For the Department of Labor provisions under Title VII, John D. Heinberg, Office of Strategic Planning and Policy Development, Employment and Training Administration, Room N-5629, Frances Perkins Building, 200 Constitution Avenue, Washington, DC 20210, telephone (202) 535-0682.

For the Department of Education voluntary CHAP provisions under Title VII, Sarah Newcombe, Office of Vocational and Adult Education, 400 Maryland Avenue, SW., Room 4428, Washington, DC 20202, telephone (202) 732-2390. (None of these telephone numbers are toll-free.)

SUPPLEMENTARY INFORMATION:

Background

On July 22, 1987, the Stewart B. McKinney Homeless Assistance Act (Pub. L. 100-77) (the Act) was signed into law. Title IV of the Act contained a number of homeless assistance and related provisions to be administered by HUD.

Subtitle A of Title IV established the requirements for the Comprehensive Homeless Assistance Plan (CHAP). On August 14, 1987, HUD published a notice in the **Federal Register** implementing the initial CHAP requirements (52 FR 30628). Under Subtitle A, HUD was prohibited from making assistance under Title IV's programs available to, or within the jurisdiction of, States, or metropolitan cities or urban counties eligible for a formula allocation under the Emergency Shelter Grants program (ESG formula cities and counties), unless the jurisdiction and a HUD-approved CHAP.

In addition, individual applications for Title IV assistance were required to include a certification that the activities proposed for assistance were consistent with the jurisdiction's approved CHAP.

The Title IV programs affected by the CHAP requirement included the Emergency Shelter Grants program under Subtitle B; the Supportive Housing Demonstration program (both Transitional and Permanent Housing components) under Subtitle C; the Supplemental Assistance for Facilities to Assist the Homeless program under Subtitle D; and the Section 8 Moderate Rehabilitation program under Subtitle E.

In addition, the CHAP was required in connection with programs administered by the Departments of Education and Labor under Title VII of the Act. Section 702 of the Act originally required the Secretary of Education to distribute funds under the Adult Education for the Homeless Programs on the basis of assessments of the homeless population made in State CHAPs. However, subsequent legislation removed this requirement and converted the program from a formula program to a discretionary program, requiring the Secretary to consider as a factor in making discretionary awards the number of homeless adults receiving literacy and basic skills training in each project. Plans to provide for the educational needs of homeless adults are submitted in each State's adult education plan submitted directly to the Secretary of Education every four years. Currently, States may continue to include State Education Agencies in their CHAP process at the State's option, although CHAP data are not required for formula purposes.

Under Section 732, States are required to describe in their CHAPs how they will coordinate job training demonstration projects for homeless individuals under Subtitle C of Title VII with other services for homeless individuals assisted under the Act.

Annual CHAP Submission Under the 1988 Amendments Act

On November 7, 1988, President Reagan signed the Stewart B. McKinney Homeless Assistance Amendments Act of 1988 (Pub. L. 100-628) (the 1988 Amendments). The 1988 Amendments revised a number of provisions of the Act, including the CHAP submission requirement which was changed from a one-time submission into an annual submission requirement.

On December 28, 1988, the Department published in the **Federal Register** a notice implementing the CHAP provisions in the 1988 Amendments Act (53 FR 52600). Under section 485 of the 1988 Amendments, HUD is required to publish by November 7, 1989 a final rule based on the December CHAP notice.

Included in the December notice was a provision informing grantees under Titles IV and VII of the Act that the next CHAPs needed to be submitted to HUD by February 13, 1989, but thereafter that CHAPs should be submitted annually by October 1. This Notice is intended to inform Titles IV and VII grantees that they need *not* submit their CHAPs to HUD by the stated October 1, 1989 deadline.

The Department is currently considering a number of revisions to the content of the CHAP which are intended to provide additional data on the extent of the homeless need, and on the development of an effective strategy to respond to that need. HUD intends to publish these requirements as proposed provisions, either in conjunction with the final CHAP rule that the Department publishes by the November 7, 1989 statutory deadline, or in a separate proposed rulemaking. (Following a notice and comment period, these revised requirements will be published in a final rule that will govern the next CHAP submissions, as described below.)

As a result, during this transition period in implementing the annual CHAP requirement, and because of the relatively brief period between the February 1989 CHAP submission and the projected October 1, 1989 submission, HUD will not require grantees to submit CHAPs by October 1. Instead, CHAPs reflecting the Department's revised content requirements should be submitted to HUD in accordance with the following schedule:

(1) Grantees that are ESG formula cities and counties should submit their CHAPs to HUD by July 15, 1990, with a CHAP information copy simultaneously forwarded to the State in which the formula city or county is located.

(2) State grantees should use the formula jurisdictions' CHAP information copies in the preparation of their own Statewide CHAPs. To provide State grantees with an adequate review period of the formula jurisdictions' CHAPs, HUD is not requiring State grantees to submit their CHAPs until August 30, 1990. At that time, State grantees should simultaneously forward CHAP information copies to each of the formula jurisdictions in their State.

HUD will continue to use the July 15 (formula communities) and August 30 (States) deadlines for all subsequent CHAP submissions.

It should be noted that the Department expects grantees to submit their annual CHAP performance reports by the May 31, 1990 deadline, and voluntarily to submit amendments to their existing CHAPs during the transition period announced in this Notice.

Authority: Sec. 485, Stewart B. McKinney Homeless Assistance Amendments Act of 1988 (Pub. L. 100-628, approved November 7, 1988); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Dated: August 17, 1989.

Audrey E. Scott,

General Deputy Assistant Secretary for Community Planning and Development.

Part IV

Department of Health and Human Services

Public Health Service

Announcement of Availability of Funds for Family Planning Service Grants; Notice

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

Announcement of Availability of Funds for Family Planning Service Grants

AGENCY: Public Health Service, HHS.

ACTION: Notice.

SUMMARY: For Fiscal Year (FY) 1990, approximately $130 million will be provided to fund family planning services grants under title X of the Public Health Service Act (42 U.S.C. 300 *et seq.*). The Office of Population Affairs is announcing the availability of approximately ⅕ of this amount for competitive grants.

OMB Catalog of Federal Domestic Assistance: 13.217.

DATE: Application due dates vary. See Supplementary Information below.

ADDRESSES: Additional information may be obtained from and completed applications should be sent to the appropriate Regional Health Administrator at the address below:

Region I (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont): DHHS/PHS Region I, John F. Kennedy Federal Building, Government Center, Room 1400, Boston, MA 02203.

Region II (New Jersey, New York, Puerto Rico, Virgin Islands): DHHS/PHS Region II, 26 Federal Plaza, Room 3337, New York, NY 10278.

Region III (Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, W. Virginia): DHHS/PHS Region III, 3535 Market Street, Philadelphia, PA 19101.

Region IV (Alabama, Florida, Georgia, Kentucky, Mississippi, N. Carolina, S. Carolina, Tennessee): DHHS/PHS Region IV, 101 Marietta Tower, Suite 1002, Atlanta, GA 30323.

Region V (Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin): DHHS/PHS Region V, 300 South Wacker Drive, 34th Floor, Chicago, IL 60606.

Region VI (Arkansas, Louisiana, New Mexico, Oklahoma, Texas): DHHS/PHS Region VI, 1200 Main Tower Building, Room 1800, Dallas, TX 75202.

Region VII (Iowa, Kansas, Missouri, Nebraska): DHHS/PHS Region VII, 601 East 12th Street, 5th Fl. W., Kansas City, MO 64106.

Region VIII (Colorado, Montana, N. Dakota, S. Dakota, Utah, Wyoming): DHHS/PHS Region VIII, 1961 Stout Street, Denver, CO 80294.

Region IX (Arizona, California, Hawaii, Nevada, Commonwealth of the Northern Mariana Islands, American Samoa, Guam, Repubic of Palau, Federated States of Micronesia, Republic of the Marshall Islands): DHHS/PHS Region IX, 50 United Nations Plaza, Room 327, San Francisco, CA 94102.

Region X (Alaska, Idaho, Oregon, Washington): DHHS/PHS Region X, Blanchard Plaza, 2201 Sixth Avenue, M/S RX–20, Seattle, WA 98121.

FOR FURTHER INFORMATION CONTACT: Grants Management Offices, Region I: Mary O'Brien–617/565–1482; Region II: Thomas Butler–212/264–4496; Region III: Richard Dovalovsky–215/596–6663; Region IV: Wayne Cutchins–404/331–2597; Region V: Lawrence Poole–312/353–8700; Region VI: Frank Cantu–214–767–3879; Region VII: Hollis Hensley–816/426–2924; Region VIII: Jerry F. Wheeler–303/844–6163; Region IX: Alan Harris–415/556/5810; Region X: J. O'Neal Adams–206/442–7997.

Program Officers, Region I: James Sliker–617/565–1452; Region II: Eileen Connolly–212/264–3939; Region III: Joe Healey–215/596–6686; Region IV: Ed Rogge–404/331–5316; Region V: George Hockenberry–312/353–1700; Region VI: Paul Smith–214/767–3072; Region VII: Will Marshall–816/426–2924; Region VIII: John J. McCarthy, Jr.–303/844–5955; Region IX: James Hauser–415/556–7117; Region X: Vivian Lee–206/442–1030.

Staff are available to answer questions and provide limited technical assistance in the preparation of grant applications.

SUPPLEMENTARY INFORMATION: Title X of the Public Health Service Act, 42 U.S.C. 300 *et seq.*, authorizes the Secretary of Health and Human Services to award grants and enter into contracts with public or private nonprofit entities to assist in the establishment and operation of voluntary family planning projects to provide a broad range of acceptable and effective family planning methods and services (including natural family planning methods, infertility services, and services for adolescents). To the extent practicable, entities shall encourage family participation. No funds may be used in programs where abortion is a method of family planning. Implementing regulations have been published at 42 CFR part 59, subpart A. At 53 FR 2922, (February 2, 1988), the Department of Health and Human Services promulgated rules revising the requirements for compliance by grantees and applicants for grants with the statutory provision relating to abortion. Since promulgation of the revised rules, suits have been filed in four jurisdictions challenging the rules, and the February 1988 rules have been enjoined by two of the jurisdictions. Consequently, portions of the regulations currently appearing at 42 CFR Part 59 Subpart A are effective at present for certain organizations and not with respect to others. Users or organizations with questions as to whether the rules issued on February 2, 1988 apply to them should contact the appropriate program officer at the telephone number listed above.

Approximately $130 million nationwide is available in funding for Title X services grants, which are normally awarded for 3 years. The entire $130 million is allocated among the 10 departmental regions, and will in turn be awarded to public and private nonprofit agencies located within the regions. Each regional office is responsible for evaluating applications, establishing priorities, and setting funding levels according to criteria in statute Part 59, Subpart A, Subsection 59.7.

This notice announces the availability of approximately $24,000,000 to provide services in 17 States. This notice includes those projects for which the application due date has not passed at the time of publication. Applications are invited for the following areas:

Area(s) to be served	Number of grants to be awarded	Approximate funding level	Application due date	Grant funding date
Region I:				
Connecticut	1	$1,170,000	9/1/89	1/1/90
Metro Boston	1	809,000	5/1/90	9/1/90
Western MA	1	527,000	12/1/89	4/1/90
Northeastern MA	1	751,000	3/1/90	7/1/90
Vermont	1	432,000	12/1/89	4/1/90
New Hampshire	1	547,000	3/1/90	7/1/90
Maine	1	861,000	3/1/90	7/1/90
Rhode Island	1	334,000	3/1/90	7/1/90

Guam	1	102,000	3/1/90	7/1/90
Region X:				
Idaho	1	558,000	3/1/90	7/1/90
Total	22	24,000,000		

Applications must be postmarked or received at the appropriate Grants Management Office no later than close of business on application due dates listed above. Private metered postmarks will not be acceptable as proof of timely mailing. Applications which are postmarked or delivered to the appropriate Grants Managements Office later than the application due date will be judged late and will not be accepted for review. Applications which do not conform to the requirements of this program announcement or do not meet the assurances for project requirements in regulation 42 CFR Part 59, Subpart A will not be accepted for review. Applicants will be so notified, and the applications will be returned.

Applicants will be evaluated on the following criteria:

(1) The number of patients and, in particular, the number of low-income patients to be served;

(2) The extent to which family planning services are needed locally;

(3) The relative need of the applicant;

(4) The capacity of the applicant to make rapid and effective use of the Federal assistance;

(5) The adequacy of the applicant's facilities and staff;

(6) The relative availability of non-Federal resources within the community to be served and the degree to which those resources are committed to the project; and

(7) The degree to which the project plan adequately provides for the requirements set forth in the Title X regulations.

Application Requirements: Application kits, including the application form, PHS 5161, and technical assistance for preparing proposals are available from the respective regional office. An application must contain: (1) A narrative description of the project and the manner in which the applicant intends to conduct it in order to carry out the requirements of the law and regulations; (2) a budget that includes an estimate of project income and costs, with justification for the amount of grant funds requested; (3) a description of the standards and qualifications that will be required for all personnel and facilities to be used by the project; and (4) such other pertinent information as may be required by the Secretary and specified by the regional office. In preparing an application, applicants should respond to all applicable regulatory requirements. (The information collections contained in this notice have been approved by the Office of Management and Budget and assigned control number 0937–0189.)

Application Review and Evaluation: Each regional office is responsible for establishing its own review process. Applications must be submitted to the appropriate regional office at the address listed above. Applications not meeting the due dates above will not be accepted for review.

Grant Awards: Grants are generally awarded for 3 years with an annual non-competitive review of a continuation application to continue support. Non-competing continuation awards are subject to the project making satisfactory progress and the availability of funds. In all cases, continuation awards require a determination by HHS that continued funding is in the best interest of the Federal Government.

Review Under Executive Order 12372: Applicants under this announcement are subject to the review requirements of Executive Order 12372, State Review applications for Federal Financial Assistance, as implemented by 45 CFR part 100. As soon as possible, the applicant should discuss the project with the State Single Point of Contact (SPOC) for each State to be served. The application kit contains the currently available listing of the SPOCs which have elected to be informed of the submission of applications. For those States not represented on the listing, further inquiries should be made by the applicant regarding the submission to the Grants Management Office of the appropriate region. State Single Point of Contact comments must be received by the regional office 30 days prior to the funding date to be considered.

When final funding decisions have been made, each applicant will be notified by letter of the outcome of their application. The official document

notifying an applicant that a project

Friday

notifying an applicant that a project application has been approved for funding is the Notice of Grant Award, which specifies to the grantee the amount of money awarded, the purposes of the grant, and terms and conditions of the grant award.

Dated: July 26, 1989.

Nabers Cabaniss,

Deputy Assistant Secretary for Population Affairs.

50 CFR Part 20

Final Migratory Bird Hunting Regulations on Certain Federal Indian Reservations and Ceded Lands; Final Rule

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

RIN 1018–AA 24

Final Migratory Bird Hunting Regulations on Certain Federal Indian Reservations and Ceded Lands

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This rule prescribes special migratory bird hunting regulations to be established for certain tribes on Federal Indian reservations, off-reservation trust lands, and ceded lands. This season begins as early as September 1.

EFFECTIVE DATE: This rule takes effect on September 1, 1989.

ADDRESSES: Comments received on the proposed special hunting regulations and tribal proposals are available for public inspection during normal business hours in Room 634—Arlington Square Building, 4401 N. Fairfax Drive, Arlington, VA. Communications regarding the documents should be addressed to: Director (FWS/MBMO), U.S. Fish and Wildlife Service, Room 634—Arlington Square, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Fant W. Martin, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Room 634—Arlington Square, Washington, DC 20240 (703–358–1773).

SUPPLEMENTARY INFORMATION: The Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755; 16 U.S.C. 703 et seq.), authorizes and directs the Secretary of the Interior, having due regard for the zones of temperature and for the distribution, abundance, economic value, breeding habits, and times and lines of flight of migratory game birds, to determine when, to what extent, and by what means such birds or any part, nest, or egg thereof may be taken, hunted, captured, killed, possessed, sold, purchased, shipped, carried, exported, or transported.

In the July 24, 1989, **Federal Register** (54 FR 30658), the U.S. Fish and Wildlife Service (hereinafter the Service) proposed special migratory bird hunting regulations for the 1989–90 hunting season for certain Indian tribes, under the guidelines described in the June 4, 1985, **Federal Register** (at 50 FR 23467). The guidelines were developed in response to tribal requests for Service recognition of their reserved hunting rights, and for some tribes, recognition of their authority to regulate hunting by both tribal members and nonmembers on their reservations. The guidelines include possibilities for: (1) on-reservation hunting by both tribal members and nonmembers, with hunting by nontribal members on some reservations to take place within Federal frameworks but on dates different from those selected by the surrounding State(s); (2) on-reservation hunting by tribal members only, outside of usual Federal frameworks for season dates and length, and for daily bag and possession limits; and (3) off-reservation hunting by tribal members on ceded lands, outside of usual framework dates and season length, with some added flexibility in daily bag and possession limits. In all cases, the regulations established under the guidelines would have to be consistent with the March 10–September 1 closed season mandated by the 1916 Migratory Bird Treaty with Canada. Tribes that desired special hunting regulations in the 1989–90 hunting season were requested in the February 27, 1989, **Federal Register** (54 FR 8221) to submit a proposal that included details on: (1) Requested season dates and other regulations to be observed; (2) harvest anticipated under the requested regulations; (3) methods that will be employed to measure or monitor harvest; (4) steps that will be taken to limit level of harvest, where it could be shown that failure to limit such harvest would impact seriously on the migratory bird resource; and (5) tribal capabilities to establish and enforce migratory bird hunting regulations. No action is required if a tribe wishes to observe the hunting regulations that are established by the State(s) in which an Indian reservation is located. The guidelines have been used successfully since the 1985–86 hunting season, and they were made final beginning with the 1988–89 hunting season.

In the July 24, 1989, proposed rule, the Service pointed out that duck hunting regulations for the upcoming season likely would be restrictive in the 1989–90 hunting season because of a reduced fall flight caused by drought. Hunting regulations also were restrictive last year for the same reason. Recently completed surveys on the breeding ground have confirmed that there has been little improvement in duck population status since 1988. Although duck hunting regulations have not been established yet for the late season, they can be expected to be restrictive again during the 1989–90 hunting season.

Comments and Issues Concerning Tribal Proposals

Great Lakes Indian Fish and Wildlife Commission, Odanah, Wisconsin

In a June 30, 1989 letter, Mr. C.D. Besadny, Secretary, Wisconsin Department of Natural Resources, raised a number of concerns regarding the regulations requested by the Great Lakes Indian Fish and Wildlife Commission for hunting of migratory birds by Chippewa Indians on ceded lands in Wisconsin. Mr. Besadny had no objections to the requested goose hunting regulations. However, he asked that the tribes delay the duck season one week (from September 18 to September 25) because of the decline in duck numbers caused by drought, that tribal members observe the same shooting hours that will be established throughout the Mississippi Flyway, and that the opening dates for hunting of migratory game birds other than ducks and geese be concurrent with the opening of the tribal duck season. Mr. Besadny also asked that the tribes retain the 48-hour emergency closure rule that was included in the past because of concern over possible displacement of waterfowl caused by the early season.

In the July 24, 1989, **Federal Register** (54 FR 30658), the Service pointed out that preliminary survey results indicated little improvement since 1988 in duck numbers or breeding ground conditions, and that it was likely that it would be necessary to establish conservative hunting regulations again for the 1989–90 hunting season. As noted earlier in this document, completed surveys have confirmed that no increase in the fall flight is expected this year, and continued harvest restrictions will be necessary. Last year, the different Chippewa Indian Tribes opened the duck season later than usual as a means of reducing the harvest. They have agreed to delay the season again this year, and it will open on September 25, rather than on September 18, as was proposed earlier in the July 24, 1989, proposed rule (54 FR 30658). Season dates for geese and woodcock will begin on the dates shown in the July 24, 1989, proposed rule. Seasons on other species will be concurrent with the early duck season for tribal members. Daily bag and possession limits for Canada geese on ceded lands in Michigan, Minnesota, and Wisconsin will be 4 and 8, respectively, rather than 3 and 6, respectively, as shown in the July 24, 1989, proposed rule. The increase in Canada goose bag and possession limits is authorized for tribal members

because of an anticipated substantial increase in the fall flight in Michigan and Wisconsin, where virtually all of the tribal harvest occurs.

The tribes will observe the same shooting hour regulations that will be established for States in the flyway, under final Federal frameworks to be announced. The Service does not believe that the small number of tribal hunters in the early season will have adverse effects on the population status of migratory game birds or cause a major change in their distribution. However, in an emergency, the Great Lakes Indian Fish and Wildlife Commission will exercise its authority to close the season under provisions in the Chippewa Inter-tribal Agreement Governing Resource Management and Regulation of Off-reservation Treaty Rights in the Ceded Territory.

As discussed in the July 24, 1989, proposed rule, the Michigan Department of Natural Resources concurred with the proposed regulations for hunting by tribal members in the State's Upper Peninsula. However, Minnesota continues to oppose special regulations for hunting by Chippewa Indians on ceded lands in the State. The Service recognizes Minnesota's concerns, but for the reasons discussed in the July 24, 1989, proposed rule, believes that continued carefully regulated seasons for Chippewa Tribal members are appropriate in Minnesota, as well as in Michigan, and Wisconsin. Therefore, special regulations for the 1989–90 hunting season are made final in this rule. The regulations take into account the need to continue the reduced harvest of ducks, and as in the past, the Great Lakes Indian Fish and Wildlife Commission will conduct a survey to monitor harvest by tribal members.

Confederated Salish and Kootenai Tribes, Flathead Indian Reservation, Pablo, Montana

As discussed in the July 24, 1989, proposed rule, the Confederated Salish and Kootenai Tribes and the State of Montana are continuing to work toward a comprehensive and long-term agreement. There is no disagreement over the migratory bird hunting regulations requested by the tribes, however, and they are made final in this rule. In the past, the final rule for the Flathead Indian Reservation provided for an early closure of goose hunting on a portion of the reservation. Any such closure or other restrictions on migratory bird hunting on the reservation for the 1989–90 hunting season may be established at a later date under tribal and State authority.

Yankton Sioux Tribe, Marty, South Dakota

In the July 24, 1989, proposed rule, the Service proposed special Canada goose and White-fronted goose hunting regulations for both tribal and nontribal members on tribal and trust lands of the Yankton Sioux Tribe. In the past, nontribal members hunting on tribal and trust lands observed the regulations established by the South Dakota Game, Fish, and Parks Department. However, in a May 22, 1989 proposal, the Yankton Sioux Tribe requested a later season for Canada geese than is usually established by the State in the Missouri River unit. The later season was requested because of the delayed arrival of geese onto Indian lands. The tribe requested that the Service approve the same season dates for duck hunting on tribal and trust lands that will be established in surrounding areas by the State for the 1989–90 hunting season.

In an August 8, 1989, letter, John P. Guhin, Deputy Attorney General, State of South Dakota, raised a number of concerns about the proposed hunting regulations. Some of these concerns also were raised in an earlier telephone conversation in which the Service pointed out that the tribe would revise the proposal to make it complete. In his letter, Mr. Guhin stated that the description of the tribal proposal in the July 24, 1989, proposed rule was cursory, that the proposal was amended through a telephone conversation with the Service, and that the State should not be expected to comment on the proposal until it is complete. Mr. Guhin requested that the proposal be withdrawn and submitted again to South Dakota for comment when a complete proposal is available. Mr. Guhin concluded that it is the view of the State that the tribe has no jurisdiction to allow a nonmember to hunt outside of the seasons prescribed by South Dakota and that the State therefore objects to the proposed regulations. In his letter, Mr. Guhin stated that the State has no objection to tribal members hunting on their lands in a season other than that adopted by the State. He pointed out further that the State also has no objection to a tribal requirement of a nonmember license if the nonmember also has a State license, and the nonmember hunts during the State prescribed season and abides otherwise by State requirements.

In response, the Service acknowledges that the tribal proposal is incomplete in some respects and that steps will soon be taken to make it complete. Specifically, the Service intends to meet promptly with tribal officials to ensure that the area where hunting will occur is well-defined, that it includes only tribal and trust lands, and that bag checks or other procedures are followed to ensure that the species composition and size of harvest is measured during the 1989–90 hunting season. The Service will request that a State representative participate in the meeting.

As stated in the July 24, 1989, proposed rule, the Service believes that Indian tribes generally have the authority to regulate migratory bird hunting on tribal and trust lands, and that tribes are entitled to establish special migratory bird hunting regulations for nontribal members, subject to Service approval. The Service will not approve special regulations if they are likely to result in excessive harvest. The Service does not believe that there will be a large goose harvest on Yankton Sioux lands but will require that the 1989–90 hunting season is experimental, pending the collection and evaluation of harvest information. The Service believes that prompt consultation will rectify the omissions in the tribe's May 22, 1989, proposal and the special regulations requested by the tribe are made final in this rule.

NEPA Consideration

The "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES–75–74)" was filed with the Council on Environmental Quality on June 6, 1975, and notice of availability was published in the **Federal Register** on June 13, 1975, (40 FR 25241). A supplement to the final environmental statement "Final Supplemental Environmental Impact Statement: Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (SEIS 88–14)" was filed on June 9, 1988, and notice of availability was published in the **Federal Register** on June 16, 1988, (53 FR 22582) and June 17, 1988, (53 FR 22727). In addition, an August 1985 environmental assessment entitled "Guidelines for Migratory Bird Hunting Regulations on Federal Indian Reservations and Ceded Lands" is available from the Service.

Nontoxic Shot Regulations

On November 9, 1988, (at 53 FR 45296), the Service proposed nontoxic shot zones for the 1989–90 waterfowl hunting season. This proposed rule was sent to all affected tribes and to Indian organizations for comment. The final rule on nontoxic shot zones for the 1989–90 hunting season was published on April 13, 1989, in the **Federal Register** (54 FR 14814). All of the hunting regulations

BEST COPY AVAILABLE

covered by this final rule are in compliance with the Service's nontoxic shot restrictions.

Endangered Species Act Consideration

Section 7 of the Endangered Species Act provides that, "The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act" (and shall) "insure that any action authorized, funded, or carried out * * * is not likely to jeopardize the continued existence of any endangered species or threatened species, or result in the destruction or adverse modification of [critical] habitat * * *." Consequently, the Service initiated Section 7 consultation under the Endangered Species Act for the proposed hunting season on Federal Indian reservations and ceded lands.

On August 3, 1989, the Division of Endangered Species and Habitat Conservation notified the Office of Migratory Bird Management of its concurrence with the finding that the proposed action will not affect any listed species or any critical habitat.

Regulatory Flexibility Act, Executive Order 12291, and the Paperwork Reduction Act

In the March 27, 1989, Federal Register (54 FR 12534), the Service reported measures it had undertaken to comply with requirements of the Regulatory Flexibility Act and the Executive Order. These included preparing a Determination of Effects and an updated Final Regulatory Impact Analysis, and publication of a summary of the latter. These regulations have been determined to be major under Excutive Order 12291, and they have a significant economic impact on substantial numbers of small entities under the Regulatory Flexibility Act. This determination is detailed in the aforementioned documents which are available on request from the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Room 634—Arlington Square, Washington, DC 20240. These regulations contain no collection of information subject to Office of Management and Budget review under the Paperwork Reduction Act of 1980.

Memorandum of Law

The Service published its Memorandum of Law, required by Section 4 of Executive Order 12291, in the Federal Register on August 11, 1989, (54 FR 32975).

Authorship

The primary author of this final rule is Fant W. Martin, Office of Migratory Bird Management, working under the direction of Byron K. Williams, Acting Chief.

Regulations Promulgation

The rulemaking process for migratory bird hunting must, by its nature, operate under severe time constraints. However, the Service is of the view that every attempt should be made to give the public the greatest possible opportunity to comment on the regulations. Thus, when the proposed hunting regulations for certain tribes were published on July 24, 1989, the Service established the longest period possible for public comments. In doing this, the Service recognized that time would be of the essence. The comment period provided the maximum amount of time possible while ensuring that a final rule was published before the beginning of the hunting season on September 1, 1989.

Therefore, under the authority of the Migratory Bird Treaty Act of July 3, 1918, as amended (40 Stat. 755; 16 U.S.C. 703 et seq.), the Service prescribes final hunting regulations for certain tribes on Federal Indian reservations (including off-reservation trust lands), and ceded lands. The regulations specify the species to be hunted and establish season dates, bag and possession limits, season length, and shooting hours for migratory game birds other than waterfowl. However, final Federal frameworks for the waterfowl hunting season (opening and closing framework dates, daily bag and possession limits, etc.) are planned for publication on September 18, 1989. Because it was necessary to publish this document by September 1, 1989, most waterfowl regulations for the tribes listed here are shown as "within final Federal frameworks to be established."

Therefore, for the reasons set out above, the Service finds that "good cause" exists, within the terms of 5 U.S.C. 553(d)(3) of the Administrative Procedure Act, and this final rule, therefore, will take effect on September 1, 1989.

List of Subjects in 50 CFR Part 20

Exports, Hunting, Imports, Transportation, Wildlife.

Accordingly, 50 CFR part 20 is amended as follows:

For the reasons set out in the preamble, title 50, chapter I, subchapter B, part 20, subpart K, is amended as set forth below.

PART 20—[AMENDED]

1. The authority citation for part 20 continues to read as follows:

Authority: Migratory Bird Treaty Act sec. 3, Pub. L. 65-186, 40 Stat. 755 (16 U.S.C. 701-708h); sec. 3(h), Pub. L. 95-616, 92 Stat. 3112 (16 U.S.C. 712).

Editorial Note.—The following annual hunting regulations provided for by § 20.110 of 50 CFR part 20 will not appear in the Code of Federal Regulations because of their seasonal nature.

2. Section 20.110 is revised to read as follows:

§ 20.110 Seasons, limits, and other regulations for certain Federal Indian reservations, Indian Territory, and ceded lands.

(a) *Jicarilla Indian Reservation, Dulce, New Mexico (Tribal Members and Nonmembers).*—(1) *Ducks (including Mergansers). Season Dates:* Earliest opening date and longest season permitted Pacific Flyway States under final Federal frameworks to be announced. *Daily bag and possession limits:* Same as permitted Pacific Flyway States under final Federal frameworks to be announced.

(2) *Goose Season Closed on All Species.*

(3) *General Conditions:* Tribal and nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR part 20 regarding shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or over must carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (duck stamp) signed in ink across the face. Special regulations established by the Jicarilla Apache Tribe also apply on the reservation.

(b) *Navajo Indian Reservation, Window Rock, Arizona (Tribal Members and Nonmembers).*—(1) *Ducks (including Mergansers). Season Dates:* Earliest opening date and longest season permitted Pacific Flyway States under final Federal frameworks to be announced. *Daily Bag and Possession Limits:* Same as permitted Pacific Flyway States under final Federal frameworks to be announced.

(2) *Canada Geese (Season closed on other geese). Season Dates:* December 16–January 7. *Daily Bag and Possession Limits:* 2 daily. Possession limit 4.

(3) *Coots and Common Moorhens (Gallinule). Season Dates:* Same as for ducks. *Daily Bag and Possession Limits:* Same as permitted Pacific Flyway States under final Federal frameworks to be announced.

(4) *Common Snipe. Season Dates:* Same as for ducks. *Daily Bag and Possession Limits:* 8 daily. Possession limit 16.

(5) *Band-tailed Pigeons. Season Dates:* September 1–September 30. *Daily Bag and Possession Limits:* 5 daily. Possession limit 10.

(6) *Mourning Doves and White-winged Doves. Season Dates:* September 1–September 30. *Daily Bag and Possession Limits:* 10 mourning and white-wing doves daily in the aggregate, of which no more than 6 may be white-winged doves. Possession limit is 20 mourning and white-winged doves in the aggregate, of which no more than 2 may be white-winged doves.

(7) *General Conditions:* Tribal and nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR part 20 regarding shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or over must carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (duck stamp) signed in ink across the face. Special regulations established by the Navajo Nation also apply on the reservation.

(c) *Fort Hall Indian Reservation, Fort Hall, Idaho (Nontribal Members Only)*—(1) *Ducks (including Mergansers). Season Length and Dates:* Begin continuous season on October 14, with longer season permitted Pacific Flyway States under final Federal frameworks to be announced. *Daily Bag and Possession Limits:* Same as permitted Pacific Flyway States under final Federal frameworks to be announced.

(2) *Geese (Canada, Blue, Snow, White-fronted). Season Length and Dates:* Begin continuous season on October 14, with longest season permitted Idaho under final Federal frameworks to be announced. *Daily Bag and Possession Limits:* Same as permitted Idaho under final Federal frameworks to be announced.

(3) *Common Snipe. Season Length and Dates:* Same as for ducks. *Daily Bag and Possession Limits:* 8 daily. Possession limit 16.

(4) *General Conditions:* Nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR part 20 regarding shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or over must carry on his/her person a valid Migratory Bird Hunting and Conservation State (duck stamp) signed in ink across the face. Special regulations established by the Shoshone-Bannock Tribes also apply on the reservation.

(d) *Fort Apache Indian Reservation, Whiteriver, Arizona (Tribal Members and Nonmembers)*—(1) *Ducks (including Mergansers). Season Length and Dates:* Latest closing date and longest season permitted Pacific Flyway States under final Federal frameworks to be announced. *Daily Bag and Possession Limits:* Same as permitted Pacific Flyway States under final Federal frameworks to be announced.

(2) *Geese (Canada, Blue, Snow, White-fronted). Season Length and Dates:* Latest closing date and longest season permitted Arizona under final Federal frameworks to be announced. *Daily Bag and Possession Limits:* Same as permitted Arizona under final Federal frameworks to be announced.

(3) *Coots and Common Moorhens (Gallinule). Season Dates:* Same as for ducks. *Daily Bag and Possession Limits:* Same as permitted Pacific Flyway States under final Federal frameworks to be announced.

(4) *Common Snipe. Season Length and Dates:* Same as for ducks. *Daily Bag and Possession Limits:* 8 daily. Possession limit 16.

(5) *Mourning Doves and White-winged Doves. Season Length and Dates:* ½ hour before sunrise until noon, September 1–10; ½ hour before sunrise until sunset, November 24–January 12. *Daily Bag and Possession Limits:* 10 mourning and white-winged doves daily in the aggregate, of which no more than 6 may be white-winged doves. Possession limit is 20 mourning and white-winged doves in the aggregate, of which no more than 12 may be white-winged doves.

(6) *Band-tailed Pigeons. Season Dates:* October 13–November 11. *Daily Bag and Possession Limits:* 5 daily. Possession limit 10.

(7) *General Conditions:* Tribal and nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR part 20 regarding shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or over must carry on his/her person a valid Migratory Bird Hunting and Conservation State (duck stamp) signed in ink across the face. Special regulations established by the White Mountain Apache Tribe also apply on the reservation.

(e) *Colorado River Indian Reservation, Parker, Arizona (Tribal Members and Nonmembers)*—(1) *Ducks (including Mergansers). Season Length and Dates:* Same as Colorado River Zone in California. *Daily Bag and Possession Limits:* Same as Colorado River Zone in California.

(2) *Geese (Canada, Blue, Snow, White-fronted). Season Length and Dates:* Same as Colorado River Zone in California. *Daily Bag and Possession Limits:* Same as Colorado River Zone in California.

(3) *Coots and Common Moorhens (Gallinule). Season Dates:* Same as for ducks in Colorado River Zone in California. *Daily Bag and Possession Limits:* Same as Colorado River Zone in California.

(4) *Common Snipe. Season Length and Dates:* Same as for ducks in Colorado River Zone in California. *Daily Bag and Possession Limits:* 8 daily. Possession limit 16.

(5) *Mourning Doves and White-winged Doves. Season Length and Dates:* September 1–15 and November 11–December 25. *Daily Bag and Possession Limits:* 10 mourning and white-winged doves, singly or in the aggregate. Possession limit is 20, singly or in the aggregate.

(6) *General Conditions:* Tribal and nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR part 20 regarding shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or over must carry on his/her person a valid Migratory Bird Hunting and Conservation State (duck stamp) signed in ink across the face. Special regulations established by the Colorado River Indian Tribes also apply on the reservation.

(f) *Penobscot Indian Nation, Old Town, Maine (Tribal Members and Nonmembers)*—(1) *Ducks:* Same species, season dates, season length, and daily bag and possession limits as regular duck season in Maine.

(2) *Geese:* Same species, season dates, season length, and daily bag possession limits as regular goose season in Maine.

(3) *General Conditions:* (i) Tribal members may hunt waterfowl (ducks and geese) on Penobscot Indian Territory under special sustenance regulations during the 1989–90 hunting season. Sustenance season dates are September 16–November 30. The daily bag limit in the sustenance season is 4 ducks, including no more than 1 black duck and 2 wood ducks. The daily bag limit for geese is 3 Canada geese, 3 snow geese, or 3 in the aggregate. When the sustenance and Maine's general waterfowl season overlap, the daily bag limit for tribal members is only the larger of the two daily bag limits.

(ii) Possession limits on ducks and geese during the tribal sustenance season are applicable only to transportation and do not include birds which are cleaned, dressed, and at a member's residence.

(iii) Tribal members shall comply with all basic Federal migratory bird hunting regulations in 50 CFR part 20 regarding shooting hours and manner of taking, except during the sustenance season, tribal members shall be permitted to

hunt one-half hour before sunrise to one-half hour after sunset.

(iv) Each tribal and nontribal waterfowl hunter 16 years of age or over must possess and carry on his/her person a valid Migratory Bird Stamp and Conservation Stamp (duck stamp), signed in ink across the face.

(v) Nontribal members hunting waterfowl on Penobscot Indian Territory shall comply with all Federal and State hunting regulations. Special regulations established by the Penobscot Indian Nation also apply on Penobscot Indian Territory.

(g) *Great Lakes Indian Fish and Wildlife Commission, Odanah, Wisconsin (Tribal Members Only)*—(1) *Ducks (including Mergansers). Wisconsin and Minnesota Zones: Season Dates:* Begin September 25. End with closure of Wisconsin Northern Zone duck season. *Daily Bag and Possession Limits:* Same as permitted Wisconsin under final Federal frameworks to be announced.

Michigan Zone: Same dates, season length, and daily bag and possession limits permitted Michigan under final Federal frameworks to be announced.

(2) *Canada Geese. Wisconsin and Minnesota Zones: Season Dates:* Begin September 18. End with closure of Wisconsin Northern Zone duck season. *Daily Bag and Possession Limits:* 4 daily. Possession limit 8.

Michigan Zone: Season Dates: Same opening date and season length permitted Michigan under final Federal frameworks to be announced. *Daily Bag and Possession Limits:* 4 daily. Possession limit 8.

(3) *Other Geese (Blue, Snow, and White-fronted). Wisconsin and Minnesota Zones: Season Dates:* Begin September 18. End with closure of Wisconsin Northern Zone duck season. *Daily Bag and Possession Limits:* Same as permitted Wisconsin under final Federal frameworks to be announced.

Michigan Zone: Same dates, season length, and daily bag and possession limits permitted Michigan under final frameworks to be announced.

(4) *Coots and Common Moorhens (Gallinule). Wisconsin and Minnesota Zones: Season Dates:* Begin September 25. End with closure of Wisconsin Northern Zone duck season. *Daily Bag and Possession Limits:* 20 daily, singly or in the aggregate. Possession limit 40.

Michigan Zone: Same dates, season length, and daily bag and possession limits permitted Michigan under final Federl frameworks to be announced.

(5) *Sora and Virginia Rails. Wisconsin and Minnesota Zones: Season Dates:* Begin September 25. End with closure of Wisconsin Northern Zone duck season. *Daily Bag and Possession Limits:* 25 daily, singly or in the aggregate. Possession limit 25.

Michigan Zone: Same dates, season length, and daily bag and possession limits permitted Michigan under final Federal frameworks to be announced.

(6) *Common Snipe: Wisconsin and Minnesota Zones: Season Dates:* Begin September 25. End with closure of Wisconsin Northern Zone duck season. *Daily Bag and Possession Limits:* 8 daily. Possession limit 16.

Michigan Zone: Same dates, season length, and daily bag and possession limits permitted Michigan under final Federal frameworks to be announced.

(7) *Woodcock. Wisconsin and Minnesota Zones: Season Dates:* September 16–November 20. *Daily Bag and Possession Limits:* 5 daily. Possession limit 10.

Michigan Zone: Season Dates: September 15–November 14. *Daily Bag and Possession Limits:* 5 daily. Possession limit 10.

(8) *General Conditions:* (i) While hunting waterfowl, a tribal member must carry on his/her person a valid tribal waterfowl hunting permit.

(ii) Tribal members will comply with all basic Federal migratory bird hunting regulations, 50 CFR part 20, and shooting hour regulations, 50 CFR part 20, subpart K.

(iii) Nontoxic shot will be required for all off-reservation hunting by tribal members of waterfowl, coots, moorhens, and gallinules.

(iv) Tribal members in each zone will comply with State regulations providing for closed and restricted waterfowl hunting areas.

(v) *Wisconsin Zone.* Tribal members will comply with NR 10.09 (1)(a) (2) and (3), Wis. Adm. Code (shotshells), sec. NR 10.12 (1) (C), Wis. Adm. Code (shooting from structures), sec. NR 10.12 (1) (g), Wis. Adm. Code (decoys), and § 29.27 Wis. Stats. (duck blinds). The Canada goose season at Powell Marsh will begin on September 18. A tribal quota of 25 Canada geese will be in effect until September 25, or until daily censuses by Great Lakes Indian Fish and Wildlife Commission or Wisconsin Department of Natural Resources employees indicate that at least 300 Canada geese are in the area, whichever comes first. If the tribal quota is reached before September 25, and before 300 Canada geese are present, Powell Marsh will be closed to tribal hunting until September 25. Thereafter, the tribal season will resume without a quota and with a daily bag limit of 3 Canada geese.

(vi) *Minnesota Zone.* Tribal members will comply with M.S. 100.29, Subd. 18 (duck blinds and decoys). (vii) Possession limits are applicable only to transportation and do not include birds which are cleaned, dressed, and at a member's primary residence. For purposes of enforcing bag and possession limits, all migratory birds in the possession or custody of tribal members on ceded lands will be considered to have been taken on those lands unless tagged by a tribal or State conservation warden as having been taken on-reservation. In Wisconsin, such tagging will comply with sec. NR 19.12, Wis. Adm. Code. All migratory birds which fall on reservation lands will not count as part of any off-reservation bag or possession limit.

(h) *Flathead Indian Reservation, Pablo, Montana (Nontribal Members Only).*—(1) *Ducks (including Mergansers:* Same species, season dates, season length, and daily bag and possession limits as permitted Pacific Flyway portion of Montana under final Federal frameworks to be announced.

(2) *Geese:* Same species, season dates, season length, and daily bag and possession limits as permitted Pacific Flyway portion of Montana under final Federal frameworks to be announced.

(3) *General Conditions:* Nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR part 20 regarding shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or over must carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (duck stamp), signed in ink across the face. Special regulations established by the Confederated Salish and Kootenai Tribes also may apply on the reservation.

(i) *Crow Creek Indian Reservation, Fort Thompson, South Dakota (Tribal Members and Nonmembers)*—(1) *Ducks. Season Dates:* Begin October 21, 1989, with longest season permitted Low Plains portion of South Dakota under final Federal frameworks to be announced. *Daily Bag and Possession Limits:* Same as permitted Low Plains portion of South Dakota under final Federal frameworks to be announced.

(2) *Geese:* Same species, season dates, season lengths, and daily bag and possession limits as established by South Dakota in the Missouri River Unit under final Federal frameworks to be announced.

(3) *General Conditions:* The waterfowl hunting regulations established by this final rule apply only to designated tribal and trust lands within the external boundaries of the reservation. Tribal and nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR part 20 regarding shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or over must carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (duck stamp) signed in ink across the face. Special regulations established by the Crow Creek Sioux Tribe also apply on the reservation.

(j) *Yankton Sioux Tribe, Marty, South Dakota (Tribal Members and Nonmembers)*—(1) *Ducks:* Same species, season dates, season length, and daily bag and possession limits as established by South Dakota in the Low Plains Area under final Federal frameworks to be announced.

(2) *Canada and White-fronted Geese:* Begin October 21, 1989, with longest season permitted South Dakota in Missouri River Unit under final Federal frameworks to be announced. *Daily Bag and Possession Limits:* Same as permitted South Dakota in Missouri River Unit under final Fedeal frameworks to be announced.

(3) *Other Geese* (Blue and Snow): Same season dates, season length, and daily bag and possession limits as established by South Dakota under final Federal frameworks to be announced.

(4) *General Conditions:* The waterfowl hunting regulations established by this final rule apply only to designated tribal and trust lands. Tribal and nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR part 20 regarding shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or over must carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (duck stamp) signed in ink across the face. Special regulations established by the Yankton Sioux Tribe also apply on tribal and trust lands.

Dated: August 22, 1989.

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last List August 22, 1989

Public Laws

---

are now available for the 101st Congress, 1st Session, 1989

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 101st Congress, 1st Session, 1989.

(Individual laws also may be purchased from the Superintendent of Documents, Washington, DC 20402-9328. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws and prices).

Federal Register

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 54 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Rules and Regulations

Federal Register
Vol. 54, No. 165
Monday, August 28, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 911

[Docket No. FV-89-047FR]

Limes Grown in Florida; Expenditure and Assessment Rate Increases for the 1989-90 Fiscal Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule increases the authorized expenditures and assessment rate for the 1989-90 fiscal year for the Florida Lime Administrative Committee (committee), established under Marketing Order No. 911. This rule increases authorized expenditures to $278,000 from $233,000, and the assessment rate to $0.18 from $0.15 per bushel (55 pounds) of assessable limes. These increases are needed by the committee to pay additional anticipated marketing order expenses and to collect additional assessments from handlers to pay those expenses.

EFFECTIVE DATE: April 1, 1989, through March 31, 1990.

FOR FURTHER INFORMATION CONTACT: Gary D. Rasmussen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, DC 20090-6456; telephone: (202) 475-3918.

SUPPLEMENTARY INFORMATION:

This final rule is issued under Marketing Agreement and Marketing Order No. 911, both as amended (7 CFR part 911), regulating the handling of limes grown in Florida. This agreement and order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are about 28 handlers subject to regulation under the marketing order for limes grown in Florida and about 230 lime growers in Florida. Small agricultural growers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of these handlers and growers may be classified as small entities.

The Florida lime marketing order administered by the U.S. Department of Agriculture (Department) requires that the assessment rate for a particular fiscal year shall apply to all of the assessable commodity handled from the beginning of such year. An annual budget of expenses is prepared by the committee and submitted to the Department for approval. The members of the committee are handlers and growers of Florida limes. They are familiar with the committee's needs and with the costs for goods, services, and personnel in their local area and are thus in a position to formulate an appropriate budget. The budget is formulated and discussed in public meetings. Thus, all directly affected persons have an opportunity to participate and provide input.

The assessment rate recommended by the committee is derived by dividing anticipated expenses by the expected shipments of limes in bushels (55 pounds). Because that rate is applied to actual shipments, it must be established at a rate which will produce sufficient income to pay the committee's expected expenses. The recommended budget and rate of assessment are usually acted upon by the committee shortly before a season starts, or during the season when changes are needed, and expenses are incurred on a continuous basis. Therefore, budget and assessment rate approvals must be expedited so that the committee will have funds to pay its expenses.

The committee met on April 12, 1989, and unanimously recommended increasing 1989-90 budgeted expenditures from $233,000 to $278,000 and the assessment rate from $0.15 to $0.18 per bushel (55 pounds) of assessable limes shipped. The "marketing" item in the 1989-90 budget is increased from $25,000 to $70,000 to fund additional market promotion. The committee plans to develop and submit for approval its market promotion projects later in the season. The current expenditure level and assessment rate was authorized by a final rule signed on April 12, 1989, and published in the **Federal Register** (54 FR 15168, April 17, 1989), based on a January 11, 1989, unanimous recommendation of the committee.

Based on shipments of 1,500,000 bushels of assessable limes and an $0.18 assessment rate, committee assessment income for 1989-90 is estimated at $270,000. Interest income continues to be estimated at $8,000.

The committee also unanimously recommended that excess 1988-89 assessments of about $12,000 be refunded to handlers, as provided in § 911.42, rather than be placed in its reserve as it recommended on January 11, 1989. The committee's reserve currently contains about $156,000, an amount well within the maximum authorized under the order.

While this action will impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to growers. However, these costs would be significantly offset by the benefits derived from the operation of the marketing order. Therefore, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

This action amends § 911.228 and is based on the committee's recommendations and other information. A proposed rule concerning this action was published in the **Federal Register** (54 FR 31843, August 2, 1989). Comments on the proposed rule were invited from interested persons until August 14, 1989. No comments were received.

After consideration of the information and recommendations submitted by the committee and other available information, it is found that this final rule will tend to effectuate the declared policy of the Act.

This final rule should be expedited because the committee needs sufficient funds to pay its increased expenses, which are incurred on a continuous basis. In addition, handlers are aware of the action, which was recommended by the committee at public meetings. Therefore, it is found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** (5 U.S.C. 553).

List of Subjects in 7 CFR Part 911

Florida, limes, Marketing agreements and orders.

For the reasons set forth in the preamble, 7 CFR part 911 is amended as follows:

PART 911—LIMES GROWN IN FLORIDA

1. The authority citation for 7 CFR part 911 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 911.228 is amended to read as follows:

Note: This section will not appear in the Code of Federal Regulations.

§ 911.228 Expenses and assessment rate.

Expenses of $278,000 by the Florida Lime Administrative Committee are authorized and an assessment rate of $0.18 per bushel (55 pounds) of assessable limes is established for the fiscal year ending on March 31, 1990. Excess funds from the 1988–89 fiscal year may be refunded to handlers from whom collected.

Dated: August 23, 1989.

William J. Doyle,

Acting Deputy Director, Fruit and Vegetable Division.

[FR Doc. 89–20220 Filed 8–25–89; 8:45 am]

NUCLEAR REGULATORY COMMISSION

10 CFR Part 2

RIN 3150–AC22 and 3150–AA05

Rules of Practice for Domestic Licensing Proceedings—Procedural Changes in the Hearing Process; Correction

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule appearing in the **Federal Register** on August 11, 1989 (54 FR 33168), that improves the hearing process with due regard for the rights of the parties. This action is necessary to correct the text of a footnote.

EFFECTIVE DATE: September 11, 1989.

FOR FURTHER INFORMATION CONTACT: Stuart A. Treby, Assistant General Counsel, Rulemaking and Fuel Cycle Division, Offices of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555; Telephone 492–1636.

SUPPLEMENTARY INFORMATION: On Page 33171, footnote number 2 is corrected to read as follows:

[2] The Commission recognizes that in some cases the applicant's and the NRC staff's position on a particular issue will be similar. Although under these rules the contention must be framed to disagree with the applicant's position, an intervenor's evidentiary presentation in such cases at the hearing may be directed towards both the staff and the applicant to the extent required for a consistent litigation strategy.

Dated at Bethesda, Maryland, this 22nd day of August 1989.

For the Nuclear Regulatory Commission.

Donnie H. Grimsley,

Director, Division of Freedom of Information and Publications Services, Office of Administration.

12 CFR Part 571

Investment Portfolio Policy and Accounting Guidelines

Date: August 21, 1989.

AGENCY: Office of Thrift Supervision, Treasury.

ACTION: Final statement of policy; delay of effective date.

SUMMARY: The Office of Thrift Supervision (the "Office") is hereby delaying the effective date of its final statement of policy on investment portfolio policy and accounting guidelines in order to allow time for a consistent policy in this area to be developed by the Federal banking agencies, including the Office, pursuant to the mandate of Title XII, section 1215, of the Financial Institutions Reform, Recovery and Enforcement Act of 1989, Pub. L. 101–73, 103 Stat. 183 ("FIRREA").

EFFECTIVE DATE: August 28, 1989. Pre-existing GAAP requirements remain unaffected by this Statement of Policy. Savings associations must comply with the documentation requirements of an investment policy and strategies and board of director reviews on January 1, 1990.

FOR FURTHER INFORMATION CONTACT: Joe A. Hargett, Professional Accounting Fellow, (202) 331–4583, David H. Martens, Chief Accountant, (202) 331–4579, Douglas P. Foster, Chief Accountant, Corporate and Securities Division, (202) 906–7503, Gary Jeffers, Staff Attorney, Corporate and Securities Division, (202) 906–6457, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION: The Office is delaying the effective date of its final statement of policy on investment portfolio policy and accounting guidelines, published at 54 FR 23457 (June 1, 1989), to be codified at 12 CFR 571.19, from August 30, 1989, until January 1, 1990. The Office has requested the Federal Financial Institutions Examination Council ("FFIEC") to convene a task force to develop a joint Statement of Policy that clarifies Generally Accepted Accounting Principles for investment portfolios of financial institutions. The Office believes that FFIEC participation will ensure that consistent accounting standards are applied to all insured financial institutions in this crucial area. The Office believes that the mandate contained in section 1215 of the recently enacted FIRREA that "each appropriate Federal banking agency shall establish uniform accounting standards to be used for determining the capital ratios of all federally insured depository institutions and for other regulatory purposes" will be best served by these actions.

Pre-existing GAAP requirements remain unaffected by the delay in implementation of this Statement of Policy. The Office will continue to

aggressively pursue its efforts to ensure fair and consistent application of generally accepted accounting principles and to identify and prohibit abusive accounting practices. Savings associations must comply with the documentation requirements of an investment policy and strategies and board of director reviews on January 1, 1990.

List of Subjects in 12 CFR Part 571

Accounting, Bank deposit insurance, Reporting and recordkeeping requirements, Savings and loan associations, Securities.

Accordingly, the Office hereby amends chapter V of title 12, Code of Federal Regulations, as set forth below.

1. The heading for Chapter V is revised to read as follows:

CHAPTER V—OFFICE OF THRIFT SUPERVISION, DEPARTMENT OF THE TREASURY

PART 571—[AMENDED]

2. The authority citation for part 571 is revised to read as follows:

Authority: Sec. 3, as added by sec. 301, 103 Stat. 278 (12 U.S.C. 1462a); sec. 4, as added by sec. 301, 103 Stat. 280 (12 U.S.C. 1463); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464).

§ 571.19 [Amended]

3. Amend paragraph (e) of § 571.19 by changing "August 30, 1989" to "January 1, 1990".

Darrel W. Dochow,

Acting Director, Office of Thrift Supervision.

[FR Doc. 89–20173 Filed 8–25–89; 8:45 am]

BILLING CODE 6720–01–M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 120

RIN 3245–AB92

Business Loans

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: Public Law 100–590, enacted November 3, 1988, amended the *alter ego* rule for development companies so that complete identity of ownership interests would not be required if certain listed family members were owners of the operating business and the so-called *alter ego*, the real estate holding company. This final rule promulgates an identical change in the regulations for *alter ego* loan guarantees made under section 7(a) of the Small Business Act (15 U.S.C. 636(a)).

DATE: August 28, 1989.

FOR FURTHER INFORMATION CONTACT: Charles R. Hertzberg, Deputy Associate Administrator for Financial Assistance, 1441 L Street NW., Washington, DC 20416. telephone (202) 653–6574.

SUPPLEMENTARY INFORMATION: On November 3, 1988, Public Law 100–590, 102 Stat. 2989, was enacted (1988 legislation). Section 114 of the 1988 legislation amended the Small Business Investment Act of 1958 (15 U.S.C. 697(a)(2)) to lessen the restrictions on the use of the *alter ego* rule in the development company area. Under the old rule, there had to be a complete identity of ownership interests between the applicant real estate holding company (the *alter ego*) and the operating small business concern. The 1988 legislation provided that there did not have to exist a complete identity of ownership interests if one or more of the following classes of relatives have the ownership interests in either the *alter ego* real estate entity or the operating small business concern: father, mother, son, daughter, wife, husband, brother or sister. Regulations implementing this change have been promulgated with respect to development companies (54 FR 6265, February 9, 1989).

There is no reason to have a different *alter ego* rule with respect to loans guaranteed under section 7(a) of the Small Business Act (15 U.S.C. 636(a)). Up until the present time, the *alter ego* regulations for both the development company area (13 CFR part 108) and section 7(a) loans (13 CFR part 120) have been substantially similar. It is SBA's view that if Congress expressly amended the rule for development companies, the Agency should revise the rule for section 7(a) loans so that the rules would continue to be substantially similar. S. Rep. 416, 100th Cong., 2nd Sess. (1988), stated that the former strict rule had prevented a number of meritorious projects from receiving financing. Similarly, while the SBA does not maintain statistics in this regard, it is possible that strict adherence to the complete identity of interest rule has also prevented some meritorious financing in the loan guaranty field.

Accordingly, on April 28, 1989, the SBA published in the **Federal Register** (54 FR 18299), a notice of proposed rulemaking to eliminate the complete identity of ownership requirement for section 7(a) loans provided that certain listed family members were owners of the operating business and the real estate holding company (*i.e.*, the *alter ego*). The Agency received no comments and the regulation is being promulgated as final.

Section 120.101–2(e)(5) of SBA regulations (13 CFR 120.101–2(e)(5)) is hereby amended so that the ownership interests between the applicant real estate holding company (the *alter ego*) and the operating small concern do not need to be identical if such ownership is by the father, mother, son, daughter, wife, husband, brother or sister.

For purposes of the Regulatory Flexibility Act (5 U.S.C. 605(b)), SBA certifies that this final rule will not have a significant impact on a substantial number of small entities since the preponderance of the Agency's guaranteed loans are not made to *alter ego* applicants of small concerns. Similarly, SBA certifies that this final rule does not constitute a major rule for the purposes of Executive Order 12291, since the change is not likely to result in an annual effect on the economy of $100 million or more.

This final rule does not impose additional reporting or recordkeeping requirements which would be subject to the Paperwork Reduction Act, 44 U.S.C. chapter 35.

This final rule does not have federalism implications warranting the preparation of a Federal Assessment in accordance with Executive Order 12612.

List of Subjects in 13 CFR Part 120

Loan programs/business.

Pursuant to the authority contained in section 5(b)(6) of the Small Business Act (15 U.S.C. 634(b)(6)), SBA hereby amends part 120, chapter I, title 13, Code of Federal Regulations, as follows:

PART 120—BUSINESS LOAN POLICY

1. The authority citation for part 120 continues to read as follows:

Authority: 15 U.S.C. 634(b)(6) and 636(a)(h).

2. Section 120.101–2(e)(5) is amended by revising it to read as follows:

§ 120.101–2 Type of business.

* * * * *

(e) *Lending or investment, "Alter Ego."* * * *

(5) It must have ownership interest(s) completely identical with and in the same proportion as the ownership interest(s) in the operating company and agree in writing that such identity of ownership shall remain unchanged until the loan is paid in full or unless SBA gives written approval for an earlier change, *Provided*, however, that SBA shall not decline a loan or a guaranty to an applicant when the ownership interests in the operating small concern and in such applicant holding company are not identical and not in the same proportion solely because one or more of the following members of the same family have such interest or interests in

one and/or the other: Father, mother, son, daughter, wife, husband, brother or sister. In each such case, SBA shall make a determination that such ownership, such guaranty and the proceeds of such loan will substantially benefit the operating small concern.

13 CFR Part 121

Small Business Size Standards; Revision; Correction

AGENCY: Small Business Administration.

ACTION: Final rule; correction.

SUMMARY: On March 31, 1989, the Small Business Administration (SBA) revised its regulations to set an explicit size standard of 500 employees for nonmanufacturers. A "nonmanufacturer" is a company offering to supply to the Federal Government an item which it does not itself manufacture. However, the subheadings of the size standards table for Division F—Wholesale Trade and Division G—Retail Trade can give the unintended impression that all retail and wholesale procurement contracts, including those for services, are included under the 500-employee nonmanufacturer standard. The regulations cover only contracts for supplies. Institutional food service, computer software and other service-type contracts are excluded from the nonmanufacturer's size standard. The final rule is corrected by adding the words "of supplies" to the subheadings of Division F and G.

EFFECTIVE DATE: August 28, 1989.

FOR FURTHER INFORMATION CONTACT: Gary M. Jackson, Director, Size Standards Staff, (202) 653-6373.

SUPPLEMENTARY INFORMATION: On March 31, 1989, SBA published a Final Rule (54 FR 13160) which established a size standard of 500 employees for nonmanufacturers. This rule applies only to contracts for supplies and not for construction or service contracts (as stated in the regulations in § 121.5(b)(2)). However, through misinterpretation of subheadings in Table 2 of the regulations, contracts for services with firms under Division F (Wholesale Trade) or Division G (Retail Trade) might be construed also to be covered. By adding the words "of supplies" to the center subheadings under both Divisions F and G, as set forth below, any erroneous impressions are avoided.

Accordingly, the subheadings of Division F—Wholesale and Division G—Retail Trade in Table 2 of §121.2(d)(2), which appeared as a final rule in the **Federal Register** on March 31, 1989 (54 FR 13163), are correctly revised as set forth below:

Division F—Wholesale Trade

(Not Applicable to Government Procurement of supplies. The nonmanufacturer size standard of 500 employees shall be used for purposes of Government Procurement of supplies.)

* * * * *

Division G—Retail Trade

(Not Applicable to Government Procurement of supplies. The nonmanufacturer size standard of 500 employees shall be used for purposes of Government Procurement of supplies.)

* * * * *

Dated: August 16, 1989.

Susan Engeleiter,

Administrator, U.S. Small Business Administration.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 97

[Docket No. 25994; Amdt. No. 1407]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: *Effective:* An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference—approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESS: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;
2. The FAA Regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA-200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS-420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260-3, 8260-4, and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in the amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationships between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule under Executive Order 1229; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Approaches, Standard instrument, Incorporation by reference.

Issued in Washington, DC, on August 18, 1989.

Robert L. Goodrich,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 g.m.t. on the dates specified, as follows:

PART 97—[AMENDED]

1. The authority citation for part 97 continues to read as follows:

BILLING CODE 4910-13-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

14 CFR Part 1261

RIN 2700–AA62

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: NASA is amending 14 CFR part 1261, subpart 1261.1, by correcting the authority citation and by revising § 1261.102 to comply with Public Law 100–565 dated October 31, 1988.

EFFECTIVE DATE: August 28, 1989.

ADDRESS: Office of General Counsel, Code GG, NASA Headquarters, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Sara Najjar, 202/453–2465.

SUPPLEMENTARY INFORMATION: Public Law 100–565 was approved on October 3, 1988, which amends title 31 of the United States Code to increase from $25,000 to $40,000 the maximum that the United States may pay in settlement of a claim against the United States made by an officer or employee of the Government.

Because this rule is only technical in nature and corrects a statutory citation and revises a mandated dollar amount, it does not constitute a major rule for purposes of Executive Order 12291 and is not subject to the Regulatory Flexibility Act at 5 U.S.C. 601 et seq.

List of Subjects in 14 CFR Part 1261

Administrative practice and procedures, Claim, Dept collections, Administrative offset, Government employees, Pay administration, Personal property, Salary offset, Wages.

For reasons set out in the preamble, 14 CFR part 1261 is amended as follows:

PAST 1261—PROCESSING OF MONETARY CLAIMS (GENERAL)

1. The autority citation for 14 CFR subpart 1261.1 is revised to read as follows:

Authority: 31 U.S.C. 2371, et seq.

2. Section 1261.102 is revised to read as follows:

§ 1261.102 Maximum Amount.

From October 1, 1982, to October 30, 1988, the maximum amount that may be paid under the Military Personnel and Civilian Employees' Claim Act of 1964, as amended (31 U.S.C. 3721) is $25,000, and on or after October 31, 1988, the maximum amount is $40,000 (Pub. L. 100–565, 102 Stat. 2833, October 31, 1988).

Richard H. Truly,
Administrator.

BILLING CODE 7510–01–M

FEDERAL TRADE COMMISSION

16 CFR Part 424

Amendment to Trade Regulation Rule Concerning Retail Food Store Advertising and Marketing Practices

AGENCY: Federal Trade Commission.

ACTION: Final amendments to trade regulation rule.

SUMMARY: The Federal Trade Commission issues a final amendment to 16 CFR part 424, which is retitled Retail Food Store Advertising and Marketing Practices as amended. The trade regulation rule, as amended, requires retail food stores to have adequate stock to meet reasonable demand for items advertised for sale at specified prices unless the store publishes in the advertisement a clear and adequate disclosure that quantities are limited. Additionally, the amended rule provides that, even when stores do not publish a limited quantity disclaimer, it is not a violation of the rule, when unavailability of an advertised item does occur, if the store (1) ordered sufficient quantities of the item to meet reasonably anticipated demand; (2) offers a raincheck for the unavailable item; (3) offers a substitute for the unavailable item at the advertised price or at a comparable price reduction; or (4) offers other compensation at least equal to the advertised value.

This notice contains a Statement of Basis and Purpose for the amendments to the Rule, which incorporates a regulatory analysis, and the text of the Rule as amended.

EFFECTIVE DATE: August 28, 1989.

ADDRESS: Requests for copies of the Rule and the Statement of Basis and Purpose should be sent to the Public Reference Branch, Federal Trade Commission, 6th Street and Pennsylvania Avenue NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Walter Gross, Division of Service Industry Practices, Bureau of Consumer Protection, Federal Trade Commission, Washington, DC 20580, (202) 326–3319.

List of Subjects in Part 424

Retail food stores, Trade rules.

By direction of the Commission.

Donald S. Clark,
Secretary.

STATEMENT OF BASIS AND PURPOSE

I. Introduction

A. Overview of the Rule

The Commission promulgated the Retail Food Store Advertising and Marketing Practices Rule [1] in May, 1971 concluding that "on the basis of the entire public record * * * the issuance of the Trade Regulation Rule with respect to the unavailability and mispricing of advertised food and grocery products is required by that record, and is in the public interest." [2] The Rule required retail food stores to have every advertised item readily available for sale at or below the advertised price. If an advertised item was not available, the Rule required that grocers be able to document that they ordered and received sufficient quantities of the item to meet reasonably anticipated demand. The Rule permitted disclosures of some restrictions on availability, such as "Available only at stores featuring delicatessen departments." [3]

Between 1973 and 1978, the Commission entered nine cease and desist orders against food chains charged with failing to have advertised items available. Some of the complaints in these cases charged violations of the Rule; others charged that conduct in violation of the principles expressed in the Rule violated section 5 of the Federal Trade Commission Act.[4]

---

[1] 16 CFR part 424 (hereinafter cited as "the Rule" or "the current Rule").

[2] 36 FR 8777 (hereinafter cited as "SBP").

[3] The Rule included an exception to the general availability requirement—a provision permitting "clear and conspicuous disclosure * * * as to all exceptions and/or limitations or restrictions with respect to stores, products or prices otherwise included within the advertisements." A 1975 staff interpretation of the Rule's disclosure provision concluded that advertisements containing a notice that supplies of a number of items available at each store location, would not excuse a retailer from the Rule's requirement that retailers must have sufficient quantities on hand to meet demand.

[4] *Food Fair Stores, Inc.*, 90 F.T.C. 491 (1977); *Fisher Foods, Inc.*, 90 F.T.C. 473 (1977); *Shop Rite Foods, Inc.*, 90 F.T.C. 500 (1977); *Kroger Co.*, 90 F.T.C. 459 (1977); *Mayfair Supermarkets, Inc.*, 87 F.T.C. 286 (1976); *Pacific Gamble-Robinson Co.*, 86 F.T.C. 1694 (1975); *Boso'r, Inc.*, 86 F.T.C. 1028 (1975); *The Great Atlantic and Pacific Tea Company, Inc.*, 86 F.T.C. 601 (1975); *Albertsons, Inc.*, 85 F.T.C. 500 (1975). Two additional Orders, *Safeway Stores, Inc.*, 91 F.T.C. 975 (1978), and *Fred Meyer, Inc.*, 87 F.T. C. 112 (1976) dealt only with mispricing.

The Commission is promulgating the amended Rule in order to reduce costs on the retail food industry that are passed along to consumers. The Commission has concluded that these costs, though difficult to measure precisely, exceed the benefits the original Rule may have provided to consumers. The Commission has also concluded that the amended Rule will not significantly reduce consumer protection because injury caused by such instances of unexpected unavailability as do occur will be substantially mitigated by the amended Rule's requirement that consumers be offered rainchecks or comparable substitute items.

B. Background of this Proceeding

In 1980, the Commission published [5] for comment A Study of Consumer Response to the Availability of Advertised Specials, which describes the results of a survey that was conducted for the Commission by an independent research organization, Market Facts, Inc.[6] The findings of the Market Facts Study suggested that consumers realize little, if any, benefit as a result of the Rule. Comments by various grocers on the published Study indicated that costs of complying with the Rule were far in excess of any benefits that had been identified.[7] On December 10, 1984, the Commission published an Advance Notice of Proposed Rulemaking ("ANPR").[8] The ANPR indicated that the Commission was seeking further information on the costs and benefits of the current Rule as well as comments on whether the Commission should repeal the Rule, amend it or make no change.[9] Comments received in response to both the ANPR and the staff's economic analysis indicated strong consumer opposition to repeal of the Rule. The staff subsequently recommended that the Commission reduce the costs imposed by the Rule by amending its provisions to allow grocers greater flexibility in disclosing in advertising when there are only limited quantities of advertised items and to permit additional defenses to unavailability.[10]

The Commission then published a Notice of Proposed Rulemaking ("NPR") on October 24, 1985.[11] The major amendments proposed in the NPR permitted grocers to (1) publish clear and adequate limited quantity disclosures in their advertising and (2) defend against instances of unavailability by demonstrating that they provide rainchecks, substitutions of items of comparable value or other compensation at least equal to the advertised value.

A ninety-day comment period on the NPR concluded on January 24, 1986. The Commission received 35 comments on the NPR, including two from industry trade associations, three from retail grocers, seven from state, federal and local government agencies, three from consumer groups and 20 from individual consumers.

On April 1 and 2, 1986, public hearings on the Rule were held in Washington, DC. Two parties, the Food Marketing Institute ("FMI"), a trade association representing approximately 1,500 wholesale and retail grocers, and Consumers Union, applied for and were granted designation as interested parties to participate in the hearings. Eight witnesses, four for the Staff and four for industry, testified at the hearings. Consumers Union decided not to present any witnesses, but did conduct cross-examination of both staff witnesses and industry witnesses.

In December, 1986, the staff published its Final Report, recommending, with one minor adjustment, the adoption of the proposed amendments.[12] In an accompanying statement, the Bureau Director indicated that he favored repealing the Rule because the record evidence demonstrated that retail food stores appear to have adequate incentives to avoid unavailability even without the presence of an FTC rule.[13] On January 20, 1987, the Presiding Officer published his Report, in which he recommended amendments to the Rule that deviated substantially from those that the Commission had initially proposed and staff had subsequently recommended in its Staff Report.[14] Twenty-one comments were received during a ninety-day comment period on both reports that ended on March 24, 1987: two from industry trade groups, one from a federal agency, three from state and local consumer agencies, one from an academic/staff consultant, one from the publisher of a newsletter for specialty dealers in the consumer electronics industry and thirteen from individual consumers.

On December 1, 1987, the Bureau of Consumer Protection forwarded its final recommendations to the Commission on this proposed rulemaking. Two members of the rulemaking staff favored amending the Rule, while one favored repeal. The Assistant Director for Service Industry Practices also favored amendment. The Bureau Director favored repeal as did the Bureau of Economics.[15] On April 19, 1988, after reviewing the rulemaking record as a whole, the Commission voted three to two to amend the Rule as the majority of the rulemaking staff had proposed.

II. Basis for Amended Rule

A. The Legal Standard for Amending the Rule

Section 18(d)(2) of the FTC Act states that "[a] substantive amendment to, or repeal of, a rule promulgated under subsection (a)(1)(B) shall be prescribed * * * in the same manner as a rule under such subsection." That section also provides that an amendment or repeal of a Section 18 rule shall be "subject to judicial review, in the same manner as" any other Section 18 rule. Section 18(e)(3) provides that a rule may be judicially reviewed under either a substantial evidence standard or, in accordance with 5 U.S.C. 706(2)(A), an arbitrary and capricious standard. According to section 18(e)(3), all factual matters upon which the amendment is based should be supported by substantial evidence in the rulemaking record.

MacLeod, Director, Bureau of Consumer Protection, to the Commission (November 30, 1987). *See also* FTC Press Release, "Consumer Protection and Economics Directors Recommend Repealing Food Store Advertising Rule; Staff Sees Basis For Either Repealing or Amending Rule" (April 19, 1988).

In addition to this statutory requirement, the Commission should "articulate a satisfactory explanation for its action including a rational connection between the facts found and the choice made." [16] Since the courts have noted that there is a presumption against changes to an existing course of action, the Commission should "supply reasoned analysis for the change beyond that which may be required when an agency does not act in the first instance." [17] If the Commission's decision to amend or repeal a rule is based upon factual findings, those findings should be supported by substantial evidence. If the decision to amend or repeal is based on policy grounds, the Commission should articulate its reasoning so that it is clear it is not acting arbitrarily or capriciously.

The Commission adopted the original Rule in 1971, on the basis of a record containing survey evidence that indicated overall unavailability rates of 11 percent of advertised items and overpricing rates of between 3.0 percent and 4.6 percent in the ten leading food chains.[18] The Commission's current rulemaking standards might require a more persuasive record before imposing an industry-wide Rule.[19] However, given that the Rule is in place, these same standards now require "a preponderance of substantial reliable evidence" in support of any proposed change to the Rule.

In the case of this rulemaking, the Commission has concluded that there is substantial evidence to support a finding that the costs of complying with the original Rule far outweigh its benefits. Moreover, the Commission believes that the amendments it has adopted will reduce these costs while serving to ensure that consumers will still be protected from losses associated with unavailability of advertised items.

B. The Benefits of the Original Rule

One means of determining the benefits of the Rule is to measure the extent to which it may have been effective in reducing unavailability of advertised specials that existed prior to the Rule and then to estimate the actual consumer dollars saved as a result of that reduction. The rulemaking record in this matter contains evidence on this issue in the form of retail food store unavailability surveys that were conducted before and after the Rule was promulgated, as well as academic research that permits the conversion of the differences in unavailability rates into consumer dollars. This section first compares pre-Rule and post-Rule survey rates of unavailability and then, using the findings from the academic research, estimates the maximum level of likely savings that consumers have realized as a result of the Rule.

A second means of determining consumer benefits is to survey consumers as to how the unavailability of advertised products affects them and how much they value availability of these products as compared with other attributes of retail grocery stores. Using the data from that survey of consumers regarding unavailability, a separate estimate of consumer benefits is generated.

1. Pre-Rule and Post-Rule Measures of Unavailability

a. Survey Rates of Unavailability. In 1967–68, as part of a larger study of food store selling practices conducted in Washington, DC and San Francisco, California, staff surveyed retail food stores' shelves for the presence of advertised items. [20] This survey indicated an average overall unavailability rate in the two metropolitan areas studied of 11 percent.[21] This study was the primary basis for promulgation of the original Rule.[22]

In contrast, the record evidence indicates that unavailability rates in the period after the Rule was promulgated have been cut in half. In 1973, Commission staff surveyed unavailability and mispricing of advertised items in 640 retail food stores of leading grocery store chains in 40 Standard Metropolitan Statistical Areas ("SMSA").[23] The overall average unavailability rate was 5.5 percent.[24]

A recent survey, conducted in the Borough of Manhattan of New York City by the Better Business Bureau of Metropolitan New York, Inc., in 1985, showed an unavailability rate (4.6%) consistent with previous post-Rule studies.[25] Only one study, which was conducted in New Jersey in 1980, showed post-Rule unavailability rates to be higher (6.8%) than rates found in the studies already mentioned.[26]

[17] *Id.* at 2866.

[18] SBP, *supra* n. 2 at 8777–78.

[19] The Commission has indicated that before it will promulgate a Rule, it will first assure that the rulemaking record contains "a preponderance of substantial reliable evidence" in support of the Rule. Initially, it will require substantial evidence for the factual propositions underlying a determination that an existing practice is unfair or deceptive. Additionally, the Commission will consider the following questions in deciding to promulgate a Rule: (1) Is the act or practice prevalent? (2) Does a significant harm exist? (3) Will the proposed Rule reduce that harm? and (4) Will the benefits of the Rule exceed its costs? Statement of Basis and Purpose, Credit Practices TRR, 49 FR 7740 (March 1, 1984).

[20] Bureau of Economics, Federal Trade Commission, Economic Report on Food Chain Selling Practices in the District of Columbia and San Francisco 1 (1969) R–I–61 (hereinafter cited as "Market Basket Survey"). The survey covered an average of 65 advertised items in each of 137 stores in the Washington, DC and San Francisco sales areas.

[21] In Washington, DC, the staff found chain store unavailability rates to be 23 percent in low-income areas and 11 percent in high-income areas, with an overall rate of 14.4 percent. In San Francisco, where there was no such discrepancy between low-income and high-income areas, staff found an overall rate of six percent. Overall, a total of 11 percent of the items were found to be unavailable.

It should be noted, however, that in this study, surveyors did not ask store personnel, as they did in later studies, about items they could not find on the shelves. Presumably, some items not found on the shelves may have been in the back of the store or located elsewhere in the sales area. This survey was criticized by industry members as being unsound methodologically. *See* S.R., *supra* n. 7 at 19, n. 41. While the failure to ask routinely for items not found on the shelves could have resulted in a slight overstatement of actual unavailability rates, it is unlikely that this oversight resulted in any substantial distortion of the results. In a similar study conducted by the Better Business Bureau of Metropolitan New York, Inc., surveyors did ask for items they could not find. Of the 480 items checked, only two out of 22 items not found on the shelves were in storage. Comment of Better Business Bureau of Metropolitan New York (1986) R–H–1 ("NYBBB 1986"). It does appear, however, that in order to account for differences between pre- and post-Rule methodologies, the overall pre-Rule unavailability rate should be adjusted slightly downward.

[22] SBP, *supra* n. 2 at 8777–78.

[23] Statement of Michael Lynch, Bureau of Economics, Federal Trade Commission, HX. 12, Exhibit 2 (1973 Commission Survey). Four stores from each of the four leading chains in each SMSA were picked at random. An item was considered unavailable if it could not be found anywhere in the sales area of the store and was not available on request from any part of the store not open to the public. *Id.*

[24] *Id.* Primarily on the basis of this survey, the Commission issued complaints against eleven supermarket chains alleging high unavailability rates in nine of them. *See* discussion *supra* at § II.A. An analysis of the unavailability rates contained in mandatory reports filed by the stores under orders as a result of these actions ("compliance reports"), submitted mostly in 1978 shows unavailability rates ranging from 0.3 percent to six percent and an average reported rate of 2.4 percent. However, because in many cases the order provisions requiring the surveys permitted the chain named in the order to determine the time and place of the surveys of its own stores, staff estimated that the true overall rates were closer to four percent. S.R., *supra* n. 7 at 21.

[25] S.R., *supra* n. 7 at 22.

[26] *Id.* at 22–23. A similar study conducted in 1978 by the same agency had found the overall

Continued

On the basis of the comparison of pre-Rule and post-Rule survey rates, it appears that overall unavailability rates have been reduced by about 50 percent to current levels of about five percent since the Rule's promulgation. Although other factors, such as the introduction of computerized inventory records, may have served to reduce unavailability somewhat, evidence as to the measures that stores have taken to assure Rule compliance [27] leads the Commission to conclude that this reduction can be attributed primarily to the Rule and the resulting enforcement actions brought in the mid-seventies. Accordingly, benefits that may result from the original Rule can be measured in terms of the reduction in consumer losses from pre-Rule levels of unavailability of about 10 percent to post-Rule levels of unavailability of about five percent.

b. The Ferguson Study. [28] In 1980, academic researchers from the Marketing Department of the University of Alabama reported on a simulation study that estimated losses from unavailability of items featured in a typical retail food store ad. This research, referred to herein as the Ferguson Study, provides the basis for a direct measurement of Rule benefits by providing a basis for estimating an aggregate annual loss incurred by customers confronted with unavailability.[29]

The simulation technique used in the Ferguson Study permitted the researchers to calculate the losses incurred by consumers at various levels of unavailability.[30] Comparing losses generated by an unavailability level near that which existed prior to the Rule with losses generated by an unavailability level approximating the post-Rule unavailability level results in a new benefit per consumer of less than one cent per shopper per week.[31]

This estimate takes into account only the savings realized through the avoidance of trip losses ("the trip gain"), which are losses that result from the expense of wasted trips to retail outlets for advertised items that are unavailable. The price savings on advertised specials ("the savings gain")—which to the individual consumer shopping for that special may seem important—are not included in the benefits calculation because consumers in the aggregate do not actually realize a savings from the purchase of items on special. This is because grocers compensate for losses they incur from price reductions by increasing prices elsewhere or reducing services.[32]

2. The Consumer Survey Regarding Unavailability

A survey of consumer attitudes and perceptions of unavailability commissioned by the staff, the Market Facts Study,[33] addressed such issues as (1) the degree to which consumers experience unavailability, (2) the ability of consumers to take corrective action when they encounter unavailability, (3) the extent to which consumers consider unavailability to be a problem, and (4) the value consumers place on availability.[34] Consumer responses to these questions produced the following results:

—More than eight out of ten consumers have experienced at least occasional unavailability; a typical encounter usually results in the consumer either doing without the item, buying a comparable item at the regular price or going elsewhere to get the item. Most consumers indicated that they are not significantly inconvenienced by unavailability.

—Seven out of ten consumers have access to several stores that compete for their business by means of newspaper advertising.[35] of the more than half of the respondents who had encountered a store with "too few of its advertised items available," most would respond by either paying less attention to that store's advertising or shopping there less often.

—When asked to rank by importance various store attributes, consumers ranked availability of advertised items seventh out of 21 factors, behind quality of produce, quality of meat, overall price, amount of savings of advertised items, variety of items and friendly, helpful store personnel.

—Consumers report that they are willing to accept availability levels as low as 70 percent rather than experience either a one percent increase in prices, reduced savings on advertised specials, an increase in cashier overcharge mistakes, or a significant reduction in consumer services.[36]

---

unavailability rate to be five percent. *Id.* However, little is known concerning the methodology used in either of these studies. For example, the methodology does not reveal whether shoppers asked store personnel for items that they could not find on the shelves.

[27] *See* discussion *infra* at section II.C.

[28] Ferguson, Mason and Wilkinson, Simulating Food Shoppers' Losses as a Result of Supermarket Unavailability, 11 Decision Sciences 535 (1980), R–I–40 (hereinafter cited as "the Ferguson Study").

[29] The Study researchers generated the data on shopper losses by simulating a year's worth of typical shopping transactions at a supermarket believed to be representative in terms of size and sales volume. The design of the simulation model was based on previously obtained information about management's stocking policies, store sales volume, the number and size of transactions, customer demographics, shopping patterns, and customer and management responses to unavailability. The items purchased in the simulation were derived from an actual advertisement of the supermarket, typical of the number and variety of items featured in the weekly grocery advertising of that market. The Ferguson loss calculation does not take into account the time and aggravation expended by shoppers encountering unavailability because of the difficulty in quantifying such factors. *Id.* at 544 n. 7.

[30] To obtain the weekly per shopper gain, the average gain for each transaction in the simulation is multiplied by the average number of weekly transactions made by an average shopper (1.5). *See* Progressive Grocer, 48th Annual Report of the Grocery Industry (1981), R–I–55. The resulting per week gain ($0.008) is then converted to an annual figure by multiplying the average number of supermarkets in 1980 (28,680) times the average number of customers per supermarket (about 4000) as reported in Progressive Grocer, 49th Annual Report of the Grocery Industry, 5 (1982), R–B–42. This result is then multiplied by the average gain per week per shopper and converted to 1985 dollars (see below) to produce an annual figure of $48 million.

All benefits and costs estimates are converted to 1985 dollars using the consumer price index in order to make them comparable to each other. The conversion formula follows:

Amount Year Y Dollars = (Amt in Year X Dollars) (CPI of Year Y) divided by (CPI of Year X).

[31] *See* S.R., *supra* n. 7 at 80–82. The Presiding Officer criticized the omission of savings gains and the justification therefor. He concluded that "Staff has averaged away the benefits for the individual consumer." P.O.R., *supra* n. 14 at 100. However, these individual consumer gains are not as significant as critics may think. First, the more that individual shoppers exclusively shop for bargains, the more other shoppers will have to absorb increased prices. The benefit to those individual shoppers thus becomes a loss to the other shoppers and the net benefit is still zero. Second, it is unlikely that many consumers actually save substantial sums on the yearly food budget by shopping specials.

[32] *See* S.R., *supra* n. 7 at 80–81. The savings gain per shopper per week is approximately 2.8 cents.

[33] *Supra* n. 6.

[34] The Study is based on a sample taken from a universe of 65,000 households comprising the Market Facts Mail Panel, demographically balanced to represent U.S. consumers and the U.S. population as a whole. The sample was chosen randomly from a universe of all panel members. The sample consisted of 3,036 households, each of which was mailed a questionnaire with instructions that it should be completed by the household member who does at least half of the shopping, to insure that it was completed by the most experienced shopper. Questionnaires were returned by 2,563 respondents, representing an 84 percent response rate.

[35] The study also found that consumers regularly read food store advertising and most of them pay some attention to featured items in those ads.

[36] The Study also reported that consumers generally were unwilling to give up any other store attributes—some arguably much lower in value than a one percent price hike—to assure higher availability rates. For example, generally, it was more important to consumers to maintain the same level of items advertised than to have them available 70, 80, 90 or even 100 percent of the time;

Continued

In light of the findings of the Market Facts Study, that, in general, consumers do not object to availability going as low as 70 percent, then even a decrease to the 90 percent pre-Rule levels would not appear to pose a major problem. Moreover, the Market Facts Study indicates that while most consumers have experienced unavailability of advertised items, they have alternative food stores available to them and would switch to them if their regular store had too few of its advertised items available. Under the circumstances, therefore, the Commission concludes that the Market Facts Study indicates that, in general, the Rule has provided relatively small benefits to most consumers.

3. Conclusion

Based on the two studies relied on in assessing Rule benefits, the Commission finds that the measurable benefits to consumers under the Rule are less than one cent per week per shopper and, in the aggregate, range no higher than $48 million per year for all supermarket shoppers. Consumers may also realize additional—albeit unquantifiable—benefits, inasmuch as the Rule's assurance of availability saves consumers the aggravation expended when an advertised product proves unavailable.[37]

C. The Costs of the Original Rule

According to the record evidence, most food retailers feel compelled to take precautions that they would otherwise not take in the ordinary course of business to avoid inadvertent violations of the Rule. They take extraordinary measures to ensure that they have sufficient inventory of advertised items on hand to satisfy the last customer on the last day of the sale. These measures include maintaining inventory cushions over and above what is needed to meet reasonably anticipated demand, performing additional checks of retail shelves, and creating and maintaining records of their cumulative monitoring activities. These measures result in costs to the food retailers that are attributable solely to the Rule. This section analyzes the direct costs of these efforts. Evidence of the magnitude of these costs is provided by estimates from five separate supermarket chains.[38] In addition, the Commission staff's own independent analysis of the costs produced by investing in excess inventory, using data from the Ferguson Study, is also set forth. This independent analysis, developed by Michael Lynch, a staff economist in the FTC's Bureau of Economics, generally supports the supermarket chains' estimates of inventory costs.[39]

For purposes of this analysis, industry cost data are broken down into four expense categories: (1) Increased inventories to reduce unavailability ("inventory costs"); (2) extra internal monitoring of shelf stock and back room inventories to reduce ordering and pricing errors ("monitoring costs"); (3) compiling and monitoring extra records to prove compliance ("recordkeeping costs"); and (4) extra legal advice and consultation as well as extra monitoring by outside auditors and the like ("legal and survey costs").[40] The Table at Appendix A to this statement breaks out cost data (stated in 1985 dollars) by source and expense category.

1. Inventory Costs

The record indicates that one of the more costly measures that stores use to avoid inadvertently violating the Rule is to purchase and stock more inventory of advertised products than they realistically expect to sell. This measure results in both the cost of investing in (or carrying) excess inventory[41] ("inventory investment costs") and the monetary loss that stores incur when the excess inventory in perishables, *e.g.*, meat and produce, spoils or is reduced below cost for quick sale before it spoils ("spoilage and distress costs").[42]

As staff's independent analysis of inventory costs demonstrates,[43] the cost of stocking inventory cushions in perishable items can be extremely high. This is because these products have a very limited shelf life and, if not sold quickly, will spoil and must be discarded at a total loss. In order to reduce losses from spoilage, grocers attempt to sell excess inventory in perishables below their costs to move them quickly ("distress selling"). The extent to which grocers incur losses from spoilage or distress selling constitutes a second type of cost attributable to the perceived need to stock inventory cushions for advertised items. Staff estimates from industry figures that these costs range from $1,697 to $8,789 per store annually.[44]

2. Monitoring Costs

Monitoring costs represent the labor cost of having in-store personnel and supervisory personnel perform extra checks to see that advertised items are in stock and priced correctly.[45] As a matter of good business practice, food retailers regularly monitor inventory levels to ensure that they have adequate stock. In order to ensure Rule compliance, however, they make these checks more often than would be required in the regular course of business.[46] Staff estimates from industry figures that annual per store monitoring costs ranged from $2,268 to $9,830.

3. Recordkeeping Costs

Recordkeeping costs are the costs food retailers incur to develop and compile records to show that they ordered and had delivered sufficient quantities of advertised items to meet reasonably anticipated demand in order to defend themselves against any charges that they violated the Rule. Food retailers indicated that recordkeeping costs exist at both the store level where these records are developed and at the central office level where the records generally are compiled and stored. Staff estimates from industry figures that annual recordkeeping costs ranged from $52 to $2,312 per store.

4. Legal and Survey Costs

This cost category includes the cost of legal services used in connection with Rule compliance or defense (the legal costs). It also includes the cost of audits of Rule compliance by independent firms that some stores retain (the survey costs). Staff estimates from industry figures that such costs ranged from $12 to $249 annually.[47]

5. Indirect Costs

The indirect costs of the Rule are mainly opportunity costs, *i.e.*, costs that are the result of the lost opportunities from action not taken. These indirect costs may occur because the threat of penalties resulting from a Rule violation may inhibit some types of food store advertising. As a result, food stores may advertise fewer items, run fewer specials or change the types of products they advertise. For example, food stores may advertise new products less often because demand for them may be hard to predict. They may be reluctant to advertise produce or other perishables, because at the end of the sale period, unsold items may spoil or need to be sold at distress prices. They may restrict their advertising of items with limited demand, such as ethnic items, because all stores would have to carry the item regardless of the segmented demand. They may advertise directly delivered items, such as beer and soft drinks, less often because deliveries from many independent suppliers are more difficult to coordinate than deliveries from the store's warehouse. They also may advertise less frequently items available in limited quantity, such as products on "deal", because they may not be able to guarantee quantities sufficient to meet demand. While these costs are real, they are not readily quantifiable and thus are not included in the cost-benefit calculation.[48]

D. Cost/Benefit Comparison

On the basis of the various estimates of costs of Rule compliance as compared with the estimates of maximum benefits under the Rule, the Commission concludes that the costs of complying with this Rule greatly exceed the benefits. Depending upon which food retailers' cost figures are used and assuming benefits of a magnitude indicated by the Ferguson Study, the record indicates that the costs imposed by the Rule exceed its benefits by ratios that range from over 2⅓ to one to nearly eight to one.[49] If the sum of the averages for each cost category is used, the ratio of costs to benefits is more than five to one.[50] Moreover, staff's independent analysis of the data used in the Ferguson Study demonstrates that the costs of reducing survey rates of unavailability by investing in excess inventory can result in costs that exceed benefits by an overwhelming margin.[51]

As previously noted, there are both benefits and costs, indirect in nature and difficult to quantify, that are not included in the cost benefit calculation.[52] On the benefits side of the equation are unquantified "transactional costs," or costs in the form of wasted time and frustration that result when an advertised item is unavailable.[53] On the cost side are the "indirect costs" of lost information, *e.g.*, information lost as a result of food retailers' avoiding advertising of certain categories of products—meat, produce, new products, etc.—because it may be difficult to accurately predict demand for them or assure adequate inventories.[54]

Record evidence indicates that savings from avoiding transactional costs are *de minimis*. Both the Market Facts Study and the Ferguson Study indicate that the overwhelming majority of consumers who have encountered unavailability report minimal inconvenience as a result. In the Ferguson Study, 83 percent of shoppers who encountered unavailability indicated that they did not experience significant inconvenience.[55] Likewise, the independent surveys supporting the Market Facts findings revealed that 74 percent of shoppers who encountered unavailability experienced little or no inconvenience (44 percent reported none), while only three percent reported "great inconvenience."

The indirect costs of limited information about items specially reduced in price are also minor. Indeed, if specials are not advertised, consumers may not realize the savings available had they known about and purchased those items at reduced prices. However, these "savings gains" do not affect the cost-benefit calculus inasmuch as grocers must raise other prices or reduce services to compensate for these price reductions.[56] Thus, the actual loss in

---

consumers also placed more value in having 80 percent of regularly stocked non-advertised items available than 100 percent of advertised items. Market Facts Study, *supra* n. 6 at 24.

[37] *See supra* n. 29. *See also infra* at section II.D where the Commission concludes that the magnitude of the unquantified transactional costs are *de minimis*.

[38] All per store cost figures have been converted to 1985 dollars. *See supra* no. 30.

[39] *See* Statement of Michael Lynch, Bureau of Economics, Federal Trade Commission, Exhibit 13 (1986) HX-12, R-LL-1.

The industry cost data includes data submitted by the Food Marketing Institute (FMI) on behalf of three supermarket chains, identified in the record only as Company A, Company B, and Company C, and data submitted separately by Safeway, Inc., Kroger Stores, Inc. and Albertsons, Inc. However, a number of factors indicate that Safeway is Company A in FMI's submission. *See* S.R., *supra* n. 7 at 92. Thus they are treated as one ("Company A/Safeway") for purposes of this analysis.

Although the retail food industry alleged that their costs were indeed incremental costs attributable solely to Rule compliance, some commenters were skeptical that the chains could demonstrate successfully their basis for distinguishing alleged incremental costs from costs incurred in the ordinary course of doing business. The Presiding Officer also believed that the industry cost data were not reliable. P.O.R., *supra* n. 14 at 97. Staff, however, carefully probed industry witnesses at the hearings to determine the methodologies the chains used to identify and quantify their costs. *See* S.R., *supra* n. 7 at 111–112. In some instances, staff recalculated cost components of some stores that it believed to be based upon erroneous accounting principles. *Id.* at 98–99 and 101–102.

In the Commission's opinion, industry witnesses provided generally objective criteria for their costs, and each chain that submitted cost figures for the record demonstrated that it had an objective basis from which it estimated incremental Rule compliance costs. As adjusted by staff, the figures may be relied upon to support a finding as to the magnitude of costs to the industry for Rule compliance.

[40] S.R., *supra* n. 7 at 93.

[41] When retailers purchase extra inventory for advertised items that they do not expect to sell during the sales periods, they either have to borrow the money or invest capital that otherwise would be earning money for them. Either the amount of interest paid for the loan or the amount of money that stores could realize had that capital been invested at prevailing interest rates represents the inventory investment cost to the retailer. Of course, except for perishables that spoil or that are reduced below cost for quick sale, stores eventually will sell the excess inventory at the normal profit margin. For that reason the amount of money actually borrowed or invested is not a cost to the stores because ultimately they will recoup that expenditure. However, the fact that grocers eventually will earn a profit on the excess inventory does not offset the lost interest. Retailers, as long as they remain in business, must invest continually in new inventory cushions for their weekly advertising specials. Accordingly, they always will have an amount of capital tied up in excess inventory; even as they are recouping capital previously invested, they are investing new capital. Thus, the loss of interest on the average amount of capital invested in the excess inventory cushion represents the retailer's inventory investment cost.

[42] These costs varied widely (from $356 per store to $4,778 per store) and some were subject to controversy. *See* discussion in S.R., *supra* n. 7 at 97–103 for an explanation of how they were derived.

[43] *See infra* at section II.D. *See also* testimony of Michael Lynch, Staff Economist, Bureau of Economics, Tr. at 296–301.

[44] *See* S.R., *supra* n. 7 at 95.

[45] *Id.* at 107–08.

[46] *Id.* at 107, n. 283.

[47] *Id.* at 109–10.

[48] *See infra* at section II.D, where the Commission concludes that these costs are *de minimis*.

[49] Staff estimated maximum direct benefits under the Rule to be $48 million per year. The lowest overall estimate of annual costs (based on the submission of the only grocery store chain that did not attempt to estimate its inventory costs) was approximately $132 million when extrapolated industrywide. On the high side of the range are costs extrapolated to the industry at about $370 million. Even selecting the lowest costs in each category and extrapolating their total to an industrywide figure results in costs of about $126 million per year.

[50] Staff estimated that the total of the averages for all cost categories is approximately $319 million, or, converted to a per customer per week basis, 5.3 cents. To obtain the per customer per week cost, the industrywide cost per year was divided by the number of supermarket shoppers in 1980, 114.7 million, *see* S.R., *supra* n. 7 at 82, n. 231, and then divided by the 52 weeks in a year. As previously noted, the maximum benefit was estimated by staff to be only 0.8 cents per customer per week.

[51] From the raw data supporting the Ferguson Study, staff used the annual demand levels generated by the Study to project annual costs of inventory cushions for a store that chooses to invest in extra inventory in amounts sufficient to lower unavailability from pre- to post-Rule levels. *See* S.R., *supra* n. 7 at 104–05. Carrying inventories at two standard increments above the normal level reduces survey unavailability rates from a level approximating the pre-Rule level to that approximating the post-Rule level. Such a practice results in inventory investment costs on a per store basis (in 1985 dollars) of $839 and spoilage/distressing costs of $29,046. These reductions would produce benefits of only $1149. *Id.* at 106–07.

As staff notes, the figures as generated should not be considered *actual* costs of a typical store, however, since actual costs depend upon *all* strategies that an individual chain might adopt to achieve Rule compliance. These figures are based upon reliable data, however, and confirm that the inventory figures produced by industry are reasonable cost estimates.

[52] The Presiding Officer claimed that the existence of both costs and benefits that could not be quantified rendered the entire cost-benefit analysis unreliable P.O.R., *supra* n. 14 at 53.

[53] *See supra* n. 29.

[54] *See* discussion *supra* at § II.C.5.

[55] HX. 5 at 8.

[56] *See* discussion *supra* at § II.D.

this respect is limited to the information itself, not the savings to be gained from knowing it. Thus, for example, the loss occasioned by a grocer's failure to advertise a new breakfast cereal at a reduced introductory price is the information that a new product exists, not the savings to be realized from purchasing it.

After considering all of the options for correcting this imbalance, including repeal of the Rule, the Commission has concluded that amending the Rule as proposed will substantially reduce costs while preserving the benefits that accrue to consumers from increased availability.

E. Legal Basis for Amending the Rule

As previously noted, the basis for amending the Rule is the record evidence that the cost of complying with the Rule substantially exceeds the benefits. Given this basis for action, the Commission is adopting measures that should substantially mitigate or eliminate the compliance costs. There is also substantial evidence in the current rulemaking record that, under the Commission's deception standard, failing to have adequate supplies of advertised products on hand in sufficient quantities to meet reasonably anticipated demand is deceptive.[57]

The Commission's deception standard requires that there be a representation, omission or practice that is material and likely to mislead consumers acting reasonably under the circumstances.[58] Certainly, there is little dispute that a retail food store ad listing items on sale at specified prices is a material representation. What remains to be determined, therefore, is whether the record contains substantial evidence that consumers who shop for items featured in the ad and find them unavailable are reasonably misled.

The Market Facts Study contains substantial evidence that would provide a basis for concluding that failing to have sufficient quantities of advertised items on hand to meet anticipated demand misleads many consumers. The Study indicates that a substantial portion of the public (34%) expect that grocers will not run out of advertised goods unless there are qualifications or limitations as to their availability expressed in the ad.[59] Moreover, according to the same study, 30 percent of consumers consider it very important and an additional 48 percent find it somewhat important that they be able to find all advertised items on the last day of a sale.[60] The Market Facts Study also found that 87 percent of consumers actually experienced unavailability in recent years even when post-Rule unavailability levels of five rather than ten percent were believed to prevail.[61] More significantly, at this same post-Rule level, 56 percent of consumers found a store that had levels of unavailability that they considered too high.[62]

In summary, the Commission concludes that there is substantial evidence in the current record that unavailability of advertised items would constitute a deceptive practice.[63] The amendments that the Commission is promulgating, therefore, retain basic protection against deception while eliminating the need for grocers to adopt costly compliance measures against the possibility of inadvertent unavailability of advertised items.

III. Section-by-Section Analysis

A. Introduction

The Rule as amended contains two new provisions that should reduce the costs imposed by the original Rule significantly. Both of the amendment proposals are intended to relieve any uncertainty about Rule compliance, by making explicit the steps that a grocery food retailer can take to defend against a charge of unavailability.

B. Disclosure Amendment: Section 424.1 Unfair or Deceptive Practices [64]

This section sets out the basic requirement of the Rule that stores have in stock and readily available for sale the items that they advertised. The major change in the section from the original Rule is its allowance for a broader use of limited availability disclosures in advertising. Specifically, if the ads disclose that supplies of the advertised product are limited or available for sale only at some outlets, § 424.1 creates an exception to the requirement that stores have in stock the items that they advertise. Under this exception, as long as an advertisement covered by the Rule contained a clear and adequate disclosure of limited availability, the food retailer would not violate the Rule by failing to have adequate supplies of the advertised product on hand during the entire duration of the sale period. The disclosure would have to specify, however, whether the limitation on availability was the result of limited quantities or limited outlets. This disclosure provision is adapted from the Commission's Guidelines Against Bait Advertising [65] and is intended (1) to emphasize that under the amended Rule, food retailers still will not be permitted to engage in bait advertising and (2) to ensure that consumers will not be deceived about the availability of advertised items when availability is limited.

---

[57] This does not mean that grocers are expected to meet a 100 percent availability standard. Even the original Rule indicated that it "will consider * * * all circumstances surrounding non-delivery of advertised products which were actually ordered in quantities sufficient to meet reasonably anticipated demands, but were beyond the advertisers' control."

[58] Cliffdale Associates, Inc., 103 F.T.C. 110, 164–65 (1984).

[59] Market Facts Study, *supra* n. 6 at Table 16.

[60] *Id.* at Table 9. This notion that advertisers have on hand sufficient quantities of advertised merchandise to meet reasonably anticipated demand is not unique to the Rule. It is a direct extension of principles expressed in the Commission's Guides Against Bait Advertising (16 CFR 238.3(c)) as well as decision in litigated cases. *See, e.g., The Great Atlantic and Pacific Tea Company, Inc.*, 85 F.T.C. 601 (1975).

The Market Facts findings that 34 percent of consumers expect 100 percent availability can also be reasonably read as a statement that they expected greater than 90 percent availability. Unfortunately, the survey did not allow consumers to choose levels between 90 percent and 100 percent availability. Consumers responding to the survey were asked to indicate how many items out of ten advertised that they expected to find at the store. Consumers who typically shop in a market that features weekly advertising of over 200 items per store may have selected ten out of ten items only because they expected more than 90 percent availability. Expecting more than 90 percent is not unrealistic, particularly in an environment where at the time of the survey the average availability rate may have been [illegible] percent.

This evidence could also reasonably be interpreted to mean that these consumers do not expect that grocers who run out of stock of advertised items should necessarily be punished for violating laws against deception unless they are unwilling, when unavilability occurs, to offer rainchecks or substitute items, as the amended Rule would require. According to this analysis, it is not unreasonable for consumers to expect—in the absence of disclaimers—that compensation will be offered in cases when unavailability does occur.

[61] *Supra* n. 6 at 29.

[62] *Id.*

[63] This discussion is not meant to exhaust the possible instances in which unqualified retail food store advertising might be found deceptive. That determination would be affected by the number of factors that go beyond an analysis of the average level of unavailability. There are possible instances in which much lower average levels of unavailability might still be deceptive to consumers, as where a store substantially under-orders turkeys featured in advertisements placed just before Thanksgiving. The fact that the store may have in stock all of the other items it advertises would not prevent the Commission from examining whether consumers were, in fact, deceived by the ad.

[64] This section first defines the unfair or deceptive practice that the amended Rule addresses as, basically, advertising products for sale at a stated price when the advertised products are not in stock and readily available to customers during the effective period of the advertisement. This satisfies the requirement of the Second Circuit Court of Appeals decision in Katharine Gibbs School, Inc. v. FTC, 612 F. 2d 658 (1979), that the Commission define with specificity in the rule itself the unfair or deceptive acts or practices that the rule prohibits.

[65] 16 CFR 283.3(c) (1986).

At the same time, by allowing grocers greater latitude to advertise items with limited availability, the disclosure amendment should eliminate the costs associated with the current Rule's discouraging advertising of items in limited supply (such as closeout specials, seasonal products and special purchase items), products of interest only in certain neighborhoods and those items with particularly high carrying costs (such as perishables). The amendment should encourage food retailers to disseminate more information to consumers and increase the number of advertised specials on a variety of products, to the benefit of both consumers and food retailers. Moreover, since the cost savings realized through this amendment would be reflected in reduced prices or improved services or both, consumers would realize an additional benefit from the amendment.[66]

C. Defenses: Section 424.2

This section sets out the four defenses to a Rule violation that excuse any failure of a store to have in stock the items they advertise. The first defense—that the advertised products were ordered in adequate time for delivery in quantities sufficient to meet reasonably anticipated demand—is based on a defense to unavailability that was included in the original Rule. Unlike the original Rule, the amended Rule does not require that stores maintain records demonstrating that the order had been made. This defense recognizes that there may be situations where the failure to have advertised items in stock was beyond the store's control.

The amended Rule provides three additional defenses against a charge of unavailability for grocers who offer consumers appropriate alternative compensation—a raincheck, a substitute item of comparable value or other compensation at least equal to the value of the advertised item—for the unavailable item.[67]

By allowing food retailers to offer a raincheck or comparable value substitute when they run out of an advertised item, the amendment should eliminate virtually all of the nonproductive costs associated with compliance efforts under the current Rule.[68] Stores can abandon the overkill measures of stocking excessive inventory or performing duplicative shelf inspections and opt for far less costly measures of providing rainchecks and substitutions which many if not most of them already provide in the ordinary course of doing business. As in the case of the disclosure amendment, the benefit of lowered costs of compliance can then be passed on to consumers.[69] Additionally, by providing for an offer of compensation equal to that of the advertised savings in the event of unavailability, the amendment seeks to ensure that consumers will not be denied the benefit of any bargain advertising on which they relied in making their shopping choice.[70]

IV. Alternatives Considered

A. Maintain the Status Quo

The Commission could choose to take no action and leave the current Rule in place. For all of the reasons already set out in this statement, a majority of the Commission believes that the costs of complying with the original Rule greatly exceed its benefits. The Rule imposes costly burdens on grocers in the form of investment in unnecessary inventory and excessive monitoring and recordkeeping costs. These costs are ultimately passed along to consumers in the form of higher prices or reduced services. Savings that have been realized by consumers are principally the result of reduction in the number of unsuccessful trips made to purchase items that are not in stock. These savings, or benefits, are only a small fraction of the costs that the Rule imposes.

B. Repeal the Rule

Another alternative that the Commission considered was to repeal the Rule and handle individual instances of deceptive advertising of unavailable products on a case-by-case basis. If the Rule were repealed, food retailers should be able to avoid all of the costs that they now incur as a result of the

---

[66] Many members of the retail grocery industry who commented on the proposed amendments felt that this section allows grocers greater flexibility in deciding whether to use limited availability disclosures. They noted that the availability of such disclosures gives retailers opportunities to convey useful information and pass on valuable savings to consumers on a variety of products, the advertising of which is restricted by the stringent availability and disclosure requirements of the current Rule. *See, e.g.*, Comment of the Food Marketing Institute 9 (1985) R–B–58 ("FMI 1985"); Saldin, Tr. 190, 191. Specifically, those who favored the amendment believed that it will encourage food retailers to increase the number and type of products advertised and offer more specials on such products. *See, e.g.*, FMI 1985 at 9; Comment of National Grocers Association 3 (1986) R–E–2 ("NGA 1986"); Saldin, Tr. 190, 191; Comment of Albertson's, Inc. 2 (1986) R–D–2 ("Albertson's 1986"). Secondly, industry representatives supported the fact that the disclosure amendment gives retailers the discretion to use general disclosures in limiting availability, noting that retailers need the flexibility to decide whether to use general or specific disclosures, claiming that the circumstances that prevail when an ad is published are sometimes difficult to predict at the time that the commitment is made to run the ad. *See, e.g.*, Comment of Food Marketing Institute 6–7 (1986) R–E–1 ("FMI 1986"); Comment of the Kroger Co. 2–3 (1986) R–D–3 ("Kroger 1986"); Saldin, Tr. 201, 204.

[67] This policy, it is argued, is well accepted by consumers. *See, e.g.*, Statement of Dr. Timothy Hammonds, Senior Vice President, Food Marketing Institute 5 (1986), HX. 8; FMI 1985, *supra* n. 66 at 11, 12; Hicks, Tr. 255–256. Evidence of consumer acceptance of rainchecks as a remedy for unavailability is on the record. The Market Facts Study found that 60 percent of the consumers questioned felt rainchecks constituted a satisfactory remedy in the case of unavailability. Market Facts, *supra* n. 6 at 32–33. Similarly, a 1980 study conducted by the National Association of Supermarket Shoppers indicated that 67 percent of the respondents found rainchecks to be a sufficient remedy when an advertised item is unavailable. Comment of the National Association of Supermarket Shoppers, Attachment 2 at 6 (1980) R–B–55 ("NASS Survey"). And finally, a 1976 study of consumer behavior with respect to rainchecks by Wilkinson *et al.*, found that 82 percent of shoppers who received rainchecks redeemed them. Moreover, 83 percent of this group indicated they were able to redeem their rainchecks on their first return trip to the store. The remainder of the respondents indicated that no more than two trips were necessary to redeem the raincheck. Statement of Dr. J. B. Wilkinson, Associate Professor of Marketing, University of Akron, at Exhibit 6, 156–57 (1986) HX.

[68] Industry commenters noted that the availability of such a defense would eliminate most of the overkill costs imposed by the Rule's strict availability requirements—in particular the burdensome costs attributable to both over-ordering of inventory and recordkeeping. *See, e.g.*, Statement of Dean Hicks, Vice President, The Kroger Co. at 1, 2 (1986) HX. 8; Hammonds, HX. 1 at 4.

[69] *See, e.g.*, Albertson's 1986, *supra* n. 66 at 1.

[70] Industry representatives emphasized that the amendment achieves a balance between the need to reduce the excessive compliance costs associated with the current Rule and the need to preserve consumer benefits realized under the Rule. *See, e.g.*, FMI 1986, *supra* n. 66 at 1; Comment of Safeway Stores, Inc., 2 (1986) R–D–1 ("Safeway 1986"). They also noted that in permitting such defenses, the proposed Rule would encourage a "sound, pro-consumer business practice," by reinforcing the already well-established policy among grocery retailers of offering the types of compensation provided for in the amendment in the event an advertised item is unavailable. As support for this point, the Food Marketing Institute cited a 1982 survey of its members to determine what type of compensation grocers offer in the event of unavailability, noting that all 341 retailers responding to the survey—regardless of size—had established a policy or program to handle out-of-stocks for advertised items, the most common being issuance of rainchecks (95%), an offer of substitute merchandise (75%) and a combination of a raincheck and substitute offer (48%).

The amended Rule also allows food retailers to offer "other compensation at least equal to the advertised value" whenever advertised items subject to the rule are unavailable. This contemplates that, when reduced price specials are involved, rather than offer rainchecks or substitutions, the retailer might choose to reduce the customer's total bill by the difference between the regular price and the advertised price. Alternatively, under this provision, the retailer might choose to provide the customer with savings coupons for comparable products that, when redeemed, would produce a similar savings gain to the customer.

BEST COPY AVAILABLE

Rule's requirements. Consumers would ultimately benefit to the extent that these costs are no longer passed along to them. Consumers would also benefit from being able to receive more information through advertising about the availability of reduced price specials on products that food retailers do not regularly feature under the current Rule either because they are available in limited quantities or because it is difficult for food retailers to predict demand for them. Increasing the flow of price information to consumers should lower the time costs of shoppers, encourage competition and lower the prices of these goods.

In the Rule's absence, however, food retailers might lack clear guidance on what standards the Commission would use in enforcing the general prohibition on deceptive advertising. In the face of this uncertainty, advertisers might continue to incur some of these costs, for example, by ordering excessive inventory or maintaining records that they would not maintain in the ordinary course of business, costs that would ultimately be passed along to consumers.

Additionally, repeal of the Rule might encourage some food retailers to take advantage of the elimination of specific regulation in the area and engage in practices that are intended to deceive the public since the immediate threat of civil penalties would have been eliminated. While existing market forces would probably hold the number of such perpetrators down, repeal of the Rule might remove a deterrent factor and tempt unscrupulous grocers to risk the reduced consequences of deceptive claims.

Amending the Rule as proposed would eliminate virtually all of the costs of complying with the current Rule and impose no significant new costs.[71] While there are differences in costs savings between amendment and repeal, they are so small as to be *de minimis*. Moreover, the Rule as amended provides the certainty that food retailers may need in order to avoid inadvertent law violations. It also retains the deterrent impact of civil penalties for rule violations. In effect, it reduces costs almost as much as repeal of the Rule would while retaining the positive advantages of having a rule in place. Accordingly, the Commission believes that amending the Rule is preferable to repealing it.

C. Modify the Amendments

Several comments that were received on the proposed amendments contained suggestions for modifying them in ways that the commenters believed would either make them more helpful to consumers or foreclose food retailers from taking advantage of what were perceived to be overly broad exceptions to liability. Additionally, the Presiding Officer recommended several modifications to the proposed amendments to bring about the same result. This section sets forth those suggested modifications and the Commission's conclusions regarding them.

1. Modifications to the Disclosure Amendment

Limited quantity disclosures are intended to provide food retailers with a means for advertising products that may not be available in quantities sufficient to satisfy anticipated demand, and for which rainchecks or substitutions are not possible or practical. A single clear and adequate limited quantity disclaimer applicable to all items featured in an ad serves as a defense to liability under the Rule for unavailability of any single featured item, and relieves the food retailer of any obligation to give out rainchecks or otherwise compensate consumers for the unavailable item. Although it may not be deceptive to use general disclaimers for advertised products that the grocer can readily restock, neither would such action promote informed consumer choice or customer convenience.[72] Such broad general disclaimers fail to inform consumers which items truly were limited in quantity and which were in plentiful supply.

The Presiding Officer recommended a rule amendment that requires that a limited quantity disclosure accompany each individual item to which it applies.[73] Although this approach eliminates the opportunity for grocers to use broad general disclaimers for everything advertised and may be of some value to consumers, there is no evidentiary basis in the record for adopting it. While broad general disclaimers are not as helpful or informative to consumers as more specific ones, there is no evidence that the public is deceived by them. Trade Regulation Rules can only be imposed if they are reasonably necessary to prevent unfairness or deception. Likewise, fencing-in measures may be included in such Rules only if the record demonstrates a likelihood that without them consumers will be deceived or misled.[74] No such record exists here, so the Presiding Officer's proposal cannot be justified.[75] As long as consumers are informed that not all products may be in sufficient supply to meet actual demand, they are on notice that there is some risk of unavailability at that particular store. They will be likely to include that factor among the variables they consider when deciding where to shop. Since it would not generally be deceptive to advertise in this manner, there is no justification for attempting to curtail such advertising through modifying the amendment.

Several commenters also urged adoption of a specific numeric quantity requirement to discourage grocers from using limited quantity disclaimers where their supply of an advertised item is extremely low.[76] Under such a requirement, the food retailer would have to disclose the minimum quantity of items available at each store for any advertised item that was subject to a minimum quantity disclaimer. The Commission has decided not to promulgate such a provision because it would impose costly impediments to using limited quantity disclaimers for

---

[71] One of the assumptions fundamental to the Commission's decision to propose amending the Rule was that the amendments would eliminate virtually all of the industry compliance costs. This assumption has been confirmed by the industry representatives who participated in the Rulemaking. *See* Testimony of Dr. Timothy Hammonds, Senior Vice President, FMI, Tr. at 11, 20–21.

[72] Evidence in the rulemaking record indicates that the larger supermarkets are able to replenish exhausted inventories for most products several time a week, if not daily. *See* Hammonds, Tr. 45, 73–74. Consequently, it does not appear that these stores need to make limited quantity disclosures except in certain exceptional situations such as seasonal closeouts or special purchases. Spokespersons for two leading grocery chains testified, moreover, that limited quantity disclosures would be appropriate only in the limited circumstances described above. *See* Saldin, Tr. 190–191; Hicks, Tr. 243–45, 280–281. One grocer went so far as to say he saw no reason for using limited quantity disclosures for items that a store regularly stocks. *See* Hicks, Tr. 200. Thus, even without a restriction on limited quantity disclosures in an amended rule, it does not appear necessary or likely that retailers will uniformly use the disclosure option for all item advertised.

[73] P.O.R., *supra* n. 14 at 115.

[74] Katharine Gibbs School, Inc. v. FTC, 612 F.2d 658 (2d Cir. 1979), *reh'g denied*, 627 F.2d 758 (2d Cir. 1980).

[75] This approach would not permit grocers any flexibility to use a general disclaimer in circumstances that would not hamper customer convenience. For example, such a requirement might discourage grocers from advertising end-of-season closeout sales or other groups of specials that are indeed available only in limited quantities. Such promotions may feature several items, all of which are limited to supplies on hand. Grocers may wish to run special advertising or highlight a portion of more general advertising to promote such sales. In such circumstances, a single clear and adequate disclosure that is clearly applicable to a readily identifiable set or subset of items would fully inform consumers. Requiring that a disclaimer accompany each item advertised would likely restrict consumers' opportunities to learn of such specials.

[76] *See e.g.*, Comment of Consumers Union 7 (1986), R–H–3 ("CU 1986").

any purpose and consequently frustrate the function of the amendment to increase the advertising of limited quantity items that are not now advertised. Furthermore, such disclosures would not be informative to consumers because stores are likely to understate the minimum quantity available and because consumers would not know how quickly the supply would be exhausted.[77] Finally, they are unnecessary because possible abuses of the Rule's exception for less specific disclosures can be addressed through section 5 of the FTC Act.[78]

Some commenters also suggested that disclaimers concerning availability limited to certain outlets be more specific than the amendment would require. They said that a disclosure declaring only that advertised products are "not available at all stores" does not sufficiently inform consumers of the store locations where such items may be unavailable.[79] The Commission believes, however, that requiring grocers to list all store locations where a particular product can be found (or, in the alternative, where it cannot be found) would consume too much costly advertising space. The current Rule restricts limited outlet disclaimers to notifying consumers of limited availability either by a common location or by a common characteristic, *e.g.*, "not available at stores in Maryland," or "available only in stores with delicatessen departments." However, there was no evidence presented during the rulemaking hearings that consumers are harmed if grocers clearly disclose that "not all items are available at all stores." Consumers confronting that disclaimer are put on notice that certain items may not be carried at all stores and they can call ahead if availability of a particular item is important to their decision as to where to shop.[80]

2. Modifications to the Defenses Amendment

This amendment permits food retailers to defend against a charge of unavailability by offering any one of the alternative forms of compensation, and thereby relieves the food retailer of the obligation to demonstrate that he or she ordered sufficient quantities to meet reasonably anticipated demand. Some commenters recommended modifying the proposed Rule to incorporate a minimum stocking requirement as a pre-condition to the raincheck or comparable value substitute defenses. They argued that this modification would protect consumers against potentially deceptive advertising and assure reasonable levels of availability, while significantly reducing the recordkeeping and inventory costs associated with meeting the "last unit of demand" under the current Rule.[81] Similarly, the Presiding Officer's substitute amendment would impose a proviso that the offer of rainchecks or substitutions would constitute a valid defense only in situations where the food retailer ordered sufficient quantities of the unavailable item to meet reasonably anticipated demand. His revision explicitly deletes the requirement for recordkeeping by the food retailer.[82]

Making the new defenses in an amended Rule conditional upon first ordering or having in stock sufficient quantities to meet reasonably anticipated demand or imposing some other minimum stocking requirement preserves the need for food retailers to continue to overstock and perform monitoring and recordkeeping over and above that which is done in the ordinary course of business. The mere fact that the Presiding Officer's recommendation would remove the specific documentation requirement in the current Rule does not remove entirely the burdens imposed by the Rule. Under his suggested modification, grocers may still reasonably perceive the need to continue some or all of the costly measures they are currently employing or in order to avoid the risk of civil penalty liability.[83] Moreover, other costs could increase whenever the requirement resulted in stores having ordered more inventory than they could sell. The result would be at least a partial frustration of the goal of the proposed amendments—lowering the cost of complying with the Rule. Mandating such pre-conditions to the availability of the raincheck and substitution defenses, then, cannot be justified either to prevent deception—since rainchecks and substitutions will serve as acceptable substitutes for and incentives against unavailability—or to reduce costs.

Finally, such requirements would have the likely effect of imposing costs on an industry that the record evidence demonstrates already has incentives to stock as much inventory of advertised merchandise as is necessary to meet demand. There has never been any evidence to suggest that food retailers engage in systematic and deliberate understocking of advertised items.[84] Nevertheless, there is at least the concern on the part of some commenters that, but for the Rule, some grocers would indeed engage in a form of bait and switch advertising, *i.e.*, advertising attractive prices for items that they knew they did not have in sufficient quantities to meet the anticipated demand. The proposed amendments do not relieve grocers from liability for stockouts that are the result of deliberately understocking advertised items without disclosing that quantities are limited. As the Commission has already observed, such behavior will subject food retailers to liability through administrative or injunctive proceedings under section 5 of the FTC Act. Bait advertising, as defined in the Commission's Guides Against Bait Advertising, would still be actionable under section 5 regardless of whether rainchecks or substitutions were offered.

The amendment gives food retailers, rather than consumers, both the right to choose the form of alternative compensation when an advertised item is unavailable, and the right to determine what constitutes a comparable substitute. Some comments noted that, depending upon the particular circumstances surrounding the purchase, the consumer may have a preference for one type of compensation and should not be forced to accept an undesirable alternative to the advertised item.[85] Other commenters pointed out that allowing food retailers to choose the type of compensation provides them opportunities to substitute lower quality items for the advertised items in order to increase profits.[86]

---

[77] Stores might avoid disclosing their best estimate of actual quantity for fear of inadvertently overstating it.

[78] The Commission agrees that grocers should not use general limited quantity disclaimers to disguise severely restricted quantities of merchandise that will only satisfy the first few customers who seek the items. The amended Rule does not preclude an action for unfair and deceptive advertising under Section 5 of the FTC Act for engaging in such a practice. If there are grocers who may be tempted to employ such tactics, they would still be in violation of Section 5 of the FTC Act for engaging in bait advertising and subject to a Commission enforcement action.

[79] *See, e.g.*, CU 1986, *supra* n. 76 at 7. *See also* Comment of Public Voice for Food and Health Policy 3 (1986) R–H–2 ("Public Voice 1986").

[80] Disclosing more detailed information, such as listing the locations that carry a particular item may well benefit consumers. But the record does not provide a basis for concluding that such a requirement is necessary to prevent unfairness or deception. Stores should recognize the benefits of disclosing that information voluntarily rather than risk annoying potential customers.

[84] *See* 1985 Staff Memorandum, *supra* n. 10 at 4. *See also* 1984 Staff Memorandum, *supra* n. 9 at 9–15.

[85] *See, e.g.*, Comment of California Department of Justice, 3 (1985) R–I–76 ("California 1985"); Comment of the Alaska Office of the Attorney General 3 (1986) R–J–7 ("Alaska 1986"); Comment of Public Voice for Food and Health Policy 3 (1986) R–H–2 ("Public Voice 1986").

In view of these concerns, these commenters suggested modifying the amendment to allow consumers the option of choosing the preferable method of compensation, and in the case of a substitute, the option to decide what constitutes a "comparable" substitute.[87] The Presiding Officer's modified rule would require that, where the unavailable item was one that was regularly stocked, the customer would be given the opportunity to elect to receive a raincheck over any other compensation that the food retailer might offer.[88]

The Commission does not believe that a requirement that the customer have an option between a raincheck and a store designated substitute is necessary. Industry spokespersons were unanimous in indicating that customer satisfaction is the ultimate goal whenever unavailability of advertised products arises; thus, when a customer expresses a preference for a raincheck or substitute item, store managers do their best to accommodate the customer.[89] Given the highly competitive nature of the grocery industry and the considerable and uncontroverted record testimony that stores are motivated to satisfy their customers, there is no reason to doubt this contention. It would appear, therefore, that one-on-one negotiation between the customer and the store is the best means for settling the matter when the customer prefers that the store exercise its raincheck policy instead of its substitution policy.

Another modification suggested by some commenters would require that any food retailer relying on the raincheck defense must reorder the item in question promptly [90] and notify customers when it is again in stock.[91] The Presiding Officer would impose a "reasonable time" requirement for food retailers' redeeming rainchecks.[92]

Such a requirement would be burdensome and complicate Rule compliance.[93] Use of vague terms such as "reasonable time" or "promptly" does not provide needed regulatory certainty in order for food retailers to know when they must resort to extraordinary compliance measures and when they can avoid them. Moreover, there is convincing record evidence that the great majority of supermarket shoppers are able to redeem their rainchecks on the next regular visit to the market.[94] Furthermore, representatives of the grocery industry testified that most supermarkets are able to replenish supplies for most products, if not on a daily basis, certainly within the week.[95] Accordingly, there does not appear to be a need for elaborate standards governing the issuance and redemption of rainchecks. Such requirements, if imposed, would add to the costs without appreciably improving the benefits. Consumers who might have to make a special trip to redeem a raincheck can always call ahead to make sure that the rainchecked item has been restocked.

V. Other Matters

A. Cost-Benefit Analysis

In this section the Commission considers the projected benefits and effects of the amended Rule that it is promulgating.

1. Effect on Consumers

Consumers are likely to benefit from the amended Rule in two principal ways. First, any savings in compliance costs that food retailers realize from this Rule are likely to be passed along to them.[96] Second, by allowing stores to advertise limited-quantity bargain items, the amended Rule permits consumers to receive more price and product information than they received under the original Rule.

More importantly, the amended Rule should not reduce consumer protection. The Market Facts study indicates that the great majority of consumers can and do punish stores if they consistently have too few items available to satisfy demand. This, in conjunction with the Rule's continued requirement that stores have in stock the items that they advertise, should provide substantial incentives to stock those items in adequate quantities. Accordingly, it is unlikely that unavailability levels will rise to any significant degree. What should be eliminated, however, are the excess monitoring and inventory costs that stores pass along to consumers.[97]

2. Effect on Industry Members

Substituting the requirements of the amended Rule for those of the original Rule should result in a substantial net gain for food retailers.[98] The

[94] *See, e.g.,* Ferguson Study, *supra* n. 28 at 545, Figure 2, n. d; Market Facts Study, *supra* n. 6 at 32.

[95] *See, e.g.,* Hammonds, Tr. 73–74; Saldin, Tr. 251.

[96] With regard to savings passed along, it is unlikely that they will be significant to many individual consumers. The annual costs of complying with the original rule were only a few cents, per consumer, per week. However, average annual savings for all shoppers are more significant, exceeding the maximum estimate of consumer benefits by more than $250 million.

[97] The Commission has also taken into consideration how amending this Rule might affect the poor and the elderly. These groups, it is argued, lack the mobility of the general public to punish stores that have high levels of unavailability by shopping elsewhere, and must stretch limited budgets by searching for and buying advertised grocery specials. *See* Comment of New York City Department of Consumer Affairs (1986), R–Q–20. The staff noted, however, that the current Rule may not benefit the poor any more than any other class of shopper. *See,* Final Staff Memorandum to the Commission, September 4, 1987, at 18. The Market Facts Study indicates that the poor are, in fact, less cost conscious with respect to grocery purchases than the average shopper, and, furthermore, that they do not encounter unavailability any more often than other groups. (*Supra* n. 4 at 30.)

On the other hand, record evidence with regard to the shopping habits of the elderly shows that this group is indeed more cost conscious than other shoppers and, therefore, more likely than others to shop for advertised specials. Additionally, they are less likely than others to encounter unavailability, reflecting, perhaps, more diligent efforts to follow-up after finding shelf stock depleted. They are, however, equally as likely as others to find stores with too few items available and considerably less likely than others to shop elsewhere as a consequence. (*Id.* at 38–39.)

Nevertheless, staff noted that rainchecks should serve as adequate substitutes when the elderly encounter unavailability, and, since their immobility locks them into their regular market for shopping advertised specials, they will not have to make special trips to redeem them. Additionally, staff noted that, in most cases, the elderly will be able to rely on shoppers in their regular markets to keep grocers alert to inventory levels lest they lose those more mobile shoppers to competitors. *See* Final Staff Memorandum, *supra* at 16–17.

[98] All of the food retailers that addressed the effect of amendment on their compliance costs agreed that the amendments would reduce these costs significantly. Hammonds, Tr. 21; Kroger Cost Item Chart (1986) HX. 9A, R–LL–1; Saldin, Tr. 173, 218–219. Nevertheless, while food retailers agreed that the proposed amendments would substantially reduce costs, they emphasized that they prefer repeal. *See* FMI 1986, *supra* n. 66, at 9; Comment of the Kroger Co., by Arthur L. Ferguson, Senior Counsel, at 3 (1985) R–B–69; Comment of Albertson's, Inc. 2–3 (1986) R–B–62; Safeway 1986, *supra* n. 70, at 1–2.

amendments would eliminate or reduce over-ordering of advertised items because grocers could (1) offer rainchecks or adequate compensation if demand exceeded what they reasonably expected and (2) use disclosures of limitations on ad items to avoid carrying excessive inventories. Thus, the amendments would allow grocers to eliminate or reduce substantially the costs associated with carrying extra inventories.

Moreover, excess recordkeeping and monitoring costs could be eliminated under the amendments. Instead of conducting audits and compiling records to prove Rule compliance, grocers could use, under the amended rule, a limited quantity disclosure or a raincheck or substitute item policy as a defense to a Rule violation.

A reduction in the number and types of items advertised is an indirect cost of the restrictions imposed by the current Rule. The amendments may also reduce this cost by eliminating the disincentive to advertise items that are in limited supply. For example, grocers could advertise close-outs and other items available in limited supply if they either disclosed the limitation or offered rainchecks or other adequate compensation if supplies ran out.

Although grocers would incur the costs of administering raincheck and substitution policies, the evidence indicates that the need to keep customers satisfied leads many stores to do so in any event. The Food Marketing Institute survey indicates that 94 percent of those grocers surveyed already have a raincheck policy in effect and 75 percent have a substitution policy.[99] Since these policies currently are not defenses to Rule violations, grocers would not use them if they were not cost-effective.[100] Finally, although grocers would incur the cost of ensuring that proper disclosures were made, they would likely incur these costs whether the Rule were repealed or amended.

3. Effect on Small Businesses

The amended Rule should reduce the burdens on small businesses as well as major grocery chains.[101] There is, to be sure, a greater burden the more that a store advertises and the greater the variety of products in the store's inventory. Smaller food retailers are not likely to advertise as frequently as the larger grocery chains. Furthermore, when the smaller food retailers do advertise, they are not likely to feature hundreds of products in their ads. Thus, small businesses are likely to have incurred burdens under the original Rule that are proportional to their size. The same is likely to be true for the amended Rule.

The Small Business Association, however, recommended that grocery stores with ten or fewer employees be completely excluded from coverage under the amended Rule, noting that the difference in compliance costs for the very small grocery store presents an excellent argument for making a regulatory distinction between the two.[102] While this suggestion may have merit, there is little or no evidence on the record as to what the effect of such an exclusion might be.

4. Effect on State Law

Amending the Rule may have some impact on state enforcement of unavailability laws.[103] In approximately half of the states, interpretations of section 5(a)(1) of the FTC Act are considered in interpreting state law.[104] Even in jurisdictions where such is not the case, state courts may look to FTC interpretations on their own initiative. It is also likely that pressure will be exerted on legislatures to bring state law into line with the amended FTC Rule. In a few additional jurisdictions, state law provides that acts or practices that are subject to and comply with rules and regulations or statutes enforced by the FTC or other federal agencies are exempt from state enforcement.[105]

Some states have filed comments that note this outcome and seek to avoid it.[106] The Commission believes, however, that since this Rule, as amended, should result in a net consumer benefit and eliminate costs that are now passed on to consumers, it is appropriate that the defenses that it contains should extend to state and local enforcement to the extent that state or local law requires.

B. Final Regulatory Analysis

The final regulatory analysis [107] of this Rule amendment has been integrated into the Statement of Basis and Purpose, as allowed by statute.[108]

Accordingly, title 16, part 424 of the Code of Federal Regulations is revised to read as follows:

PART 424—RETAIL FOOD STORE ADVERTISING AND MARKETING PRACTICES

Sec.
424.1 Unfair or deceptive acts or practices.
424.2 Defenses.

Authority: 88 Stat. 2193, as amended: 15 U.S.C. 57a(a)(1)(B).

§ 424.1 Unfair or deceptive acts or practices.

In connection with the sale of offering for sale by retail food stores of food, grocery products or other merchandise to consumers in or affecting commerce as "commerce" is defined in section 4 of the Federal Trade Commission Act, 15 U.S.C. 44, it is an unfair or deceptive act or practice in violation of section 5(a)(1) of the Federal Trade Commission Act, 15 U.S.C. 45(a)(1), to offer any such products for sale at a stated price, by means of an advertisement disseminated in an area served by any stores which are covered by the advertisement, if those stores do not have the advertised products in stock and readily available to customers during the effective period of the advertisement, unless the advertisement clearly and adequately discloses that supplies of the advertised products are limited or the advertised products are available only at some outlets.

§ 424.2 Defenses.

No violation of § 424.1 shall be found if:

(a) The advertised products were ordered in adequate time for delivery in quantities sufficient to meet reasonably anticipated demand;

(b) The food retailer offers a "raincheck" for the advertised products;

(c) The food retailer offers at the advertised price or at a comparable price reduction a similar product that is at least comparable in value to the advertised product; or

---

[99] FMI 1986, *supra* n. 66, at 12.

[100] The small percentage of grocers who currently do not have either of these policies in effect would incur only a one time start-up cost in addition to their small ongoing administrative costs. *See* Hammonds, Tr. 34–35.

[101] *See, e.g.,* Hammonds, Tr. 77, 78; Comment of U.S. Small Business Administration at 1, 3, 5 (1986), R–J–2.

[102] *Id.*

[103] *See* 1985 Staff Memorandum, *supra* n. 10 at 28–29.

[104] *Id.*

[105] *Id.*

[106] A number of government officials expressed the general concern that any modification of the Rule could have serious implications for state and local laws, which make specific exceptions or create defenses based on the Rule. *See, e.g.,* Vermont 1986, *supra* n. 91 at 1–2; Comment of Iowa Department of Justice, Attachment at 4 (1986), R–J–4.

[107] The statute requires that the analysis contain (1) a statement of the need for and objectives of the rule; (2) a summary of the issues raised by public comments, a summary of the agency's assessment of such issues, and a statement of the changes made in the rule as a result of those comments; and (3) a description of the significant alternatives to the rule considered and the reasons for rejecting each alternative. 5 U.S.C. 604.

[108] 5 U.S.C. 605(a).

(d) The food retailer offers other compensation at least equal to the advertised value.

Dissenting Statement of Commissioner Calvani

I dissent from the Commission's decision today to amend the Retail Food Store Advertising and Marketing Practices Trade Regulation Rule (the Unavailability Rule). The Commission has acknowledged today that the original Unavailability Rule is not justified, and approved amendments designed to lower its costs to grocers. However, in my view, common sense tells us that in the highly competitive grocery store business, where consumers return week after week to the same store, any supermarket that frustrates its customers through unavailability of advertised items will not long keep those customers. In other words, it is clear to me that existing market forces adequately police unavailability, and that, therefore, no Federal Trade Commission rule is necessary, amended or otherwise. The Commission's action today to retain even an amended Unavailability Rule does not conform to common sense.

Statement of Commissioner Andrew J. Strenio, Jr., Retail Food Store Advertising and Marketing Practices Rule

Although revising the"Unavailability Rule" has a certain intuitive appeal, there is insufficient evidence on the record to conclude that these changes will result in net consumer benefits. Accordingly, I could not support amending the Rule in this manner. However, now that the step has been taken, it is to be hoped that experience will bear out the optimistic expectations of the Commission majority.

BILLING CODE 6750-01-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 240

[Rel. No. 34-27160; File No. S7-3-89]

Sales Practice Requirements for Certain Low-Priced Securities

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Commission is adopting Rule 15c2-6, which imposes sales practice requirements on broker-dealers who recommend purchases of certain low-priced, non-NASDAQ over-the-counter securities to persons who are not established customers. Such broker-dealers are required to make a documented suitability determination regarding the purchaser, and to obtain the purchaser's written agreement to the first three purchases of these securities. The Commission is taking this action in response to the widespread incidence of misconduct by some broker-dealers in connection with transactions in low-priced securities.

EFFECTIVE DATE: January 1, 1990.

FOR FURTHER INFORMATION CONTACT: Robert L. D. Colby, Chief Counsel, (202) 272-2844, or Dan Gray, Attorney, (202) 272-2848, Division of Market Regulation, Securities and Exchange Commission, 450 Fifth Street NW., Mail Stop 5-1, Washington, DC 20549.

SUPPLEMENTARY INFORMATION:

I. Executive Summary

The Commission is adopting Rule 15c2-6 ("Rule") to regulate the sale practices of broker-dealers active in the market for low-priced, non-NASDAQ over-the-counter ("OTC") securities. As a means reasonably designed to prevent fraud, the Rule makes it unlawful for a broker-dealer to sell a security subject to the Rule ("Designated Security") to, or to effect the purchase of a Designated Security by, any person unless (1) the transaction is exempt under paragraph (c) of the Rule, or (2) prior to the transaction, the broker-dealer has (i) approved the purchaser's account for transactions in Designated Securities, and (ii) received written agreement to the transaction from the purchaser. In approving an account for transactions in Designated Securities, a broker-dealer must obtain sufficient information from the purchaser to make an appropriate suitability determination, provide the purchaser with a written statement setting forth the basis of the determination, and obtain a signed copy of the suitability statement from the purchaser.

The scope of the Rule is limited in order to exclude transactions that are less likely to be subject to fraudulent, high pressure sales practices. Application of the Rule is limited to transactions in Designated Securities, which are defined as non-NASDAQ OTC equity securities whose issuers have less than $2,000,000 in net tangible assets. In addition, exemptions are provided in paragraph (c) of the Rule for: (1) Transactions in which the price of the security is five dollars or more; (2) transactions in which the purchaser is an accredited investor or an established customer of the broker-dealer; (3) transactions that are not recommended by the broker-dealer; and (4) transactions by a broker-dealer who is not a market maker in the Designated Security that is the subject of the transaction, and whose sales-related revenue from transactions in Designated Securities does not exceed five percent of its total sales-related revenue from transactions in securities.

II. Introduction

In Securities Exchange Act Release No. 26529 (February 8, 1989), 54 FR 6693 ("Release 34-26529"), the Commission published for comment proposed Rule 15c2-6 ("Proposed Rule") under the Securities Exchange Act of 1934 ("Exchange Act"),[1] which would have required written customer agreement to, and a documented suitability determination for, certain recommended transactions in equity securities that are not registered on a national securities exchange or authorized for quotation in the NASDAQ system, and whose issuers do not meet certain minimum financial standards. These securities are quoted primarily in the "pink sheets," which are daily listings of dealers published by the National Quotation Bureau.[2] Many are low-priced securities commonly referred to as "penny stocks." The Commission has undertaken a concerted campaign to reduce fraud and manipulation in the market for these securities, including the creation of a Penny Stock Task Force to coordinate the Commission's enforcement, regulatory, and educational efforts in this area.[3] As a part of this effort, the Commission published the Proposed Rule to address the widespread incidence of misconduct by some broker-dealers in connection with transactions in low-priced securities. In particular, the Proposed Rule was intended to prevent the indiscriminate use by broker-dealers of fraudulent, high pressure telephone sales campaigns to sell such securities to unsophisticated investors.

The Commission solicited comment on the general design of the Proposed Rule, and whether it was likely to address the targeted broker-dealer misconduct without imposing undue burdens on broker-dealers and issuers. The Commission was particularly concerned with the effect of the Proposed Rule on small business capital formation, and invited comment on whether its requirements would, in practice, impede the public offering of the securities of small businesses, or reduce liquidity in the secondary market for such securities. Conversely, the Commission sought comment on whether the Proposed Rule would have the intended effect of providing greater protections for investors, thus increasing investor confidence and involvement in the securities of small businesses.

The Commission received letters from 123 commenters setting forth their views on the Proposed Rule.[4] In addition, members of the Commission staff spoke directly with eleven broker-dealers in an effort to obtain the comments of broker-dealers who are actively involved in securities issued by small businesses. Commenters generally agreed that serious problems of broker-dealer misconduct existed in the market for low-priced, non-NASDAQ OTC securities, and overwhelmingly supported increased enforcement efforts against broker-dealers and individuals who engaged in such misconduct. Commenters were sharply divided, however, on whether the Proposed Rule was an appropriate regulatory response to the problem.

Commenters supporting the Proposed Rule particularly noted the seriousness and extent of broker-dealer misconduct in the market for low-priced, non-NASDAQ OTC securities, and the need for effective regulatory tools with which to address such misconduct.[5] Commenters who opposed the Proposed Rule did so primarily because of the adverse effect that they believed it would have on the operations of legitimate broker-dealers involved in the securities of small businesses, and, consequently, on capital formation of small businesses.[6]

After carefully considering the views of the commenters, the Commission has determined to adopt Rule 15c2-6,[7] but with significant modifications that expand the exceptions contained in the Proposed Rule, and that streamline the paperwork requirements of the Proposed Rule. With these changes, the Commission believes that Rule 15c2-6 will provide a needed regulatory tool with which to combat abuses involving low-priced securities in the non-NASDAQ OTC market, without imposing undue burdens on legitimate broker-dealers underwriting and trading in the securities of small businesses.[8] By improving investor safeguards, Rule 15c2-6 is intended to increase investor confidence in the market for low-priced securities and to enhance the ability of small issuers to raise capital effectively.

III. Background

A. Broker-Dealer Misconduct Involving Low-Priced Securities

The Commission's proposal of Rule 15c2-6 reflected its growing concern with the widespread incidence of broker-dealer fraud and other misconduct in connection with low-priced stocks that are traded predominantly in the non-NASDAQ OTC market.[9] The commenters, including each of the twenty state regulators who commented on the Proposed Rule, shared the Commission's concern in this area. In a resolution supporting adoption of Rule 15c2-6, the North American Securities Administrators Association stated that "penny stock manipulation schemes and fraudulent cold calling sales tactics are among the most prevalent fraudulent schemes being perpetrated on the investing public, resulting in millions of dollars of losses annually, damaging the efficient operation of the market and reducing the amount of capital available to legitimate business." [10] In another comment letter supporting adoption of Rule 15c2-6, the Attorney General for the State of New York noted that four penny stock brokerage firms had been shut down in New York alone during a three-month period, and stated that "in the wake of these closings, it has become clear that tens of thousands of investors—and mostly unsophisticated investors of modest means—have suffered staggering financial losses, probably totalling several hundred million dollars." [11]

Most of the sales practice abuses involving low-priced securities are conducted over the telephone by broker-dealers engaging in "boiler-room" operations.[12] Improved communications technology has enabled an increasing number of this type of broker-dealer to engage in high pressure sales campaigns on a nationwide basis. An essential aspect of a boiler-room operation is the use of numerous salespersons making hundreds of high pressure cold calls each day to generate sales of low-priced securities to new customers. Cold calls are telephone calls made to persons whose names are drawn from a telephone directory or a membership list. Consequently, many of the persons called with have little investment experience and limited financial resources. The salespersons are trained in high pressure sales tactics designed to elicit a buy decision during the course of a telephone call,[13] and typically are compensated solely by commissions generated by sales of securities. Because many of the persons called are inexperienced investors, they are particularly vulnerable to deceptive sales pitches promising high profits made by salespersons willing to disregard the unsuitability of a security for the purchaser.

Broker-dealers engaging in boiler-room operations frequently choose a low-priced, non-NASDAQ OTC security as their sales product for several reasons. First, low-priced securities sold in large volume can generate enormous profits for broker-dealers. Price spreads in these securities, while small in dollar amount, can be very large in percentage terms. For example, if a stock is quoted at five cents bid and ten cents asked, the spread, while only five cents in amount, constitutes a potential 100% profit per share to the broker-dealer.[14] The

[7] Rule 15c2-6, although denominated under section 15(c) of the Exchange Act, 15 U.S.C. 78o(c), also was proposed, and herein is adopted, under the Commission's authority in sections 3, 10, 15, and 23 of the Exchange Act, 15 U.S.C. 78c, 78j, 78o, 78w.

[8] The effective date of the Rule has been set for January 1, 1990, in order to provide broker-dealers with an opportunity to implement any revised systems and procedures that may be needed to comply with the Rule.

[9] One indication of broker-dealer misconduct in connection with low-priced securities is provided by the increasing number of investor complaints received by the Commission regarding broker-dealers selling low-priced securities. In fiscal year 1988, the Commission received approximately 1500 complaints regarding these broker-dealers. In only the first six months of fiscal year 1989, the Commission has received more than 2400 such complaints.

[14] Indeed, the per share profit to the broker-dealer may be much higher than the spread alone. The "market" for these securities is frequently dominated and controlled by the broker-dealer,

Continued

broker-dealer can attract purchasers to these stocks by touting that a small gain in price will produce large percentage gains in value. Unsophisticated investors may fail to recognize, however, that if they purchase a stock with a 100% spread they will not break even on a sale of their investment until the bid price doubles (assuming that a broker-dealer actually will buy all of the investor's stock at that bid price).

Second, many low-priced securities are issued by smaller, little-known companies that may attract little attention outside that generated by a boiler-room sales campaign. Often, these issuers are not subject to Exchange Act reporting requirements. The scarcity of information about the issuer is further aggravated by the lack of information on transactions in the issuer's securities. The non-NASDAQ OTC market does not have reliable quotation or trade information that the public could use to examine the nature of the market. In contrast, firm quotations are readily available in exchange and NASDAQ markets, and all exchange securities and NASDAQ/National Market System securities have minute by minute trade reports that are disseminated to investors. The availability of this information makes possible ongoing electronic surveillance of exchange and NASDAQ markets by the relevant self-regulatory organization ("SRO"). Many unsophisticated investors may not appreciate the vast difference in the nature, market information, and supervision of the market between the exchange and NASDAQ markets, and the non-NASDAQ OTC market.

B. The Commission's Response

The Commission realizes that only comprehensive action will successfully reduce fraud in the sale of low-priced securities, and therefore has undertaken a broad-based program in this area that includes expanded enforcement efforts, a public education program, and regulatory initiatives. The Commission has begun a concerted enforcement program against broker-dealers and individuals engaging in misconduct in connection with transactions in low-priced securities. Release 34–26529 noted that in 1986 the Commission had initiated more than 25 enforcement actions involving fraud and abuse in the non-NASDAQ OTC market, and that since 1986, the Denver Regional Office alone had initiated more than thirty such actions. Thus far in 1989, the Commission has initiated more than forty additional enforcement actions involving fraud and other misconduct in connection with transactions in low-priced securities,[15] and is investigating many other cases involving similar abuses. In addition, the Commission has cooperated with the SROs, other federal agencies, and state regulatory authorities in proceedings involving penny stock fraud, and these efforts have resulted in a number of criminal prosecutions.[16]

The Commission also has begun a campaign to educate the public concerning the risks of fraud in the market for low-priced securities.[17] Ultimately, the best defense against fraudulent activities by securities salespersons is an informed investing public that recognizes deceptive sales pitches and is not misled. The Commission's public education campaign is intended to increase the number of investors who can guard themselves against fraudulent practices.

Finally, the Commission has developed, and has encouraged the SROs to develop, new regulatory initiatives designed to address fraud and manipulation in connection with transactions in low-priced securities. In a forthcoming release, the Commission will propose amendments to Rule 15c2–11 under the Exchange Act[18] that would emphasize the responsibility of market makers to review information concerning non-NASDAQ OTC securities and take it into account in their market making activities. In addition, the NASD has implemented a program that requires broker-dealers to report to the NASD volume and price information concerning their transactions in non-NASDAQ OTC securities.[19] This program should provide assistance to regulators in monitoring the non-NASDAQ OTC market, and in identifying fraudulent or manipulative trading activities in that market.

In addition to these ongoing efforts, the Commission continues to believe that a comprehensive program to deter fraud in connection with transactions in low-priced securities must address the sales practices of broker-dealers actively involved in selling low-priced securities to new customers. In this connection, the Commission is adopting Rule 15c2–6.

IV. Rule 15c2–6

A. Objectives of the Rule

In adopting the Rule, the Commission has sought to combat the unscrupulous, high pressure sales tactics of certain broker-dealers by imposing objective and readily reviewable requirements that condition the process by which new customers are induced to purchase low-priced stocks. The requirements are intended to assist investors in protecting themselves from fraudulent sales practices, and also to reinforce a broker-dealer's suitability obligations, which historically have been an important standard constraining indiscriminate high pressure sales tactics by broker-dealers.[20]

An essential aspect of high pressure "boiler-room" operations is the constant solicitation of new, and often unsophisticated, customers. The Rule conditions this process by establishing account opening procedures that must be followed before Designated Securities are recommended to unsophisticated new customers. The procedures are intended to provide greater assurance that the broker-dealer will make an appropriate suitability determination by obtaining sufficient information concerning the customer and by considering the customer's previous investment experience, investment objectives, and financial situation.

In addition, the Rule will protect investors from fraudulent sales practices in low-priced stocks in two ways. First, the requirement that the customer agree to purchases in writing provides the customer with an opportunity to make an investment decision outside of a pressured telephone conversation with a salesperson. Boiler room salespersons realize the importance of making a sale while on the telephone and use high pressure tactics to close the sale. The written agreement requirement is intended to remove this pressure for an immediate decision. Second, the account opening procedures require the broker-dealer to provide a copy of the broker-dealer's suitability determination to the customer prior to the customer's commitment to purchase a Designated Security. The customer therefore will have the opportunity to review the determination, and decide whether the broker-dealer has made a good faith attempt to consider the customer's financial situation, investment experience, and investment objectives.

---

thereby permitting arbitrary pricing. In the above example, the broker-dealer may not purchase any securities at its five cents bid. Instead, the broker-dealer may have acquired large amounts of the stock at nominal cost (*e.g.*, one cent per share or less) immediately prior to commencing an intensive sales campaign. Securities acquired for one cent per share and sold at ten cents per share represent a 900% gross profit to the broker-dealer. *See* Chairman's Remarks, *supra* note 3, at 2–9. As noted *infra* note 49, this practice can constitute a violation of SEC and NASD rules.

[15] *See, e.g.*, *SEC* v. *Murray*, SEC Litigation Release No. 12136 (June 27, 1989), 43 SEC Doc. 2309; *SEC* v. *Brownstone-Smith Securities Corp.*, SEC Litigation Release No. 12126 (June 12, 1989), 43 SEC Doc. 2072; In re The David-Maxwell Company, Inc., Securities Exchange Act Release No. 26823 (May 15, 1989), 43 SEC Doc. 1636; In re The Stuart-James Co. Inc., Securities Exchange Act Release No. 26700 (April 5, 1989), 43 SEC Doc. 998; *SEC* v. *Stoneridge Securities, Inc.* (February 13, 1989), 42 SEC Doc. 1047.

[18] 17 CFR 240.15c–11.

[19] *See* NASD Schedules to the By-Laws, Schedule H, NASD Manual (CCH) ¶¶1932–33.

[20] *See* generally Report of Special Study of Securities Markets of the SEC (1963), reprinted in H.R. Doc. No. 95, 88th Cong., 1st Sess. (1963), pt. 1 at 237–40, 302–30 ("Special Study").

The Commission realizes that certain broker-dealers may ignore the requirements of the Rule. The Rule therefore requires records to be kept that will indicate their compliance with each of its provisions. This documentation will enable regulatory authorities to review a broker-dealer's compliance with the Rule, and will provide the basis for simple and direct enforcement actions against broker-dealers that fail to comply. Many commenters, particularly regulatory authorities, noted the value of this aspect of the Rule.[21] For example, the Attorney General for the State of California stated that:

> The proposed rule's effect on enforcement is particularly important. Although existing laws and rules permit prosecution for a variety of unfair and deceptive acts, proving such acts can be so burdensome as to be impossible. This is particularly true where the solicitation is made by telephone. There is no written record, and consumers often have difficulty at a later date remembering exactly what they were told in a telephone conversation. The rule addresses this problem by prohibiting sales and recommendations of designated securities unless the basis for the broker-dealer's suitability determinations is set forth in writing and retained. Enforcement actions can be taken against those who fail to maintain such documentation without the necessity of proving numerous instances of specific misrepresentations or other violations of particular laws.

B. Effect on Small Business Capital Formation

The Commission recognized in proposing Rule 15c2–6 that, while non-NASDAQ OTC securities issued by smaller companies frequently provide the greatest opportunity for abusive sales practice activity, many securities trading in this market are issued by legitimate small businesses that do not meet the qualifications for quotation on NASDAQ. The Commission therefore was concerned that the Proposed Rule not adversely affect these legitimate small issuers, and solicited the views of commenters on this issue.

Many commenters on the Proposed Rule argued that small business capital formation would be harmed by the Proposed Rule. In particular, they maintained that legitimate broker-dealers would not attempt to comply with the paperwork requirements of the Proposed Rule. They asserted that, instead, these broker-dealers would either withdraw entirely from underwriting and making markets in securities subject to the Proposed Rule, or they would limit their activities to dealing with established customers, thus constricting the potential market for these securities. As a result, they argued that capital formation by those small businesses whose securities were no longer handled by broker-dealers would be impaired, and the holdings of current stockholders of such small businesses would be reduced in value.

The Commission considers legitimate small business capital formation to be of great importance,[22] and has considered carefully the effect of the Rule on small business capital formation, taking into account the views of the commenters. While many small businesses might have been able to avoid the effects of the Proposed Rule by raising capital through informal investors[23] and venture capital, the Commission is concerned that the rule as proposed could have reduced the access of legitimate small issuers to the public markets.[24] Accordingly, the Commission has modified the Proposed Rule in several respects to limit its effect on small business capital formation.

First, the Commission has streamlined substantially the paperwork requirements of the Rule. Broker-dealers are no longer required to obtain a manually-executed statement from customers setting forth a number of specific items of information, as required in the Proposed Rule. Instead, a broker-dealer can obtain over the telephone the customer information it needs for a responsible suitability determination, record its basis for this determination, and then send the information and this determination to the customer for verification. The Commission believes that these procedures are more in accordance with responsible industry practice than the proposed procedures, and that they substantially reduce the paperwork burden discussed by the commenters.

Second, the Rule provides that offerings of securities approved for trading on an exchange or NASDAQ upon notice of issuance are excluded from the Rule.[25] The Proposed Rule did not make clear that offerings of securities scheduled to be traded on an exchange or NASDAQ after the offering, including the initial public offerings of many small issuers, would not be subject to the Proposed Rule. The current requirements for qualification on NASDAQ are relatively low, including total assets of $2 million and capital and surplus of $1 million. Consequently, the initial public offerings of small businesses that are going to be traded on NASDAQ will not be covered by the Rule.[26]

---

[21] *See, e.g.*, State of California, Attorney General ("California"); State of Colorado, Division of Securities ("Colorado"); New Jersey; NASAA.

[22] The Commission has taken numerous actions within the last decade to facilitate the issuance of securities by small businesses, such as promulgating Regulation D, 17 CFR 230.501–230.508, under the Securities Act of 1933, 15 U.S.C. 77a–77aa ("Securities Act"), which provides exemptions from registration that are helpful to small businesses. The Commission also adopted Form S–18, which provides a simplified registration process for issuers raising less than $7.5 million. *See* Securities Act Release No. 6049 (April 3, 1979), 44 FR 21567. Furthermore, the Commission has increased the asset level that triggers reporting requirements under section 12 of the Exchange Act from $1 million to $5 million. *See* 17 CFR 240.12g–1. Each of these initiatives was intended to lower the costs and simplify the process of small business capital formation. In addition, the Commission annually holds the Government-Business Forum on Small Business Capital Formation in order to obtain a wide range of views on initiatives that would facilitate small business capital formation.

[23] *See infra* note 24.

[24] In weighing the effect of the Rule on small business capital formation, the extent to which the public securities markets provide capital to small businesses must be considered. The U.S. Small Business Administration has indicated that approximately 75% of the capital for small businesses is provided by the operators of the business and their families, and by informal investors—those who invest in small businesses without the intermediation of financial professionals. The other 25% of capital for small businesses is provided by public investors and professional venture capitalists. *See* Text of Remarks of Frank S. Swain, Chief Counsel for Advocacy, U.S. Small Business Administration, in U.S. Securities and Exchange Commission, Final Report of the Seventh Annual Government-Business Forum on Small Business Capital Formation, appendix F (1989).

[25] The Rule excludes securities registered on a national securities exchange that makes transaction reports available pursuant to Rule 11Aa3–1 under the Exchange Act. 17 CFR 240.11Aa3–1.

[26] *Cf.* Rule 174(d) under the Securities Act, 17 CFR 230.174(d), which substantially reduces the dealer prospectus delivery requirement for securities that become qualified for exchange listing or NASDAQ authorization immediately upon issuance.

Third, the Commission has enabled additional issuers to qualify for an exclusion from the Rule by the reformulation of the issuer financial standards in the Proposed Rule. The Rule's definition of Designated Security excludes securities issued by companies with net tangible assets in excess of $2 million. This standard compares with the $10 million total assets and the $8 million capital and surplus alternative standards contained in the Proposed Rule. The Commission's review indicates that a substantial number of issuers will meet the net tangible assets standard that would not have met any one of the three standards in the Proposed Rule.

Fourth, as discussed below,[27] the Rule contains a new exemption for transactions in Designated Securities at prices of five dollars or more. Thus, issuers can avoid perceived adverse effects of the Rule by adjusting their capital structure and setting the offering price for their securities at five dollars or more, thereby reducing the opportunities for abusive sales practices in their securities. While the five dollar price exemption may create a risk of circumvention of the Rule's requirements, the Commission believes that this risk is more than outweighed by the benefits of providing issuers with greater control over the application of the Rule to their securities.

Finally, as discussed at greater length below, the Rule contains a number of other changes that will reduce its impact on broker-dealers, and, indirectly, its effect on small business capital formation. In particular, the definition of the type of customer excluded from the Rule has been reformulated in response to comment. All persons who have been customers of a broker-dealer for over a year are excluded. Moreover, once a customer is exempted from the Rule, the customer is permanently exempted with respect to that broker-dealer, thereby simplifying broker-dealer compliance procedures. Consequently, the Commission believes that the reformulated exemption for established customers will be more useful to broker-dealers and further limit the Rule's impact on their operations.

The Commission believes that the changes incorporated in the Rule substantially reduce the Rule's effect on legitimate broker-dealers and issuers. The Commission also believes that the significant potential for sales practice abuse and manipulation in connection with the transactions covered by the Rule justifies the Rule's adoption as modified.

V. Description of the Rule

A. Scope of the Rule

The Rule generally provides that any broker-dealer who sells a Designated Security to, or effects the purchase of a Designated Security by,[28] any person must comply with the account approval and written agreement requirements of the Rule, unless the transaction qualifies for one of the exemptions set forth in paragraph (c) of the Rule.[29] The major limitations on the scope of the Rule are its restriction to Designated Securities and its exemption of: (1) Transactions at prices of five dollars or more; (2) purchasers who are established customers or accredited investors; (3) transactions that do not involve a recommendation; and (4) broker-dealers who engage in limited activities in Designated Securities.

1. Designated Security

A Designated Security is defined in the Rule as any equity security other than a security: (1) Registered, or approved for registration upon notice of issuance, on a stock exchange that makes transaction reports pursuant to Rule 11Aa3–1 under the Exchange Act; (2) authorized, or approved for authorization upon notice of issuance, for quotation in the NASDAQ system; (3) issued by an investment company registered under the Investment Company Act of 1940; (4) that is an option issued by The Options Clearing Corporation;[30] or (5) whose issuer has net tangible assets in excess of $2,000,000, as demonstrated by financial statements dated less than fifteen months previously that the broker or dealer has reviewed and has a reasonable basis for believing are true and complete in relation to the date of the transaction with the customer, and, for issuers other than foreign private issuers, that are the most recent financial statements for the issuer that have been audited and reported on by an independent public accountant in accordance with the provisions of Regulation S–K.[31] The three major components of the definition therefore are its inclusion of all equity securities, its exclusion of securities traded on an exchange or NASDAQ, and its exclusion of issuers with more than $2 million in net tangible assets.

a. *Equity Security.* Several commenters indicated that the definition of a Designated Security in the Proposed Rule encompassed several types of equity securities other than corporate stock that did not rise the regulatory concerns to which the Rule was addressed.[32] In particular, they said that interests in limited partnerships, real estate investment trusts ("REITs"), non-convertible preferred stock, certain types of asset-backed securities, and the securities of acquisition vehicles should not be covered by the Rule. They noted that these types of securities have not been subject to the sales practice and manipulation abuses that characterized the market for low-priced corporate stocks.[33]

The Commission concurs with the views of these commenters that the Rule generally should not apply to these types of securities, but is concerned that an exclusion from the Rule for these securities not create a loophole for unscrupulous broker-dealers. Rather than exempting entire classes of equity securities or all securities offerings made pursuant to registration or an exemption from registration under the Securities Act, as some commenters suggested, the Commission has exempted from the Rule transactions in which the price of the Designated Security is five dollars or more, as more fully discussed below.[34] As noted by the commenters, limited partnership interests, REITs, non-convertible preferred stock, asset-backed securities, and similar securities generally are priced at far more than five dollars.[35]

The Commission also solicited comment in Release 34–26529 on whether the definition of Designated Security should be expanded to include debt securities. Several commenters believed that the Proposed Rule should apply to transactions in debt securities.[36] They stated that debt securities were subject to the types of sales practice abuses to which the Proposed Rule was addressed, and believed that a potential loophole in the Proposed Rule would be created if debt were excluded. Other commenters, however, indicated that sales practice abuses were not prevalent in connection with transactions in debt securities, and did not believe that the Proposed Rule should be expanded to cover debt securities.

The Commission has determined not to include debt transactions within the Rule at this time. Although there is evidence that boiler room abuses can occur in connection with debt transactions,[37] such abuses do not appear to be of the same nature or to have occurred with the same frequency as abuses in connection with equity transactions. Consequently, the Commission does not believe that the benefits to be gained by including debt transactions would justify the costs of imposing the sales practice requirements of the Rule. The Commission will continue to monitor, however, whether the sales practices of broker-dealers regarding debt securities require special regulatory treatment, such as application of the Rule.

b. *Exchange and NASDAQ Securities.* The definition of Designated Security in the Proposed Rule excluded securities that are registered on an exchange or authorized for quotation on NASDAQ. Release 34–26529 noted that transactions in these securities were subject to the protections of trading in markets that had, at a minimum, real time quotation reporting and extensive surveillance systems in place. The Release requested comment, however, on whether the Proposed Rule should apply to the securities of all issuers who did not meet the minimum financial standards in the Proposed Rule, regardless of the market in which they were traded.

Several commenters specifically supported the exclusion from the Proposed Rule of exchange and NASDAQ securities.[38] Other commenters, however, believed that the Proposed Rule should apply to all transactions in securities issued by companies not meeting the Proposed Rule's minimum financial standards, regardless of whether they were traded on an exchange or NASDAQ.[39] These commenters felt that despite the protections provided by an organized and visible market, many stocks of smaller issuers involved the potential for sales practice abuses, and that investors in these stocks could benefit from the protections provided by the Proposed Rule.

The Commission has retained the exclusion of exchange and NASDAQ securities from the Rule,[40] although it recognizes that sales practice abuses and manipulations similar to those in the non-NASDAQ OTC market also can occur in exchange and NASDAQ markets, particularly with respect to NASDAQ securities that are not designated as National Market System securities and subject to last sale reporting. At this point, however, the Commission believes that the exchange and NASDAQ transaction reporting and surveillance systems operated by the SROs provide the basis for sufficient monitoring and prosecution of fraudulent activities, without the imposition at this time of the requirements of the Rule. In addition, issuers of securities traded on an exchange or NASDAQ must comply with increased corporate disclosure requirements.[41] Moreover, an issuer whose securities trade on an organized, visible market is more likely to be followed by professional securities analysts and the public, with greater opportunity for efficient pricing of the issuer's securities. The Commission expects the SROs to join it, however, in closely monitoring for fraudulent sales practice activities in exchange and NASDAQ markets following effectiveness of the Rule to prevent the transfer of such activities into these markets.

Finally, several smaller broker-dealers contacted by members of the Commission staff indicated their concern that initial public offerings of securities should not be considered Designated Securities if, upon completion of the offering, they would be traded on an exchange or NASDAQ. The Commission agrees, and has included express language in the Rule clarifying that a security approved for trading on an exchange or NASDAQ upon notice of issuance will be excluded from the Rule.

---

[27] *See infra,* text accompanying notes 46–51.

[28] The Rule makes it unlawful both to sell and to effect purchases of Designated Securities in order to clarify that both principal and agency transactions are covered by the Rule.

[29] The organization of the Rule is somewhat changed from that of the Proposed Rule to reflect more clearly the transactions to which the rule applies.

[30] Sales of these options already are subject to special suitability and risk disclosure requirements under Commission and SRO rules. *See, e.g.,* 17 CFR 240.9b–1; CBOE Rules, ch. IX, CBOE Guide (CCH) ¶¶ 2301–23; NASD Rules of Fair Practice, Appendix E, NASD Manual (CCH) ¶ 2184.

[31] 17 CFR 210.2–02. In the event the issuer is a foreign private issuer, the financial statements must be the most recent financial statements for the issuer that have been filed with the Commission; furnished to the Commission pursuant to 17 CFR 240.12g3–2(b); or prepared in accordance with generally accepted accounting principles in the country of incorporation, audited in compliance with the requirements of that jurisdiction, and reported on by an accountant duly registered and in good standing in accordance with the regulations of that jurisdiction.

[32] The term "equity security" is defined in section 3(a)(11) of the Exchange Act, 15 U.S.C. 78c(a)(11), as "any stock or similar security; or any security convertible, with or without consideration, into such a security, or carrying any warrant or right to subscribe to or purchase such a security; or any such warrant or right; or any other security which the Commission shall deem to be of similar nature and consider necessary or appropriate, by such rules and regulations as it may prescribe in the public interest or for the protection of investors, to treat as an equity security."

Rule 3a11–1, 17 CFR 240.3a11–1, defines the term "equity security" to include "any stock or similar security, certificate of interest or participation in any profit sharing agreement, preorganization certificate or subscription, transferable share, voting trust certificate or certificate of deposit for an equity security, limited partnership interest, interest in a joint venture, or certificate of interest in a business trust; or any security convertible, with or without consideration into such a security, or carrying any warrant or right to subscribe to or purchase such a security; or any such warrant or right; or any put, call, straddle, or other option or privilege of buying such a security from or selling such a security to another without being bound to do so."

[33] The commenters noted that offerings of real estate securities are subject in many states to the guidelines of the North American Securities Administrators Association regarding disclosure, suitability, and recordkeeping. *See* NASAA Statement of Policy on Real Estate Programs, NASAA Reports (CCH) ¶¶ 3601–10. Also, offerings of direct participation programs are subject to disclosure, suitability, and recordkeeping standards under NASD rules. *See* NASD Rules of Fair Practice, Appendix F, NASD Manual (CCH) ¶ 2192. Commenters also indicated that, because of federal income tax considerations, limited partnership interests generally were either traded on an exchange or NASDAQ, or were illiquid because of restrictions on transferability. Finally, commenters noted that the minimum sales price of interests in partnership offerings usually ranged from $2500 to $5000, far higher than the price of most non-NASDAQ OTC stocks.

[34] *See infra,* text accompanying notes 46–51.

[35] In addition, in the event that a type of security generally is priced at less than five dollars, is not otherwise excluded from the Rule, and does not raise the concerns to which the Rule is addressed, the Commission retains general exemptive authority pursuant to paragraph (c)(5) of the Rule that will enable it to provide relief in specific situations.

[36] One commenter suggested that the Rule should apply to any secondary market security if competitive price information was not readily available to the public on an instantaneous basis.

[37] *See, e.g.,* Mitchell, Fast-Talking Brokers in Little Rock Target Small-City Treasuries, Wall St. J., April 12, 1989, at A1.

[38] In addition, one commenter suggested that, if an ADR for a foreign security was traded on an exchange or NASDAQ, then the underlying security should also be excluded from the Rule. The Toronto Stock Exchange ("TSE") commented that the definition of Designated Security should not include securities listed on the TSE. It noted that companies were required to meet minimum requirements to be listed on the TSE, and also that companies listed on the TSE were subject to the same kinds of public reporting and timely disclosure requirements that are imposed by exchanges in the United States. The Commission believes that the $2 million net tangible assets exclusion and the five dollar price exemption will except most foreign securities broadly traded in the non-NASDAQ OTC market. For foreign securities that do not qualify for these exclusions, the Commission has retained general exemptive authority under paragraph (c)(5) of the Rule to provide relief in appropriate situations.

[39] Two other commenters felt that the Rule should apply to securities authorized for quotation on NASDAQ, but which did not qualify for designation as National Market System ("NMS") securities.

[40] The Rule excludes securities registered on a national securities exchange that makes transaction reports available pursuant to Rule 11Aa3–1 under the Exchange Act, 17 CFR 240.11Aa3–1. The Commission believes that exchange-listed securities exempt from the Rule at a minimum should be subject to quotation and last sale reporting. Because this definition would not cover options traded on the Chicago Board Options Exchange, options issued by The Options Clearing Corporation are excluded separately from the definition of a Designated Security.

[41] *See, e.g.,* NASD Schedules to the By-Laws, Schedule D, pt. II, section 1, NASD Manual (CCH) ¶ 1803.

c. $2,000,000 Net Tangible Assets. The definition of a Designated Security in the Proposed Rule excluded securities whose issuer met any one of the following three financial standards: (1) Annual net income in excess of $300,000 in the most recently completed fiscal year or in two of the last three most recently completed fiscal years; (2) capital and surplus in excess of $8,000,000 at the end of the most recently completed fiscal year; or (3) total assets in excess of $10,000,000 at the end of the most recently completed fiscal year. The Commission solicited comment on whether these standards should be raised or lowered, or whether they should be eliminated altogether so that the Proposed Rule would apply to all pink sheet stocks.

The comments split widely on the appropriateness of the issuer financial standards contained in the Proposed Rule. Some commenters believed that the standards should be eliminated altogether so that the Proposed Rule would apply to all pink sheet securities. These commenters believed that abuses occurred largely because of lack of information in the pink sheet market, and therefore the profitability, capitalization, or size of the issuer was not sufficient to reduce the risk of fraud in the market. Conversely, several commenters believed that the issuer financial standards were too high, and would include many companies of sufficient size and capitalization that abuses would not occur in their securities. Finally, other commenters objected to the Rule's issuer financial standards as a matter of principle, suggesting in particular that the Commission should be more concerned with the amount of information available about a company, rather than its financial characteristics. In this regard, they felt that the Rule should exclude reporting companies under section 12 of the Exchange Act.[42]

In addition, several commenters indicated that the net income and total assets standards were manipulable, and should be eliminated or modified. The NASD, NASAA, and ABA/Broker-Dealer Subcommittee stated that the net income standard could be circumvented easily by including income from extraordinary items, and suggested that the standard only should include income from continuing operations. NASAA also noted that the net income standard could lead to the use of accounting devices to recognize income in one year and expenses in another in order to meet the standard. Another commenter suggested that the net income standard should be met by an issuer for at least two years in order to establish a substantial operating history.

Several commenters also believed that the total assets standard was manipulable. In particular, they indicated that an issuer could easily increase its total assets by increasing debt, without adding any real financial strength to the issuer. Also, NASAA noted that an issuer's intangible assets could be used to meet the total assets standards, and that an issuer's securities could be excluded from the Rule even though it had a negative net worth if intangible assets were excluded. In this regard, the NASD suggested changing the total assets standard to a net tangible assets standard, noting that this standard would exclude goodwill, and therefore, be more meaningful and less subject to circumvention.

The Commission's intent in including the financial standards in the Proposed Rule was not to differentiate among issuers on the basis of investment merit. Rather, these standards were intended to exclude from the Proposed Rule issuers of such size that they were not commonly subject to the types of sales practice abuses targeted by the Proposed Rule.

After considering the views of the commenters, the Commission has consolidated the issuer financial standards contained in the Proposed Rule into a single net tangible assets standard.[43] This standard is intended to exclude larger issuers whose securities are unlikely to be the vehicles for sales practice abuse and manipulation, even though traded outside of an organized market at prices below five dollars. In view of the comments, the total assets and the net income standards have been deleted from the Rule. The capital and surplus standard has been replaced by a net tangible assets standard in order to exclude intangible assets, which may be inflated improperly despite the audited financial statement requirement. In maintaining a relatively high financial standard for Designated Securities in the Rule, the Commission's sole purpose is to retain the intended screening function, and not to imply anything about the quality of the issuers covered by the standard.

In light of the shift to net tangible assets and commenter's suggestions that the proposed standards could be lowered and still properly identify issuer securities which were substantially less likely to be subject to fraudulent boiler room practices, the Commission has set the net tangible asset standard at $2,000,000. The Commission believes that the companies historically used in penny stock manipulations rarely have had $2,000,000 in net tangible assets. While the Rule's net tangible assets standard is higher than the $1,000,000 capital and surplus qualification standard for NASDAQ suggested by some commenters, it is substantially lower than the $4,000,000 net tangible assets standard for designation as a National Market System security suggested by others. The Commission believes that the absence of the protections of trading in a market with visible quotations, transaction reporting, and electronic surveillance capabilities justifies having standards in the Rule higher than those for qualifications on NASDAQ.

Although the Commission in most circumstances looks to full and accurate disclosure rather than prescriptive rules to protect investors, the Commission does not believe that issuer disclosure is sufficient protection against the gross misrepresentations in the sales process often characteristic of the market for low-priced, non-NASDAQ OTC securities.[44] In particular, the Commission does not believe that the disclosure provided by Exchange Act reporting companies constitutes by itself an adequate substitute for the prophylactic measures of the Rule. Broker-dealers using high pressure sales tactics often may misstate information available to the market, particularly if broker-dealers are directly soliciting unsophisticated investors at a time when they have not received any information on the security. Moreover, the markets for many low-priced, non-NASDAQ OTC securities are dominated by a single market maker and, as a result, the pricing of the security may not reflect the available public information.

All of the commenters who addressed the requirement that compliance with the Proposed Rule's financial standards be demonstrated by financial statements certified by an independent public accountant believed that it was an appropriate requirement for issuers who sold their securities to the public. Accordingly, the Commission has retained the requirement in the Rule, with technical revisions.[45]

2. Price of Security

The Proposed Rule did not differentiate among securities based on market price, although Release 34–26529 noted that Designated Securities often were traded at less than one dollar per share. In addition, Release 34–26529 solicited comment on whether the Proposed Rule's definition of Designated Security was appropriately tailored to include those securities that presented the problems to which the Proposed Rule was addressed without unnecessarily including securities that were not generally the vehicles used for fraudulent high pressure activity. Several commenters suggested that the Proposed Rule should include a price per share limitation. For example, the NASD concluded that a price standard would make the Proposed Rule more workable in practice and aid the broker-dealer in the initial evaluation of whether a security was a Designated Security.

The Commission has determined to provide an additional exemption from the Rule for transactions in which the price of the security is five dollars or greater.[46] This exemption will allow issuers to avoid perceived adverse effects of the Rule by adjusting their capital structure and setting the offering price for their securities at five dollars or more. Therefore, issuers of equity securities, whether common stock, preferred stock, limited partnership interests, or other equity securities, will have greater control over the application of the Rule to their securities. The price exemption also has the benefit of being easily monitored by broker-dealers. Broker-dealers who wish to underwrite and trade in the securities of small, non-NASDAQ OTC issuers without being subject to the Rule and without implementing extensive compliance procedures can do so by restricting their activities to securities priced at five dollars or more.

Smaller issuers who set the offering price for their shares at five dollars or more in order to avoid application of the Rule may be limited in the number of shares that they can issue, which may limit somewhat secondary trading in their securities. A five dollar price standard is consistent, however, with the Uniform Limited Offering Registration ("ULOR") project developed by the State Regulation of Securities Committee of the American Bar Association. ULOR is intended to provide a streamlined procedure for small businesses raising less than $1,000,000 in offerings exempt from registration under Rule 504 of Regulation D.[47] In order to prevent abuses in the secondary market for securities issued pursuant to ULOR, issuers cannot use ULOR for offerings in which the offering price of common stock, or the exercise price or conversion price of any warrants, options, rights, or convertible securities included in the offering, is less than five dollars.[48]

The Commission intends to monitor closely the use of the price exemption. While most abuses that have occurred in the non-NASDAQ OTC market have involved securities trading at less than five dollars, the Commission is aware of the risk that the price exemption could result in increased attempts to employ abusive sales practices and manipulative schemes in stocks trading above five dollars. Nevertheless, the Commission believes that this risk is outweighed by the substantial benefits of a price exemption.

The Commission does not believe that the price exemption will result in widespread circumvention of the Rule, because stocks priced at five dollars or more appear to be less susceptible to manipulation and high pressure sales campaigns. First, the spreads at this price level are generally much smaller. While it is common to see quotes for securities at five cents bid and ten cents asked,[49] instances of 100% price spreads in stocks priced in excess of five dollars are rare. Moreover, a five dollar spread would be much more likely to attract notice and increase investor caution, even on the part of unsophisticated investors. Second, low-priced stocks often are sold through a sales pitch that is dependent upon their initial low price. Broker-dealers selling low-priced, speculative stocks frequently promise high profits, arguing that high percentage returns will result from only a few cents rise in price. For example, a high pressure salesperson touting a five cent stock may emphasize that a mere five cent rise in price will produce a 100% return on investment. This tactic is less effective with respect to stocks selling for five dollars or more.

The Commission is aware that issuers of low-priced securities often raise capital by issuing units containing a variety of securities components, for example, multiple shares of common stock and warrants for the purchase of the stock. In these situations, the unit and the individual components of the unit would be considered separately under the Rule's criteria for a Designated Security. To qualify for the price exemption, each must be priced at five dollars or more. However, to avoid the need to assign a price to warrants, options, rights, and the conversion option of a convertible security, the value of these components of a unit would not be considered in determining whether a transaction in the unit was covered by the Rule. Thus, units would be subject to the Rule unless (1) the unit price divided by the number of shares (or interests, in the case of a partnership or trust) included in the unit was five dollars or more; and (2) the exercise price of any warrant, option, or right, or the conversion price of a convertible security, included in the unit was five dollars or more. Once the components of a unit begin trading separately, both the transaction price and the exercise price of warrants, options, or rights, or the conversion price of convertible securities, would have to be five dollars or more to qualify for the five dollar exclusion.

---

[42] 15 U.S.C. 78l

[43] Regulation S–X currently requires issuers to state separately each class of intangible assets that is in excess of five percent of the issuer's total assets. 17 CFR 210.5–02. The types of assets that constitute intangible assets are discussed in Accounting Principles Board Opinion No. 17 (August 1970).

[44] As the Special Study noted, "no amount of disclosure in a prospectus can be effective to protect investors unless the securities are sold by a salesman who understands and appreciates both the nature of the securities he sells and his responsibilities to the investor to whom he sells." Special Study, *supra* note 20, pt. 1, at 556.

[45] One commenter suggested modifying the Rule to make clear that an issuer's financial statements would continue to qualify under the Rule in the period between the end of a fiscal year and the time that new statements became available, and that suggestion has been incorporated into the Rule. In addition, the audited financial statement requirement references Regulation S–K, 17 CFR 210.2–02, in order to provide greater guidance as to the requirement. Finally, the standard of broker-dealer review of an issuer's financial statements has been phrased in affirmative terms rather than the "double negative" phrase used in the Proposed Rule to provide greater clarity as to the standard. The Commission notes, for example, that the existence of an unqualified opinion by an independent public accountant would constitute, in the absence of information to the contrary, a reasonable basis for a broker-dealer to believe that the financial statements were true and complete.

[46] A five dollar price criterion has been adopted in several other contexts involving securities regulation. *See* 12 CFR 220.17(a)(2) (five dollars per share requirement for inclusion on list of OTC margin stocks); Washington Administrative Code section 460–17A–030(d), *Blue Sky Law Reporter* (CCH) ¶61,588C (five dollars per share requirement for offerings pursuant to Uniform Limited Offering Registration); NASD Schedules to the By-Laws, Schedule D, pt. III, section 2, *NASD Manual* (CCH) ¶1809 (five dollars per share requirement for designation as National Market System security).

[47] 17 CFR 230.504. For a description of the purposes and requirements of ULOR, see J. Harris, S. Keller, G. Stakias & M. Liles, Financing the "American Dream"—Small Business and the ULOR Project, 43 Bus. Law. 757, 762–63 (1988).

[48] The U.S. Small Business Administration and the Washington State Business Assistance Center submitted comments recommending that ULOR offerings be excluded from the Proposed Rule, and noting the utility of the five dollar price limitation in preventing abuses in ULOR securities.

[49] *See supra* note 14, and accompanying text. The Commission notes that, in dominated or inactive markets, market makers generally must calculate mark-ups on the basis of actual transactions, and not on quotations. *See In re* Alstead, Dempsey & Company, Securities Exchange Act Release No. 20825 (April 5, 1984), 30 SEC Doc. 258. Undisclosed excessive mark-ups constitute violations of NASD rules and Rule 10b–5 under the Exchange Act, 17 CFR 240.10b–5.

As noted previously, several commenters believed that offerings of securities pursuant to registration or an exemption from registration under the Securities Act should be excluded from the Proposed Rule. In particular, they believed that the disclosure provided by the issuer in the registration process would constitute an adequate safeguard against the abuses to which the Proposed Rule was addressed. As noted above,[60] however, the Commission is not persuaded that issuer disclosure provides an adequate safeguard against the abusive broker-dealer sales practices present in this market. Moreover, the Commission believes that the price exemption along with the exclusion of offerings that are approved for exchange or NASDAQ trading substantially addresses the concerns of many of these commenters. With respect to offerings of securities below five dollars per share that are not approved for exchange or NASDAQ trading, the Commission believes that the requirements of the Rule are warranted in view of the substantial potential for sales practice abuse, even when a disclosure document is available.[61]

3. Established Customers and Accredited Investors

The Proposed Rule excluded sales to accredited investors, as defined in Regulation D under the Securities Act,[62] and regular customers of a broker-dealer. A regular customer was defined as any person for which the broker-dealer, or a clearing broker on behalf of such broker-dealer, maintains a margin account or a cash account as provided for in Regulation T of the Federal Reserve Board, and who has purchased in either or both of such accounts the securities of three or more different issuers on three separate occasions within the preceding two years. Release 34–26529 indicated that the definition was intended to exclude persons with whom the broker-dealer previously had established a business relationship, and who presumably had the opportunity to become acquainted with the nature and business conduct of the broker-dealer.

The Proposed Rule's definition of regular customer was criticized by commenters for several reasons. First, several commenters believed that the definition would permit inappropriate circumvention of the Proposed Rule's requirements. For example, Merrill Lynch stated that an unscrupulous broker-dealer could convince a client to purchase three small positions in securities other than Designated Securities, such as money market funds or Treasury securities, immediately prior to commencing aggressive cold calling activities in Designated Securities. Second, commenters suggested that merely making three purchases of any security in an account with a broker-dealer did not necessarily mean that the customer was familiar with the reputation and business conduct of that broker-dealer with respect to Designated Securities. Finally, commenters believed that legitimate broker-dealers would have difficulty implementing systems to monitor compliance with the regular customer exclusion.

To address these problems, several commenters suggested that the definition of regular customer should focus on the length of time that a customer had an account with a broker-dealer, rather than the number of transactions in the account. They believed that focusing on the age of the account would provide more assurance that a customer was familiar with the nature and business practices of a broker-dealer.

The Commission agrees with the concerns of these commenters and has reflected their suggestions in the Rule. The term "regular customer" has been changed to "established customer" to reflect the elimination of the requirement that a customer have recent activity in the account to qualify for an exclusion from the Rule. Instead, once a customer of a broker-dealer qualifies as an established customer, the customer's transactions with the broker-dealer will be permanently excluded from the Rule. Paragraph (d)(3) of the Rule defines an established customer as any person for whom the broker-dealer, or a clearing broker on behalf of a broker-dealer,[63] carries an account, and who in such account has (1) effected a securities transaction, or made a deposit of funds or securities, more than one year previously, or (2) made three purchases of Designated Securities that occurred on separate days and involved separate issuers.[64]

The Commission believes that this definition will assist broker-dealers in monitoring compliance with the Rule, as well as prevent inappropriate circumvention of the Rule. It is less likely that a person who has had a significant relationship with a broker-dealer for over a year will be victimized by that broker-dealer engaging in boiler-room abuses. In addition, the alternative requirement of three purchases of Designated Securities increases the likelihood that the customer will be familiar with the risks of Designated Securities, and that the broker-dealer will have made an appropriate suitability determination for customers with accounts less than one year old prior to selling them a Designated Security.

4. Recommended Purchases

The Proposed Rule made it unlawful for a broker-dealer to recommend, and subsequently to sell, any Designated Security without complying with the Proposed Rule. Several commenters suggested that clarification was needed as to when a purchase would be considered to have been recommended by the broker-dealer. Moreover, two commenters suggested that the Proposed Rule would be clearer if the term "solicited" rather than "recommended" were used in the Proposed Rule.

The Commission has determined to retain the exemption from the Rule for transactions that are not recommended by a broker-dealer. One of the major requirements of the Rule is the suitability determination involved in approving an account for transactions in Designated Securities, and the NASD and other suitability rules have long applied only to "recommended" transactions. As noted in Release 34–26529, the Rule would not apply to situations in which a broker-dealer functioned solely as an order taker and executed transactions for persons who on their own initiative decided to purchase a Designated Security without a recommendation from the broker-dealer. Nor would the Rule apply to general advertisements not involving a direct recommendation to the individual. The Rule would apply, however, to situations where the broker-dealer recommends to an investor the purchase of a specific Designated Security, whether through direct telephone communication with the customer or through sending promotional material through the mail.

While in some contexts determining whether a transaction was recommended may raise close questions, the Commission understands that in practice most Designated Securities are "sold, not bought," and in most cases the determination will not be difficult. In particular, in most situations in which the broker-dealer brings a specific Designated Security to the attention of the customer, a subsequent purchase of the security will involve an implicit or explicit recommendation by the broker-dealer. For example, if several different customers dealing with a registered representative purchased the same security within a short period of time and without communicating with each other, it would be strong evidence that the registered representative had recommended the security.

Some commenters believed that the Proposed Rule should apply to investor responses to general advertisements by a broker-dealer, one noting that general advertisements could serve the same purpose as cold calls by laying the groundwork for subsequent high pressure sales tactics. The Commission notes, however, that these high pressure sales tactics generally would involve a recommendation after the customer calls for information in response to a general advertisement, and therefore any resulting transactions would be covered by the Rule.

5. Limited Broker-Dealer Activity in Designated Securities

The Proposed Rule excluded transactions in a Designated Security by a broker-dealer whose total transactions in the Designated Security had not exceeded an aggregate volume of $5000 or 10,000 shares during any period of five consecutive business days that ended within the preceding 90 days. Release 34–26529 noted that the Proposed Rule was directed at concentrated selling efforts, and that the benefits of imposing the Proposed Rule's requirements on broker-dealers who were executing only minimal transactions in a security might not exceed the costs of compliance. Release 34–26529 solicited comment on whether the proposed volume standards were appropriately drawn. In particular, comment was requested on whether the standards focused the Proposed Rule on situations where abusive selling practices were most prevalent while avoiding situations where these abusive sales practices were uncommon.

The commenters criticized this limited transaction exclusion for several reasons. They believed that the standards were too low to provide practical benefits to broker-dealers. In addition, the commenters indicated that broker-dealers would have great difficulty monitoring whether they qualified for the limited transaction exclusion because of its "rolling" nature. Finally, one commenter noted that the limited transaction exclusion could be used by unscrupulous broker-dealers to promote different securities on a rotating basis and thereby circumvent the Proposed Rule's requirements. It suggested that any limited transaction exclusion should be based on the firm's total volume of transactions in all Designated Securities.

Several commenters suggested an alternative formulation of the limited transaction exclusion that excluded sales by broker-dealers whose commission revenue derived from transactions in Designated Securities did not exceed a certain percentage of their overall commission revenue. They believed that this percentage approach would provide a more effective way to identify those firms whose primary business purpose is to sell pink sheet stocks, while providing an easily determinable exclusion for firms engaging in only a minimal amount of business in Designated Securities.[65]

The Commission has replaced the proposed limited transaction exclusion with an exemption similar to the percentage approach suggested by the commenters. Paragraph (c)(4) of the Rule exempts transactions by a broker-dealer (1) whose commissions, commission equivalents, and mark-ups from transactions in Designated Securities during each of the immediately preceding three months, and during eleven or more of the preceding twelve months,[66] did not exceed five percent of its total commissions, commission-equivalents, and mark-ups from securities transactions during those months; [67] and (2) who has not been a market maker in the Designated Security that is the subject of the transaction during the previous twelve months. The Commission believes that making a market in a security provides an incentive for high pressure sales practices and an opportunity for manipulation of the price of that security that would not otherwise be present, and, consequently, all market makers in a Designated Security should be subject to the Rule, irrespective of the percentage of revenue accounted for by Designated Securities. The percentage of revenue exemption also will restrict collusion between broker-dealers active in penny stocks, in which each firm would sell as agent Designated Securities in which the other firm was a market maker.

---

[60] *See supra*, text accompanying note 44.

[61] In this connection, the Commission solicited comment in Release 34–26529 on the issue of whether transactions subject to the disclosure document delivery requirements of Rule 15c2–8(b) under the Exchange Act, 17 CFR 240.15c2–8(b), or Regulation A under the Securities Act, 17 CFR 230.256(a)(2), should be excluded from the written agreement requirement of the Proposed Rule. The NASD indicated in its comment letter that broker-dealers often had difficulty complying with the prospectus delivery requirement, and the Commission is not satisfied that the delivery requirements would constitute adequate substitutes for the Rule.

[62] 17 CFR 230.501(a). The Commission received limited comment on the exclusion of sales to accredited investors, and transactions in which the purchaser is an accredited investor continue to be exempted in the Rule.

[63] The reference in the Rule to a clearing broker is intended merely to recognize that introducing broker-dealers do not carry accounts. The Rule is not intended to alter existing responsibilities of introducing broker-dealers and their clearing brokers.

[64] If the person had more than one personal account with the broker-dealer, purchases in all of the accounts could be aggregated to meet the three purchase requirement. In the context of introducing and clearing brokers, however, purchases by a person with more than one personal account carried by the clearing broker could be aggregated only with purchases in accounts that were carried by the clearing broker on behalf of a single introducing broker.

[65] Several commenters, however, recommended that the limited transaction exclusion be deleted from the Proposed Rule. They believed that, in light of the purpose of the Proposed Rule to eliminate high pressure sales tactics and indiscriminate recommendations, it was inappropriate to adopt an exclusion based on the volume of broker-dealer transactions, as this would permit such activities to occur to a limited extent. The Commission agrees with the view of these commenters that even a limited amount of sales practice abuses should not be permitted, but believes that firms engaging in a limited business in Designated Securities are far less likely to be involved in fraudulent sales activities. Moreover, the Commission fully intends to monitor the limited activity exemption provided in the Rule to detect abuses in Designated Securities.

[66] The Commission recognizes that broker-dealers will need a period of time after the end of a month in order to determine whether their sales-related revenue from transactions in Designated Securities during the preceding month was less than five percent of their total sales-related revenue from securities transactions. Accordingly, if a broker-dealer's non-market maker transactions during the preceding month were exempt under the percentage exemption, such transactions by the broker-dealer will continue to qualify for the exemption for the first ten business days after the end of the preceding month in order to provide the broker-dealer with an opportunity to make the percentage determination. For example, if a broker-dealer's non-market maker transactions were exempt under the percentage exemption during the month of April because the broker-dealer's sales-related revenue from transactions in Designated Securities during each of the months of January, February, and March was less than five percent of its total sales-related revenue during those months, the non-market maker transactions of the broker-dealer during the first ten business days of May would continue to qualify for the percentage exemption. Of course, the broker-dealer's sales-related revenue during this ten-day period in May would have to be included in determining whether the broker-dealer's sales-related revenue during May exceeded the five percent standard.

[67] Revenues received in connection with transactions in securities other than commissions, commission-equivalents, and mark-ups, such as revenues from repurchase transactions, would not be included in this computation.

6. General Exemptive Authority

The Proposed Rule enabled the Commission to exempt, conditionally or unconditionally, any transactions that it determined were not encompassed within the purposes of the Proposed Rule. There were no comments on this provision. The Commission believes that it provides needed flexibility in applying the Rule and has retained the provision.

B. Requirements of the Rule

For transactions that fall within the scope of the Rule, paragraph (a)(2) of the Rule provides that, prior to the transaction, the broker-dealer must: (1) Approve the purchaser's account for transactions in Designated Securities in accordance with the procedures set forth in paragraph (b) of the Rule; and (2) receive from the purchaser a written agreement to the transaction setting forth the identity and quantity of the Designated Security to be purchased.

1. Account Approval Procedures

The Commission has determined to modify the account approval procedures contained in the Proposed Rule to lessen the compliance burden on broker-dealers, while maintaining the purposes of the procedures in the Proposed Rule. The Proposed Rule required a broker-dealer to obtain a manually-executed and dated statement from the customer setting forth detailed items of information concerning the customer's financial situation, investment experience, and investment objectives that were specified in the Proposed Rule. Release 34–26529 indicated that a customer's failure to provide this information would preclude the broker-dealer from approving the account. In addition to obtaining the written statement of customer information, the Proposed Rule required a broker-dealer to set forth in writing the basis of its suitability determination and to send this statement to the customer along with the confirmation of the transaction required by Rule 10b–10 under the Exchange Act.[58]

Many commenters believed that the procedures in the Proposed Rule, and in particular the requirement of a manually-executed statement of customer information, imposed an unreasonable paperwork burden on broker-dealers. For example, the ABA Broker-Dealer Subcommittee noted that requiring customers to provide in writing significant information about themselves might have an undesirable "chilling" effect on legitimate transactions in Designated Securities. It added, however, that customers might be more willing to provide such information orally. In addition, commenters noted the difficulties broker-dealers often experience in getting customers to fill out and return forms. Consequently, commenters said that the account approval procedures would interfere substantially with the process of obtaining new customers.

To lessen these burdens on broker-dealers while maintaining the purposes of the Proposed Rule, the Commission has eliminated from the Rule the requirement that a broker-dealer obtain a manually-executed statement of customer information. In addition, the Rule does not require broker-dealers to obtain each of the specific items of customer information identified in the Proposed Rule. Instead, as discussed below, the Rule requires a broker-dealer, prior to the purchase of a Designated Security, to (1) obtain, orally or in writing, information from the customer concerning the customer's financial situation, investment experience, and investment objectives; (2) reasonably determine the customer's suitability for, and capability of evaluating the risks of, transactions in Designated Securities; (3) deliver to the customer a written statement setting forth the basis of such determination, disclosing the written agreement requirement of the Rule, and stating that the customer should not sign and return the written statement to the broker-dealer if it does not accurately reflect the customer's circumstances; and (4) receive back from the customer a manually signed and dated copy of the suitability statement.

a. Customer Information. Several commenters supported the requirement in the Proposed Rule that broker-dealers obtain and preserve in writing information concerning the customer's financial situation, investment experience, and investment objectives. Many of these commenters, as well as several broker-dealers contacted by members of the Commission staff, noted that broker-dealers typically used account forms that included much of the information required by the Proposed Rule. This information is obtained by registered representatives over the telephone, and the representatives fill out the account form and make a suitability determination. For example, the SIA stated that: "We do not view the requirement under the Proposed Rule regarding the retention of the suitability information in connection with recommended purchases to be burdensome. Most firms currently retain such information as a means to demonstrate compliance with Article III, section 2 of the NASD Rules of Fair Practice and NYSE Rule 405."

To conform to this industry practice, the Rule no longer specifies each item of information that the broker-dealer must obtain, and permits this information to be obtained orally. The Commission wishes to emphasize, however, that the broker-dealer must obtain sufficient information concerning the customer that it can reasonably make its suitability determination. In the Commission's view, the customer information specified in the Proposed Rule remains highly relevant to the broker-dealer's suitability determination,[59] and broker-dealers should seek to obtain this information from customers. While in some cases a customer may refuse to provide each of the items of information specified in the Proposed Rule, such a refusal will not absolve the broker-dealer of its obligations under the Rule. Consequently, a broker-dealer must obtain sufficient information for a reasonable suitability determination prior to approving the customer's account for transactions in Designated Securities.

b. Suitability Determination. The Rule requires a broker-dealer reasonably to determine that transactions in Designated Securities are suitable for the customer, and that the customer (or the customer's independent adviser in these transactions) has sufficient knowledge and experience in financial matters that the customer (or the customer's independent adviser in these transactions) reasonably may be capable of evaluating the risks of transactions in Designated Securities.[60]

---

[58] 17 CFR 240.10b–10.

[59] The Proposed Rule required a broker-dealer to obtain information concerning a customer's: (1) Financial situation, including age, marital status, number of dependents, employment status, estimated annual income and the sources of that income, estimated net worth (exclusive of family residence), and estimated liquid net worth (cash, securities, other); (2) investment experience and knowledge, including the number of years of experience, and the size, frequency, and types of transactions in stocks, bonds, options, commodities, and other investments; and (3) investment objectives, such as safety of principal, income, growth, or speculation.

[60] The Rule's requirement that a broker-dealer make a special suitability determination in approving a customer's account for transactions in Designated Securities is in addition to, and in no way replaces, a broker-dealer's general obligation under SRO rules to make a suitability determination for all recommended transactions. Thus, a broker-dealer would remain obligated to make a suitability determination for each recommended purchase of a Designated Security by a customer even after such customer's account had been approved for transactions in Designated Securities, as well as for recommended purchases by customers that are not covered by the Rule, such as accredited investors and established customers.

Several commenters expressed the view that requiring a determination of the customer's capability of evaluating the risks of a transaction was subjective and would create confusion. As noted in Release 34–26529, however, a customer's ability to evaluate the risks of a transaction is an integral aspect of any suitability determination. This aspect of suitability is emphasized in the Rule because it is frequently ignored in sales practice abuses in the non-NASDAQ OTC market, which typically involve indiscriminate recommendations to unsophisticated investors. Release 34–26529 noted that many Designated Securities are speculative securities that require purchasers to possess a significant degree of expertise, as well as access to issuer financial information, before an informed investment decision can be made. The issuers of Designated Securities are rarely followed by professional securities analysts or covered by the financial press, and may not be making complete information about their operations and financial condition publicly available on a regular basis.

The required determination focuses on the customer's knowledge and experience in financial matters. Persons who have no prior investment experience are unlikely to appreciate the risks of transactions in Designated Securities without special efforts by the broker-dealer or the person's personal advisers to inform them of the risks. For example, one of the individual investors who commented on the Proposed Rule indicated that she had been induced to place her entire retirement savings of $6600 in a self-directed IRA, which her broker recommended she invest entirely in penny stocks. She further stated that the broker was aware that her knowledge of investments was very limited and that she had no other savings or investments of any kind, not even a savings account. She lost her entire investment. Many other complaint letters received by the Commission indicate that her experience is not an aberration, and the Commission strongly believes that the special problems to which the rule is addressed require a specific investigation of the customer's capability to evaluate the risks of transactions in Designated Securities.

Release 34–26529 solicited comment on the effect of a customer's consultations with a personal adviser who was capable of evaluating the risks of transactions in Designated Securities. Several commenters suggested that, if such an adviser was permitted to help establish the customer's capability to evaluate such risks, then the adviser should be completely independent of the broker-dealer and the issuer of the Designated Securities. The Commission believes that it would be useful for investors, particularly inexperienced investors, to consult with an adviser prior to investing in Designated Securities. The Rule therefore provides that a broker-dealer can approve a customer's account if the customer's independent adviser in transactions in Designated Securities is capable of evaluating the risks of transactions in Designated Securities. The Commission wishes to emphasize, however, that the broker-dealer must reasonably determine that the adviser will consult with the customer on transactions in Designated Securities, and that the adviser is completely independent of the transactions. Any connection between the adviser and either the broker-dealer or the issuer that compromises the adviser's independence, such as an affiliation or compensation, would preclude the adviser from qualifying under the Rule.

The Commission also wishes to emphasize the point made in Release 34–26529 that the target of the Rule is sales practice abuse and manipulation, not small issuers or speculative investment decisions *per se*. It is, however, in low-priced, non-NASDAQ OTC securities that the Commission has found a disproportionate number of such abuses to occur, and it is for this reason that the Commission is adopting a prophylactic rule for recommended sales of such securities.

c. Suitability Statement. The Commission continues to believe that a customer should have an opportunity to review the information on which a broker-dealer makes its suitability determination regarding the customer. Such a review enables the customer to check the accuracy of this information recorded by the broker-dealer. Moreover, as a state regulatory authority indicated in its comment letter, by requiring the purchaser to sign a statement containing financial information, the importance of making an informed and deliberate investment decision will be made clear to the purchaser. Setting forth the suitability determination in writing also increases the likelihood that a determination will be made and facilitates subsequent review by regulatory authorities.

The Rule therefore provides that, prior to approving an account for transactions in Designated Securities, a broker-dealer must deliver to the customer a written statement: (1) Setting forth the basis of the broker-dealer's suitability determination; (2) stating in a highlighted format the written agreement requirement of the Rule; and (3) stating in a highlighted format immediately preceding the customer signature line that the broker-dealer is required by the Rule to provide the customer with the suitability statement, and that the customer should not sign and return the statement to the broker-dealer if it does not accurately reflect the customer's financial situation, investment, experience, and investment objectives. The broker-dealer then must obtain a manually signed and dated copy of the suitability statement from the customer. These requirements are intended to convey to the customer the importance of the suitability statement, and to prevent a salesperson from convincing the customer to sign the statement without a review for accuracy.

The Rule's new procedures are less burdensome than those in the Proposed Rule, however, because the customer need only sign and date a copy of the suitability statement, and return the statement to the broker-dealer. Thus, only one suitability document must be processed by the broker-dealer, and the signed copy can be obtained from customers at the same time customers send the broker-dealer their written agreement to the first purchase of a Designated Security in their accounts.[61] The Commission believes that the Rule's revised procedures for opening new accounts are substantially less burdensome than the procedures required by the Proposed Rule, while maintaining effective discipline over the broker-dealer's preexisting obligation to not make unsuitable recommendations.

2. Written Agreement to a Purchase

The Proposed Rule required the broker-dealer to obtain written agreement from the customer for each purchase of a Designated Security covered by the Proposed Rule. The written agreement was required to set forth the identity and number of shares or units of the Designated Security to be purchased. This requirement was intended to provide the customer with an opportunity to evaluate the security without the necessity for an immediate final decision that is characteristic of high pressure telephone sales tactics.

---

[61] This procedure is in accordance with that suggested by the NASD in its comment letter. The NASD noted that it had published for comment a modification of its books and records rule that required much of the same information specified in the Proposed Rule to be gathered regarding customers. While the proposed NASD rule would not require a customer signature, the NASD indicated that a uniform approach with respect to the information required would allow firms to follow normal procedures and add only one additional step—obtaining the customer's signature as required by the Rule.

Many commenters specifically supported the Proposed Rule's requirement that broker-dealer obtain written agreement to purchases from the customer. A state regulatory authority noted the particular problems of regulating telephone solicitations, and stated that the Proposed Rule would have a "profound and salutary effect on such sales by requiring that the sale of designated securities be pursuant to a written agreement. In the cases of telephone solicitations, the time required to obtain such written agreement will necessarily give the consumer time to consider the purchase and to obtain whatever information is necessary and available in order to make a careful decision." An individual investor stated that "a written agreement, with time for the buyer to think about what he or she is doing, making sure the investment is right for themselves, is definitely needed." Another individual investor strongly supported the requirement that purchases be well documented, noting that on several occasions purchases had been made in his account without his authorization.

Conversely, many commenters opposed the written agreement requirement. One broker-dealer stated that the written agreement requirement was "draconian and unrealistic. It would expose brokerage firms to significant potential losses by giving an escape clause to investor if the security decreased in value." Another broker-dealer stated that most brokerage firms would stop dealing in Designated Securities rather than comply with the written agreement requirement.

The Commission believes that the written agreement requirement is critical to the effectiveness of the Rule, and has retained the requirement in the Rule. The written agreement requirement provides the Rule's most direct protection against high pressure sales tactics by enhancing the ability of investors to guard themselves against such tactics. Broker-dealers involved in boiler-room abuses typically use prepared scripts designed by marketing experts that try to elicit immediate buy decisions during the course of one or a series of telephone calls. Moreover, the Commission is aware of instances in which high pressure salespersons interpreted noncommittal responses as the placing of an order, with confirmations sent to customers of purchases that they had not intended to make.[62] The written agreement requirement has the beneficial effect of ensuring that the customer's final decision will be made outside of a pressured telephone call, and of providing objective evidence of whether a customer has agreed to a transaction.

While the written agreement requirement is an additional paperwork burden on broker-dealers, the Commission believes that the Rule would be substantially less effective without the requirement, and that its benefits outweigh the compliance burden it entails. The Commission notes that most retail securities transactions involve communicating with the customer, and obtaining payment, through the mail, and that obtaining a written agreement therefore will not constitute a unique processing procedure for broker-dealers. In addition, despite the assertions of some commenters, the written agreement requirement does not force a broker-dealer to, in effect, provide an option to the customer to purchase a Designated Security at a specified price.[63] Instead, as discussed in Release 34–26529, the written agreement only must set forth the identity and quantity of the Designated Security. Price can be agreed upon over the telephone when the broker-dealer receives the customer's written agreement.[64] Modification of the identity or quantity of the Designated Security specified in the written agreement, however, would require a new written agreement.

VI. Conclusion and Solicitation of Comment

The Commission believes that the Rule will provide a needed regulatory tool with which to combat sales practice abuse and manipulation by broker-dealers involving low-priced, non-NASDAQ OTC securities, without imposing undue burdens on legitimate broker-dealers underwriting and trading in the securities of small businesses. The Commission solicits comment, however, on whether any of the exclusions from the scope of the Rule will provide unscrupulous broker-dealers with unacceptable opportunities to circumvent the requirements of the Rule. These exclusions include the definition of Designated Security, which excludes non-NMS NASDAQ securities and securities whose issuers have net tangible assets in excess of $2,000,000; and the five dollar price exemption, the established customer exemption, the unrecommended transaction exemption, and the percentage of revenue exemption contained in paragraph (c) of the Rule. The Commission is particularly interested in learning the views of commenters after the Rule has been effective for a period of time, and its impact has been ascertained through practical experience.

VII. Effects on Competition and Regulatory Flexibility Act Considerations

Section 23(a)(2) of the Exchange Act[65] requires that the Commission, in adopting rules under the Exchange Act, consider the anticompetitive effects of such rules, if any, and balance any anticompetitive effect against the regulatory benefits gained in terms of furthering the purposes of the Exchange Act. The Commission is of the view that Rule 15c2–6 will not result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Exchange Act.

In addition, the Commission has prepared a Final Regulatory Flexibility Analysis ("FRFA"), pursuant to the requirements of the Regulatory Flexibility Act,[66] regarding the Rule. The FRFA indicates that Rule 15c2–6 will impose some additional costs on certain small broker-dealers and small issuers. The Commission believes, however, that the inclusion of additional exclusions in the Rule as adopted provide small broker-dealers and small issuers with greater control over whether they will be subject to the Rule. With respect to the transactions that remain within the scope of the Rule, the Commission believes that the requirements of the Rule have been streamlined to bring them more into accord with existing industry practice, and that any additional costs imposed by the Rule are outweighed by the benefits of reducing fraud through more effective regulation of the sales

practices of broker-dealers active in the market for low-priced, non-NASDAQ OTC securities.

A copy of the FRFA may be obtained from Dan Gray, Attorney, Office of Chief Counsel, Division of Market Regulation, Securities and Exchange Commission, 450 Fifth Street NW., Mail Stop 5–1, Washington, DC 20549, (202) 272–2848.

VIII. List of Subjects in 17 CFR Part 240

Reporting and recordkeeping requirements, Securities.

IX. Statutory Basis and Text of Amendments

The Commission hereby adopts § 240.15c2–6 in chapter II of title 17 of the Code of Federal Regulations as follows:

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for part 240 is amended by adding the following citation:

Authority: Sec. 23, 48 Stat. 901, as amended (15 U.S.C. 78w) * * * § 240.15c2–6, also issued under secs. 3, 10, and 15, 15 U.S.C. 78c, 78j, and 78o.

2. By adding § 240.15c2–6 as follows:

§ 240.15c2–6 Sales practice requirements for certain low-priced securities.

(a) As a means reasonably designed to prevent fraudulent, deceptive, or manipulative acts or practices, it shall be unlawful for a broker or dealer to sell a designated security to, or to effect the purchase of a designated security by, any person unless:

(1) The transaction is exempt under paragraph (c) of this section; or

(2) Prior to the transaction:

(i) The broker or dealer has approved the person's account for transactions in Designated Securities in accordance with the procedures set forth in paragraph (b) of this section; and

(ii) The broker or dealer has received from the person a written agreement to the transaction setting forth the identity and quantity of the Designated security to be purchased.

(b) In order to approve a person's account for transactions in Designated Securities, the broker or dealer must:

(1) Obtain from the person information concerning the person's financial situation, investment experience, and investment objectives;

(2) Reasonably determine, based on the information required by paragraph (b)(1) of this section and any other information known by the broker-dealer, that transactions in Designated Securities are suitable for the person, and that the person (or the person's independent adviser in these transactions) has sufficient knowledge and experience in financial matters that the person (or the person's independent adviser in these transactions) reasonably may be expected to be capable of evaluating the risks of transactions in Designated Securities;

(3) Deliver to the person a written statement:

(i) Setting forth the basis on which the broker or dealer made the determination required by paragraph (b)(2) of this section;

(ii) Stating in a highlighted format that it is unlawful for the broker or dealer to effect a transaction in a Designated Security subject to the provisions of paragraph (a)(2) of this section unless the broker or dealer has received, prior to the transaction, a written agreement to the transaction from the person; and

(iii) Stating in a highlighted format immediately preceding the customer signature line that:

(A) The broker or dealer is required by this section to provide the person with the written statement; and

(B) The person should not sign and return the written statement to the broker or dealer if it does not accurately reflect the person's financial situation, investment experience, and investment objectives; and

(4) Obtain from the person a manually signed and dated copy of the written statement required by paragraph (b)(3) of this section.

(c) For the purposes of this section, the following shall be exempt transactions—

(1) Transactions in which the price of the Designated Security is five dollars or more; *provided, however,* That if the Designated Security is a unit composed of one or more securities, the unit price divided by the number of components of the unit other than warrants, options, rights, or similar securities, must be five dollars or more, and any component of the unit that is a warrant, option, right, or similar securities, or a convertible security must have an exercise price or conversion price of five dollars or more.

(2) Transactions in which the purchaser is an accredited investor or an established customer of the broker or dealer.

(3) Transactions that are not recommended by the broker or dealer.

(4) Transactions by a broker or dealer:

(i) Whose commissions, commission equivalents, and mark-ups from transactions in Designated Securities during each of the immediately preceding three months, and during eleven or more of the preceding twelve months, did not exceed five percent of its total commissions, commission-equivalents, and mark-ups from transactions in Securities during those months; and

(ii) Who has not been a market maker in the Designated Security that is the subject of the transaction in the immediately preceding twelve months.

(5) Any transaction or transactions that, upon prior written request or upon its own motion, the Commission conditionally or unconditionally exempts as not encompassed within the purposes of this section.

(d) For the purposes of this section—

(1) The term "accredited investor" shall have the same meaning as in 17 CFR 230.501(a).

(2) The term "designated security" shall mean any equity security other than a security:

(i) Registered, or approved for registration upon notice of issuance, on a a national securities exchange that makes transaction report available pursuant to 17 CFR Part 11Aa3–1;

(ii) Authorized, or approved for authorization upon notice of issuance, for quotation in the NASDAQ system;

(iii) Issued by an investment company registered under the Investment Company Act of 1940;

(iv) That is a put option or call option issued by The Options Clearing Corporation; or

(v) Whose issuer has net tangible assets in excess of $2,000,000, as demonstrated by financial statements dated less than fifteen months previously that the broker or dealer has reviewed and has a reasonable basis to believe are true and complete in relation to the date of the transaction with the person, and

(A) In the event the issuer is other than a foreign private issuer, are the most recent financial statements for the issuer that have been audited and reported on by an independent public accountant in accordance with the provisions of 17 CFR 210.2–02; or

(B) In the event the issuer is a foreign private issuer, are the most recent financial statements for the issuer that have been filed with the Commission; furnished to the Commission pursuant to 17 CFR 240.12g3–2(b); or prepared in accordance with generally accepted accounting principles in the country of incorporation, audited in compliance with the requirements of that jurisdiction, and reported on by an accountant duly registered and in good standing in accordance with the regulations of that jurisdication.

(3) The term "established customer" shall mean any person for whom the

---

[62] *See, e.g.,* Report on First Jersey Securities, *supra* note 12, at 11, 14.

[63] The Rule does not require a broker-dealer to bind itself to the terms of a transaction prior to receipt of a customer's written agreement. Moreover, the execution of a transaction by a broker-dealer in a customer's account without the customer's prior written agreement would violate the Rule, even if the broker-dealer were willing to rescind the transaction if the customer did not subsequently agree in writing to the transaction.

[64] The Rule would not preclude a written agreement from including the price agreed upon by the broker-dealer and the customer. If, however, the market price of the security at the time the broker-dealer receives the written agreement is less than the price specified therein, the broker-dealer's "best execution" obligations would preclude the broker-dealer from executing the transaction at that price. *See* NASD Rules of Fair Practice, Art. III, sections 1 and 4, Interpretation of the Board of Governors re NASD Mark-Up Policy, NASD Manual (CCH) ¶ 2154 at 2050.

BILLING CODE 8010-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

20 CFR Parts 404 and 416

RIN 0960-AA90

Treatment of Old-Age Survivors, and Disability Insurance Payments in the Aid to Families With Dependent Children Program (AFDC); Direct Payment to Beneficiaries Under Age 18

AGENCY: Social Security Administration, HHS.

ACTION: Final rule.

SUMMARY: These final rules amend 20 CFR 404.2040 which prescribes the use of benefit payments by a representative payee. The final regulations cover our existing policy on the treatment of all title II benefits (retroactive lump-sum and monthly) when paid to a representative payee on behalf of a beneficiary who is a member of an Aid to Families with Dependent Children (AFDC) assistance unit. We are clarifying existing policy to state that we do not consider it inappropriate for a representative payee to make the benefit payments available to the AFDC assistance unit.

EFFECTIVE DATES: These amendments are effective August 28, 1989.

FOR FURTHER INFORMATION CONTACT: Philip Berge, Legal Assistant, 3-B-4 Operations Building, 6401 Security Boulevard, Baltimore, Maryland 21235, (301) 965-1769.

SUPPLEMENTARY INFORMATION: On August 22, 1988, we published proposed rules intended to provide a needed clarification of our policy concerning the treatment of all title II benefits (retroactive lump-sum and monthly) when paid to a representative payee on behalf of a beneficiary who is a member of an AFDC assistance unit by stating that we do not consider it inappropriate for a representative payee to make the benefit payments available to the AFDC assistance unit (53 FR 31886-31888). We received one comment on the proposed rules. This comment was from a State agency and agreed with the proposed rules.

Section 402(a)(17) of the Social Security Act (the Act), which was amended by section 2304 of the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97-35), provides that when a person in an AFDC assistance unit receives an amount of income that, together with other countable income in the month of receipt not excluded under section 402(a)(8) of the Act, exceeds the State's standard of need, the assistance unit is ineligible for AFDC for a prescribed period of time. This period (in months) is determined by dividing the total of the lump-sum and other countable income received in the month by the State's monthly needs standard applicable to the family unit. The Senate Committee on the Budget, in addressing this provision, specifically identified retroactive Social Security benefits as the kind of lump-sum payments that should be considered available to meet the ongoing needs of an AFDC family (Senate Rep. No. 97-139, 97th Cong., 1st Sess. (1981) at p. 504, printed in (1981) U.S. Code Cong. and Admin. News 771.)

Section 402(a)(38) of the Act, as amended by section 2640 of the Deficit Reduction Act of 1984 (Pub. L. 98-369), generally requires that parents and brothers and sisters of a dependent child who are living in the same household as the dependent child and who meet the age and deprivation requirements must also be included in the assistance unit. Thus, it is no longer possible, as under prior law, for a caretaker relative to exclude a potentially eligible child who is, or will be, receiving other income (e.g., title II benefits) from the AFDC assistance unit.

AFDC interim final regulations published on September 10, 1984, at 49 FR 35586 provide that income and resources of all the individuals required to be included in the assistance unit must be considered in determining eligibility and payment for the assistance unit. In this connection, the statute specifically provides for the inclusion of title II benefits, notwithstanding the authority for payment of such benefits to representative payees which is found in section 205(j). Under the AFDC policy, when title II benefits are paid to a representative payee on behalf of a member of the assistance unit and the payee lives in the same household as the assistance unit, the title II benefits must be counted as income. When the representative payee does not live in the household, the title II benefits are included only to the extent that the payee makes them available for the support of the beneficiary. This is consistent with our permitting the benefits to be used for other members of the unit.

Because of the above changes in the Act, we are revising 20 CFR 404.2040, which prescribes the use of benefit payments by a representative payee, by adding a paragraph to this section that covers our policy concerning the treatment of all title II benefits (retroactive lump-sum and monthly) when paid to a representative payee on behalf of an AFDC recipient. We are clarifying existing policy by stating that we do not consider it inappropriate for a representative payee to make the benefit payments available to the AFDC assistance unit. In addition, we are also making a technical revision to 20 CFR 404.2045 to reflect this clarification.

Finally, we are also revising 20 CFR 404.2010(b)(6) and 20 CFR 416.610(b)(3) to provide that we will make direct payments to a beneficiary under age 18 if the beneficiary is within 7 months of attaining age 18 and is initially filing an application for benefits. This proposed revision extends to 7 months the 4-month period in our current regulations to be consistent with the program policy which permits direct payment to a child beneficiary within 7 months of age 18 when an initial claim is filed. This change is unrelated to the above-described provisions regarding the treatment of title II benefits.

Regulatory Procedures

Executive Order No. 12291

The Secretary has determined that this is not a major rule under Executive Order No. 12291 because it will result in negligible administrative costs or savings. It has no affect on the amount of benefit payments of existing operating procedures under the Old-Age, Survivors and Disability Insurance program. The provision for direct payment to beneficiaries under age 18 will have no cost impact. Therefore, a regulatory impact analysis is not required.

Regulatory Flexibility Act

We certify that these final regulations will not have a significant economic impact on a substantial number of small entities because these rules only affect

individuals. Therefore, a regulatory flexibility analysis as provided in Pub. L. 96-354, the Regulatory Flexibility Act, is not required.

Paperwork Reduction Act

Thee final regulations impose no additional reporting/recordkeeping requirements requiring OMB clearance.

(Catalog of Federal Domestic Assistance Program Nos. 13.802 Social Security—Disability Insuarance; 13.803 Social Security—Retirement Insurance; 13.804 Social Security—Survivors Insurance; 13.807 Supplemental Security Income.)

List of Subjects

20 CFR Part 404

Administrative practice and procedure, Death benefits, Disability benefits, Old-age, Survivors, Disability insurance.

20 CFR Part 416

Administrative practice and procedure, Aged, Blind, Disabled, Public assistance programs, Supplemental Security Income (SSI).

Dated: April 5, 1989.

Dorcas R. Hardy,

Commissioner of Social Security.

Approved: August 4, 1989.

Louis W. Sullivan,

Secretary of Health and Human Services.

For the reasons set out in the preamble, subpart U of part 404 and subpart F of part 416 of 20 CFR chapter III are amended as follows:

PART 404—FEDERAL OLD-AGE, SURVIVORS AND DISABILITY INSURANCE

1. The authority citation for subpart U continues to read as follows:

Authority: Secs. 205 (a), (j), and (k), and 1102 of the Social Security Act; 42 U.S.C. 405 (a), (j), (k), and 1302.

§ 404.2010 [Amended]

2. Section 404.2010 is amended by changing "4" to "7" in paragraph (b)(6).

3. Paragraph (a) of § 404.2040 is revised to read as follows:

§ 404.2040 Use of benefit payments.

(a) *Current maintenance.* (1) We will consider that payments we certify to a representative payee have been used for the use and benefit of the beneficiary if they are used for the beneficiary's current maintenance. Current maintenance includes cost incurred in obtaining food, shelter, clothing, medical care, and personal comfort items.

Example: An aged beneficiary is entitled to a monthly Social Security benefit of $400. Her son, who is her payee, disburses her benefits in the following manner:

Rent and utilities	$200
Medical	25
Food	60
Clothing (coat)	55
Savings	30
Miscellaneous	30

The above expenditures would represent proper disbursements on behalf of the beneficiary.

(2) Notwithstanding the provisions of paragraph (a)(1) of this section, if a beneficiary is a member of an Aid to Families With Dependent Children (AFDC) assistance unit, we do not consider it inappropriate for a representative payee to make the benefit payments available to the AFDC assistance unit.

* * * * *

4. Section 404.2045 is amended by revising the first sentence of paragraph (a) to read as follows:

§ 404.2045 Conservation and investment of benefit payments.

(a) *General.* After the representative payee has used benefit payments consistent with the guidelines in this subpart (see § 404.2040 regarding use of benefits), any remaining amount shall be conserved or invested on behalf of the beneficiary. * * *

* * * * *

PART 416—SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

1. The authority citation for subpart F continues to read as follows:

Authority: Secs. 1102 and 1631 (a)(2) and (d)(1) of the Social Security Act; 42 U.S.C. 1302 and 1383 (a)(2) and (d)(1).

§ 416.610 [Amended]

2. Section 416.610 is amended by changing "4" to "7" in paragraph (b)(3).

Office of the Secretary

32 CFR Part 172

[DoD Instruction 7310.1]

Disposition of Proceeds From DoD Sales of Surplus Personal Property

AGENCY: Office of the Secretary, DoD.

ACTION: Final rule.

SUMMARY: This part issues a final rule on expanded instruction on the collection and disposition of payments received in connection with DoD sales of surplus property and Administrative Service Act of 1949. The issuance includes new guidance on term bids, use of credit cards, and expedited return of negotiable instruments to losing bidders. It also contains expanded guidance on the form of payment required in support of bids and final settlement.

EFFECTIVE DATE: July 10, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Michael J. Melburn, Office of the Comptroller, DoD, Room 3A882, the Pentagon, Washington, DC 20301-1100, telephone (202) 697-3135.

SUPPLEMENTARY INFORMATION: All comments received on the proposed rule were considered in the issuance of the final rule.

List of Subjects in 32 CFR Part 172

Defense contracts, Government property management.

Accordingly, title 32, subchapter E, is amended to add part 172 to read as follows:

PART 172—DISPOSITION OF PROCEEDS FROM DOD SALES OF SURPLUS PERSONAL PROPERTY

Sec.
172.1 Purpose.
172.2 Applicability and scope.
172.3 Policy.
172.4 Responsibilities.
172.5 Procedures.
172.6 Information requirements.

Appendix A—Efforts and Costs Associated With the Disposal of Recyclable Material

Appendix B—Disposition of Amounts Collected From Successful Bidders

Authority: 40 U.S.C. 484 and 485, 10 U.S.C. 2577.

§ 172.1 Purpose.

This document provides revised and expanded instructions on the collection and disposition of cash and cash equivalents received by the DoD Components for the DoD sale of surplus personal property.

§ 172.2 Applicability and scope.

This part:

(a) Applies to the Office of the Secretary of Defense (OSD), the Military Departments, the Joint Chiefs of Staff (JCS) and the Joint Staff, the Unified and Specified Commands, the Inspector General of the Department of Defense (IG, DoD), the Defense Agencies, and DoD Field Activities (hereafter referred to collectively as "DoD Components").

BEST COPY AVAILABLE

(b) Applies to the proceeds resulting from sales made under authority of Public Law 152 and to the following:

(1) Personal property governed by DoD 4160.21–M.

(2) Surplus Government-owned personal property in the possession of contractors, as described in FAR subpart 45.6.

(3) Recyclable material governed by 10 U.S.C. 2577. Such materials would otherwise be sold as scrap or discarded as waste, but are capable of being reused after undergoing some type of physical or chemical processing. The recycling of hazardous materials or hazardous waste shall be accomplished with due recognition of the types of materials being processed and the applicable regulation governing the handling and disposal of such materials. Qualified recyclable materials do not include the following:

(i) Precious metal-bearing scrap and those items that may be used again for their original purposes or functions without any special processing; e.g., used vehicles, vehicle or machine parts, bottles (not scrap glass), electrical components, and unopened containers of oil or solvent.

(ii) Ships, planes, or weapons that must undergo demilitarization or mutilation before sale.

(iii) Scrap generated from DoD industrial fund (IF) operations that has been routinely sold with the proceeds being used to offset customer costs.

(iv) Bones, fats, and meat trimmings generated by a commissary store or exchange.

§ 172.3 Policy.

(a) Cash or cash equivalents in the prescribed amounts shall accompany bid deposits for a bid to be considered responsive. Similarly, cash or cash equivalents for the total sales price shall be received by the DoD Components or, in authorized cases, by contractors before the transfer of physical possession to the successful bidder.

(b) Amounts collected by the DoD Components in connection with the sale of excess and surplus property shall be deposited promptly to the U.S. Treasury accounts prescribed in accordance with this instruction. The use of suspense accounts shall be minimal. If the account, ultimately to be credited with the proceeds of a sale, can be determined reasonably at the time funds are collected, the deposit shall be made immediately to that account.

(c) The Secretary of each Military Department shall establish qualified recycling programs. The effort associated with the collecting, processing and selling of recyclable material is in appendix A to this part.

(1) Proceeds from the sale of recyclable material shall be used to reimburse installation-level costs incurred in operation of the recyclable program.

(2) After reimbursement of the cost incurred by the installation to operate the recycling program, installation commanders may use up to 50 percent of remaining sale proceeds for pollution abatement, energy conservation, and occupational safety and health activities. A project may not be carried out for an amount greater than 50 percent of the amount established by law as the maximum amount for a minor construction project.

(3) Any sale proceeds remaining after paragraphs (c)(1) and (2) of this section may be transferred to installation morale or welfare activities.

§ 172.4 Responsibilities.

The *Heads of DoD Components* that sell surplus personal property shall implement the procedures prescribed in this part for the disposition of cash and cash equivalents received in connection with such sales.

§ 172.5 Procedures.

(a) *Required bid deposits.* When a sale conducted by a DoD Component provides for bid deposit with subsequent removal, the following procedures shall apply:

(1) *Term bid.* This type of bid deposit is applicable when the sale involves the purchase of scrap or disposable material that will be generated over time with periodic removal by the successful bidder. The amount of the bid deposit required to accompany such bids is the average estimated quantity of such material to be generated during a 3 month period multiplied by 20 percent of the bid price. The calculation is illustrated, as follows:

Estimated quantity of material to be generated each quarter (pounds).	3,000
Bid price—$1.00 per pound...	× $1.00
Subtotal	$3,000
20 percent of bid price	20
Amount to accompany bid.	$600

(2) *Other than term bid.* With the exception of term bids, payment in the amount of 20 percent of the bid shall accompany the bid.

(b) *Payment terms.* When a sale conducted by a DoD Component provides for immediate pickup, the entire amount of the sales price shall be collected from the buyer at the conclusion of the sale. If the sale provides for a bid deposit, the balance of the bid price shall be paid before removal of the property.

(c) *Form of payment*—(1) *Cash and certified checks.* When a sale is conducted by a DoD Component, cash or its equivalent shall be collected for bid deposits and for remaining amounts due. Guaranteed negotiable instruments, such as cashiers checks, certified checks, travelers checks, bank drafts, or postal money orders are acceptable as a cash equivalent.

(2) *Personal checks.* Personal checks may be accepted by a DoD Component only when a performance bond or a bank letter of credit is on hand that will cover the amount due. If the check is dishonored, amounts due shall be collected from the issuer of the performance bond or letter of credit.

(i) If a bidder intends to use a bond or letter of credit without an accompanying personal check, the claim against the performance bond or letter of credit shall be made for any amounts due.

(ii) If personal checks are used, the bond or letter of credit shall be returned intact after the applicable personal checks are honored, unless other instructions have been received from the bidder.

(2) *Credit cards.* Approved credit cards may be accepted by a DoD Component for payment.

(i) Before initiating any credit card transactions, the selling DoD Component shall enter into an agreement with a network commercial bank. Currently, the Treasury has approved the use of "Master Card" and "Visa" charge cards. Changes or additions to approved credit cards are announced in Comptroller of the Department of Defense (C, DoD) memoranda or in changes to the TFM. Except for equipment and communication costs, the Treasury pays any fees normally charged to sellers. If the Treasury policy of paying such charges is changed, any charges for the processing of approved credit card transactions shall be assessed to the buyer.

(ii) If a credit card is used for the bid deposit and authorization is declined, the bid shall be rejected as nonresponsive and other bidders considered.

(iii) Approval for charges against credit cards shall be processed as follows:

(A) The credit card presented shall be passed through the DoD installation's credit card swiper. The swiper is connected electronically with the network commercial bank selected by the DoD Component, and keys are provided to enter the proposed charge amount. If the charge is approved, the swiper will provide an approval number that shall be recorded on the charge slip.

Note: A swiper is an electronic device that is used to capture the magentic information contained on a credit card and transmit it to the network commercial bank for validation and authorization of a sale. The information captured normally includes the account number, issuing bank, date of expiration of the card, and any credit restrictions that may apply.

(B) The bidder shall sign a standard credit card charge form at the sale contracting office. A copy of this form shall be returned to the card holder at that time. A copy of the charge slip shall be retained by the selling DoD activity as a record of the sale. On the following business day, the installation finance and accounting officer or the activity providing accounting support shall submit the signed credit card forms with a supporting cover sheet showing the total charges to the network commercial bank. Accounting control must be maintained over such in-transit deposits.

(C) On receipt of the credit card charge forms, the network commercial bank shall charge the bidder's credit card account and deposit the funds to the Treasury general account. The network commercial bank also is required to forward a copy of the deposit slip to the DoD installation making the sale within 1 business day. On receipt of the deposit slip, the in-transit account shall be cleared and appropriate accounts credited following the procedures in paragraph (d) of this section:

(iv) If a contractor's bid is provided by message, mail, or telephone to the U.S. Government using a credit card instead of other forms of payment, the following information is required:

(A) Account number.

(B) Bidders name, as it appears on the credit card.

(C) Date of expiration of the card.

(D) Issuing bank.

(E) Type of card.

Any additional cost incurred by the Department of Defense in connection with the use of the charge card, such as telephone calls to obtain approval from the network bank, shall be billed to the purchaser as an additive charge.

(d) *Disposition of proceeds.* (1) Proceeds from the sale of surplus personal property shall be deposited by the collecting DoD Component promptly to the U.S. Treasury accounts prescribed in appendix B to this part. The use of suspense accounts shall be minimal. If the account ultimately to be credited with the proceeds of a sale can be determined reasonably at the time the funds are collected, the deposit shall be made immediately to that account.

(2) See paragraph (f) of this section for special instructions on the processing of proceeds resulting from the sale of recyclable material.

(e) *Return of bid deposits to unsuccessful bidders.* (1) Cash collected from unsuccessful bidders by a DoD Component shall be deposited to account X6875, "Suspense," and a check shall be drawn on that account to reimburse unsuccessful bidders.

(2) Normally, noncash bid deposits shall be returned to unsuccessful bidders by DoD Components through the mail. However, when a bidder has requested expedited return and has provided the name of a carrier and a charge account number, the designated carrier shall be called to pick up the deposit with the explicit condition that applicable carrier costs will be charged to the bidder's account.

(f) *Sales of recyclable material.* The efforts associated with collection and processing of recyclable material are reflected in appendix A to this part. The following transactions for others (TFO) procedures apply:

(1) Proceeds from the sale of recyclable material shall be deposited in F3875, "Budget Clearing Account (Suspense)." The deposit to F3875 shall identify the fiscal station and the name of the installation (use the full name and do not abbreviate) that is to receive the proceeds. Deposits that do not provide the necessary information shall be referred formally to the property disposal cashier for the required information.

(2) The Military Department's finance and accounting office receiving the sales proceeds shall mail a copy of the cash collection voucher to the fiscal station shown on the collection voucher. This advance copy shall be used by the fiscal station to record the collection of proceeds to its account and shall be used for followup purposes, as necessary. The copy received through the financial network shall be used to clear the undistributed collection. These vouchers shall be mailed in the weekly TFO cycle.

(3) The Military Department's finance and accounting office shall:

(i) Report weekly transactions to the responsible fiscal station cited on the collection voucher.

(ii) Report the collections within the same month in the "Statement of Transactions" to the Treasury.

(g) *Contractor sales of surplus Government-furnished property.* (1) DFARS § 245.610 provides overall direction for crediting proceeds from contractor conducted sales of surplus Government furnished property. Paragraph (g)(5) of this section provides the procedures that shall be used to ensure proper accounting for such proceeds.

(2) The contractor making the sale may follow normal company policy on bid deposits and form of payment. However, any loss associated with dishonored payment shall be the contractor's responsibility.

(3) The plant clearance officer (PLCO) is responsible for notifying the appropriate accounting office of the amounts collected by the contractor. The PLCO shall also notify the accounting office whether such collections:

(i) Represent an increase in the dollar value of the applicable contract(s).

(ii) Were made instead of disbursements on the applicable contract(s).

(iii) Were returned to miscellaneous receipt account 972651, "Sale of Scrap and Salvage, Materials, Defense."

(4) The accounting office for the contract is identified in the accounting classification code. See DoD 7220.9–M, chapter 17 for additional information.

(5) The accounting office shall prepare the source documents necessary to account properly for the transaction. The value of applicable Government property general-ledger-asset accounts shall be reduced for each alternative set forth in paragraph (g)(3) of this section. Additionally, for alternatives (addressed in paragraph (g)(3)(i) or (g)(3)(ii) of this section, an accounting entry shall be made to reflect the creation of reimbursable obligational authority and the use of such authority.

§ 172.6 Information requirements.

The reports cited in §§ 172.5(f)(3) (i) and (ii) of this part are exempt from licensing in accordance with paragraph E.4g. of DoD 7750.5–M.

1/ The proceeds of sales of DoD-purchased materials, labor, and assets shall be recouped on the basis of a sale to "Another Federal Agency," as prescribed in DoD 7220.9-M, chapter 26 (reference (h)). This procedure excludes capital investment costs. Such costs may be paid from recyclable material sales proceeds in their entirety. Therefore, amortization of capital items is not applicable.

APPENDIX B - DISPOSITION OF AMOUNTS COLLECTED FROM SUCCESSFUL BIDDERS

Type of Property	Disposition of:	
	(20%) Bid Deposit	(80%) Remaining Balance
1. Scrap turned in by IF activities.	IF	IF
2. Usable personal property purchased by and turned in by IF activities.	IF	IF
3. Property purchased with funds from trust fund _X8420, "Surcharge Collections, Sales of Commissary Stores."	__X8420	__X8420
4. Automatic data processing equipment owned by the General Services Administration (GSA) and leased to the Department of Defense.	__F3875, Budget Clearing Account (Suspense).	__F3875. On receipt of the entire amount due from the bidder, a check shall be drawn on the suspense account and forwarded to the GSA at the following address: General Services Administration Office of Finance (WBCRC) Collections and Securities 7th and I Streets, NW, Washington, D.C. 20407.
5. Pre Military Assistance Program (MAP) merger (Pre fiscal (FY) 1982) property issued under the MAP and returned as no longer needed, and all MAP-funded administrative property belonging to the Security Assistance Offices.	11__1080, "Military Assistance, Funds Appropriated to the President."	11__1080

DISPOSITION OF AMOUNTS COLLECTED FROM SUCCESSFUL BIDDERS - CONTINUED

Type of Property	Disposition of:	
	(20%) Bid Deposit	(80%) Remaining Balance
6. Coast Guard property under the physical control of the Coast Guard at the time of sale.	__F3875	__F3875. On receipt of the entire amount due from the bidder, a check shall be drawn on the suspense account and forwarded to the Coast Guard at the following address: Commandant U.S. Coast Guard (GFAC) Washington, D.C. 20593
7. Property owned by nonappropriated fund instrumentalities, excluding garbage suitable for animal consumption that is disposed of under a multiple-pickup contract.	__X6875, "Suspense"	__X6875. On receipt of the entire amount due from the bidder, a check shall be drawn on the suspense account and forwarded to the applicable instrumentality.
8. Recyclable material. NOTE 1/ 10 U.S.C. 2577(reference (e)) limits the amounts which can be held in F3875 at the end of any FY resulting from the program to $2 million. Amounts in excess of $2 million are to be transferred to "Miscellaneous Receipts of the Treasury." This Instruction provides for immediate distribution of all sales proceeds received from the recyclable program.	__F3875 1/	__F3875.1/ On receipt of the entire amount due from the bidder, deposit total proceeds to the accounts designated by the DoD military installation that gave the material up for disposal.

DISPOSITION OF AMOUNTS COLLECTED FROM SUCCESSFUL BIDDERS - CONTINUED

Type of Property	Disposition of:	
	(20%) Bid Deposit	(80%) Remaining Balance
9. Lost, abandoned, or unclaimed privately owned personal property.	972651, "Sale of Scrap and Salvage Materials, Defense."	__X6001, "Proceeds of Sales of Lost, Abandoned or Unclaimed Personal Property." The owner(s) of lost, abandoned, or unclaimed property may claim the net proceeds from sale of that property within 5 years of the date of the sale by providing proof of ownership to the government. After 5 years from the date of the sale, any unclaimed net proceeds shall be transferred from __X6001 to general fund miscellaneous receipt account __1060, "Forfeitures of Unclaimed Money and Property."
10. Property owned by a country or international organization.	Operation and maintenance appropriation of the DoD Component that sells the property. (This is reimbursement for selling expenses.)	__X6875. On receipt of the entire amount due from the bidder, a check for 80% of the sales price shall be drawn on the suspense account and forwarded to the applicable foreign country or international organization.
11. Bones, fats, and meat trimmings generated by a commissary store.	Stock Fund.	Stock Fund.
12. Government furnished property sold by contractors. NOTE: 1/ See subsection E.7. of the Instruction.	1/	1/

BILLING CODE 3810-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD7–89–24]

Drawbridge Operation; Atlantic Intracoastal Waterway, Florida

AGENCY: Coast Guard, DOT.

ACTION: Temporary Rule.

SUMMARY: At the request of the Town of Jupiter, the Coast Guard is temporarily changing the regulations governing the Indiantown Road (SR 706) drawbridge in Palm Beach County by scheduling openings at 30 minute intervals from 7 a.m. to 6 p.m. on weekdays. This temporary deviation from the regulations is being made in order to evaluate suggested changes to the drawbridge operation requirements due to increases in both navigational and vehicular traffic This action may accommodate the increasing needs of vehicular traffic and still provide for the reasonable needs of navigation.

DATE: These temporary regulations become effective on July 17, 1989 and terminate on September 15, 1989.

ADDRESSES: Comments should be mailed to Commander (oan), Seventh Coast Guard District, 909 SE 1st Avenue, Miami, Florida 33131–3050. The comments and other materials referenced in this notice will be available for inspection and copying on the 4th Floor, of the Brickell Plaza Federal Building, 909 SE 1st Ave., Miami, Florida. Normal office hours are between 7:30 a.m. and 4 p.m., Monday through Friday, except holidays. Comments also may be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Mr. Walt Paskowsky (305) 536–4103.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, comments, data, or arguments. Persons submitting comments should include their names and addresses, identify the bridge, and give reasons for concurrence with or any recommended change in the proposal. Persons desiring acknowledgement that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

The Commander, Seventh Coast Guard District, will evaluate all communications received, the overall effect of this temporary regulation change and determine a course of future action on this proposal.

Drafting Information

The drafters of this notice are Mr. Walt Paskowsky, Bridge Administration Specialist, project officer, and Lieutenant Commander D.G. Dickman, project attorney.

Discussion of Temporary Regulations

The bridge is presently opened on signal, except that from November 1 through April 30 from 7 a.m. to 6 p.m. the draw need open only on the hour, 20 minutes after the hour, and 40 minutes after the hour. This change which limits openings to the hour and half hour from 7 a.m. to 6 p.m. Monday through Friday is intended to provide a longer interval between openings which may improve vehicle traffic flow. It is recognized that limiting the frequency of openings may increase their duration. The rule is being implemented on a temporary basis to study its effect on navigation and vehicular traffic.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. We conclude this because the rule exempts tugs with tows. Since the economic impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend part 117 of title 33, Code of Federal Regulations, as follows:

PART 117—[AMENDED]

1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05-1(g); 33 CFR 117.43.

2. Paragraph (q) of § 117.261 is revised to read as follows for the period July 17, 1989 through September 15, 1989. Because this is a temporary rule, this revision will not appear in the Code of Federal Regulations.

§ 117.261 Atlantic Intracoastal Waterway, St. Mary's River to Key Largo.

* * * * *

(q) The draw of the Indiantown Road (SR 706) bridge, mile 1006.2 at Jupiter shall open on signal, except that from November 1 through April 30 from 7 a.m. to 6 p.m. the draw need open only on the hour, 20 minutes after the hour and 40 minutes after the hour. From July 17, through September 15, 1989, Monday through Friday except federal holidays,

from 7 a.m. to 6 p.m., the draw need open only on the hour and half hour.

* * * * *

Dated: August 14, 1989.

Martin H. Daniell,

Rear Admiral, U.S. Coast Guard, Commander, Seventh Coast Guard District.

BILLING CODE 4910-14-M

POSTAL RATE COMMISSION

39 CFR Part 3001

[Docket No. RM89–3; Order No. 839]

Rules of Practice and Procedure Relating to Documentation of Statistical and Volume Evidence

Issued: August 22, 1989.

AGENCY: Postal Rate Commission.

ACTION: Final rule.

SUMMARY: The Commission amends its rules of practice requiring improved documentation of econometric studies offered in evidence (Rule 31(k)(2)), improved documentation of volume estimates offered in evidence by the Postal Service (Rule 54(j)), and periodic reports by the Postal Service of certain data relating to volumes (Rule 102(a)).

EFFECTIVE DATE: These amendments shall become effective August 28, 1989.

ADDRESS: Correspondence relating to this Notice of Rulemaking should be sent to Charles L. Clapp, Secretary of the Commission, 1333 Street, NW., Washington DC 20268 (telephone: 202/789–6840).

FOR FURTHER INFORMATION CONTACT: David F. Stover, General Counsel, 1333 Street, NW., Washington, DC 20268 (telephone: 202/789–6840).

SUPPLEMENTARY INFORMATION: The Commission issued its First Notice in this docket on March 1, 1989 (54 FR 9848–52, March 8, 1989). There we proposed amendments to 39 CFR 3001.31(k)(2), which governs the statistical presentations of all parties to our proceedings, 39 CFR 3001.54(j), which governs the Postal Service's presentation of projected volumes in our proceedings, and 39 CFR 3001.102(b), which governs periodic data reporting requirements to the Commission. These proposals were prompted by a perceived need by the Commission and numerous parties for clearer and more specific standards for initial documentation of econometric studies in our proceedings, particularly as they are employed in the increasingly complex demand analyses submitted by the Postal Service and others.

In response to comments on our First Notice, we issued a Second Notice of proposed rulemaking (54 FR 22317–24 (May 23, 1989)) in which we significantly revised our proposals concerning documentation of econometric studies. In this Notice, we promulgated final rules concerning documentation of econometric studies. Our final rules reflect further modest revisions to proposed rules 31(k)(2), 54(j), and 102(a), in response to comments received on our Second Notice.

Responding to our First Notice, several parties proposed amendments to our documentation standards governing various kinds of non-econometric evidence. Taken together they would involve major changes to a wide range of documentation standards. Thorough consideration of those changes would have delayed implementation of our proposals in this docket. For that reason we severed them from this docket in our Second Notice. Further action on these proposals is under consideration.

The Postal Service generally approved of the revisions that we made to our proposals in our Second Notice. They continued to express reservations, however, about several proposed requirements.

As modified in our Second Notice, proposed rule 31(k)(2)(iii)(d) requires, among other things, that parties provide reasons for rejecting alternative econometric models whose computed results influenced the choice of their preferred model. 54 FR 22320, 22324. It is the Postal Service's view that such statements would only occasionally be of interest to opposing parties, and, therefore, should only be required if opposing parties request them. Postal Service Comments on Second Notice at 4–5. We do not agree that it is excessive to make a statement of reasons for rejecting alternative models mandatory. This requirement would apply only to rejected alternatives that influenced the selection of a perferred model. Only very brief statements need be given to comply with the rule. We believe that interrogatories from opposing parties concerning reasons for rejecting such alternatives would be almost inevitable, absent the requirement. Therefore, we believe that providing such statements at the outset will speed discovery without adding signficantly to the documentation burden.

As modified in our Second Notice, proposed rule 31(k)(2)(iii)(e) requires that each econometric technique incorporated into an evidentiary submission either be referenced to a standard text or supported by a description and analysis that is sufficient for *ad hoc* technical evaluation. In its comments on our First Notice, the Postal Service expressed concern that this referencing requirement is too broad. In our Second Notice, we responded by explaining that it is intended to apply only to techniques used for fitting equations to data. We illustrated the scope of this requirement as applied to demand studies with citations to Appendix H of our Opinion in Docket No. R87–1. 54 FR 22319.

Commenting on our Second Notice, the Postal Service agrees that, with this guidance, the referencing requirement is manageable with respect to demand analysis. It maintains, nevetheless, that the requirement remains unmanageably broad as applied to other areas where econometric techniques are used. It warns that it will be difficult for a party submitting other forms of econometric evidence to recognize where a reference is required. It recommends that a reference not be required unless requested, to prevent disputes over whether the submitting party complied with the rule. Postal Service Comments on Second Notice at 3. We believe that it is best to keep the referencing requirement in mandatory form to avoid the delay that would otherwise occur. We are confident that techniques for fitting equations to data will not be substantially more numerous or more difficult for a submitting party to recognize in costing analyses that they are in demand studies. Presiding Officers will, however, be encouraged to apply a rule of reason to complaints of noncompliance, and cut motion practice short where an omitted reference is promptly provided.

Proposed rules 54(j)(5)(ii) and (iii) require that the Postal Service's before- and after-rates volume forecast extend four quarters beyond the test year. The Postal Service continues to oppose this requirement.

In our Second Notice we expressed our conviction that how a predictive model behaves if it is incrementally extended beyond the test year has a bearing on the reasonableness of the test-year prediction. The extra four quarters should make implausible dynamic behavior affecting the test year more readily apparent. 54 FR 22321. Econometric models with lagged variables and other time-dependent features, such as those of Postal Service witness Tolley, may have unsuspected dynamic properties. Extending the forecasts enhances our prospects of recognizing explosive growth, unstable oscillations and implausible reversals of direction that may be implied by the dynamic characteristics of an econometric model. These properties may not be apparent from forecasts for the close-in period, especially where price has transition effects. Requiring forecasts for an additional four quarters will enhance our ability to identify any such properties, free of transition effects.

The Postal Service questions whether its underestimation of Bulk Rate Regular Volumes in Docket No. R84–1 provides an appropriate illustration of the potential usefulness of this requirement. It argues that we were able to identify this underestimation because forecasted interim volumes could be compared with historical volumes while that docket was still pending. It points out that this would not be possible with post test-year forecasts. It also argues that it was able to identify anomalous forecasting properties of Dr. Hausman's econometric model for Bulk Rate Regular mail in Docket No. R87–1 by careful scrutiny of the model structure, without the aid of any post test-year forecasts based upon his model. Postal Service Comments on Second Notice at 8.

We grant that being able to compare predicted with historical results, as well as careful inspection of an econometric model, can be helpful in identifying anomalous forecast volume trends affecting the test year. Conceding this, however, does not detract from the fact that it would have been easier to identify both the unreasonable test year trends forecast by witness Tolley, and those implied by witness Hausman's model, if they had provided forecasts for several adjecent post test-year quarters.

The Postal Service argues that post test-year forecasts would shed no light on its test year forecasts, because if a mechanical extrapolation from its demand model were to yield an unreasonable post test-year forecast, its witnesses would modify it through judgmental adjustments. *Id.* This may be true, but, especially under our amended documentation standards, both the unreasonable extrapolation and the judgmental adjustment of it would be readily identifiable. So documented, the post test-year forecast would still provide useful notice to the parties that the result warrants further investigation or explanation.

The Postal Service questions our rationale that post test-year forecasts are useful because they show the results of the forecasting method free of transition affects. It contends that if we were in earnest about the need to evaluate a forecast, free of transition effects, our current test-year rule would require that the test year consist of the "first four quarters after new rates took effect." Postal Service Comments on Second Notice at 7.

Such an argument assumes that because we think it is useful to evaluate forecast results free of transition effects, this concern must override all others that have gone into the fashioning of our current test year rule. There are myriad reasons that we have not adopted such a test year definition, and myriad reasons that the Postal Service would doubtless object to it if we had. One is the fact that it would require the Postal Service to commit itself in advance of filing to a date certain for implementing its requested rates. Others are that it would ignore our need to have a fiscal-year test year, for accounting purposes, and our need to limit the range of allowable test years, so that they will not be too prospective, but will be reasonably representative of the period throughout which requested rates are actually in effect. See Notice of Proposed Rulemaking in Docket No. RM82–3, issued August 1, 1983 (48 FR 35914 (August 8, 1983)) and Order No. 529 (48 FR 50715 (November 3, 1983)). The usefulness of viewing forecasts free of transition effects must be balanced against these considerations. We think that it is much more reasonable to employ the modest requirements of proposed rules 54(j)(5) (ii) and (iii) to help us evaluate volume forecasts free of transition effects, than to rewrite our basic test-year rule in a manner that ignores its other objectives.

In our Second Notice, we discussed the Consumer Advocate's (OCA's) request that we revise our proposed rule 54(j)(5)(i) to require the Postal Service to document its econometric demand study in sufficient detail to allow parties to replicate it regardless of whether they have the exact software application that the Postal Service used. We said that we agreed that such detail should be provided, but that our proposed rule 54(j)(7)(i) already required such detail. 54 FR 22325. Clarification of these remarks is in order.

Proposed rule 54(j)(7)(i) requires the Postal Service to provide all "input files and programs needed to replicate" its econometric demand study. Our remarks in our Second Notice characterized proposed rule 54(j)(7)(i) as being more prescriptive than it actually is. It does not prescribe that the Postal Service provide documentation in so much detail that any party with standard software can replicate its demand study. It requires that computer materials sufficient to replicate the study be provided. This should be read to mean sufficient under the circumstances. The most relevant circumstances would ordinarily be the degree of detailed documentation that the Postal Service has included with its demand study. Under the rule, the Postal Service may provide any combination of computer materials and documentation of its model that is sufficient to allow parties of reasonable skill and expertise to replicate its model.

If, for example, the Postal Service has used non-standard software programs to develop its demand study, it may satisfy the rule either by providing those non-standard programs (and the documentation necessary to run them), or by providing documentation of its method that is thorough enough to allow parties to replicate its demand study without those non-standard programs. Of course, custom-written software must always be provided and documented under rule 31(k)(3). For purposes of rule 54(j)(7)(i), we will assume that parties have access to and sufficient skill to implement any standard statistical software packages in general commercial use. We will not, however, assume that parties have independently acquired access to, or the skill to use, unusual software capability not in general commercial use that the Postal Service might have employed to develop its demand model.

In our Second Notice, we revised the ongoing reporting requirements that we originally proposed for volume-related data. That revision took the form of proposed rule 102(a)(10), which would require that the Postal Service annually provide billing determinants from which price indices can be calculated. 54 FR 22322, 22324. The Postal Service has expressed its concern that current billing determinants for Express Mail, Priority Mail, and parcel post have commercial value that would cause competitive harm if regularly disclosed. It notes that in our recent Express Mail rulemaking, Docket No. RM88–2 (54 FR 25132, 25136–37 (June 13, 1989)), we acknowledged the commercial sensitivity of billing determinants for Express Mail by allowing it to file them one year late.

The Postal Service assumes that the one-year lag allowed there is one year from the time that non-competitive billing determinants are filed. See its proposed revised language for rule 102(a)(10) in footnote 1, at page 3 of its comments on our Second Notice. Our Express Mail rulemaking, however, allows the Postal Service to delay filing billing determinants up to one year from the time that the events occur. Nevertheless, we will revise our proposed rule 102(a)(10) to allow the Postal Service to file billing

determinants for its competitive services one year later than it files them for other services, consistent with its proposed revision of the rule. For purposes of rule 102(a)(10), regular reporting of billing determinants is more important than how current they are. For purposes of the proposed rules for expedited Express Mail hearings, it is more important to have current billing determinants.

In our Second Notice we added to our proposed rule 54(j)(6)(i) a requirement that the Postal Service present representative step-by-step derivations of its volume forecast from its econometric demand study for two major mail classes, and present any methodological departures from those representative derivations for remaining classes and subclasses. We did so in response to the OCA's suggestion that detailed derivations be presented for all classes and subclasses. *See* 54 FR 22319. The OCA asks us to reconsider our partial acceptance of his proposal. He argues that to present detailed derivations for all classes and subclasses would be very helpful and could be presented in only a few additional workpaper pages. As an illustration, he asserts that in Docket No. R87–1, such derivations for the three First-Class letter rate groups and the three third-class regular rate groups were presented in only two pages of Table 26 of Postal Service witness Tolley's Workpaper H. OCA Comments on Second Notice at 4.

It appears to us, however, that Table 26 omits some intermediate steps in the derivations of the forecasts for these mail categories. We remain concerned that to require step-by-step derivations for all classes and subclasses would require more documentation than is practical. We do agree with OCA, however, that additional documentation for the remaining classes and subclasses would be helpful. We are therefore adding to our final rule 54(j)(6)(i) a requirement that the Postal Service provide, at a minimum, summaries of derivations for remaining classes and subclasses of mail. Presentations at the level of detail comparable to witness Tolley's Table 26, referenced above, will be sufficient to satisfy the rule.

Responding to our First Notice, the OCA urged us to revise our proposed rule 31(k)(2)(iii)(h) to require that the party submitting an econometric model provide statistical tests of hypotheses concerning the functional form of the model, and the model's parameter constraints. In our Second Notice, we declined this suggestion, observing that functional forms are usually received hypotheses not capable of an econometric test. 54 FR 22323.

Commenting on our Second Notice, the OCA asks us to reconsider our rationale for declining his suggestion. He continues to assert that it would be appropriate to require hypothesis testing of a model's functional form and parameter constraints. He quotes an econometrics text that, he contends, confirms the value of testing functional forms to the designer of econometric models. He argues that requiring such tests would be an important means of documenting the judgmental selection of a model's functional form and its parameter constraints. OCA Comments on Second Notice at 3. We continue to adhere to the view that most aspects of the functional form of an econometric model are untestable. In applied econometrics, the functional forms and the identity of the variables in the model are regarded as received hypotheses. Testing is restricted to hypotheses about parameter values, the distribution of the errors, and other computed statistics. We are unaware of any generally-accepted statistical test of, for example, the log-log functional form that has been incorporated repeatedly in the submissions of the Postal Service and other parties in our rate proceedings. The passage from the text by Judge, *et al.*, that the OCA quotes at page 3 of his comments on our Second Notice, makes reference to Wald, likelihood ratio, Lagrange multiplier, and Hausman specification tests. None of these tests applies to the functional form of a model, as we understand them.

We should make a fundamental point about the OCA's suggestion that we neglected to make in our First Notice. He proposes that we insert in proposed rule 31(k)(2)(iii)(h) a partial list of subjects for required testing that includes functional forms and parameter constraints. Proposed rule 31(k)(2)(iii)(h) requires parties submitting econometric models to submit the results of all tests that they conduct, including those conducted for the purposes urged by the OCA. It was not our intent in proposing this rule to prescribe either the tests or the subjects of tests that parties must make. Our intent was merely to require full disclosure of whatever tests the parties undertake. In our view, the battery of statistical tests that is available to an econometrician is too large, and the suitability of any test is too dependent on the purpose for which it is applied, to make a rule prescribing the subjects for testing appropriate. For these reasons we decline to adopt the OCA's suggestion.

In our Second Notice, we decided to delete rule 31(k)(2)(iii)(j) from our proposed requirements for documenting econometric models. That rule would have required the submitting party to rerun its model with alterations suggested by others, where the suggested alterations were reasonably necessary to validate the model. The main use of the rule would have been to have sensitivity tests run to establish the robustness of the model. Despite its desirable purpose, the parties persuaded us that it would be difficult to implement, because there was likely to be excessive litigation over whether requests for alternative runs were reasonably necessary and nonburdensome. We concluded that with the improved documentation that our proposed rules would require, it would be more practical for opposing parties to make desired alternative runs of the model themselves. 54 FR 22320–21. With this reasoning we declined the suggestion of the Federal Trade Commission's Bureau of Economics (Bureau) that we require parties to submit unspecified sensitivity tests along with their models. We did, however, invite further discussion of specific suggestions as to how sensitivity tests might be required.

The Bureau responded by suggesting that we require parties to submit three kinds of sensitivity tests that it asserted "were frequently part of standard econometric practice and should not be too costly to perform," *i.e.*, deletion of variables, partitioning of data, and changing the form of variables. Bureau Comments of Second Notice at 6.

Even though these particular sensitivity tests are about as close as one might come to identifying standard tests, we are not confident that even they will be the best tests, or even meaningful tests, in all cases. We must concede that universally appropriate sensitivity tests cannot be identified in advance, considering the wide variety of models that might be submitted, and the wide variety of uses for which they might be submitted. Accordingly, we have decided not to adopt the Bureau's suggestion that we prescribe sensitivity tests in our rules.

In response to our First Notice, the Bureau suggested that we require the Postal Service to submit econometric analyses of the reliability of previous Postal Service models in predicting demand, and the reliability of its current model in predicting past changes in demand, using historical data. We indicated in our Second Notice that we agreed, in principle, that a track record is one of the best ways of assessing the reliability of a forecasting model, especially where judgmental "add factors" are a major component. But we expressed our skepticism that the Postal Service's models lend themselves to meaningful track record analysis, since, to the best of our knowledge, they are significantly revised each time they are implemented, and their implementations are few and intermittent. We nevertheless invited comment on more specifically framed proposals to require such analysis. 54 FR 22321–32.

In its response, the Bureau argues that a track record compiled from the Postal Service's models would still be meaningful despite the discontinuous implementation of those models. It reiterates its recommendation that the current model's specifications be applied to the circumstances of past implementations of the model, and that past models' specifications be applied to current circumstances. It asserts that such analysis would help us identify persistent biases, the effects of changes in specifications, which explanatory variables have been the most powerful predictors, and how accurate the Postal Service's forecasts have become over time. Bureau Comments on Second Notice at 7–8.

Up to now, the Postal Service has judgmentally adjusted the forecasts implied by its demand models so substantially that few generalizations about its underlying demand models could be drawn from a comparison of its adjusted forecasts. The Bureau, by contending that the exercises it recommends would provide meaningful comparisons of one model's forecasting properties with another, must have in mind comparing mechanically extrapolated forecasts from the various underlying demand models that the Postal Service has employed in past rate proceedings, rather than its judgmentally adjusted forecasts. It appears to us that even comparing unadjusted forecasts would be relatively uninformative. The disparity between the Postal Service's unadjusted results and known historical values is likely to be so large that meaningful generalizations as to their cause would be difficult to draw. Even is the Postal Service, in future proceedings, were to switch to forecasting methods that did not depend heavily on judgmental adjustments of the results of its econometrics, a number of rate cycles would be necessary before a meaningful track record could be compiled. For these reasons, we conclude that, at least in the near future, a rule making it mandatory for the Postal Service to present a track record analysis would not be productive.

Impact of changes. Pursuant to Executive Order 12291, the Commission finds that these amendments to our rules do not, individually or collectively, constitute a "major rule." They affect only rules of practice governing hearing procedures. Their economic impact will be negligible, including their impact on the costs or prices for consumers, individual industries, federal, state, or local government, agencies, or geographic regions. Additionally, these rule changes will have no measurable effect on competition, employment, investment, productivity, innovation, or on the employment, investment, productivity, innovation, or on the ability of United States enterprises to compete with foreign-based enterprises in domestic or export markets.

The above analysis that these rule changes do not constitute a major rule applies, as well, to the Regulatory Flexibility Act.

These rule changes do not contain policies with Federalism implications, and therefore do not warrant preparation of a Federalism assessment under E.O. 12612.

List of Subjects in 39 CFR Part 3001

Administrative practice and procedure, Postal Service.

Therefore, in consideration of the foregoing, part 3001, title 39, Code of Federal Regulations is amended as follows:

PART 3001—RULES OF PRACTICE AND PROCEDURE

1. The authority citation for 39 CFR Part 3001 continues to read as follows:

Authority: 39 U.S.C. 404(b), 3603, 3622–24, 3661, 3662, 84 Stat. 759–62,764, 90 Stat. 1303; (5 U.S.C. 553), 80 Stat. 383.

2. In § 3001.31, the introductory text of paragraph (k)(2) and paragraphs (k)(2)(ii), (k)(2)(iii), and (k)(2)(iv) are revised to read as follows:

§ 3001.31 [Amended]

* * * * *

(k) * * *

(2) *Statistical studies.* All statistical studies offered in evidence in hearing proceedings or relied upon as support for other evidence shall include a comprehensive description of the assumptions made, the study plan utilized and the procedures undertaken. Where a computer analysis is employed to obtain the result of a statistical study, all of the submissions required by § 3001.31(k)(3) shall be furnished, upon request. In addition, for each of the following types of statistical studies, the indicated information should be furnished:

* * * * *

(ii) *Experimental analyses. (a)* A complete description of the experimental design, including a specification of the controlled conditions and how the controls were realized;

(b) A complete description of the methods of making observations and the adjustments, if any, to observed data.

(iii) *Econometric Studies. (a)* A presentation of the economic theory underlying the study;

(b) A complete description of the econometric model(s) and the reasons for each major assumption and specification;

(c) The definition of the variables selected and the justification for their selection;

(d) For any alternative model whose computed econometric results influenced the choice of the preferred model, a statement of the reasons for rejecting that alternative, an identification of any differences between that alternative and the preferred model with respect to variable definitions, equation forms, data, or estimation methods, and, upon request, the computed econometric results for that alternative;

(e) A reference to a detailed description in a text, manual, or technical journal for every econometric technique used in the estimation process and the reasons for selecting the technique, or, in the alternative, a description and analysis of the technique that is sufficient for a technical evaluation;

(f) Summary descriptions and source citations for all input data and, upon request, a complete listing of the data. Complete descriptions of any alterations or transformations made to the data as received from the original sources, and the reasons for making the alterations;

(*g*) A complete report of the econometric results including, where applicable:

(*1*) coefficient estimates

(*2*) standard errors and t-values,

(*3*) goodness-of-fit statistics,

(*4*) other appropriate test statistics,

(*5*) the variance/covariance matrix of the estimates,

(*6*) computed residuals for results computed from samples composed of fewer than 250 observations, and, upon request, other computed residuals;

(*h*) Descriptions of all statistical tests of hypotheses and the results of such tests;

(iv) *All other studies involving statistical methodology.* (*a*) The formula used for statistical estimates;

(*b*) The standard errors of each component estimated;

(*c*) Test statistics and the description of statistical tests and all related computations, and final results; and

(*d*) Summary descriptions of input data, and upon request the actual input data shall be made available at the offices of the Commission.

* * * * *

3. In § 3001.54, paragraphs (j)(5), (j)(6), and (j)(7) are revised to read as follows:

§ 3001.54 [Amended]

* * * * *

(j) * * *

(5) Subject to paragraph (a)(2) of this section, there shall be furnished in every formal request, for each class and subclass of mail and postal service, the following:

(i) An econometric demand study relating postal volumes to their economic and noneconomic determinants including postal rates, discounts and fees, personal income, business conditions, competitive and complementary postal services, competitive and complementary nonpostal activities, population, trend, seasonal patterns and other factors.

(ii) The actual or estimated volume of mail at the prefiled rates for each postal quarter beginning with the first quarter of the most recent complete fiscal year and ending one year beyond the last quarter of the future fiscal year.

(iii) The estimated volume of mail assuming the effectiveness of the suggested rates for each postal quarter beginning with the quarter in which the rates are assumed to become effective and ending one year beyond the last quarter of the future fiscal year.

(6) The estimated volumes and revenues referred to in paragraphs (j)(2), (j)(3) and (j)(5) of this section shall be derived from the econometric demand study referred to in paragraph (j)(5)(i) of this section. Any departure from the assumptions and specifications in the demand study made in estimating volumes of any class or subclass of mail shall be explained.

(i) Subject to paragraph (a)(2) of this section, there shall be furnished in every formal request a detailed explanation of the methodology employed to forecast volumes for each class and subclass of mail and postal service. Representative derivations of these forecasts from the econometric demand study shall be presented in detail for two major mail classes, showing each intermediate value or factor employed. For remaining classes and subclasses of mail, such derivations may be summarized, except where their derivations depart from the representative methods presented.

(ii) Subject to paragraph (a)(2) of this section, there shall be furnished in every formal request a detailed explanation of the methodology employed to forecast changes in revenues for each class and subclass of mail and postal service resulting from changes in rates and fees.

(iii) Subject to paragraph (a)(2) of this section, there shall be furnished in every formal request a computer implementation of the methodology employed to forecast volumes and revenues for each class and subclass of mail and postal service.

(iv) The computer implementation described in paragraph (j)(6)(iii) of this section shall be able to compute forecasts of volumes and revenues compatible with those referred to in paragraphs (j)(2), (j)(3), and (j)(5) of this section for:

(*a*) Any set of rates and fees within a reasonable range of the prefiled and suggested rates,

(*b*) any date of implementation within the range spanned by the assumed date and the start of the future fiscal year,

(*c*) alternative forecasts of the economic determinants of postal volumes other than postal rates and fees, and

(*d*) alternative values of any parameters with assigned values that are based upon unverifiable judgments.

(v) The computer implementation described in paragraph (j)(6)(iii) of this section shall comply with § 3001.31(k)(3).

(7) Subject to paragraph (a)(2) of this section, there shall be made available at the offices of the Commission with every formal request, in a form that can be read directly by a standard digital computer, the following:

(i) All of the input files and programs needed to replicate the econometric demand study referred to in paragraph (j)(5)(i) of this section;

(ii) Any input files and programs employed to derive a price index for any class or subclass of mail or postal service from postal rates, discounts and fees;

(iii) Any input files and programs used to prepare data for use in the econometric demand study referred to in paragraph (j)(5)(i) of this section.

* * * * *

4. § 3001.102 is amended by adding a new paragraph (a)(10) to read as follows:

§ 3001.102 [Amended]

* * * * *

(a) * * *

(10) Billing determinants, at the level of detail employed in the most recent formal request for a change in rates or fees, except that the filing of billing determinant information for Express Mail, Priority Mail, and parcel post pursuant to this section may be delayed for up to one year.

* * * * *

By the Commission.

Charles L. Clapp,

Secretary.

BILLING CODE 7710-FW-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 704

[OPTS–82033; FRL–3636–5]

Comprehensive Assessment Information Rule; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; correction.

SUMMARY: This document corrects a typographical error that appeared in the Comprehensive Assessment Information Rule that was published in the Federal Register of July 19, 1989.

EFFECTIVE DATE: This document is effective August 28, 1989.

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Director, Environmental Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Room E–545, 401 M Street SW., Washington, DC 20460, Telephone: (202) 554–1404, TDD: (202) 554–0551.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of July 19, 1989 (54 FR 30211), EPA solicited comments from the public on certain issues concerning the Toxic Substances Control Act section 8(a) Comprehensive Assessment Information Rule (CAIR). On page 30212, column one, the eighteenth line of the third full paragraph, the production volume was incorrectly listed as 10,000 pounds; the correct number is 1,100.

Dated: August 11, 1989.

Frank D. Kover,

Chief, Chemical Screening Branch, Office of Toxic Substances.

GENERAL SERVICES ADMINISTRATION

41 CFR Part 201-19

[FIRMR Amdt. 16]

RIN 3090 AD 22

Information Resources Management Reviews

AGENCY: Information Resources Management Services, GSA.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to codify relevant information regarding the Federal Information Resources Management (IRM) Review Program previously delineated in Federal Information Resources Management Regulation (FIRMR) Temporary Regulation (TR) 10 and supplements to TR 10. Guidance and general information regarding this program have been removed from regulatory coverage and are now located in the newly developed FIRMR Bulletin 59, Federal Information Resources Management Review Program. This rule incorporates comments received in response to requests for comments on TR 10 and supplements to TR 10. This rule also consolidates and strengthens reporting requirements for the Federal IRM Review Program. Changes to the reporting requirements will allow the General Services Administration (GSA) to provide current and complete information on the impact and benefits of IRM reviews for all agencies in the annual report to Congress required by the Paperwork Reduction Act of 1980, as amended.

The Federal IRM Review Program was initiated in fiscal year 1986, and all 76 executive agencies have now formally entered into the program. GSA's first Consolidated Final Report covering the fiscal year 1986 through 1988 review cycle was forwarded to the Office of Management and Budget (OMB) on March 2, 1989. A recent GSA review of the Federal IRM Review Program indicated that Federal agencies generally have succeeded in establishing effective review programs within their IRM organizations. The success of the program to date has led GSA to conclude that it is appropriate to streamline and consolidate agency reporting requirements. Agencies will now be required to submit an Annual Executive Summary that also contains synopses of IRM reviews conducted during the previous year. This summary report, as described in FIRMR Bulletin 59, shall include: An overview of the previous year's effort; an evaluation of IRM review objectives; a summary of benefits realized through the IRM Review Program; a status of compliance with section 3506 of the Paperwork Reduction Act, as amended; and a description of planned review activities for the coming year.

This simplification of reporting requirements should not affect the substance or functioning of agency review programs. Departments and agencies have indicated the changes will allow them to focus on the reviews and their results instead of on a complex reporting cycle.

EFFECTIVE DATE: August 28, 1989.

FOR FURTHER INFORMATION CONTACT: R. Stewart Randall, Regulations Branch, Office of Information Resources Management Policy, telephone (202) 566-0194 or FTS, 566-0194.

SUPPLEMENTARY INFORMATION: (1) Reserved part 20-19 is activated under the title, Review and Evaluation. It contains policies and procedures pertaining to the Federal Information Resources Management Review Program.

(2) FIRMR Temporary Regulation 10 is canceled.

(3) The General Services Administration has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981. GSA decisions are based on adequate information concerning the need for, and the consequences of, the rule. This rule is written to ensure maximum benefits to Federal agencies. This is a Governmentwide regulation that will have little or no net cost effect on society. It is therefore certified that this rule will not have a significant impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

List of Subjects in 41 CFR Part 201-19

Government information resources activities, Government procurement, Information resources management reviews.

For the reasons set forth in the preamble, 41 CFR part 201-19 is added to chapter 200, subchapter C to read as follows:

PART 201-19—REVIEW AND EVALUATION

Sec.
201-19.000 Scope of part.

Subpart 201-19.1—Federal Information Resources Management Review Program

201-19.100 Scope of subpart.
201-19.101 General.
201-19.102 Policies.
201-19.103 Procedures.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c) and Sec. 101(f), 100 Stat. 1783-345, 40 U.S.C. 751(f).

§ 201-19.000 Scope of part.

This part prescribes policies and procedures for agency conducted evaluation programs to help agencies ensure that the acquisition, management, collection, maintenance, use, and dissemination of Federal information processing and related resources are consistent with applicable laws and regulations.

Subpart 201-19.1—Federal Information Resources Management Review Program

§ 201-19.100 Scope of subpart.

This subpart prescribes policies and procedures for the Federal Information Resources Management (IRM) Review Program as it relates to the management and use of information and to the acquisition, management and use of Federal information processing and related resources.

§ 201-19.101 General.

(a) Section 3513 of Title 44 of the United States Code (The Paperwork Reduction Act of 1980, Pub. L. 96-511) requires the Administrator of General Services to assist the Director of the Office of Management and Budget (OMB) in reviewing, at least once every three years, the information management activities of each executive agency. GSA is the focal agency for collecting, assessing and reporting on IRM review results to OMB. GSA has additional review and oversight responsibilities under the Federal Property and Administrative Services Act and the National Archives and Records Administration Act.

(b) The principal objectives of the Federal IRM Review Program are to:

(1) Determine if each agency is carrying out its information management activities in an efficient, effective, and economical manner in support of program missions and objectives.

(2) Determine how well each agency is complying with established IRM policies, procedures, principles, standards, and guidelines.

(3) Determine whether each agency is complying with the responsibilities assigned by The Paperwork Reduction Act of 1980, as amended (44 U.S.C. 3506).

(c) The following GSA-issued documents provide additional guidance related to this subpart:

(1) Federal Information Resources Management Review Program—An Executive Guide.

(2) IRM Review Handbook.

(3) FIRMR Bulletin series.

§ 201-19.102 Policies.

(a) Each executive agency shall establish an IRM review capability commensurate with the scope and complexity of the agency program objectives and missions.

(b) The agency head, in coordination with the agency's Designated Senior Official (DSO) for IRM, shall delegate IRM review authorities and responsibilities within the agency consistent with the Paperwork Reduction Act and this regulation. Specifically, the agency head shall ensure that the agency's review organization:

(1) Has authority to review programs, functions, and activities within the objectives and scope of IRM.

(2) Is responsive to established Governmentwide and agency-specific priorities.

(3) Is responsible for meeting the reporting requirements of the Federal IRM Review Program.

§ 201-19.103 Procedures.

(a) Each agency shall develop for its own use an IRM review plan which addresses, at a minimum, review priorities, objectives, compliance with section 3506 of the Paperwork Reduction Act, and planned reviews for the coming year. Each agency shall submit a report entitled "Annual Executive Summary", to GSA by November 1 in accordance with procedures established in the FIRMR Bulletin series. In the report, each agency shall provide an overview of the agency reviews conducted during the previous year; evaluate how well the reviews met overall agency review objectives; assess the benefits of the review effort to the agency; demonstrate how the agency is complying with Federal agency responsibilities of section 3506 of the Paperwork Reduction Act, as amended; describe planned review activities for the coming year; and synopsize each of the previous year's IRM reviews. This report has been cleared in accordance with FIRMR 201-45.6 and assigned Interagency Report Control Number 0326-GSA-AN.

(b) GSA may periodically conduct separate reviews of agencies' IRM activities to complement and supplement agency efforts. Prior to a GSA-conducted review, the designated senior official will be informed of its scope and the manner in which it will be conducted.

Dated: July 10, 1989.

Richard G. Austin,

Acting Administrator of General Services.

[FR Doc. 89-20213 Filed 8-25-89; 8:45 am]

BILLING CODE 6820-25-M

Proposed Rules

Federal Register
Vol. 54, No. 165
Monday, August 28, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1137

[DA-89-035]

Milk in the Eastern Colorado Marketing Area; Proposed Suspension of Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed suspension of rule.

SUMMARY: This notice invites written comments on a proposal to suspend for the months of September 1989 through February 1990 portions of the Eastern Colorado Federal milk order. The provisions proposed to be suspended were also suspended for the same period during the previous three years. Provisions proposed to be suspended relate to the limit on the period of automatic pool plant status for a supply plant which met pool shipping standards during a previous September through February period. Also proposed to be suspended for the same period are the "touch-base" and diversion limit requirements that each producer's milk be received at least three times each month at a pool distributing plant. Suspension of the provisions was requested by a cooperative association representing producers supplying the market in order to prevent uneconomic movements of milk.

DATE: Comments are due no later than September 5, 1989.

ADDRESS: Comments (two copies) should be filed with the USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456.

FOR FURTHER INFORMATION CONTACT: Richard A. Glandt, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456, (202) 447-4829.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act (5 U.S.C. 601-612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this proposed action would not have a significant economic impact on a substantial number of small entities. Such action would lessen the regulatory impact of the order on certain milk handlers and would tend to ensure that dairy farmers would continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under the criteria contained therein.

Notice is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), the suspension of the following provisions of the order regulating the handling of milk in the Eastern Colorado marketing area is being considered for the months of September 1989 through February 1990:

1. In the second sentence of § 1137.7(b), the words "plant which has qualified as a", and "of March through August".

2. In the first sentence of § 1137.12(a)(1), the words "from whom at least three deliveries of milk are received during the month at a distributing pool plant"; and in the second sentence "30 percent in the months of March, April, May, June, July, and December and 20 percent in other months of," as the word "distribution."

All persons who want to send written data, views or arguments about the proposed suspension should send two copies of them to the USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456, by the 7th day after publication of this notice in the **Federal Register**. The period for filing comments is limited to 7 days because a longer period would not provide the time needed to complete the required procedures and include September 1989 in the suspension period.

The comments that are sent will be made available for public inspection in the Dairy Division office during normal business hours (7 CFR 1.27(b)).

Statement of Consideration

Mid-America Dairymen, Inc. (Mid-Am), an association of producers that supplies some of the market's fluid milk needs and handles some of the market's reserve milk supplies, requested the suspension. For the months of September 1989 through February 1990, the suspension would remove the limit on the period of automatic pool plant status for a supply plant which met pool shipping standards during a previous September through February, and suspend the requirement that three deliveries of each producer's milk be received at a pool distributing plant each month.

Mid-Am states that the volume of producer milk pooled on the Eastern Colorado order during the first six months of 1989 increased 13.3 percent over year-earlier levels. During the same period, according to the cooperative, producer milk used in Class I has increased only 0.3 percent over the previous year. Mid-Am states also that present projections indicate that there will be ample supplies of locally produced milk to meet the fluid requirements of Eastern Colorado distributing plants.

Mid-Am observes that suspension of the order's "touch-base" delivery requirement for each producer would not allow for additional milk supplies to be pooled, but would provide for more efficient disposition of producer milk not needed for fluid requirements of Eastern Colorado distributing plants.

Without the suspension action, Mid-Am states that the cooperative will be required to ship milk from the western Nebraska and western Kansas area to Denver-area distributing plants, displacing locally-produced milk and resulting in shipments from the Denver area to surplus handling plants increasing by an identical amount. Both movements, according to Mid-Am, would represent uneconomic movements of milk. Without the requested continued suspension, the cooperative expects to incur substantial unnecessary costs for the movement of its milk solely for the purpose of pooling the milk of its members currently associated with the Eastern Colorado market.

List of Subjects in 7 CFR Part 1137

Dairy products, Milk, Milk marketing orders.

The authority citation for 7 CFR part 1137 continues to read as follows:

Authority: Sections. 1-19, 48 Stat. 31, as amended; 7 U.S.C 601-674.

Signed at Washington, DC, on August 23, 1989.

Kenneth C. Clayton,
Acting Administrator.

BILLING CODE 3410-02-M

SMALL BUSINESS ADMINISTRATION

13 CFR Parts 120 and 123

RIN 3245-AB99

Business and Disaster Loans

AGENCY: Small Business Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Small Business Administration (SBA) makes financial assistance available to individuals and businesses through direct and guaranteed loan programs. SBA proposes this rule to allow SBA to recover its collection costs from borrowers who have failed to satisfy their loan agreements and to assess additional penalties permitted by law. This proposed rule complies with the policies expressed in the Debt Collection Act of 1982, Public Law 97-365, and OMB Circular A-129.

DATE: Comments must be submitted on or before September 27, 1989.

FOR FURTHER INFORMATION CONTACT: Charles R. Hertzberg, Deputy Associate Administrator for Financial Assistance, 1441 L St. NW., Washington, DC 20416, telephone (202) 653-6574.

ADDRESSES: For comments relating to Part 120, Business Loans, contact Charles R. Hertzberg, Deputy Associate Administrator for Financial Assistance, 1441 L Street, NW., Washington, DC 20416, telephone (202) 653-6574.

For comments relating to part 123, Disaster Loans, contact Bernard Kulik, Deputy Associate Administrator for Disaster Assistance. 1441 L Street, NW., Washington, DC 20416, telephone (202) 653-6879.

SUPPLEMENTARY INFORMATION: The Debt Collection Act was enacted in 1982 to improve the recovery of delinquent debt owed to the Federal Government. It created new collection mechanisms for creditor Agencies and set forth interest, penalties and fees to be charged recalcitrant debtors. SBA makes financial assistance available to individuals and businesses through various direct and guaranteed loan programs. When SBA promulgated rules implementing the Debt Collection Act, it authorized the use of the new collection techniques, but continued to rely on the Small Business Act and/or other preexisting authorities as a legal basis for the imposition of fees on delinquent debtors.

SBA has now begun to rely more heavily on new Debt Collection Act techniques and is incurring costs of a nature and size not previously envisioned. For example, the Debt Collection Act authorizes SBA to refer delinquent debt to contractors for collection. These firms charge fees for their services. The Debt Collection Act permits such fees to be collected from the delinquent debtor.

To comply with the Administration's initiative to standardize collection processes, SBA proposes the following amendments to its regulations covering the business loan program and the disaster loan program. Conforming language will be added to promissory notes used subsequent to the effective date of these regulations, and will affect only those loans made subsequent to the effective date of these regulations, and will affect only those loans made subsequent to the effective date of these regulations. Together, these changes will allow fees and collection expenses, including collection agency fees to be passed on to a delinquent borrower whose obligation contains the above-referenced note provisions.

Initial Regulatory Flexibility Analysis

For purposes of the Regulatory Flexibility Act (5 U.S.C. 605(b)), SBA certifies that this proposed rule, if promulgated in final form, will not have a significant impact on a substantial number of small entities. However, because the proposed rule represents a significant change from SBA's long-established practice, the following analysis is presented.

SBA's portfolio of loans to small entities contains approximately 140,000 loans of which 80 percent are paid current. 20,000 new loans are made each year. If this rule becomes final, all new Notes for such loans will permit SBA to collect fees from delinquent borrowers. Of approximately 28,000 loans which may be delinquent at any one time, most will not incur the costs discussed in the proposed regulations. Many borrowers will voluntarily bring their loan current or reschedule their debt. Others will obtain protection under the Bankrupcty code.

SBA has not compiled statistics that would show the exact costs of this proposal on the average affected small entity. However, SBA now has over two years experience using debt collection contractors. Fees paid to contractors are the largest cost item which would be charged to delinquent borrowers under the proposed regulation. From this experience, SBA makes the following estimates.

SBA referred fewer than 16,000 accounts in two years. Under this proposal, the number of entities affected would be much lower for two to three years until borrowers who signed Notes with the newly-inserted fee provisions began to default. The contractors collected on 10-15% of the accounts referred. SBA paid average fees of $400 on 1,800 accounts. SBA estimates many accounts incurred costs under $200 and a much smaller number incurred costs in excess of $2,000.

Some borrowers will never completely satisfy their obligation. Fewer than 400, or 3%, of the small entities whose accounts SBA referred to collection agencies paid their debts in full. In all other cases, the proposed regulation would have changed SBA's internal accounting, but would have had no economic impact on the small entity. SBA concludes that in most cases the actual impact of the proposed regulation will be insignificant in relation to the principal balance owed by each affected entity.

SBA proposes to charge collection costs to borrowers so that SBA's collection practices will more closely parallel those of Agencies operating under direct authority of the Debt Collection Act. SBA has determined that there is no alternative way to collect these fees other than by promulgating the proposed regulation and changing the language in SBA promissory notes and other documents. If there were an alternative, the economic impact would be the same as that under the proposed regulation.

SBA certifies that the proposed rule does not constitute a major rule for the purposes of Executive Order 12291. The change is not likely to result in an annual effect on the economy of $100 million or more. In over two years of referring consumers, businesses and others to debt collection contractors, SBA incurred charges of less than $1,500,000. The annual effect should remain approximately $500,000 per year.

If promulgated in final form, this proposed rule would not impose additional reporting or recordkeeping requirements which would be subject to the Paperwork Reduction Act, 44 U.S.C. Chapter 35.

The proposed rule would not have federalism implications warranting the preparation of a Federal Assessment in accordance with Executive Order 12612.

13 CFR Part 120

List of Subjects in 13 CFR Part 120

Loan programs business.

Pursuant to the authority contained in section 5(b)(6) of the Small Business Act (15 U.S.C. 634(b)(6)), SBA proposes to amend part 120, Chapter I, Title 13, Code of Federal Regulations, as follows:

PART 120—BUSINESS LOAN POLICY

1. The authority citation for part 120 is revised to read as follows:

Authority: 15 U.S.C. 634(b)(6) and 636(a) and (h); 31 U.S.C. 3717(e).

2. Section 120.101–4(b) would be amended by revising it to read as follows:

§ 120.104-2 Service And commitment fees.

* * * * *

(b) *Late payments.* Additional fees for servicing accounts of borrowers who have not made timely payments or have otherwise failed to comply with loan conditions may be charged to the borrower to the extent authorized by the Debt Collection Act of 1982, 31 U.S.C. 3717(e), the Federal Claims Collection Standards, 4 CFR part 101, or agreement with the borrower (Note). The amount charged shall be limited to actual amounts paid by the bank or SBA, but may cover overhead and in-house costs, or a reasonable estimation thereof, and the full amount charged for collection or other services provided by third parties as authorized by the Debt Collection Act and the Federal Claims Collection Standards. A lender shall obtain SBA's prior written approval before charging such additional costs to the borrower.

13 CFR Part 123

List of Subjects in 13 CFR Part 123

Disaster assistance—Loan programs/business; Small businesses.

Pursuant to the authority contained in section 5(b)(6) of the Small Business Act (15 U.S.C. 634(b)(6)), SBA proposes to amend part 123, title 13, Code of Federal Regulations, as follows:

PART 123—DISASTER—PHYSICAL DISASTER AND ECONOMIC INJURY LOANS

1. The authority citation for part 123 is revised to read as follows:

Authority: Secs. 5(b)(6), 7(b), (c), (f) of the Small Business Act, 15 U.S.C. 634(b)(6) and 636(b), (c), (f); Pub. L. 100–590; 31 U.S.C. 3717(e).

2. Section 123.6(b) would be amended by adding three sentences at the end as follows:

§ 123.6 Fees and charges.

* * * * *

(b) * * * Borrowers may be charged for costs and expenses set forth in the Debt Collection Act, Pub. L. 97–365, 31 U.S.C. 3717(e), and implementing regulations appearing in the Federal Claims Collection Standards, 4 CFR part 101. These fees may include overhead and in-house costs incurred as a result of borrower's failure to make timely payments or otherwise comply with loan conditions. Any such fees shall be limited to actual expenses, or a reasonable estimation thereof, plus amounts billed by third parties as authorized by the Debt Collection Act and the Federal Claims Collection Standards, and shall be approved in writing by SBA.

BILLING CODE 8025-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 89–ANM–7]

Proposed Alteration of VOR Federal Airway V–382; Colorado

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter VOR Federal Airway V–382 between Grand Junction, CO, and Durango, CO. This action would expedite air traffic arriving and departing the Telluride Regional Airport. Altering V–382 would utilize the Cones very high frequency omni-directional radio range and distance measuring equipment (VOR/DME) and support the VOR/DME approach to Runway 9 to Telluride Regional Airport.

DATE: Comments must be received on or before October 13, 1989.

ADDRESSES: Send comments on the proposal in triplicate to:

Manager, Air Traffic Division, ANM–500, Docket No. 89–ANM–7, Federal Aviation Administration, 17900 Pacific Highway South, C–68966, Seattle, WA 98168.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Betty Harrison, Airspace Branch (ATO–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267–9255.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89–ANM–7." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA–230, 800 Independence Avenue SW., Washington, DC. 20591, or by calling (202) 267–3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to alter VOR Federal Airway V–382 between Grand Junction, CO, and Durango, CO. This extension would expedite air traffic departing from and landing at the Telluride Regional Airport, in the vicinity of the Cones VOR. In addition, altering V–382 would support the VOR/DME Runway 9 approach to the Telluride Regional Airport. The action would reduce controller workload and aid flight planning. Section 71.123 of part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6E dated January 3, 1989.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, VOR Federal airways.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.123 [Amended]

2. Section 71.123 is amended as follows:

V–382 [Amended]

By removing the words "to Grand Junction, CO." and substituting the words "Grand Junction; Cones, CO; to Durango, CO."

Issued in Washington, DC, on August 21, 1989.

Harold W. Becker,

Manager, Airspace-Rules and Aeronautical Information Division.

[Airspace Docket No. 89–ANM–8]

Proposed Alteration of Jet Route J–54; Oregon

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter Jet Route J–54 in the vicinity of Pendleton, OR, to create a more efficient traffic flow into and around the Seattle, WA, area. This action would save fuel, aid flight planning and reduce controller workload.

DATE: Comments must be received on or before October 13, 1989.

ADDRESSES: Send comments on the proposal in triplicate to:

Manager, Air Traffic Division, ANM–500, Docket No. 89–ANM–8, Federal Aviation Administration, 17900 Pacific Highway South, C68966, Seattle, WA 98168.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Betty Harrison, Airspace Branch (ATO–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267–9255.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on the notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89–ANM–8." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA–230, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267–3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to part 75 of the Federal Aviation Regulations (14 CFR part 75) to alter Jet Route J–54 in the vicinity of Pendleton, OR. This action is in conjunction with Seattle Air Route Traffic Control Center's sector realignment to create a more efficient traffic flow around the Seattle, WA, area. Altering J–54 would provide aircraft with a more direct route and would improve the traffic flow in this area. This action would save fuel, aid flight planning and reduce controller workload. Section 75.100 of part 75 of the Federal Aviation Regulations was republished in Handbook 7400.6E dated January 3, 1989.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 75

Aviation safety, Jet routes.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend part 75 of the Federal Aviation Regulations (14 CFR Part 75) as follows:

PART 75—ESTABLISHMENT OF JET ROUTES AND AREA HIGH ROUTES

1. The authority citation for Part 75 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 75.100 [Amended]

Section 75.100 is amended as follows:

J–54 [Amended]

By removing the words "Pendleton, OR" and substituting the words "Baker, OR".

Issued in Washington, DC, on August 21, 1989.

Harold W. Becker,

Manager, Airspace-Rules and Aeronautical Information Division.

BILLING CODE 4910-13-M

14 CFR Part 75

[Airspace Docket No. 89–ASW–2]

Proposed Establishment of Jet Route J–234; Texas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Withdrawal of notice of proposed rulemaking.

SUMMARY: This notice withdraws the Notice of Proposed Rulemaking (NPRM), Airspace Docket No. 89–ASW–2, which was published in the **Federal Register** on March 30, 1989. The NPRM proposed was Jet Route J–234 located in the vicinity of Amarillo, TX. The proposed route is aligned from Amarillo, via San Angelo,TX, to Junction, TX, in order to reroute traffic around the Brownwood 4 Military Operations Area (MOA)/Air Traffic Control Assigned Airspace (ATCAA). Based on usage statistics for the Brownwood 4 MOA/ATCAA compiled during the comment period, this action is no longer necessary.

EFFECTIVE DATE: August 28, 1989.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Branch (ATO–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267–9250.

The Proposed Rule

On March 30, 1989, a Notice of Proposed Rulemaking was published in the **Federal Register** to establish new Jet Route J–234 located in the vicinity of Amarillo, TX. This route would be established from Amarillo, via San Angelo, TX, to Junction, TX, to reroute traffic around the Brownwood 4 MOA/ATCAA.

Conclusions

Based on usage statistics for the Brownwood 4 MOA/ATCAA, the FAA has concluded that the establishment of new Jet Route J–234, which was to bypass the Brownwood 4 MOA/ATCAA, is not necessary. We are therefore withdrawing Airspace Docket No. 89–ASW–2.

List of Subjects in 14 CFR Part 75

Aviation safety, Jet routes.

The Withdrawal

Accordingly, pursuant to the authority delegated to me, the Notice of Proposed Rulemaking, Airspace Docket No. 89–ASW–2, as published in the **Federal Register** on March 30, 1989 (54 FR 13072), is hereby withdrawn.

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

Issued in Washington, DC, on August 15, 1989.

BILLING CODE 4910-13-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 935

Ohio Permanent Regulatory Program; Reclamation Board of Review

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule.

SUMMARY: OSMRE is announcing the receipt of proposed Program Amendment Number RBR–5 to the Ohio permanent regulatory program (hereinafter referred to as the Ohio program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendments are intended to incorporate changes to the Ohio Reclamation Board of Review (RBR) initiated by Ohio and to revise the Ohio Revised Code (ORC) and the Ohio Administrative Code (OAC) to be consistent with the corresponding Federal regulations. The proposed amendments would revise the composition of the RBR, would increase the per diem pay to RBR members, and would revise the standards to be applied concerning awards of costs and expenses, including attorneys' fees, by the RBR.

This notice sets forth the times and locations that the Ohio program and proposed amendments to that program will be available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendments, and the procedures that will be followed regarding the public hearing, if one is requested.

DATES: Written comments must be received on or before 4:00 p.m. on September 27, 1989. If requested, a public hearing on the proposed amendments will be held at 1:00 p.m. on September 22, 1989. Requests to present oral testimony at the hearing must be received on or before 4:00 p.m. on September 12, 1989.

ADDRESSES: Written comments and requests to testify at the hearing should be mailed or hand-delivered to Ms. Nina Rose Hatfield, Director, Columbus Field Office, at the address listed below. Copies of the Ohio program, the proposed amendments, and all written comments received in response to this notice will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requester may receive, free of charge, one copy of the proposed amendments by contracting OSMRE's Columbus Field Office.

Office of Surface Mining Reclamation and Enforcement, Columbus Field Office, 2242 South Hamilton Road, Room 202, Columbus, Ohio 43232, Telephone: (614) 866–0578.

Ohio Department of Natural Resources, Division of Reclamation, Fountain Square, Building B–3 Columbus, Ohio 43224, Telephone: (614) 265–6675.

FOR FURTHER INFORMATION CONTACT: Ms. Nina Rose Hatfield, Director, Columbus Field Office, (614) 866–0578.

SUPPLEMENTARY INFORMATION:

I. Background

On August 16, 1982, the Secretary of the Interior conditionally approved the Ohio program. Information on the general background of the Ohio program submission, including the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Ohio program, can be found in the August 10, 1982 **Federal Register** (47 FR 34688). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 935.11, 935.12, 935.15, and 935.16.

II. Discussion of the Proposed Amendments

On August 10, 1987 (52 FR 29515), the Deputy Director of OSMRE approved Program Amendment No. RBR–3 which revised the rules of the Ohio Reclamation Board of Review (RBR) at Ohio Administrative Code (OAC) sections 1513–3–21(E) (3), (4), and (5). These amendments had been required by OSMRE at 30 CFR 935.16(a) so that the standards used by the RBR to award costs and expenses, including attorney's fees, would be no less effective than the Federal counterparts at 43 CFR part 4.

During Ohio's promulgation of Program Amendment No. RBR–3, the Ohio Mining and Reclamation Association (OMRA) voiced opposition to the rule change and the RBR withdrew the amendments in a letter dated November 13, 1987 (Administrative Record No. OH–0993). The disputed issues concerning this rule change were subsequently resolved under a settlement agreement filed in *Ohio Mining and Reclamation Association, et al.* v. *Hodel et al.*, Civil Action No. C3–86–0611 (S.D. Ohio, December 23, 1987) between OMRA, the Mining and Reclamation Council of America, and OSMRE.

By letter dated March 24, 1988 (Administrative Record No. OH–1021), the RBR submitted proposed Program Amendment No. RBR–4 to revise OAC sections 1513–3–21(E) (3), (4), and (5) to reflect the terms of the settlement agreement. On July 14, 1988 (53 FR 26592), the Deputy Director of OSMRE approved this amendment.

During Ohio's promulgation of Program Amendment No. RBR–4, the OMRA again voiced opposition to the rule change and the RBR withdrew the amendments in a letter dated October 19, 1988 (Administrative Record No. OH–1106). The disputed issues concerning this rule change were subsequently resolved between Ohio and the OMRA.

By letter dated August 11, 1989 (Administrative Record No. OH–1199), Ohio submitted proposed Program Amendment No. RBR–5. This proposed Program Amendment would revise the Ohio Program at ORC sections 1513.05 and 1513.13 (E) and (F) and at OAC section 1513–3–21(E). The substantive changes in these sections are discussed briefly below.

(1) ORC section 1513.05: This section is being rewritten to change the composition of the RBR. Under the existing Ohio program, four of the seven members of the RBR are appointees who represent the public and of whom one must be an attorney. Under the proposed revision, these four members would be changed to two appointees who own and operate a farm or are retired farmers, one appointee who is the representative of an operator of a coal mine, and one appointee who is a representative of the public. The composition of the three remaining RBR members would not be revised: one appointee who is experienced in modern forestry practices, one appointee who is experienced in agronomy, and one appointee who is either experienced in earth-moving or is a civil engineer.

This section is also being rewritten to increase the per diem pay of members of the RBR from one hundred to one hundred fifty dollars per day.

(2) ORC section 1513.13 paragraph (E): This paragraph is being rewritten to authorize the award of costs and expenses, including attorneys' fees, under three circumstances to parties involved in appeals before the RBR:

(1) To either the permittee or to the person requesting payment of costs and expenses from the Ohio Department of Natural Resources, Division of Reclamation if the RBR determines that the permittee or other person made a substantial contribution to a full and fair determination of the appeal or administrative proceeding before the RBR.

(2) To a permittee from a person who initiated or participated in an appeal if the permittee demonstrates that the person did so in bad faith and for the purpose of harassing or embarrassing the permittee.

(3) To the Ohio Department of Natural Resources, Division of Reclamation from a person who initiated an appeal if the Division of Reclamation demonstrates that the person initiated or participated in the appeal in bad faith and for the purpose of harassing or embarrassing the Division of Reclamation.

The proposed revisions to this section would delete the current possibility of the award of costs and expenses to a person from a permittee.

Nonsubstantive changes are also proposed in this rule to correct paragraph letter notations.

(3) ORC section 1513.13 paragraph (F): This paragraph is being added to provide that costs and expenses may be awarded by court order at the request of any party in connection with judicial review of orders issued under ORC § 1513.13

(4) OAC section 1513–3–21 paragraph (E): This paragraph is being rewritten to delete discussion of the standards for awards of costs and expenses by the RBR which are to be included in ORC 1513.13(E).

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17(h), OSMRE is now seeking comment on whether the amendments proposed by Ohio satisfy the applicable program criteria of 30 CFR 732.15. If the amendments are deemed adequate, they will become part of the Ohio program.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "DATES" or at locations other than the Columbus Field Office will not necessarily be considered in the

BEST COPY AVAILABLE

and the owner of the structure have no

considered in the final rulemaking or

ACTION: Proposed rule; public comment final rulemaking or included in the Administrative Record.

Public Hearing

Persons wishing to comment at the public hearing should contact the person listed under "**FOR MORE INFORMATION CONTACT**" by 4:00 p.m. on September 12, 1989. If no one requests an opportunity to comment at a public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSMRE officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment and who wish to do so will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment have been heard.

Public Meeting

If only one person requests an opportunity to comment at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSMRE representatives to discuss the proposed amendments may request a meeting at the Columbus Field Office by contacting the person listed under "**FOR FURTHER INFORMATION CONTACT.**" All such meetings shall be open to the public and, if possible, notices of the meetings will be posted at the locations listed under "**ADDRESSES.**" A written summary of each public meeting will be made a part of the Administrative Record.

BILLING CODE 4310-05-M

---

30 CFR Part 935

Ohio Permanent Regulatory Program; Liability for Subsidence Damage

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule.

SUMMARY: OSMRE is announcing the receipt of proposed Revised Program Amendment Number 28 to the Ohio permanent regulatory program (hereinafter referred to as the Ohio program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendments are intended to incorporate rule changes initiated by the State. The amendments would specify the use of agreements between mine operators and surface owners concerning subsidence damage, would limit exemptions of structures to those owned by mine operators, and would specify mine operators' responsibilities if a surface owner prevents the implementation of the operator's plan for repair or compensation of subsidence damage.

This notice sets forth the times and locations that the Ohio program and proposed amendments to that program will be available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendments, and the procedures that will be followed regarding the public hearing, if one is requested.

DATE: Written comments must be received on or before 4:00 p.m. on September 27, 1989. If requested, a public hearing on the proposed amendments will be held at 1:00 p.m. on September 22, 1989. Requests to present oral testimony at the hearing must be received on or before 4:00 p.m. on September 12, 1989.

ADDRESSES: Written comments and requests to testify at the hearing should be mailed or hand-delivered to Ms. Nina Rose Hatfield, Director, Columbus Field Office, at the address listed below. Copies of the Ohio program, the proposed amendments, and all written comments received in response to this notice will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requester may receive, free of charge, one copy of the proposed amendents by contacting OSMRE's Columbus Field Office.

Office of Surface Mining Reclamation and Enforcement, Columbus Field Office, 2242 South Hamilton Road, Room 202, Columbus, Ohio 43232, Telephone: (614) 866-0578.

Ohio Department of Natural Resources, Division of Reclamation, Fountain Square, Building B-3, Columbus, Ohio 43224, Telephone: (614) 265-6675.

FOR FURTHER INFORMATION CONTACT: Ms. Nina Rose Hatfield, Director, Columbus Field Office, (614) 866-0578.

SUPPLEMENTARY INFORMATION:

I. Background

On August 16, 1982, the Secretary of the Interior conditionally approved the Ohio program. Information on the general background of the Ohio program submission, including the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Ohio program, can be found in the August 10, 1982 **Federal Register** (47 FR 34688). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 935.11, 935.12, 935.15, and 935.16.

II. Discussion of the Proposed Amendments

By letter dated February 6, 1989 (Administrative Record No. OH-1142), the Ohio Department of Natural Resources, Division of Reclamation (Ohio) submitted proposed Program Amendment No. 38 to the Ohio program at Ohio Administrative Code (OAC) section 1501:13-12-03(B), (D)(2)(a) and (b), (D)(4)(a)(ii), and (D)(4)(b). The proposed amendments were initiated by the State.

OSMRE announced receipt of the proposed amendment in the March 1, 1989 **Federal Register** (54 FR 8561), and, in the same notice, opened the public comment period and provided opportunity for a public hearing on the adequacy of the proposed amendment.

By letter dated August 10, 1989 (Administrative Record No. OH-1198), Ohio withdrew proposed Program Amendment No. 38 and submitted a new Revised Program Amendment No. 38. Revised Program Amendment No. 38 would modify OAC Section 1501:13-12-03 paragraphs (D)(2), (D)(2) (a) and (b), (D)(4), and (D)(4) (a) and (b) and would create new paragraphs (E) and (H)(3). The proposed amendment would also make nonsubstantive changes to paragraph letter notations throughout the rule.

The proposed new paragraph (E) in OAC section 1501:13-12-03 would provide that agreements between mine operators and surface owners which address the repair of or compensation for subsidence damage shall take precedence over the provisions of OAC section 1501:13-12-03 and that the provisions of OAC section 1501:13-12-03 shall not apply to damage to structures covered under such agreement.

The proposed changes to paragraph (D)(2) would rewrite this paragraph to specify that the mine operator shall repair subsidence damage to structures or shall compensate the owner of the damaged structure if the mine operator

and the owner of the structure have no agreement for repair or compensation of subsidence damage.

The proposed changes to paragraph (D)(2)(a) and (b) would rewrite these paragraphs to delete an existing provision in the Ohio regulations concerning relief of liability for subsidence damage. This existing provision exempts underground mine operators from the liability to repair or compensate for damage to structures from mine subsidence if the mine operator has an agreement with the owner of the affected structure relieving the mine operator of that liability. The proposed amendments would delete this exemption and provide that underground mine operators are relieved of the liability to repair or compensate for subsidence damage only if the mine operator is the owner of the affected structure.

The proposed changes to paragraphs (D)(4) and (D)(4) (a) and (b) would rewrite these paragraphs to specify that, if the mine operator has not reached an agreement with the owner of a structure damaged by subsidence, then the operator shall fully perform the obligations specified in any remedial plans submitted under existing paragraph (D)(3), provided that the surface owner does not prevent the mine operator from performing those obligations.

The proposed new paragraph (H)(3) would provide that, if the surface owner prevents the implementation of the mine operator's plan for repair or compensation of subsidence damage, then the Chief of the Division of Reclamation, Ohio Department of Natural Resources shall take no further action and the surface owner may pursue whatever private rights of action may be available to the surface owner.

III. Public Comment Procedure

In accordance with the provisions of 30 CFR 732.17(h), OSMRE is now seeking comment on whether the amendments proposed by Ohio satisfy the applicable program approval criteria of 30 CFR 732.15. If the amendments are deemed adequate, they will become part of the Ohio program.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "DATES" or at locations other than the Columbus Field Office will not necessarily be considered in the final rulemaking or included in the Administrative Record.

Public Hearing

Persons wishing to comment at the public hearing should contact the person listed under "FOR MORE INFORMATION CONTACT" by 4:00 p.m. on September 12, 1989. If no one requests an opportunity to comment at a public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSMRE officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment and who wish to do so will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment have been heard.

Public Meeting

If only one person requests an opportunity to comment at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSMRE representatives to discuss the proposed amendments may request a meeting at the Columbus Field Office by contacting the person listed under "**FOR FURTHER INFORMATION CONTACT.**" All such meetings shall be open to the public and, if possible, notices of the meetings will be posted at the locations listed under "ADDRESSES." A written summary of each public meeting will be made a part of the Administrative Record.

30 CFR Part 944

Utah Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule; public comment period and opportunity for public hearing on proposed amendment.

SUMMARY: OSMRE is announcing the receipt of a proposed amendment to the Utah permanent regulatory program (hereinafter, the Utah program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The proposed amendment consists of a new set of coal rules that would completely replace those rules currently in effect. The amendment is intended to revise the State program to be consistent with the corresponding Federal regulations and to improve operational efficiency.

This notice sets forth times and locations that the Utah program and proposed amendment to that program are available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendment, and public hearing procedures that will be followed if a hearing is requested.

DATES: Written comments must be received by 4:00 p.m., m.d.t., September 27, 1989. If requested, a public hearing on the proposed amendment will be held on September 22, 1989. Requests to present oral testimony at the hearing must be received by 4:00 p.m., m.d.t. on September 12, 1989.

ADDRESSES: Written comments should be mailed or delivered to Mr. Robert H. Hagen at the address provided below.

Copies of the Utah program, the proposed amendment, and all written comments received in response to this notice will be available for public review at the addresses listed below. These offices are open during normal business hours, Monday through Friday, excluding holidays. One free copy of the proposed amendment is available upon request by contacting the OSMRE Albuquerque Field Office.

Mr. Robert H. Hagen, Director, Albuquerque Field Office, Office of Surface Mining Reclamation and Enforcement, 625 Silver Avenue, S.W., Suite 310, Albuquerque, New Mexico 87102, Telephone: (505) 766-1486

Utah Division of Oil, Gas and Mining, 355 West North Temple, 3 Triad Center, Ste, 350, Salt Lake City, UT 84180-1203, Telephone: (801) 538-5340

FOR FURTHER INFORMATION CONTACT: Mr. Robert H. Hagen, Director, Albuquerque Field Office, whose address and telephone number are listed in "**ADDRESSES.**"

SUPPLEMENTARY INFORMATION:

I. Background on the Utah Program

The Secretary of the Interior conditionally approved the Utah program on January 21, 1981. Background information on the Utah program, including the Secretary's findings, the disposition of comments, and the conditions of approval can be found in the January 21, 1981, **Federal Register** (46 FR 589). Subsequent actions concerning Utah's regulatory program can be found at 30 CFR 944.12, 944.15, 944.16, and 944.30.

II. Proposed Amendment

By letter dated August 11, 1989 (Administrative Record No. UT–515), Utah submitted a proposed amendment to its program pursuant to SMCRA and 30 CFR 732.17(f) and (g). Utah submitted the proposed amendment in response to (1) the May 12, 1986, June 9, 1987, and November 21, 1988, OSMRE letters to Utah in which deficiencies in the Utah program were identified in accordance with 30 CFR 732.17(c); and (2) the disapprovals of certain provisions of the Utah program at 30 CFR 944.12 (a) and (b) that OSMRE made to comply with the February 26, 1980, May 16, 1980, and August 15, 1980, opinions and orders of the U.S. District Court for the District of Columbia (in re: *Permanent Surface Mining Regulation Litigation* (Civil Action 79–1144)).

In addition to revising its rules in response to OSMRE identified deficiencies, Utah at its own initiative substantially reorganized its rules and revised its guideline for revegetation. The rules that Utah proposes to amend are:

R614–100—Administrative: Introduction
R614–101—Administrative: Restrictions on State Employees
R614–102—Administrative: Exemption for Coal Extraction Incident to Government-Financed Highway or Other Construction
R614–103—Administrative: Areas Unsuitable for Coal Mining and Reclamation Operations
R614–104—Administrative: Protection of Employees
R614–105—Administrative: Blaster Training, Examination, and Certification
R614–200—Coal Exploration: Introduction
R614–201—Coal Exploration: Requirements for Exploration Approval
R614–202—Coal Exploration: Compliance Duties
R614–203—Coal Exploration: Public Availability of Information
R614–300—Coal Mine Permitting: Administrative Procedures
R614–301—Coal Mine Permitting: Permit Application Requirements
R614–301–100—General Contents
R614–301–200—Soils
R614–301–300—Biology
R614–301–400—Land Use and Air Quality
R614–301–500—Engineering
R614–301–600—Geology
R614–301–700—Hydrology
R614–301–800—Bonding and Insurance
R614–302–100—General
R614–302–200—Special Categories of Mining
R614–302–300—Special Areas of Mining
R614–303—Coal Mine Permitting: Change, Renewal, and Transfer, Assignment, or Sale of Permit Rights
R614–303–100—General Information on the Change, Renewal, Assignment, or Sale of Permit Rights
R614–303–200—Permit Review, Change, and Renewal
R614–303–300—Transfer, Assignment, or Sale of Permit Rights
R614–400—Inspection and Enforcement: Division Authority and Procedures
R614–400–100—General Information on Authority and Procedures
R614–400–200—When Penalty Will be Assessed
R614–401–300—Point System for Penalties
R614–401–400—Assessment of Separate Violations for Each Day
R614–401–500—Waiver of Use of Formula to Determine Civil Penalty
R614–401–600—Procedures for Assessment of Civil Penalties—Proposed Assessment
R614–401–700—Procedures for Informal Assessment Conference
R614–401–800—Request for Formal Hearing
R614–401–900—Final Assessment and Payment of Penalty Revised Vegetation Guideline

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17(h), OSMRE is seeking comments on whether the proposed amendment satisfies the applicable program approval criteria of 30 CFR 732.15. If the amendment is deemed adequate, it will become part of the Utah Program.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "DATES" or at locations other than the Albuquerque Field Office will not necessarily be considered in the final rulemaking or included in the administrative record.

Public Hearing

Persons wishing to testify at the public hearing should contact the person listed under "**FOR FURTHER INFORMATION CONTACT**" by 4:00 p.m., m.d.t. on September 12, 1989. The location and time of the hearing will be arranged with those persons requesting the hearing. If no one requests an opportunity to testify at a public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing or in advance of the hearing is requested to assist the transcriber. Submission of written statements in advance of the hearing will allow OSMRE officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to testify have been heard. Persons in the audience who are not scheduled to testify, and who wish to do so, will be heard immediately following the testimonies of those who were scheduled. The hearing will end after all persons scheduled or present have been heard.

Public Meeting

If only one person requests an opportunity to testify at a hearing, a public meeting, rather than a public hearing, may be held. Persons who wish to meet with OSMRE representatives to discuss the proposed amendment may request a meeting by contacting the person listed under "**FOR FURTHER INFORMATION CONTACT.**" All such meetings will be open to the public and, if possible, notices of meetings will be posted at each of the locations listed under "**ADDRESSES.**" A written summary of each meeting will be prepared and entered in the administrative record.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[OGD 05–89–81]

Special Local Regulations for Marine Events; Diet Pepsi Triathlon, Wrightsville Channel, Wrightsville Beach, NC

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to establish permanent special local regulations for the Swim portion of the Diet Pepsi Triathlon held annually in Wrightsville Channel between daybeacon 18 (LLNR 28050) and daybeacon 23 (LLNR 28065), Wrightsville Beach, North Carolina. The regulations are necessary to control spectator craft and to provide for the safety of life and property on the navigable waters during the event.

DATE: Comments must be received on or before September 18, 1989.

ADDRESSES: Comments should be mailed or hand carried to Commander (bb), Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23704–5004. The comments will be available for inspection and copying at Room 209 of this address. Normal office hours are between 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Billy J. Stephenson, Chief, Boating Affairs Branch, Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23704–5004 (804) 398–6204.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, data, or arguments. Persons submitting comments should include their names and addresses, identify this notice (OGD 05–89–81) and the specific section of the proposal to which their comments apply, and give reasons for each comment. The regulations may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on the proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process. The receipt of comments will be acknowledged if a stamped self-addressed postcard or envelope is enclosed.

Drafting Information

The drafters of this notice are Mr. Billy J. Stephenson, project officer, Chief, Boating Affairs Branch, Fifth Coast Guard District, and Lieutenant Commander Robin K. Kutz, project attorney, Fifth Coast Guard District Legal Staff.

Discussion of Proposed Regulations

The Diet Pepsi Triathlon has been an annual event for the past ten years, but has not been regulated in the past. The swim portion of the triathlon will consist of approximately 800 swimmers racing in a section of Wrightsville Channel. The participants are to swim one and one tenth miles as the first leg of the triathlon, starting at the Blockade Runner Hotel beach, located east of Wrightsville Channel Daybeacon 18 (LLNR 28050) and swim westward past the Sea Path Boatominium Marina finishing at Atlantic Marina located north of Wrightsville Channel Daybeacon 23 (LLNR 28080). It is necessary to close a portion of Wrightsville Channel to all traffic except participants for the safety of those competing in the swim and their attending personnel. If adopted, this proposal will apply to the swim portion of the 11th Annual Diet Pepsi Triathlon, scheduled from 7:00 a.m. to 8:45 a.m., October 1, 1989. Because closure of the waterway is not anticipated for any extended period, waterborne traffic should not be severely disrupted.

Economic Assessment and Certification

These regulations are not considered either major under Executive Order 12291 on Federal Regulation or significant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact is expected to be so minimal that a full regulatory evaluation is unnecessary. Because of this minimal impact, the Coast Guard certifies that these regulations will not have a significant economic impact on a substantial number of small entities.

Federalism Assessment

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the final rule does not raise sufficient federalism implications to warrant the preparation of a federalism Assessment.

Environmental Impact

This final rule has been thoroughly reviewed by the Coast Guard and has been determined to be categorically excluded from further environmental documentation in accordance with section 2.B.2.c of Commandant Instruction M16475.1B. A Categorical Exclusion Determination statement has been prepared and has been placed in the rulemaking docket.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend part 100 of title 33, Code of Federal Regulations as follows:

PART 100—[AMENDED]

1. The authority citation for part 100 continues to read as follows:

Authority: 33 U.S.C. 1233; 49 CFR 1.46 and 33 CFR 100.35.

2. A new § 100.513 is added to read as follows:

§ 100.513 Wrightsville Channel, Wrightsville Beach, North Carolina.

(a) *Definitions.*—(1) *Regulated area.* The waters of, and adjacent to, Wrightsville Channel, from Wrightsville Channel Daybeacon 14 (LLNR 28040), located at latitude 34°12'18.0" N, longitude 77°48'10.0" W, to Wrightsville Channel Daybeacon 25 (LLNR 28080), located at latitude 34°12'51.0" N, longitude 77°48'58.0" W.

(2) *Coast Guard Patrol Commander.* The Coast Guard Patrol Commander is a commissioned, warrant, or petty officer who has been designated by the Commander, Coast Guard Group Fort Macon.

(b) *Special Local Regulations.* (1) Except for persons or vessels authorized by the Coast Guard Patrol Commander, no person or vessel may enter or remain in the regulated area.

(2) The operator of any vessel in the immediate vicinity of this area shall:

(i) Stop the vessel immediately upon being directed to do so by any commissioned, warrant, or petty officer on board a vessel displaying a Coast Guard ensign.

(ii) Proceed as directed by any commissioned, warrant or petty officer on board a vessel displaying a Coast Guard ensign.

(3) Any spectator vessel may anchor outside of the regulated area specified in paragraph (a)(1) of this section, but may not block a navigable channel.

(c) *Effective Period:* The Commander, Fifth Coast Guard District will publish a notice in the **Federal Register** and in the Fifth Coast Guard District Local Notice to Mariners announcing the times and dates that this section is in effect.

Dated: August 17, 1989.

P.A. Welling,
Rear Admiral, U.S. Coast Gaurd, Commander, Fifth Coast Guard District.

[FR Doc. 89–20147 Filed 8–25–89; 8:45 am]
BILLING CODE 4910–14–M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 4

RIN 2900–AD99

Definition of Marginal Employment in Consideration of Total Evaluations Based on Individual Unemployability

AGENCY: Department of Veterans Affairs.

ACTION: Proposed regulation.

SUMMARY: The Department of Veterans Affairs (VA) proposes to amend the Schedule for Rating Disabilities to define marginal employment in consideration of total disability ratings based on unemployability of an individual. This amendment is necessary to respond to a General Accounting Office (GAO) study on this subject. The intended effect is to promote consistency in making determinations of marginal employment.

DATES: Comments must be received on or before September 27, 1989. Comments will be available for public inspection until October 10, 1989. This rule is proposed to be effective 30 days after the date of final publication.

ADDRESSES: Interested persons are invited to submit written comments, suggestions, or objections regarding this proposed admendment to the Secretary of Veterans Affairs (271A) Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420. All written comments will be available for public inspection only in the Veterans Services Unit, Room 132, at the above address and only between the hours of 8:00 a.m. and 4:30 p.m. Monday through Friday (except holidays) until October 10, 1989.

FOR FURTHER INFORMATION CONTACT: Joel Drembus, Consultant, Regulations Staff (211B), Compensation and Pension Service, Veterans Benefits Administration (202) 233-3005.

SUPPLEMENTARY INFORMATION: The GAO report "Veterans Benefits: Improving the Integrity of VA's Unemployability Compensation Program," revealed that many veterans with earnings are not reporting those earnings to VA as required. To run an effective verification program, VA needs to clarify its policy and regulations on marginal employment as the GAO study revealed that VA regional offices were interpreting marginal employment in a number of different ways, and that marginal employment was determined on a case-by-case basis. The GAO report concluded and recommended that VA define marginal employment so that the criteria used in making determinations of marginal employment in claims for unemployability are consistent between rating boards.

Section 4.16(a) currently provides, in pertinent part, that total disability ratings may be assigned, where the schedular rating is less than total, when the veteran is, in the judgment of the rating agency, unable to secure or follow substantially gainful employment as a result of service-connected disabilities. It has been VA policy that marginal employment is not to be considered substantially gainful employment.

It is proposed to amend § 4.16(a) to define marginal employment as existing when a veteran's earned annual income does not exceed the amount established by the Bureau of the Census as the poverty threshold for one person (by age). The poverty thresholds are computed each March for the preceding calendar year.

The Secretary hereby certifies that this proposed regulatory amendment will not have a significant impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. The reason for this certification is that the amendment would not directly affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), this amendment is exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

In accordance with Executive Order 12291, Federal Regulations, we have determined that this regulatory amendment is non-major for the following reasons:

(1) It will not have an annual effect on the economy of $100 million or more.

(2) It will not cause a major increase in costs or prices.

(3) It will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Catalog of Federal Domestic Assistance program number is 64.109.

List of subjects in 38 CFR Part 4

Handicapped, Pensions, Veterans.

Approved: July 21, 1989.

Edward J. Derwinski,

Secretary of Veterans Affairs.

PART 4—[AMENDED]

In 38 CFR part 4, Schedule for Rating Disabilities, § 4.16 is amended by revising paragraph (a) to read as follows:

§ 4.16 Total disability ratings for compensation based on unemployability of the individual.

(a) Total disability ratings for compensation may be assigned, where the schedular rating is less than total, when the disabled person is, in the judgment of the rating agency, unable to secure or follow a substantially gainful occupation as a result of service-connected disabilities: *Provided That,* if there is only one such disability, this disability shall be ratable at 60 percent or more, and that, if there are two or more disabilities, there shall be at least one disability ratable at 40 percent or more, and sufficient additional disability to bring the combined rating to 70 percent or more. For the above purpose of one 60 percent disability, or one 40 percent disability in combination, the following will be considered as one disability:

(1) Disabilities of one or both upper extremities, or one or both lower extremities, including the bilateral factor, if applicable;

(2) Disabilities resulting from common etiology or a single accident,

(3) Disabilities affecting a single body system, e.g. orthopedic, digestive, respiratory, cardiovascular-renal, neuropsychiatric,

(4) Multiple injuries incurred in action, or

(5) Multiple disabilities incurred as a prisoner of war.

It is provided further that the existence or degree of nonservice-connected disabilities or previous unemployability status will be disregarded where the percentages referred to in this paragraph for service-connected disabilities render the veteran unemployable. Marginal employment shall not be considered substantially gainful employment. For purposes of this section, marginal employment generally shall be deemed to exist when a veteran's earned income does not exceed the amount established by the U.S. Department of Commerce, Bureau of the Census, as the poverty threshold of one person. Marginal employment may also be held to exist, on a facts found basis, when earned annual income exceeds the poverty threshold. Consideration shall be given in all claims to the nature of the employment and the reason for termination.

(Authority: 38 U.S.C. 210(c))

BILLING CODE 8320-01-M

DEPARTMENT OF TRANSPORTATION

Maritime Administration

46 CFR Part 272

[Docket No. R-128]

RIN 2133-AA64

Requirements and Procedures for Conducting Condition Surveys and Administering Maintenance and Repair Subsidy

AGENCY: Maritime Administration, DOT.

ACTION: Proposed rule.

SUMMARY: This proposed revision of 46 CFR part 272 includes amendments of requirements and procedures for conducting condition surveys of subsidized vessels and for administering the payment of maintenance and repair (M&R) subsidy. This revision is intended to clarify and restructure the present regulations.

DATES: Comments must be received on or before October 27, 1989.

ADDRESS: Address comments to the Secretary, Maritime Subsidy Board, Maritime Administration, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590. Interested persons may inspect these comments during normal business hours in Room 7300, Department of Transportation.

FOR FURTHER INFORMATION CONTACT: Joseph H. Seelinger, Chief, Division of Ship Maintenance and Repair, Office of Ship Operations, Maritime Administration, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590, telephone (202)366-5776.

SUPPLEMENTARY INFORMATION: Title VI of the Merchant Marine Act, 1936, as amended (Act), authorizes the Secretary of Transportation to enter into Operating-Differential Subsidy agreements (ODSA) with operators of U.S.-flag vessels operating in an essential service in the foreign commerce of the United States. ODS is intended to offset certain lower costs of operating vessels under a foreign flag, and may include the fair and reasonable cost of M&R that is not compensated by insurance. Part 272 includes provisions for administering the determination and payment of M&R subsidy to the operators of subsidized vessels for which M&R subsidy is provided under an ODSA. These regulations do not apply to vessels carrying bulk raw and processed agricultural commodities from the U.S. to the U.S.S.R., which are subject to the regulations in 46 CFR part 294.

This rulemaking would give MARAD the discretion to require vessel condition surveys on specified occasions for vessels receiving M&R subsidy only, rather than make such condition surveys mandatory for all ODS vessels on the occurrence of these events, as under existing regulations. It has been MARAD's experience in administering condition surveys, since the last amendments to these regulations in 1970, that condition surveys are not always necessary on the occasions when now required under § 272.2 of the present regulations.

This rulemaking also clarifies the issue of what costs represent a repair which is not eligible for M&R subsidy (§ 272.23). This regulation recognizes that an item of M&R may have two severable cost components—the cost of a part and the cost of its installation, irrespective of whether the installation occurs contemporaneously with or subsequent to the expenditure for the part. Consistent with the legislative history of section 606(6) of the Merchant Marine Act of 1936, as amended ("Act") (46 App. U.S.C. 1176), it allows the payment of M&R subsidy for any portion of the cost of an otherwise eligible repair that is a "domestic" repair, i.e., a cost incurred in the continental United States or Puerto Rico. Section 606(6) of the Act, dealing with eligiblibity of M&R expenses for subsidy, is intended to assist U.S. shipyards, U.S. labor, and U.S. manufacturers. This rulemaking would make clear that whatever portion of a repair is domestic is eligible for subsidy when the repair is performed outside the continental limits of the United States.

MARAD proposes to restructure the entire part to clarify and simplify the regulations and to add definitions. In addition, extraneous provisions concerning internal agency administrative procedures (such as internal copy requirements) have been deleted. The proposed revision includes a number of significant procedural changes. For example, new procedures for appealing and M&R disallowance are set forth in § 272.43. The existing part refers concerned persons to appeal procedures contained in an internal administrative order which is less readily available to the public than the Code of Federal Regulations or the **Federal Register**. MARAD proposes to reduce the amount of documentation required to support the information contained in MARAD Form MA-140 for work performed by an independent contractor who has provided an adequately detailed invoice covering such work.

Section 272.17 would provide for disallowance of a claim for M&R subsidy if an Operator fails to comply with various vessel condition survey requirements. Another provision, in § 272.26, would require an operator receiving M&R subsidy to repay a portion of such subsidy when the operator has not used subsidized spare parts, has received reimbursement for a marine loss that was compensated by insurance, or has permanently gone off subsidy within three years of the payment of M&R subsidy for an improvement to the vessel.

Analysis of Regulatory Impact

The Maritime Administrator has determined that this is not a major rule under the criteria of Executive Order 12291. It will not result in an annual effect on the economy of $100 million or more. There will be no increase in production costs or prices for consumers, individual industries, Federal, State or local governments, agencies or geographic regions. Furthermore, it will not adversely affect competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule is not significant within the definition in DOT's Regulatory Policies and Procedures, 49 FR 11034 (1979), in part, because it does not involve any change in important Departmental policies. Because the economic impact should be minimal, further regulatory evaluation is not necessary. Moreover, the Maritime Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities.

This rule does not significantly affect the environment. An environmental impact statement is not required under the National Environmental Policy Act of 1969. It has also been reviewed under Executive Order 12612, Federalism, and it has been determined that it does not have sufficient implications for federalism to warrant preparation of a Federalism Assessment.

The rule contains existing reporting requirements, in §§ 272.12, 272.25 and 272.41, which have the approval of the Office of Management and Budget (Approval No. 2133-0007). There are no additional reporting requirements in this rulemaking.

List of Subjects in 46 CFR Part 272

Maritime carriers, Vessel maintenance and repairs.

Accordingly MARAD proposes to revise 46 CFR part 272, to read as follows:

PART 272—REQUIREMENTS AND PROCEDURES FOR CONDUCTING CONDITION SURVEYS AND ADMINISTERING MAINTENANCE AND REPAIR SUBSIDY

Subpart A—General

Sec.
272.1 Purpose.
272.2 Scope.
272.3 General definitions.
272.4 Effective date.
272.5 Prior instructions superseded.

Subpart B—Requirements and Procedures for Determining the Condition of Eligible Vessels

272.11 Scope.
272.12 Determining the condition of eligible vessels.
272.13 Operator's responsibilities.
272.14 Survey procedures.
272.15 Execution of condition survey reports.
272.16 Non-compliance with survey requirements.

Subpart C—Eligibility Criteria for M&R Subsidy; Substantiation of M&R Expenses

272.21 General eligibility criteria.
272.22 Improvements and other similar work.
272.23 Examples of ineligible expenses.
272.24 Subsidy repair summaries.
272.25 Requirements for subsidy repayment.

Subpart D—Penalties

272.31 Determination of penalty.
272.32 Mitigation of penalty.
272.33 Penalty appeals.

Subpart E—Examination, Audit, Review, and Appeal Procedures

272.41 Requirements for examination and allocation of M&R expenses.
272.42 Audit requirements and procedures.
272.43 Review and appeal procedures.
272.44 Dates.

Authority: Sec. 204(b), 603 and 606, Merchant Marine Act, 1936, as amended (46 U.S.C. 1114(b), 1173, 1176); 49 CFR 1.66.

Subpart A—General

§ 272.1 Purpose.

The purpose of this part is to prescribe the requirements and procedures for determining the condition of vessels receiving operating-differential subsidy, to prescribe the requirements for reporting and substantiating maintenance and repair expenses, and to establish the criteria and procedures for determining whether a maintenance and repair expense is subsidizable.

§ 272.2 Scope.

Except as otherwise provided in subpart B of this part, the provisions of this part apply only to vessels operating under an operating-differential subsidy agreement which provides for the payment of maintenance and repair subsidy, except that this part does not apply to any vessel operating under an operating-differential subsidy agreement for the carriage of bulk raw and processed agricultural commodities from the United States to the Union of Soviet Socialist Republics, pursuant to part 294 of this chapter.

§ 272.3 Definitions.

For the purposes of this part:

(a) *Act* means the Merchant Marine Act, 1936, as amended.

(b) *Marad* means the Maritime Administration, a unit of the United States Department of Transportation, as distinguished from the Board (which is a unit of MARAD).

(c) *Board* means the Maritime Subsidy Board of the Maritime Administration.

(d) *Domestic Origin:* (1) *Labor.* With respect to labor, Domestic Origin means that the work shall be performed by a ship repair facility located in the United States or Puerto Rico, performed by a U.S. citizen independent contractor, or performed in the United States or Puerto Rico by the Operator's own shore gang, using only the labor of persons who, whether U.S. citizen's or aliens, are domiciled in the United States or Puerto Rico.

(2) *Materials.* With respect to materials, Domestic Origin means that all articles, materials, and supplies shall be of the growth, production or manufacture of the United States or Puerto Rico.

(e) *Eligible vessel* means a vessel operated under an ODSA, other than an ODSA subject to part 294 of this chapter, which provides for the payment of M&R subsidy with respect to the operation of that vessel.

(f) *Equipment* means that part of an Eligible Vessel that is not part of the vessel's hull or machinery.

(g) *Expendable Equipment* means those articles, outfittings and furnishings that are portable, semi-portable or detachable, that are used in equipping a ship for service and in its normal day-to-day maintenance and operation, and that are subject to casual or gradual deterioration and replacement. It does not include items classified as stores and supplies or Spare Parts.

(h) *Improvement* means work to be performed on an Eligible Vessel which is a modification, alteration, addition or betterment, which may be accomplished separtely from M&R, but may be eligible for M&R subsidy pursuant to § 272.23 of this part.

(i) *M&R* and *M&R Subsidy* mean, respectively, maintenance and repairs and maintenance and repair subsidy payable pursuant to section 603 of the Act.

(j) *ODS* and *ODSA* refer, respectively, to operating-differential subsidy provided under an operating-differential subsidy agreement entered into pursuant to title VI of the Act.

(k) *Operator* means any individual, partnership, corporation, or association that enters into an ODSA with the Board pursuant to title VI of the Act.

(l) *Permanent equipment* means Equipment that is, or is intended to become when installed, an integral, permanent, built-in part of the vessel.

(m) *Region Office* means any one of the four Maritime Administration Region Offices in New York, NY; New Orleans, LA; San Francisco, CA; and Chicago, IL; established pursuant to section 809 of the Act.

(n) *Spare Parts* means such items as spare propellers and tailshafts and self-contained operable units of machinery or equipment, as well as those items generally recognized within the maritime industry as Spare Parts.

(o) *United States* means the fifty individual states and the District of Columbia.

§ 272.4 Effective date.

The provisions of this part apply to voyages of every Eligible Vessel which terminate on or after __________

§ 272.5 Prior instructions superseded.

The provisions of this part supersede any provisions of MARAD Circular Letters and Accounting Instructions applicable to M&R and dated prior to the effective date of these regulations to the extent that the provisions of this part may be inconsistent with the provisions of such prior instructions.

Subpart B—Requirements and Procedures for Determining the Condition of Eligible Vessels

§ 272.11 Scope.

This subpart applies to any Eligible Vessel, other than one operating under an ODSA subject to part 294 of this chapter.

§ 272.12 Determining the condition of eligible vessels.

(a) *General.* The Operator of an Eligible Vessel shall make the vessel available whenever MARAD requires a vessel condition survey.

(b) *Survey events.* MARAD may require a vessel condition survey for a vessel in each of the following instances:

(1) At the commencement of the first subsidized voyage, except for a newly constructed vessel which enters subsidized service immediately upon delivery by the shipyard, and for which

there is a prior condition survey report. If that subsidized service commences outside the continental limits of the United States, the vessel may be surveyed at the first United States port of call;

(2) At the commencement of the first voyage following the effective date for M&R subsidy established by MARAD, if such M&R rate was not established at the commencement of the vessel's first voyage;

(3) Upon the discontinuance of an M&R subsidy rate;

(4) Upon resumption of subsidized voyages after temporary withdrawal from subsidized operation. The vessel shall not be considered as having been temporarily withdrawn shall not be considered as having been temporarily withdrawn from subsidized service if it performed unsubsidized voyages in a subsidized service of the Operator;

(5) Upon withdrawal from subsidized service, either temporarily (subject to the provisions of paragraph (d) of § 272.14), or permanently;

(6) During the drydocking period incident to the vessel's American Bureau of Shipping Special Surveys;

(7) Upon termination of the last voyage under the ODSA, or at the end of the contract period, with respect to subsidized vessels in idle status at that time; or

(8) At any other time that MARAD considers to be appropriate.

§ 272.13 Operator's responsibilities.

Whenever MARAD notifies an Operator that a survey of an Eligible Vessel is required under this section, the Operator shall:

(a) Make the vessel immediately available for survey if the vessel is in a port of the United States at the time of notification; or make the vessel available for survey immediately upon arrival at the first port of call in the United States if the vessel is not in a port of the United States at the time of notification; and

(b) Furnish to the Secretary of the Board the following:

(1) A copy of each American Bureau of Shipping report and every other salvage association or damage survey report; and

(2) Copies of certificates or other evidence of compliance with applicable laws, rules, and regulations as to vessel condition and operation, including, but not limited to, those administered by the United States Coast Guard, Environmental Protection Agency, Federal Communications Commission, Public Health Service, or their respective successors, and all applicable treaties and conventions to which the United States is a signatory.

(Reporting requirements approved by the Office of Management and Budget under control number 2133–0007)

§ 272.14 Survey procedures.

(a) *Prior to survey.* Unless otherwise directed by MARAD, the Operator of a vessel which is required to be surveyed under this subpart shall contact the ship operations unit of the Region Office in which the survey is to be conducted.

(b) *Operator's assistance to surveyor.* The Operator shall assist the marine surveyor performing the survey for MARAD and shall permit access by that surveyor to all parts of the vessel, its log books, and other officials records. The Operator may designate a representative to accompany the marine surveyor during the survey, but no Operator's representative is required to be present during the survey.

(c) *On-subsidy surveys.* An on-subsidy survey consists of the following:

(1) *Vessel survey.* This includes an inspection and the completion of reports by the surveyor, in sufficient detail to reveal a comprehensive picture of the conditions noted.

(2) *On-subsidy survey report.* The on-subsidy survey report consists of:

(i) Ship Survey Report, Form MA–58; and

(ii) As appropriate for the circumstances of the survey and the respective vessel, Forms MA–55 (Turbines and Gears Report); MA–56 (Tooth Contact Report); MA–57 (Drydock Report); and MA–59 (Measurements of Piston Rings and Grooves).

(d) *Off-subsidy surveys.* An off-subsidy survey consists of the following:

(1) *Repair specifications.* The Operator shall prepare and furnish to the appropriate Region Office detailed repair specifications covering all repair work attributable to completed subsidized service.

(2) *Off-subsidy report.* The survey report for an off-subsidy survey consists of the repair specifications required by paragraph (c)(1) of this section, and the findings of the Region Office on these specifications after the survey required by paragraph (c)(2) of this section.

§ 272.15 Execution of condition survey reports.

Every survey report shall be signed by:

(a) The Operator's representative, when designated pursuant to § 272.13(a), but only if that representatives was in attendance during the survey;

(b) The Operator's superintendent engineer or equivalent;

(c) The marine surveyor who conducted the survey; and

(d) The appropriate representative of the Region Office for the Region in which the survey was conducted.

§ 272.16 Non-compliance with survey requirements.

MARAD may disallow any one or more M&R claims otherwise eligible for subsidy if an Operator fails to:

(a) Contact the appropriate Region Office as required by § 272.14(a);

(b) Comply with provisions of § 272.14(c)(1) with respect to repair specifications, or to make the vessel reasonably available for inspection before its next sailing; or

(c) Comply with any other requirement specified in subpart B of this part.

Subpart C—Eligibility Criteria for M&R Subsidy; Substantiation of M&R Expenses

§ 272.21 General eligibility criteria.

(a) *Eligible maintenance and repairs.* Costs of maintenance and repair are eligible for M&R subsidy participation if they are:

(1) Performed on an Eligible Vessel;

(2) Necessary, because of subsidized operation, for the maintenace and repair or replacement of damaged or worn parts of the vessel's hull, machinery, or Permanent Equipment;

(3) Uncompensated by insurance;

(4) Considered fair and reasonable by the Board;

(5) Of Domestic Origin; and

(6) Otherwise eligible in accordance with provisions of this part.

(b) *Off-subsidy survey items.* Any maintenance and repair contained in an executed off-subsidy survey report is eligible maintenance and repair if:

(1) Items in Paragraph (a) (1)–(6) of this section are met;

(2) The work is accomplished by the Operator before or during the next drydocking period (periodic or otherwise); and

(3) The vessel is either owned by the same Operator who owned it at the time of the off-subsidy survey, or ownership was transferred to the Federal Government pursuant to section 510 of the act.

(c) *Operator furnished items.* In addition to the general requirements of paragraph (a) of this section, the cost of the Operator's materials, supplies, or both, furnished by the Operator which are necessary to the performance of eligible maintenance and repair, is eligible for M&R subsidy if:

(1) The items for which the cost was incurred are issued by the Operator from ship's inventory or the Operator's shoreside inventory, or are issued by direct purchase to the ship repair yard, other independent contractor, or shore gang labor; and

(2) No subsidy, whether M&R or otherwise, has previously been paid for such material, supplies, or both.

(d) *Costs associated with shore gang labor.* In addition to the general requirements of paragraph (a) of this section, the costs incurred with respect to the Operator's employment of U.S. shore gang labor necessary for the performance of eligible maintenance and repair are eligible for M&R subsidy participation only if such costs are:

(1) For direct labor charges;

(2) For eligible Spare Parts, as described in paragraph (e) of this section; or

(3) Incidental to the payment of wages for the direct labor, to the extent that such costs are required by State or Federal law or by collective bargaining agreements.

(e) *Spare Parts.* Spare Parts are eligible for M&R subsidy if they are:

(1) Necessary for eligible maintenance and repair;

(2) Issued by the Operator from the Operator's shoreside inventory or issued by direct purchase of a U.S. ship repair yard, U.S. independent contractor, or U.S. shore gang labor; and

(3) Placed aboard an Eligible Vessel.

§ 272.22 Improvements and other similar work.

(a) *Eligible expenditures.* Any expenditure not in excess of $200,000 for work which the Operator and MARAD consider to be an improvement is eligible for M&R subsidy if otherwise eligible for such subsidy pursuant to provisions of this part.

(b) *Capital expenditures.* An expenditure in excess of $200,000 for work which is not necessary for maintenance or repair shall be considered to be a capital expenditure, ineligible for M&R subsidy, except that work on an Eligible Vessel which the operator considers to be an Improvement is eligible for M&R subsidy if, before awarding this work:

(1) The Operator submits a written request to the Director, Office of Ship Operations, for consideration of the expenditures;

(2) The Director determines that the work is an Improvement and is technically acceptable; and

(3) The Associate Administrator for Maritime Aids approves M&R subsidy for the work, as appropriate, pursuant to the provisions of title VI of the Act.

(c) *Improvements performed in more than one repair period.* Whenever an Operator decides to spread the work incident to any Improvement over more than one repair period, the operator shall give written notice to the Director, Office of Ship Operations, prior to commencement of the work, as to the scope of work involved, expected benefits, and the number of voyages over which the work and the estimated total cost will be extended.

§ 272.23 Examples of ineligible expenses.

Expenses ineligible for M&R subsidy participation include, but are not limited to, the following examples:

(a) *Specialized improvements.* Any expenditure or Improvement required to alter, outfit or otherwise equip a vessel for its intended subsidized service which MARAD determines should have been performed before the initial entry of the vessel into subsidized service;

(b) *Convenience items.* Any expenditure for items that the Region Director determines to be aboard a ship only for the convenience of the Operator or crew members, and which are not considered integral parts of the vessel and are not required for seaworthiness, navigation or the health or well-being of the crew or passengers.

(c) *Unsupported expenses.* Any expense item which the Operator fails to substantiate adequately with documentation, as required by § 272.25.

(d) *Untimely submission.* Any expense included in either a repair summary or supplement which was not submitted by the operator within the required time period for M&R items and Marine Loss items as set forth in §§ 272.25 and 272.41, respectively, unless the Operator can prove that such untimeliness was due to circumstances beyond the Operator's control.

(e) *Untimely requests for review.* Any disallowed expense item for which the Operator fails to make a timely request for review, as required by § 272.43.

(f) *Untimely appeals.* Any expense item disallowed in the final determination by the Director, Office of Ship Operations, for which the Operator fails to make a timely appeal to the Board, pursuant to § 272.43.

(g) *Absence of notice of multi-repair period improvements.* Any expenses for an improvement extending over more than one repair period in which the Operator did not notify the Director, Office of Ship Operations, as required by § 272.22(c).

(h) *Cargo expenses.* Any expense of special cargo fittings of a temporary nature, dunnage, ceiling, battens, the cleaning of cargo holds and tanks for cargo, the reading and certification of temperatures for refrigerated cargoes, and similar expenses.

(i) *Stevedore damage.* Any expense or any damage to the vessels or cargo gear directly attribuable to a stevedore.

(j) *Rented equipment.* Any expense for the rental of Permanent or Expendable Equipment, such as compressors, paint floats, and other similar items for use by shore gangs or ship's crew on repair or other work, radar, radio telephone, and other similar items for use by ship's crew in this operations.

(k) *Special requirements for trade routes.* Any expense for the initial installation of equipment necessary for the vessel's particular trade route, such as Suez Canal davits, which should have been installed before the entry of the vessel into the particluar subsidized service.

(l) *General operating expenses.* Any expense for the loading of stores, the landing and sorting of laundry, pilot service, tug charges, removing surplus equipment to warehouses, and other similar expenses which do not involve actual maintenance and repair.

(m) *Items attributable to unsubsidized operations.* Any item of maintenance or repair that is clearly attributable to unsubsidized operation, including expenses noted on-subsidy surveys for repairs which clearly should have been made before departure from the last United States or Puerto Rican port on the first voyage:

(1) In subsidized service, or

(2) Upon resumption of subsidized operation following temporary withdrawal.

(n) *Overdue classification and inspection requirements.* Any expenses for work required by a classification society or an agency of the Federal Government, which was due (irrespective of any grace period granted) and not completed before the first voyage:

(1) In subsidized service, or

(2) Upon resumption of subsidized operation following temporary withdrawal, except when such work is attributable to prior subsidized service.

(o) *Foreign maintenance and repairs.* Any expense for any item of maintenance and repairs, including insurance repairs, that is performed outside the United States or Puerto Rico, and that is not of Domestic Origin.

(p) *Marine or other loss.* Any part of an expense or a repair which is recovered or recoverable from an insurer or another party.

(q) *Consumables, expendables.* Any procurement expense for consumables, expendables, and Expendable Equipment, when used or installed by ship's crew or furnished for inclusion in ship's inventory, and any expense for maintenance, repair, or replacement of Expendable Equipment.

(r) *Excessive costs.* Costs for maintenance and repair which MARAD considers excessive, after allowing the Operator an opportunity to present all relevant facts pertinent to such costs.

(s) *Overhead costs.* Any expense included in shore gang labor charges which is an overhead items, as prescribed by 46 CFR part 232—Uniform Financial Reporting Requirements.

(t) *Guarantee items.* Any expense for an item adjudged or noted as being a guarantee item of a construction or repair contractor.

§ 272.24 Subsidy repair summaries.

(a) *Filing requirements.* The Operator of an Eligible Vessel shall submit to the appropriate MARAD regional Ship Operations Office a Subsidy Repair Summary (Form MA–140) for each quarter of a calendar year in which one or more of the Operator's Eligible Vessels (including any vessel which has been temporarily withdrawn from subsidized service) terminates a voyage. This quarterly report shall include supporting documents and information, as described in paragraph (c) of this section. This summary may be for either a single voyage or multiple voyages, and shall be filed not later than 120 days after:

(1) The close of the calendar quarter in which a voyage is terminated, or

(2) The date the reported vessel is temporarily or permanently withdrawn from subsidized service.

(b) *Form requirements.*—(1) *Availability and certification.* MARAD will make available one copy of the Form MA–140 upon request. Each Operator shall furnish its own supply of the form and prepare each form for submission. Information on any Form MA–140 shall pertain to only one vessel. The Operator's superintendent engineer or other responsible official shall certify every summary submitted by an Operator in the following manner:

> This is to certify that, to the best of my knowledge and belief, and based on recorded entries through (*Date*), this is a true and correct statement of repair and maintenance expenditures for the period stated, and that the repair and maintenance items indicated as eligible for subsidy participation are reasonably attributable to service subsequent to commencement of the first voyage under the Operating-Differential Subsidy Agreement and were necessary, satisfactorily completed, and the price is fair and reasonable (exceptions are listed on separate page).

(c) *Categorization.* The Operator shall exercise due diligence in identifying each item in the Form MA–140 within the following three separate categories:

(1) *Claimed for subsidy.* This includes the following:

(i) M&R,

(ii) Spare Parts,

(iii) Improvements.

(2) *Marine loss.* If any M&R expense is incurred because of marine loss, the Operator shall list such an M&R expense under this separate category, and shall exclude such expense from the totals for the "Claimed for Subsidy" and "Non-Subsidized Items" categories provided for in this section.

(3) *Non-subsidized items.* This category shall include builders' guarantee items, foreign repairs, and other items of M&R expense not claimed for subsidy.

(d) *Required supporting documents and information.*—(1) *General.* The Operator shall support every item in the Form MA–140 with documents or other information, in sufficient detail to permit MARAD to determine the fairness and reasonableness of the prices for the submitted work. With respect to any claims for M&R performed outside the United States or Puerto Rico, the Operator shall submit with the claim a certificate, signed either by the Operator (if it uses its own shore gang labor or materials from its own inventory) or by an official of the ship repair yard or the independent contractor performing the work, stating that the maintenance and repairs were performed with materials, labor, or both, of Domestic Origin.

(2) *U.S. Independent contractors.* If a U.S. independent contractor performed M&R work, the Operator shall support each such expense with one copy of the contractor's invoices covering the work performed. If an invoice is not itemized and fully descriptive of the work performed with item prices, then the Operator shall attach to the contractor's invoice other supporting documentation, such as specifications, prepared in sufficient detail to permit a determination of the fairness and reasonableness of the prices for each segment of the work performed.

(3) *Operator's shore Gang.* If an Operator's own U.S. shore gang has performed any M&R work, the Operator shall submit with the Form MA–140 specifications covering that work, prepared in sufficient detail (including the material and labor cost of each item) to permit a determination of the specific cost of each segment of work performed.

(4) *Operator furnished material.* Whenever an Operator furnishes to a contractor material obtained either from the Operator's own ship stores or shoreside inventory, or by direct purchase for a specific job, the Operator shall include on the invoice, requisition form or other form of transfer memorandum the item number for which the material was used and the contract number covering the work performed.

(5) *Spare parts.* The Operator shall ensure that the invoice covering any Spare Part for an Eligible Vessel which is to be used or installed as an integral, permanent part of the vessel, indicates the specific piece or part of the vessel's hull, machinery, or Equipment for which the Spare Part was obtained

(6) *Foreign repairs.* Operators receiving M&R subsidy shall submit copies of all U.S. Customs entry forms detailing foreign expenditures on behalf of Eligible Vessels. The copies shall include all expenditures made during the quarter.

(Approved by the Office of Management and Budget under Control Number 2133–0007)

§ 272.25 Requirements for subsidy repayment.

(a) *Repayment of M&R subsidy for compensated marine or other loss.* If an Operator eventually receives compensation from an insurer or any other person for a marine loss or any other loss for which M&R subsidy has been paid, the Operator shall repay to MARAD an amount equal to the amount of subsidy paid with respect to that loss.

(b) *Repayment of M&R subsidy for improvements*—(1) *Three year service requirement.* If, within three years after the completion of an improvement for which M&R subsidy was paid, the Operator permanently withdraws the Eligible Vessel from the ODSA, the Operator shall repay to MARAD an amount equal to the amount of M&R subsidy paid with respect to that improvement unless MARAD shall have determined that such action was beyond the control of the Operator.

(2) *Repayment of M&R subsidy due to allocation of costs.* If the allocation of total M&R costs required by § 272.41(e) of this part results in the allocation of a lesser amount of subsidizable M&R costs than were actually paid for during the calendar year, the Operator shall repay to MARAD the amount of ODS which was paid in excess of the allocated subsidizable costs.

(3) *Administration action.* If an Operator fails to repay an M&R subsidy required to be repaid by this section, MARAD may either reduce any ODS payable by the amount of M&R subsidy required to be repaid by the section, or take any other action necessary to secure repayment.

Subpart D—Penalties

§ 272.31 Determination of penalty.

Operators whose Eligible Vessels have undergone foreign repairs, which MARAD determines are non-emergency in nature, may be subject to a penalty in an amount equal to the total cost (exclusive of applicable U.S. Customs duties) of such foreign repairs and purchases, such penalty to be effected by a deduction from the Operator's total ODS otherwise accrued. The Director, Office of Ship Operating Assistance, shall notify the Operator by letter with respect to:

(a) MARAD's determination of a penalty and the reasons therefore; and

(b) Whether the determination is final or subject to the submission of additional information.

§ 272.32 Mitigation of penalty.

The Director, Office of Ship Operating Assistance, may decide, after a non-emergency foreign repair occurs, to mitigate the penalty. Any mitigation of penalty shall be based on a determination that special circumstances existed at the time of repair. The Director shall not consider the difference in the price of foreign and domestic repair work in making this determination, and shall not grant prior approval of foreign repairs. In determining whether special circumstance existed, the Director shall consider, among others, the following factors.

(a) The trading area of the vessel both before and after the repair was performed;

(b) Loss of revenue and effect on vessel utilization if the vessel had returned to the United States for repairs;

(c) The additional operating expense which would have resulted from a return to the United States to repair the vessel; and

(d) Whether the repairs could have been deferred until return to the United States, taking into consideration the Coast Guard requirements for drydocking and special surveys.

§ 272.33 Penalty appeals.

The Operator may appeal final penalty determinations of the Director, Office of Ship Operating Assistance, to the Board, as provided in § 272.43(c) of this part.

Subpart E—Examination, Audit, Review and Appeal Procedures

§ 272.41 Requirements for examination and allocation of M&R expenses.

(a) *Examination requirement.* Pursuant to the specific limitations on M&R subsidy in section 603 of the Act, the Region Office shall examine the expenses submitted by an operator on the Form MA-140 in order to determine eligibility to receive M&R subsidy and the reasonableness of such expenses.

(b) *Operator's responsibility.* During the examination, the operator shall provide, at the request of the Director or other official of the Region Office, any further documentation or information necessary to support an M&R expense. If such documentation or information, including information required under paragraph (e) of this section, is not received at the Region Office on a timely basis, the Director or other official of the Region Office may disallow the M&R expense.

(c) *Notification of examination results.* At the completion of the examination the Director or other appropriate official of the applicable Region Office shall notify the Operator by letter of the results of the examination and shall state the reason for each disallowance of an item claimed for subsidy and/or each non-approval of a marine loss item.

(d) *Record retention requirements.* To facilitate an audit examination of M&R made pursuant to § 272.42 of this part, the Operator shall maintain files arranged by vessel and voyage, which shall include, at a minimum, a copy of the Region Office notice letter, a copy of the Form MA-140 with all supporting documents submitted therewith, and the condition survey report. The Operator shall retain all the required materials in files for not less than 3 years after competion of the audit.

(Reporting requirements approved by the Office of Management and Budget under Control Number 2133-0007)

(1) *Limitation on approval.* Any approval for payment of M&R subsidy for a subsidy for a marine loss time shall be subject to rescission or modification if the Operator subsequently receives insurance or other compensation for the item. The Region Finance Officer may at any time request verification that the Operator has not received such compensation.

(2) *Status report on approved marine loss items.* The Operator shall advise the Region Finance Office by letter as to whether insurance or other compensation will be recovered for the marine loss item. The Operator is responsible for ensuring that the lettter reaches the applicable Region Office within 120 days after:

(i) The date on which all repairs for damage attributed to the "Policy Voyage" (as defined in the Operator's insurance policy) are completed when the amount for such repairs does not exceed the franchise or deductible of the policy, or

(ii) The date of the underwriter's rejection of the Operator's marine loss insurance claim or claims.

(e) *Allocation of costs.* An Operator shall allocate total M&R costs if an Eligible Vessel terminates voyages during the calendar year which were made:

(1) In more than one subsidized service; or

(2) In a subsidized service as well as in an unsubsidized service while under an ODSA;

(f) *Manner of allocation.* The Operator shall allocate the total M&R costs of the vessel which have been approved by MARAD to all voyages terminating during the calendar year according to the ratio which the number of days in each voyage (determined in accordance with part 281 of this chapter) bears to the total voyage days of the vessel during the year. The Operator shall keep a record of these allocations and make these records available for any audit conducted pursuant to this part.

(g) *M&R subsidy payment.* During any year in which the Operator is required to allocate total M&R costs, as described in paragraph (f) of this section, and if the other requirements of this part are satisfied, the Operator shall be eligible to receive M&R subsidy payments for repairs charged to each voyage at the rates determined by the Board as applicable to the service, and on the basis authorized by the ODSAs.

§ 272.42 Audit requirements and procedures.

(a) *Required audit.* MARAD shall audit the Operator's M&R costs, as necessary, in conjunction with the audit of the Operator's subsidizable expenses for the determination of final subsidy rates. The Operator shall substantiate those costs recorded on the books of account which have been approved by the Administration.

(b) *Notification of audit results.* Upon completion of the audit, the Office of Financial Approvals of MARAD shall notify the Operator of the audit results, including the items disallowed and the reasons for such audit disallowable.

§ 272.43 Review and appeal procedures.

(a) *Exclusive procedures.* Notwithstanding the audit appeal procedures of part 205 of this chapter, the provisions of this section shall be the exclusive remedy available to an Operator for the review and appeal of any disallowance of subsidy for a M&R expense claimed or any penalty assessed pursuant to section.

(b) *Request for review.* An Operator may request review by:

(1) The Director, Office of Ship Operations, with respect to any disallowance by the Region office of a claimed M&R expense, after receiving the notification required by § 272.41(c); or

(2) The Director, Office of Financial Approvals, with respect to any disallowance of a claimed M&R expense, after receiving the notification required by § 272.42(b).

(c) *Timeliness of request.* The Operator shall file all requests for review pursuant to paragraph (b) of this section within 30 days after the date of the audit notification. Any disallowance with respect to which the Operator fails to file a timely request for review shall be final and shall not be subject to appeal to the Board pursuant to paragraph (e) of this section.

(d) *Notification of review determination.* The appropriate MARAD Office Director shall notify the Operator by letter, with respect to each timely filed review request, of the Director's determination and the reasons for each disallowance and whether the determination is final or subject to the submission of additional information.

(e) *Appeal to the Maritime Subsidy Board*—(1) *Right to appeal.* An Operator may appeal a MARAD Office Director's final determination issued pursuant to § 272.32 (penalties) or § 272.43 (review of claims disallowance or of audit results) of this section to the Board in writing.

(2) *Contents and timeliness.* The Operator shall set forth in any appeal the reasons for the Operator's objection to a disallowance of penalty and shall file such appeal with the Secetary of the Board within 30 days after the date of the notification sent to the operator by the appropriate Director pursuant to paragraph (d) of this section or § 272.33. The Board will grant no extensions of the 30-day filing period.

§ 272.44 Dates.

The dates noted on the letters or notifications sent to the Operator by officials of the Region Office, any Director or any other official of MARAD, pursuant to the provisions of this part, shall be conclusive for the purposes of determining the timeliness of any requests for review made under the provisions of this part.

Dated: August 21, 1989.

By Order of the Maritime Subsidy Board/Maritime Administrator.

James E. Saari,
Secretary.

BILLING CODE 4910-81-M

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 89-17; Notice 01]

RIN 2127-AC82

Safe Entry and Exit Requirements for Commercial Vehicles

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Request for comments.

SUMMARY: This notice seeks comment on issues relating to a rulemaking action begun in 1980 when NHTSA granted a petition from the International Brotherhood of Teamsters requesting that the agency establish safe entry and exit requirements for commercial vehicles. NHTSA is seeking information that would update its data files on driver "slips and falls" from locations on the vehicle to which the driver had climbed to perform duties relating to the operation, servicing or maintenance of the vehicle or its equipment. This information is needed to assist the agency in assessing the next step in the rulemaking proceeding, i.e., continuing toward a proposed rule or terminating the rulemaking action.

DATE: Comments on this notice must be received by the agency no later than October 12, 1989.

ADDRESS: Comments should refer to the docket number and notice number and be submitted in writing to: Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street, SW., Washington, DC 20590. Telephone: (202) 366-5267. Docket hours are 8:00 a.m. to 4:00 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Scott Shadle, NRM-11, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh St., SW., Washington, DC 20590. Telephone (202) 366-5273.

SUPPLEMENTARY INFORMATION: This notice concerns a rulemaking action begun in 1980 when NHTSA granted a petition from the International Brotherhood of Teamsters (IBT) requesting that the agency establish safe entry and exit requirements for commercial vehicles. (45 FR 45336, July 3, 1980.) NHTSA is seeking information that would update its data files on driver "slips and falls" from locations on truck tractors and trailers to which the driver had climbed to perform duties relating to the operation, servicing or maintenance of the vehicle or equipment thereon. This information is needed to assist the agency in assessing the next step in the rulemaking proceeding.

In April 1979, the IBT petitioned NHTSA to issue a regulation on "safe entry and exit from commercial vehicles" to address what petitioner called "the alarming frequency of slip and fall injuries among professional drivers." IBT made this request for three reasons: (1) At the time of the petition, petitioner believed that on-going rulemaking efforts by the formerly-named Bureau of Motor Carrier Safety of the Federal Highway Administration (FHWA) concerning step, handhold and deck requirements were proceeding to slowly; (2) the FHWA regulation would apply only to high profile cab-over-engine (COE) vehicles (i.e., a truck or truck-tractor having all, or the front portion, of the engine under the cab, and the door sill step above the height of the front tires), and petitioner believed "safe entry and exit" requirements should apply to all tractors and tractor-trailer combinations; and, (3) the FHWA regulation would apply only to vehicles operating in interstate commerce. The FHWA published its final rule on step, handhold and deck requirements in July 1979, applicable to high profile COE trucks and truck-trailers manufactured on or after September 1, 1982 (49 CFR part 399, subpart L; 44 FR 43730, July 26, 1979.)

NHTSA had granted the 1979 IBT petition because the agency had thought a safety problem may have existed. In its grant notice, NHTSA announced its intention to examine available data and determine whether to propose a new FMVSS to establish entry and exit requirements (i.e., some form of step, handhold, and deck requirements) for commercial motor vehicles. Since then, the agency has been unable to find data indicating a safety need for such a proposal for vehicles not already subject to FHWA entry and exit requirements.

In light of the past public interest and administrative activity regarding entry and exit requirements, NHTSA is issuing this notice to obtain information that would assist the agency in determining whether further rulemaking appears to be warranted. Depending on the information provided by the comments and NHTSA's consideration of them, the agency may proceed to develop a proposal or terminate the rulemaking action.

NHTSA seeks responses from drivers, fleet owners, manufacturers and other parties to the following questions concerning driver "slip and fall" injuries from truck tractors and trailers. In responding to a particular question, NHTSA requests that interested persons provide any relevant factual information to support their conclusions or opinions, including but not limited to statistical data and estimated costs and benefits, and the source of such information.

1. What is the frequency and severity of driver slip and fall injuries from trucks, truck trailers and trailers occurring annually, and under what conditions (weather, time of day, operations, etc.) and from which locations on the vehicle have drivers had the most falls?

2. Which vehicles (make and model year) or type of vehicle (e.g., cab over engine) have been involved in driver slip and fall injuries?

3. To what extent, if any, have mandated or voluntary actions by manufacturers addressed the frequency and magnitude of such injuries?

Comments

NHTSA solicits public comments on this notice. It is requested, but not required, that commenters provide 10 copies of written comments and two copies of films, tapes, and other materials.

All comments must not exceed 15 pages in length. (49 CFR 553.21.) Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential business information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation 49 CFR part 512.

All comments received before the close of business on the comment closing date indicated above for this notice will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Comments on the notice will be available for inspection in the docket. NHTSA will continue to file relevant information as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the docket should enclose a self-addressed, stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

A regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

International Trade Administration

[A-588-015]

Television Receivers, Monochrome and Color, From Japan; Final Results of Antidumping Duty Administrative Review and Determination Not To Revoke in Part

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of final results of antidumping duty administrative review and determination not to revoke in part.

SUMMARY: On August 30, 1988, the Department of Commerce published the preliminary results of review and intent to revoke in part the antidumping finding on television receivers, monochrome and color, from Japan. The review covers seven manufacturers and/or exporters of this merchandise to the United States and various periods from April 1, 1980 through February 28, 1987.

We gave interested parties an opportunity to comment on the preliminary results and intent to revoke in part. Based on our analysis of the comments received and the correction of certain clerical errors, we have changed the final results for certain firms, and we have determined not to revoke the finding in part.

EFFECTIVE DATE: August 28, 1989.

FOR FURTHER INFORMATION CONTACT: Wendy J. Frankel, or J.E. Downey, or John R. Kugelman, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-3601/5222.

SUPPLEMENTARY INFORMATION:

Background

On August 30, 1988, the Department of Commerce (the Department) published in the **Federal Register** (53 FR 33164) the preliminary results of antidumping duty administrative review and intent to revoke in part the antidumping finding on television receivers, monochrome and color, from Japan (36 FR 4597, March 10, 1971). A domestic party to the proceeding and two respondents requested in accordance with 19 CFR 353.53a(a) that we conduct these administrative reviews. We have now completed these administrative reviews in accordance with section 751 of the Tariff Act of 1930 (the Tariff Act).

Scope of Review

Imports covered by the review are shipments of television receiving sets, monochrome and color, and include, but are not limited to, projection televisions, receiver monitors, and kits (containing all the parts necessary to receive a broadcast television signal and produce a video image). Not included are certain monitors not capable of receiving a broadcast signal, certain combination units, and certain subassemblies not containing the components essential for receiving a broadcast television signal and producing a video image.

The review covers seven manufacturers and/or exporters of Japanese television receivers, monochrome and color, and various periods from April 1, 1980 through February 28, 1987. All reviewed periods are identified in the Final Results of Review section.

Sharp Corporation failed to respond to our supplemental sales questionnaire for the second review period, covering April 1, 1980 through March 31, 1981. The questionnaire covered sales between Sharp's home market related distributors and unrelated dealers. Funai Electric did not respond to our sales questionnaire for the eighth review period, covering March 1, 1986 through February 28, 1987. NEC did not respond to our cost-of-production questionnaire for the eighth review period.

Therefore, for these three firms we used the best information available for assessment and estimated antidumping duty deposit purposes. As best information available, we used information that was adverse to the firms. For Sharp, we used the highest rate for any company during the same period. For Funai, we used the company's last rate as best information available. For NEC, we used the firm's own data as best information available, since this rate is in excess of the company's previous rate. After publication of the preliminary results, NEC notified the Department of previously unreported purchase price sales to one customer during the seventh review period. NEC reported only sales quantities and dates, not sales values. As best information available for these transactions, we used the highest single purchase price margin in this review that we were able to verify. For cash deposit purposes, we used the weighted average sales price for each model to this customer, verified for reported sales, in order to calculate the weighted average dumping margin.

Analysis of Comments Received

We invited interested parties to comment on the preliminary results. At the request of two respondents, we held a public hearing on November 3, 1988. We received comments from Zenith; the Independent Radionic Workers of America, the International Brotherhood of Electrical Workers, the International Union of Electrical, Radio & Machine Workers, and the Industrial Union Department, AFL–CIO (the Unions); and six respondents, Fujitsu General, Hitachi, Mitsubishi Electric, NEC, Sanyo, and Sharp.

In this final results notice, we have corrected the following inadvertent programming errors in our calculations: erroneous deductions of credit expenses from PP sales (NEC; fifth, sixth, and seventh reviews); and incorrect programming statements that omitted home market advertising expenses in the exporter's sales price (ESP) offset (NEC; fifth, sixth, and seventh reviews). In addition, in response to comments concerning mathematical or clerical errors, we have corrected the following errors: Incorrect home market sales promotion expenses (NEC; fifth, sixth and seventh reviews), incorrect imputed interest for U.S. storage (Mitsubishi Electric; fifth and sixth reviews), incorrect calculation of time on the water (Mitsubishi Electric; sixth review), and incorrect export selling expenses (Mitsubishi Electric; fifth review).

Mitsubishi Electric made certain errors in the calculation of its U.S. "Rebate 3" and U.S. warranty claims in preparing its computer tape. We corrected those errors to reflect the ratios reported in the narrative portion of its response.

Finally, in our preliminary calculations for Fujitsu General and NEC, we inadvertently calculated the home market commodity tax according to the calculation methodology used to derive the tax forgiven on U.S. sales. We have corrected our calculations to reflect the verified commodity tax expenses in the home market.

Comment 1: Zenith and the Unions argue that, under 19 CFR 353.54(a), the Department is not at liberty to exercise its authority to revoke antidumping determinations unless it is satisfied that there is no likelihood that less-than-fair-value (LTFV) sales will resume.

Zenith and the Unions argue that the burden of proof that LTFV sales are not likely to resume falls on the respondent companies, Hitachi and Sanyo, and that neither has met it. The domestic parties allege that Hitachi and Sanyo's involvment in various other antidumping cases impugns these respondents' credibility. Therefore, the Department should view skeptically the letters submitted by both respondents agreeing to the immediate reinstatment of the finding should LTFV imports occur.

The Unions and Zenith argue that the following market conditions contribute to the probability that any future imports by Hitachi or Sanyo will be made at LTFV: the prices of color TVs in the United States have declined steadily over the past six years; Japanese production costs have been increasingly; other Japanese respondents have recently been found to be dumping; and the current dollar/yen exchange rate imposes unusually strong competitive pricing pressures on Japanese exporters. In addition, the domestic parties argue that prices have been kept low in the United States by imports from such countries as the Republic of Korea, Taiwan, Mexico, Malaysia, and Singapore. Imports from these countries apply downward pressure on the price level and influence all market participants. Thus, should Hitachi and Sanyo resume commercial shipments from Japan, they would have to sell at LTFV in order to be competitive in the U.S. market.

The Unions allege that it would be easy for Hitachi and Sanyo to shift television production to lines now dedicated to other consumer items (such as color picture tubes). Zenith argues that the Japanese TV industry has excess production capacity, and that domestic demand cannot absorb all television production. Therefore, Japanese producers will need to find other markets to accommodate this excess production. Zenith contends that as other countries (such as the E.C. nations) institute more restrictive import controls over consumer products, the Japanese will increasingly depend on sales in the U.S. market. This greater supply of Japanese TVs will result in keener competition and increase the likelihood of LTFV sales.

The Unions contend that, since Sanyo and Hitachi have both been developing Liquid Crystal Diode (LCD) televisions, both companies intend to resume shipments of televisions to the United States. Because of current market conditions, such sales will necessarily be made at LTFV and, therefore, should remain subject to the antidumping finding on televison receivers.

Hitachi and Sanyo argue that they have no economic incentive to divert televisions sold in Japan to the U.S. market precisely because of the current unfavorable business climate in the United States.

Sanyo claims that because production costs at its Mexican and U.S. facilities far undercut production costs in Japan, it would not resume shipments from Japan but would continue to supply the U.S. market from its U.S. and Mexican production facilities. Hitachi and Sanyo also contend that, contrary to Zenith's argument, they are currently operating at full capacity and have had to import televisions from third countries in order to meet domestic demand. Moreover, Sanyo maintains that it does not produce LCD TVs, as is made clear by the fact that the company did not participate in the International Trade Commission's investigation concerning the effect of sales of LCD TVs in the U.S. market.

Hitachi contends that Japan is no longer a viable export base for the majority of television receivers. The comparative advantage in television production has shifted to the United States and to other countries. The company notes that "[i]n view of high production costs and the high value of the yen it would make no sense for Hitachi to attempt to compete in the price sensitive segment of the U.S. market with television sets manufactured in Japan * * *"

Both Hitachi and Sanyo dispute the domestic parties' contentions that involvement in other antidumping cases and various other types of investigations impugn their integrity. Both respondents point out that they are not related to some of the firms noted by the domestic parties that are involved in other antidumping cases.

Department's Position: We determine that we cannot conclude from the evidence in the record that there is no likelihood of the resumption of LTFV sales by Hitachi and Sanyo. Consistent with our analysis in Canned Bartlett Pears from Australia (46 FR 43224, August 27, 1981), we have examined competitive pricing pressures and Market conditions in both the U.S. and the home market. In our tentative determinations to revoke (48 FR 37506; August 18, 1983; and 48 FR 44101, September 27, 1983), we stated:

> In evaluating the requests for tentative revocation, we have reviewed a large volume of data including: (1) information on recent Japanese domestic television production and investment; (2) current pricing trends for U.S. imports of Japanese television receiving sets; (3) European Communities' market restrictions on the importation of such sets; and (4) the emergence of Taiwan and Korea as significant television set producers and exporters, with the consequence (sic) impact on prices in international markets. This information is disturbing. However, both companies have met the minimum requirements for our publishing this tentative determination to revoke in part. We intend to continue evaluating such factors in making any decisions in the future on these tentative determinations.

We have examined these factors, as well as other factors, in light of evidence placed on the record by parties to this proceeding in order to determine whether there is a likelihood of resumed LTFV sales by Hitachi and Sanyo. Since publication of the tentative determination to revoke, the evidence shows that imports as a percentage of U.S. consumption have increased, competitive pricing pressures in the United States have become stronger, E.C. import controls have become more restrictive, and, at least through 1988, the yen has appreciated against the dollar, thereby making it more difficult for Japanese exporters to be competitive in the U.S. market without selling at LTFV.

These market factors are important where, as in this case, there have been no shipments for many years, and there is therefore little information regarding these companies' pricing practices. In this case, Hitachi provided no product-specific price data. Sanyo provided information on two hypothetical purchase price sales but provided no back-up documentation. A sample of two hypothetical sales is insufficient to determine that there is no likelihood of the resumption of LTFV sales after so many years of no shipments.

Although the Japanese yen has been appreciating against the U.S. dollar, prices of Japanese TVs in the U.S. market have not risen at the same rate. In fact, prices of televisions in the United States have declined steadily over the past six years. However, because of conflicting evidence, we cannot determine whether the decline in Japanese market prices (excluding below-cost sales) has kept pace with that in the United States. During this same period, however, production costs in Japan have been rising.

In the most recent administrative reviews of this finding (*see, e.g.*, "Television Receivers, Monochrome and Color, From Japan; Final Results of Antidumping Duty Administrative Review" (52 FR 8940, March 20, 1987); and "Television Receivers, Monochrome and Color, From Japan; Final Results of Antidumping Duty Administrative Review," (54 FR 13197, April 6, 1989)), we found substantial dumping margins for several Japanese respondents that have continued to export televisions from Japan for sale in the U.S. market. Competition in the U.S. market is further affected by television imports, including many at LTFV, from such countries as the Republic of Korea and Taiwan. Given the high production costs in Japan and the high value of the yen, it is difficult to see how Hitachi or Sanyo, if they were to resume shipments to the United States on a competitive basis, could compete in such a tight market without selling at LTFV. We have no reason to believe that present market conditions in the United States and Japan will change.

Finally, we are aware that there are new technological trends in the television industry, such as liquid crystal diode (LCD) TVs, which are within the scope of this finding. Televisions using new technologies are likley to be developed and produced in Japan. We cannot predict who will enter this market, and the incentive to sell such products at LTFV will depend on competitive market pressures. However, given the number of companies currently pursuing the new technologies and the high production costs in Japan combined with the high value of the yen, it is difficult to conclude that there is no likelihood of selling the new products at LTFV in the future.

For these reasons, we cannot conclude at this time that there is no likelihood of the resumption of LTFV sales by Hitachi or Sanyo. Therefore, we determine not to revoke, in part, the finding with respect to Hitachi and Sanyo.

Comment 2: Zenith argues that the Department is required by statute to verify all information relied upon in making a determination to revoke. To satisfy this requirement, the Department may not rely on its method of asking Customs if any shipments were made and of interpreting Customs' lack of response as an affirmative declaration of no shipments. Rather, the Department must conduct on-site verification even in no-shipment cases in order to determine whether or not to revoke.

Department's Position: Since we have determined not to revoke the finding in part, this issue is moot.

Comment 3: Zenith argues that the Department should implement the ruling of the Court of International Trade in *Zenith* v. *United States* (April 24, 1988) by adding to United States price (USP) the internal taxes rebated or forgiven upon exportation of the merchandise only to the extent that those taxes are "passed through" and included in the price of televisions sold in Japan.

Department's Position: We do not agree with the court in Zenith but have not had an opportunity to appeal the decision on its merits.

Consistent with our long-standing policy, we have not attempted to measure the amount of tax "passed through" to customers in the Japanese market. We do not agree that the statutory language limiting the amount of the adjustment to the amount of the commodity tax "added to or included in the price" of televisions sold in Japan requires the Department to measure the incidence of the tax in an economic sense. Furthermore, applying such an interpretation would be contrary to the obligations of the United States under the General Agreement on Tariffs and Trade (GATT). Article VI of the GATT prohibits a finding of dumping due solely to the exemption of the exported product from taxes in the country of origin—a result that the "pass-through" method could lead to.

We agree that the amount of commodity tax forgiven by reason of the export of televisions to the United States must be added to USP under the statute. We calculated the adjustment by multiplying the ex-factory U.S. price by the tax rate and adding the result to USP. To avoid artificially inflating or deflating margins, we made circumstance of sale adjustments equal to the difference in the tax per unit, where appropriate.

Comment 4: Zenith argues that the Department failed to account for what Zenith regards as interest income earned on deferred payments of rebates and discounts.

Department's Position: We disagree. We have addressed this issue in past reviews of this case. *See, e.g., Comment 8,* "Television Receivers, Monochrome and Color, From Japan; Final Results of Antidumping Duty Administrative

Review," (52 FR 8940, March 20, 1987) and *Comment 2*, "Television Receivers, Monochrome and Color, From Japan; Final Results of Antidumping Duty Administrative Review," (54 FR 13197, April 6, 1989). We avoid imputing expenses where a company quantifies the actual expenses and provides adequate documentation of those expenses.

Comment 5: Zenith alleges that respondents may have included non-selling expenses as indirect selling expenses for the ESP offset to FMV. The Department should examine each of the items individually and make an affirmative determination that each claimed expense is, in fact, a selling expense.

Department's Position: Zenith has not indicated which expenses may not be selling expenses. Without more specific allegations, the Department is unable to respond to detail. However, we have no reason to believe that the claimed expenses are not related to selling activities. Additionally, where verification has occurred, we have examined the nature of items selected for verification to establish that they are selling expenses.

Comment 6: Zenith argues that the Department failed to deduct antidumping legal expenses from ESP.

Department's Position: We do not agree that legal expenses associated with antidumping proceedings should be deducted from ESP because such expenses are not incurred in selling merchandise in the United States. *See* our position on Comment 3 in "Television Receivers, Monochrome and Color, From Japan; Final Results of Antidumping Duty Administrative Review," (52 FR 8940, March 20, 1987) and on Comment 4 in "Television Receivers, Monochrome and Color, From Japan; Final Results of Antidumping Duty Administrative Review," (54 FR 13197, April 6, 1989).

Comment 7: Zenith contends that the Department should deduct from USP the actual amount of estimated antidumping duties paid by the respondents.

Department's Position: We disagree. We do not consider estimated antidumping duties paid to be expenses related to the sales under consideration. *See* our position on Comment 5 in "Television Receivers, Monochrome and Color, From Japan; Final Results of Antidumping Duty Administrative Review", (54 FR 13197, April 6, 1989).

Comment 8: Zenith argues that the Department should identify the direct and indirect components of U.S. commissions and should offset home market indirect selling expenses only up to the amount of the indirect component of U.S. commissions.

Department's Position: We disagree. Respondents have demonstrated that all commissions paid to unrelated parties bear a direct relationship to the sales under consideration. Therefore, they are all direct selling expenses. *See* our position on Comment 6 in "Television Receivers, Monochrome and Color, From Japan; Final Results of Antidumping Duty Administrative Review," (54 FR 13197, April 6, 1989).

Comment 9: Zenith argues that the Department's policy of instructing Customs to collect cash deposits for future entries on the basis of the weighted average percentage of entered value understates the amounts that should be collected because the weighted average margin is calculated on the basis of USP, and USP will always be higher than entered values. Since the percentage calculated on the basis of USP will subsequently be applied to the lower entered value, this calculation will understate the estimated duty. Zenith urges the Department to calculate the deposit rate as a percentage of entered value.

Department's Position: Section 731 of the Tariff Act defines an antidumping duty as the amount by which foreign market value exceeds United States price. We do not have the authority to calculate dumping margins on the basis of the difference between FMV and entered values.

At the time of entry of any shipment, USP has yet to be determined. Since cash deposits of estimated antidumping duties are required at the time of entry, we instruct Customs to require such deposits expressed as a percentage of the only informatoin available, which is entered value. *See* our position on Comment 7 in "Television Receivers, Monochrome and Color, From Japan; Final Results of Antidumping Duty Administrative Review," (54 FR 13197, April 6, 1989).

Comment 10: Mitsubishi argues that the Department should calculate the commodity tax on U.S. sales on the basis of Mitsubishi's U.S. subsidiary's sales prices to its customers, instead of basing it on the transfer price less transportation costs and packing. Mitsubishi urges the Department to change this calculation in order to bring it more closely into accord with Japanese commodity tax law.

Department's Position: We disagree. Japanese law provides several different methods for the assessments of commodity taxes; the amount of forgiven tax could be computed in a number of different ways. The Department, however, lacks the resources to determine how each respondent would calculate the amount of forgiven commodity tax in every instance. The method we chose to calculate the tax is a reasonable one and is consistent with Japanese law. *See* our position on Comment 67 in "Television Receivers, Monochrome and Color, From Japan; Final Results of Antidumping Duty Administrative Review," (54 FR 13197, April 6, 1989).

Comment 11: Mitsubishi argues that the Department should not calculate separate margins for assessment and duty deposit purposes.

Department's Position: In our preliminary results, we published separate margins for assessment and cash deposit purposes. For assessment purposes, we accounted for differences in taxation between the U.S. market and the home market by making a circumstance of sale adjustment for the tax differences. We made no such adjustment for cash deposit purposes. We have reconsidered this issue and have concluded that it is inappropriate to use different methodologies to calculate margins for assessment and cash deposit purposes.

By using a different methodology for cash deposit purposes, we were intending to determine an estimated dollar amount of duty deposit that would be as close as possible to the dollar amount to be assessed. Since the home market indirect tax, though added to USP pursuant to section 772(d)(1)(C) in our calculations for assessment purposes, is not actually paid by exporters, and therefore not acutally included in the invoice price most commonly used by the Customs Service as entered value, we believed that the deposit rate would be more accurate if it did not include the addition of the tax. Therefore, for cash deposit purposes, we did not include the circumstance of sale adjustment to FMV for the difference in taxes between the two markets. However, we now believe that the difference in taxes will be caused by many other factors in the calculation of FMV and USP, such as discounts, rebates, freight, other differences in circumstances of sale, and physical differences in merchandise. Given the practical impossibility of ever calculating a deposit rate that will reflect actual dumping margins for future sales, we have concluded that the use of a single method of margin calculation for both assessment and deposit purposes is more appropriate.

Comment 12: Mitsubishi argues that the Department should not deduct U.S. direct selling expenses from ESP, but instead should adjust FMV for

differences between the U.S. and home market expenses. As support for its argument, Mitsubishi cites the CIT's decision in *Timken Co.* v. *United States*, 673 F. Supp. 495 (1987).

Department's Position: Section 772(e)(2) provides that the Department shall deduct from ESP the amount of any expenses incurred on behalf of the exporter in the United States. We interpret this provision to cover both direct and indirect expenses. Section 773(a)(4)(B) provides that adjustments shall be made to FMV to account for differences in circumstances of sale. We interpret this provision to mean that, in a purchase price transaction, FMV should be adjusted for differences between U.S. and home market selling expenses. Section 773(a)(4)(B) does not preclude the Department from applying the specific directions in section 772(e)(2) regarding ESP transactions.

Our consistent practice of deducting direct selling expenses from ESP is appropriate and reasonable under the statutory scheme because it allows us to account for all expenses attributable to sales in the United States (both direct and indirect).

We disagree with the court's decision in Timken, and we are addressing this issue in a redetermination under remand in that case. We are also litigating this issue before the CIT in *Zenith* v. *United States*, Consolidated Court No. 88-02-00122.

Comment 13: Mitsubishi notes that there is a methodological discrepancy concerning home market warranty expenses between the Department's analysis memorandum and its computer program; and urges the Department to treat the expenses as direct, as the analysis memo indicates. Mitsubishi argues taht its home market warranty expenses are direct selling expenses because payments to the service company are made at arm's length, as shown by the service company's profitability in the following year.

Department's Position: We incorrectly considered these warranty expenses to be direct expenses in our analysis memorandum. However, in the computer program, we treated warranty expenses as indirect expenses. We consider these warranty expenses to be indirect selling expenses because the warranties were provided by related companies, and the respondent did not adequately demonstrate that payments to the service company were made at arm's length. For such warranty coverage to be considered a direct selling expense, it must represent a variable cost incurred as the result of an arm's length transaction. We cannot conclude that, merely because a related company with which MELCO did business was profitable, individual transactions between MELCO and the related company were at arm's length.

Comment 14: Sharp argues that during its disclosure conference, the Department failed to provide an explanation of the basis for its decision to use best information available (BIA).

Department's Position: The purpose of a disclosure conference is to clarify how the Department computes its margins, not to discuss whether it was justified in applying a particular methodology or standard. As we stated in our preliminary results notice, our decision to use BIA was based on Sharp's failure to respond to our supplemental questionnaire. *See* also our response to Comment 15.

Comment 15: Sharp asserts that the Department acted improperly in rejecting the statistical information used in the first notice of preliminary results for this period (48 FR 37506, August 18, 1983) to calculate expenses between Sharp's related distributors and unrelated dealers. Sharp claims that the Department has no valid reasons for rejecting the statistical information and that the Department cannot change its original preliminary results without substantial evidence to support such a change. Therefore, Sharp contends that the Department may not use BIA under these circumstances.

Department's Position: As stated in our revised preliminary results notice of August 30, 1988, our decision to use BIA was based specifically on Sharp's failure to respond to our supplemental questionnaire of August 1, 1986. In that document, we asked that Sharp provide data regarding prices between Sharp's related distributors and unrelated dealers in the home market. Sharp did not respond, even after we granted a one-month extension.

After publishing the original preliminary results notice, we concluded that we had an inadequate basis for determining that Sharp's prices to related distributors were made at arm's length. Although in our original preliminary results we relied on statistical information, which was based on studies conducted by Japan's Ministry of International Trade and Industry, we decided, for reasons identified in the record, that the statistical information was insufficient to demonstrate that sales between Sharp and its related distributors were at arm's length. For that reason, we were not able to base our analysis on those sales. Therefore, we decided to request data on sales between Sharp's related distributors and its unrelated dealers. We would have used this information as the basis for calculating FMV. Since Sharp did not respond to our supplemental questionnaire, we are resorting to BIA.

Comment 16: Sharp asserts that even if the Department does use BIA, it should not use 3.37 percent, but should use the highest preliminary rate for the second administrative review period, which is 0.53 percent.

Department's Position: We disagree. It is not appropriate to use a preliminary rate for assessment purposes. Instead, we have chosen as BIA the highest rate for any company during the same review period, which is 0.66 percent (50 FR 24278, June 10, 1985).

Comment 17: Fujitsu General asserts that the Department improperly denied as a direct expense a certain portion of advertising expenses.

Department's Position: We allowed only the portions of the home market advertising claim covering the printing and manufacturing cost of catalogues. We disallowed all other portions of the claim because Fujitsu General could not adequately demonstrate at verification a relationship between the reported expenses and the sale of CTVs in the home market.

Comment 18: Fujitsu General argues that the Department incorrectly disallowed the company's trade credit and market rebate (TCMR) as a circumstance of sale adjustment directly attributable to color television sales and other products.

Department's Position: We disagree. Fujitsu General presented a two-part TCMR claim: TCMR for CTVs and TCMR for "CTV/Other Products." The company adequately demonstrated the relationship between TCMR for CTVs and sales of CTVs. However, the company could not provide an adequate explanation of the methodology used to allocate the TCMR for "CTV/Other Products." Therefore, we disallowed that portion of the claim.

Comment 19: Fujitsu General asserts that in calculating FMV, the Department should not have included sales to farmer cooperatives because such sales are not made in the principal markets or in the ordinary course of trade, or at the same level of trade.

Department's Position: We disagree. In calculating foreign market value (FMV), we consider all home market sales of such or similar merchandise that are in the ordinary course of trade as the principal markets absent evidence that some markets should be excluded from the principal markets. Fujitsu General furnished no evidence that its principal markets were other than all markets in Japan or that certain sales were not in the ordinary course of trade or at a different level of trade. The purpose of presuming that all home market sales are in the principal market absent evidence to the contrary is to enable the Department to make fair comparisons of sales to the United States (all of which are included in US price).

Comment 20: NEC and Fujitsu General argue that in the settlement agreements, signed on April 28, 1980 by the Department and 22 importers, the Department agreed to determine FMV precisely as it had in the past, that is, to use "traditional methodology" in calculating home market advertising, sales promotion, and warranty expenses, and that the Department is therefore obligated to use the so-called "traditional methodology" in this review.

Department's Position: We disagree with NEC's and Fujitsu General's interpretation of the phrase "traditional methodology." *See* our position on Comment 28 in "Television Receivers, Monochrome and Color From Japan; Final Results of Antidumping Duty Administrative Review," (52 FR 8943, March 20, 1987). We reiterate our position that in the 1980 settlement agreements, our commitment was: (1) To forgo the use of the commodity tax method for calculating FMV, previously applied by the Treasury Department; and (2) to rely upon information and data submitted by the Japanese respondents, provided that such data were adequate and verified. This commitment did not constitute an agreement to "freeze" the antidumping calculation methodology for television receivers from Japan in time as of 1980, regardless of improvements made in our methodology.

Comment 21: According to NEC, the Department's regulations require a comparison of home market and U.S. sales made at the same commercial level of trade. Therefore, NEC argues, in calculating FMV for purchase price (PP) sales, the Department should use the sales by NEC Home Electronics (NECHE) to NEC's related sales companies (NECSCs). If the Department uses the NECSCs' sales to unrelated distributors to determine FMV, it is required by law to make an appropriate level of trade adjustment.

NEC identifies three commercial levels of trade: (1) The "ex-factory" level is the exchange that occurs between the manufacturer and the distributor; (2) the "wholesale" level is the exchange between the distributor and the retailer; and (3) the "retail" level is the exchange between the retailer and the ultimate customer. According to NEC, prices at the ex-factory level reflect the cost of producing the television, plus the manufacturer's profit. Prices at the wholesale level reflect the cost of producing the television, the manufacturer's profit, plus the cost of the distributor's services and the distributor's profit. Finally, prices at the retail level of trade reflect the cost of producing the television, the manufacturer's profit, the cost of the distributor's services, the distributor's profit, plus the cost of the retailer's services and the retailer's profit.

NEC contends that home market sales to related NECSCs, like U.S. PP sales to Original Equipment Manufacturers (OEMs), are made at the ex-factory level of trade and therefore should have been used to calculate FMV for U.S. PP sales. However, according to NEC, home market sales by the NECSCs to unrelated retailers are made at the wholesale level of trade and therefore do not constitute an appropriate base on which to calculate FMV for PP transactions.

NEC asserts that the Department impermissibly disregarded sales between NECHE and the NECSCs solely on the grounds that such sales are transactions betwen related parties. NEC argues that the statute and the regulations contemplate use of sales to related persons as the basis for calculating FMV where such sales are at prices comparable to those that would have been charged to an unrelated buyer (arm's length transactions). According to NEC, the prices charged by NECHE to the NECSCs were at arm's length. NEC asserts that the Department can determine the arm's length nature of these transactions by comparing the prices between the NEC related parties with the prices of other TV manufacturers to unrelated distributors in Japan. NEC further contends that the Japanese tax authority's acceptance of NECHE's prices to the NECSCs as the basis for the Japanese commodity tax confirms that such prices were not affected by the relationship between the parties.

Alternatively, NEC contends that if, in the case of NECHE's U.S. purchase price sales, the Department does not base FMV on sales transactions between NECHE and the NECSCs, but instead uses the prices charged by the NECSCs to unrelated retailers, the Department must make an adjustment to FMV for differences in levels of trade. NEC cites the CIT decision in *Silver Reed America Inc.* v. *United States*, 581 F. Supp. 1290, 1296 (CIT 1984), in which the court stated that "sales at different levels of trade may not be comparable without appropriate adjustments." NEC cites the Department's regulations, which require that where the comparison of the U.S. price with the applicable price in the home market is not made at the same commercial level of trade, "the comparison will be made at the nearest comparable commercial level of trade and appropriate adjustments will be made for differences affecting price comparability." (19 CFR 353.19 (1988)). In this scenario, according to NEC, the adjustment should be equal to the cost of distribution services incurred by the NECSCs in selling to unrelated retailers, *i.e.*, the selling expenses that are incurred at the wholesale level of trade in Japan, but that are not incurred at the ex-factory level of trade (PP) in Japan.

NEC asserts that it has provided the Department with the requisite level of trade data, and the Department is therefore obligated to allow an adjustment.

Department's Position: We do not agree that prices charged by other manufacturers to unrelated distributors adequately demonstrate the arm's length nature of NECHE's sales to related distributors (NECSCs) because products and production costs may differ from company to company. NEC has not provided any data indicating that related party sales between NECHE and the NECSCs were made at arm's length. Moreover, NEC has not adequately quantified the difference in price between the two markets (home market sales from NECSCs to unrelated distributors in Japan and PP sales from NECHE to unrelated U.S. distributors) attributable to the different levels of trade.

The purpose of a level of trade adjustment is to create an "apples-to-apples" comparison of the United States price with foreign market value by adjusting the home market price at one level of trade to represent what the price would have been at a different level of trade. Any quantification of that adjustment must be based on differences in the home market. Thus, any determination as to whether a level of trade adjustment is warranted depends on the sufficiency of the evidence provided by NEC. *See* our "Revised Final Results of Antidumping Duty Administrative Review Pursuant to Court Remand, Portable Electric Typewriters from Japan", December 7, 1988. In the results of that remand, we noted a number of ways a respondent could demonstrate such cost differences. NEC did not provide such information before publication of the preliminary results, and we do not accept new information after the preliminary results. The burden is on the respondent to

support claims for adjustments. We reviewed all of the data submitted by NEC in light of the criteria outlined in results of the PETs remand. Since NEC provided no data indicating that cost differences between the two markets were solely attributable to differences in levels of trade, we determine that no level of trade adjustment is warranted.

Comment 22: NEC contends that the Department's model-specific methodology for calculating advertising, sales promotion, and warranty expenses departs from the Department's traditional methodology.

Department's Position: We disagree with NEC's interpretation of the phrase "traditional methodology." *See* our position on Comment 20.

For our treatment of advertising and sales promotion expenses, *see* our position on Comment 25. For our treatment of warranty expenses, *see* our position on Comment 27.

Comment 23: NEC asserts that the Department should have based FMV on sales in the company's "principal markets" rather than in all markets in Japan, by excluding certain remote, non-competitive regions of Japan.

Department's Position: We disagree. In calculating FMV, we use all home market sales of such or similar merchandise that are in the ordinary course of trade and in the usual commercial quantities unless there is evidence that certain markets should be excluded. *See* our position on Comment 19. NEC furnished no evidence that its principal markets were other than all markets in Japan, and we were therefore unable to substantiate its claim.

Comment 24: NEC asserts that the Department violated the Administrative Procedure Act (APA) by examining sales in all markets in Japan to calculate FMV while the statute provides that only sales in the principal markets be used. The Department's practice constitutes rulemaking, and the Department cannot adopt rules without following the notice and comment requirements of the APA. As support for its position, NEC cites the Court of International Trade decisions in *IPSCO* v. *United States*, 687 F. Supp. 614, 628 (CIT May 4, 1988), and *Carlisle Tire and Rubber* v. *United States*, 634, F. Supp. 419 (CIT 1986).

Department's Position: We disagree. Because NEC furnished no evidence that its principal markets were other than all markets in Japan, we based our FMV analysis on all markets in Japan. This practice is, at most, a general statement of policy, to which the APA notice and comment requirements do not apply (5 U.S.C. 553(b)(3)(A)).

We gave NEC and the other respondents notice and an opportunity to comment on the practice that NEC contests. The administrative process would be severely constrained if the Department were only permitted to apply methodologies that had been promulgated pursuant to the APA.

The CIT decisions in Carlisle and IPSCO are not relevant. In Carlisle the court ruled that Commerce could not automatically disregard dumping margins of 0.5 percent of less as *de minimis* without first promulgating a rule to that effect pursuant to the APA. In IPSCO the court held that the Department must similarly follow APA procedures before automatically allocating certain grants over 15 years. Although we do not necessarily agree with the court's decisions, these cases involved the automatic application of an exact numerical standard in an administrative determination without regard to the particular facts presented in the case.

In this case, NEC failed to provide enough information regarding its principal markets to support a determination that particular sales should be excluded. The basis for rejecting NEC's claim was not that it conflicted with an absolute rule concerning the definition of principal markets. Rather, we merely followed the broad principle that there must be substantial evidence on the record to support claimed adjustments. Therefore, our determination was based on the particular facts of this case.

Comment 25: NEC contends that the Department should not calculate advertising and sales promotion expenses on a model-specific basis because such an approach is arbitrary, lacks any rational basis, and does not accurately measure the advertising and sales promotion expenses associated with selling TVs. NEC argues that advertising and sales promotion are designed to increase sales of all models, regardless of the specific content of a particular advertisement.

Department's Position: We agree that advertising and sales promotion expenses should be allocated on a product-line, rather than a model-specific, basis. Although we have used the model-specific allocation method in the past, we now believe that model-specific allocation: (1) Leads to inaccurate and erratic results in many instances since most companies do not keep advertising records on a model-specific basis; (2) is susceptible to manipulation by foreign companies in order to reduce dumping margins; and (3) is unnecessarily burdensome for both respondents and the Department. We note, however, that for the eighth review, NEC did not provide any documentation to support its advertising expenses. Therefore, we denied the entire home marekt advertising claim. For that review, we allowed only the home market sales promotion claim and U.S. advertising and sales promotion expenses that we were able to verify.

Comment 26: NEC asserts that the Department violated the APA by retroactively applying any methodologies other than the "traditional methodology" (*See* Comment 20) to the fifth, sixth, and seventh review periods.

Department's Position: We disagree. We consider the methodological improvements that we applied in these reviews to be general statements of policy, which are not subject to the APA. *See* positions on Comment 24 in this notice and on Comment 1 in the "Final Determination of Sales at Less Than Fair Value: Color Televisions from Korea," (49 FR 7620, March 1, 1984). Furthermore, there is no requirement that we apply changes in methdology only on a prospective basis.

Comment 27: NEC contends that the Department should not calculate home market warranty expenses on a model-specific basis. Instead, the Department should use a weighted-average of the product-line warranty expenses.

Department's Position: We disagree. We used the model-specific, weighted-average warranty expenses incurred during the past five years because the sales volume varied greatly from year to year. In our view, this allocation offers the best approximation of the eventual warranty costs for the sales under consideration. We calculate warranty expenses on a model-specific basis because, unlike advertising expenses, warranty expenses are inherently model-specific. Advertising may promote a product line or even a brand name, but repairs must be performed on a specific television set.

Comment 28: NEC contends that the Department should have treated the warranty labor costs as direct expenses in both the home market and U.S. Market.

Department's Position: Because NEC did not identify or quantify for its ESP sales which portions of its claimed U.S. warranty expenses were attributable to specific labor and parts, we considered the full warranty expenses to be direct selling expenses and adjusted ESP accordingly. From FMV we deducted only those portions of claimed home market warranty expenses which NEC demonstrated were directly related to sales of comparison model televisions.

BEST COPY AVAILABLE

Because NEC's service contractor is related to NEC, we consider the labor portion of the warranty claim to be a fixed cost, not directly related to the sales under consideration. For such warranty coverage to be considered a direct selling expense, it must represent a variable cost incurred as the result of an arm's length transaction. However, we allowed home market warranty labor costs as indirect selling expenses in the ESP offset.

Comment 29: NEC argues that the Department should not have classified NECHE's home market and U.S. inventory carrying costs as indirect selling expenses, but as direct selling expenses.

Department's Position: We disagree. The cost of carrying merchandise in inventory is indirect because such costs are incurred whether or not a sale is made.

Comment 30: For the eighth review, NEC contends that the Department should not have accepted Zenith's sales-below-cost allegation because the allegation was untimely.

Department's Position: We consider Zenith's allegation of sales below cost in the home market to have been submitted in a timely fashion because it was filed within one week after Zenith had been served with the proprietary version of NEC's supplemental questionnaire response. Zenith based its allegations on information in NEC's supplemental response.

Comment 31: NEC contends that the Department deducted an incorrect amount for warranty parts cost for home market model C-14N12PV in the fifth and sixth administrative review periods and an incorrect amount for warranty labor in the sixth review period.

Department's Position: We disagree. We reexamined NEC's warranty claims for these periods and determine that we deducted the correct amounts.

Comment 32: NEC asserts that the Department overstated U.S. advertising costs in the eighth review period.

Department's Position: We disagree. At verification for the eighth review, we discovered unreported advertising expenses in the United States. Therefore, we increased the deduction from USP for advertising expenses.

Comment 33: NEC argues that the Department deducted an incorrect amount for home market credit costs incurred during the eighth review period.

Department's Position: We disagree. We confirmed that we deducted the verified amount.

Comment 34: NEC contends that the Department used an incorrect FMV for July sales of model CT-1901A(R) in the eighth review period.

Department's Position: We disagree. Because NEC failed to respond to our COP questionnaire, we used the best information available to calculate FMV for NEC during the eighth review period. As BIA, we used NEC's own price data. Because there were no sales in the same month in which the home market comparison model was made, we examined the 90 day back/60 day forward period and used the highest FMV. To do otherwise would reward respondents for not providing complete and accurate responses.

Final Results of Review

As a result of the comments received, we have revised our preliminary results for Funai, Fujitsu General, Hitachi, Mitsubishi, NEC, and Sanyo, and we determine that the following margins exist:

Manufacturer	Review No.	Period of Review	Margin (Percent)
Fujitsu General	5	04/01/83-03/31/84	[1].015
	6	04/01/84-02/28/85	0.19
Funai Electric	8	04/01/86-02/28/87	21.93
Hitachi	5	04/01/83-09/27/83	[1]0.16
	8	03/01/86-02/28/87	[1]0.16
Mitsubishi	5	04/01/83-03/31/84	0.00
	6	04/01/84-02/28/85	0.00
NEC	5	04/01/83-03/31/84	18.21
	6	04/01/84-02/28/85	7.37
	7	03/01/85-02/28/86	7.16
	8	03/01/86-02/28/87	22.90
Sanyo	5	04/01/83-03/31/84	[1]2.86
	6	04/01/84-02/28/85	[1]2.86
	8	03/01/86-02/28/87	[1]2.86
Sharp	2	04/01/80-03/31/81	0.86

[1] No shipments during the period; rate from last review in which there were shipments.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions for each exporter directly to the Customs Service.

As provided for in section 751(a) of the Tariff Act, a cash deposit of estimated antidumping duties based on the most recent of the above rates shall be required for the above firms, except for Fujitsu General and Mitsubishi. The deposit rates for Fujitsu General and Mitsubishi remain unchanged from the rates in the last results of review, published on February 11, 1988 (53 FR 4050). For any shipments of this merchandise from Matsushita Electric Industrial Corporation (Matsushita), Victor Company of Japan (Victor), or Toshiba Corporation (Toshiba), the cash deposit will continue to be the same as the rate published in the final results of the last administrative review for each of those firms (54 FR 13917, April 6, 1989). Since the cash deposit for Hitachi Ltd. (Hitachi) is less than 0.5 percent and, therefore, *de minimis* for cash deposit purposes, the Department shall not require a cash deposit of estimated antidumping duties for Hitachi.

For any future entries of this merchandise from a new exporter, not covered in this or prior reviews, whose first shipments occurred after February 28, 1987, and who is unrelated to any reviewed firm, a cash deposit of estimated antidumping duties of 26.94 percent shall remain in effect. This is the rate for Matsushita in the eighth review period (54 FR 13917, April 6, 1989). These deposit requirements are effective for all shipments of television receivers, monochrome and color, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: August 18, 1989.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

[FR Doc. 89-20137 Filed 8-25-89; 8:45 am]

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Caribbean Fishery Management Council; Public Hearings

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of public hearings and request for comments.

SUMMARY: The Caribbean Fishery Management Council (Council) will hold public hearings on the management measures being considered by the Council for development of the Queen Conch Fishery Management Plan. Oral and written presentations will be accepted.

DATES: Written comments will be accepted until October 11, 1989.

The public hearings are scheduled as follows:

1. September 11, 1989, 3:00 p.m., Lajas, Puerto Rico.
2. September 12, 1989, 3:00 p.m., Salinas, Puerto Rico.
3. September 13, 1989, 3:00 p.m., Fajardo, Puerto Rico.
4. September 14, 1989, 3:00 p.m., Vieques, Puerto Rico.
5. September 18, 1989, 3:00 p.m., Arecibo, Puerto Rico.
6. September 20, 1989, 7:30 p.m., St. Croix, U.S.V.I.
7. September 21, 1989, 7:30 p.m., St. Thomas, U.S.V.I.

ADDRESSES: Written comments should be sent to the Caribbean Fishery Management Council, Suite 1108, Banco de Ponce Building, Hato Rey, Puerto Rico 00918.

The hearings will be held at the following locations:

1. Lajas, Puerto Rico—Hotel Villa Parguera, La Parguera.
2. Salinas, Puerto Rico—Club Naútico de Salinas, Road 701, Playa Salinas.
3. Fajardo, Puerto Rico—El Mesón Criollo, Road 987, Km. 3.2, Las Croabas.
4. Vieques, Puerto Rico—Parador Esperanza, Rural Road, Km. 12, Bo. Esperanza.
5. Arecibo, Puerto Rico—Club Naútico de Arecibo, Road 681, Km. 3, Bo. Vigia.
6. St. Croix, U.S.V.I.—Conference Room, Legislature Building, Christiansted.
7. St. Thomas, U.S.V.I.—Conference Room, Virgin Isle Hotel.

BILLING CODE 3510-22-M

Marine Mammals; Application for Permit: Geochemical and Environmental Research Group (P454)

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the Endangered Species Act of 1973 (16 U.S.C. 1531-1544), and the regulations governing endangered fish and wildlife permit (50 CFR parts 217-222).

1. *Applicant:* Geochemical and Environmental Research Group, Department of Oceanography, Texas A&M University, 10 South Graham Road, College Station, Texas 77840.
2. *Type of permit:* Scientific research; scientific purposes.
3. *Name and number of marine mammals:* Right whales (*Eubalaena glacialis*) 150.
4. *Type of take:* The applicant proposes to take right whales by harassment during photographic studies. The study will involve photography for mark-capture population analyses, and boat based environmental monitoring to characterize the occurrence and ecological use patterns of right whales.
5. *Location of activity:* Atlantic offshore waters of the southeast United States between Savannah, Georgia and Miami.
6. *Period of activity:* 3 year period.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, 1335 East West Hwy., Room 7324, Silver Spring, Maryland 20910 within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review by interested persons in the following offices:

Office of Protected Resources and Habitat Programs, National Marine Fisheries Service, 1335 East West Hwy., Rm. 7324, Silver Spring, MD;

Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Federal Bldg., Gloucester, Massachusetts 01930;

Director, Southeast Region, National Marine Fisheries Service, 9450 Koger Blvd., St. Petersburg, Florida 33702.

Dated: August 22, 1989.

Richard H. Schaefer,

Director, Office of Fisheries, Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in the Hungarian People's Republic

August 22, 1989.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: August 30, 1989.

FOR FURTHER INFORMATION CONTACT: Jerome Turtola, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for certain cotton, wool and man-made fiber textile products from Hungary are being adjusted, variously, for swing, carryover, carryforward and unused carryforward.

A description of the textile and apparel categories in terms of HTS number is available in the *Correlation:* Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 53 FR 49342, published on December 7, 1988.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

August 22, 1989.

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on December 2, 1988 by the Chairman, Committee for the Implementation of Textile Agreements. This directive concerns imports into the United States of certain cotton, wool and man-made fiber textile products, produced or manufactured in Hungary and exported during the period which began on January 1, 1989 and extends through December 31, 1989.

Effective on August 30, 1989, the directive of December 2, 1988 is amended to adjust the limits for the following categories, as provided under the provisions of the current bilateral agreement between the Governments of the United States and the Hungarian People's Republic:

Category and adjusted twelve-month limit [1]

300/301—1,334,242 kilograms
313—13,035,184 square meters
410—937,383 square meters
433—9,402 dozen
434—8,301 dozen
435—14,898 dozen
442—20,180 dozen
443—99,104 numbers
444—29,229 numbers
445/446—46,203 dozen of which not more than 34,652 dozen shall be in Category 445 and not more than 34,652 dozen shall be in Category 446
448—22,381 dozen
604—800,545 kilograms
645/646—102,912 dozen

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Adjustment of an Import Limit for Certain Man-Made Fiber Textile Products Produced or Manufactured in the People's Republic of China

August 22, 1989.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs increasing a limit.

EFFECTIVE DATE: August 22, 1989.

FOR FURTHER INFORMATION CONTACT: Jerome Turtola, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of this limit, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 566–6828. For information on embargoes and quota re-openings, call (202) 377–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limit for Category 643 is being increased for swing and carryforward.

A description of the textile and apparel categories in terms of HTS numbers is available in the *Correlation:* Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 53 FR 50276, published on December 14, 1988.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

August 22, 1989.

Commissioner of Customs,
Department of Treasury,
Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on December 6, 1988, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in the People's Republic of China and exported during the twelve-month period which began on January 1, 1989 and extends through December 31, 1989.

Effective on August 22, 1989, the directive of December 6, 1988 is amended further to increase to 460,789 numbers [1] the sublevel under Group II for man-made fiber textile products in Category 643, as provided under the provisions of the current bilateral textile agreement between the Governments of the United States and the People's Republic of China.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

COMMODITY FUTURES TRADING COMMISSION

Chicago Mercantile Exchange; Proposed Amendment Relating to Quality Specifications for the Live Cattle Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of proposed contract market rule change.

SUMMARY: The Chicago Mercantile Exchange ("CME") has submitted a proposed amendment to its live cattle futures contract which would reduce to four from eight the maximum number of yield grade 4 choice quality steers permitted in a delivery unit. The amendment as proposed would apply to newly listed contract months only, beginning with the October 1990 contract month. In accordance with section 5a(12) of the Commodity Exchange Act and acting pursuant to the authority delegated by Commission Regulation 140.96, the Director of the Division of Economic Analysis ("Division") of the Commodity Futures Trading Commission ("Commission") has determined, on behalf of the Commission, that the proposed amendment is of major economic significance. On behalf of the Commission, the Division is requesting comment on this proposal.

DATES: Comments must be received on or before September 27, 1989.

ADDRESSES: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Reference should be made to the proposed change in the maximum number of yield grade 4 steers deliverable on the CME live cattle futures contract.

FOR FURTHER INFORMATION CONTACT: Frederick V. Linse, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581, telephone (202) 254–7303.

SUPPLEMENTARY INFORMATION: The live cattle futures contract currently provides for the delivery at par of 40,000 pounds of choice quality steers of yield grades 1, 2, and 3, with the average weight per steer in the delivery unit falling between 1,050 and 1,200 pounds. The contract also provides for the delivery of a maximum of eight yield grade 4 choice quality steers in a single delivery unit. The existing terms of the contract provide that delivery units containing up to four yield grade 4 steers are deliverable at par. Delivery units containing more than four up to the existing limit of eight yield grade 4 steers are subject to a discount of 15 percent of the settlement price for each yield grade 4 steer in excess of four.

The proposed amendment would reduce to four from eight the maximum number of yield grade 4 steers permitted in a delivery unit. Under proposed amendment, delivery units containing up to the revised maximum level of four yield grade 4 steers would continue to be deliverable at par. The CME proposes to apply the amendment only to newly listed contract months following Commission approval commencing with the October 1990 contract month. Existing positions in the live cattle futures contract would not be affected.

The CME submits that the proposed amendment is needed to keep the terms of the live cattle futures market consistent with prevailing cash market practices. In particular, the CME states that:

> The Live Cattle futures contract calls for 40,000 pounds of USDA estimated yield grade 1, 2, 3, or 4 Choice quality grade live steers, averaging between 1,050 pounds and 1,200 pounds. This is equivalent to approximately 38 head at an average weight of 1,050 pounds, or 33 head at an average weight of 1,200 pounds.
>
> Eight (8) head of yield grade 4 cattle comprises between 21 percent (at an average weight of 1,200 pounds) and 24 percent (at an average weight of 1,050 pounds) of the delivery unit under current contract specifications. However, as the industry has moved to place a greater emphasis on leaner cuts of beef, current standards are much tighter, rarely allowing for more than 10% yield grade 4 cattle. This is equivalent to no more than four (4) head of yield grade 4 cattle in a delivery unit.
>
> The Exchange believes it is important to reduce the maximum number of yield grade 4 steers permitted under the Live Cattle contract from eight (8) to four (4) to keep our contract consistent with prevailing cash market practice. Such a change would bring the contract closer in line with current industry practices and thereby make the contract a more effective hedging vehicle.

The Division notes that the effect of the proposal will be to limit to four the maximum number of yield grade 4 steers that deliverers may include in a single delivery unit.

Copies of the proposed amendment will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Copies of the amended terms and conditions can be obtained through the Office of the Secretariat by mail at the above address or by telephone at (202) 254–6314.

The materials submitted by the CME in support of the proposed amendment may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR part 145 (1987)). Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Act Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with CFR 145.7 and 145.8.

Any person interested in submitting written data, views or arguments on the proposed amendments should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581 by the specified date.

Issued in Washington, DC on August 22, 1989.

Steven Manaster,

Director, Division of Economic Analysis.

BILLING CODE 6351-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Task Force on Low Observable Technology

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Science Board Task Force on Low Observable Technology will meet in closed session on September 12–13, 1989 at the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will evaluate low observable technology.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92–463, as amended (5 U.S.C. App. II, (1982)), it has been determined that this DSB Task Force meeting, concerns matters listed in 5 U.S.C. 552b(c) (1) (1982), and that accordingly this meeting will be closed to the public.

Dated: August 23, 1989.

Linda M. Bynum,

Alternative OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Department of the Navy

Chief of Naval Operations Executive Panel Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. 2), notice is hereby given that the Chief of Naval Operations (CNO) Executive Panel Advisory Committee Technology Surprise Task Force will meet November 14–15, 1989 from 9 a.m. to 5 p.m. each day, at 4401 Ford Avenue, Alexandria, Virginia. All sessions will be closed to the public.

The purpose of this meeting is to discuss the possibility of unexpected technological breakthroughs that vastly change warfighting capabilities. The entire agenda of the meeting will consist of discussions of key issues regarding the potential for unexpected technology breakthroughs that could have an acute impact on naval and other military forces. These matters constitute classified information that is specifically authorized by Executive order to be kept secret in the interest of national defense and is, in fact, properly classified pursuant to such Executive order. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting, contact: Faye Buckman, Secretary to the CNO Executive Panel Advisory Committee, 4401 Ford Avenue, Room 601, Alexandria, Virginia 22302–0268, Phone (703) 756–1205.

Dated: August 23, 1989.

Sandra M. Kay,

Department of the Navy, Alternate Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

DEPARTMENT OF EDUCATION

Assistance to States for Education of Handicapped Children Program; Intention to Compromise a Claim

AGENCY: Department of Education.

ACTION: Notice of intent to compromise a claim.

SUMMARY: Notice is given that the Acting Deputy Under Secretary for Management intends to compromise a claim against the Massachusetts Department of Education now pending before the Education Appeal Board, Docket No. 12-(276)-88.

DATE: Interested persons may express their opinions by submitting written data, views, or arguments on or before October 12, 1989.

FOR INFORMATION CONTACT: Additional information may be obtained by writing to Mr. Sergio Kapfer, Office of the General Counsel, Department of Education, 400 Maryland Ave., SW. (Room 4090, FOB-6), Washington, DC 20202.

SUPPLEMENTARY INFORMATION: Part B of the Education of the Handicapped Act (EHA-B), 20 U.S.C. 1401, 1411-1420, assists State educational agencies (SEAs) in providing special education and related services to handicapped children. The regulations implementing this program are at 34 CFR part 300.

On May 22, 1986 the Assistant Secretary for Special Education and Rehabilitative Services issued a letter of final audit determination (FLD) disallowing $48,535 of fiscal year (FY) 1983 and FT 1984 EHA-B funds awarded by this Department to the Massachusetts Department of Education (Massachusetts). The basis for this disallowance was the finding that the counts of handicapped children submitted by Massachusetts to calculate its FY 1983 and FY 1984 EHA-B awards were not supported by adequate documentation. More specifically, the Assistant Secretary concluded in the FLD that the Watertown School District had improperly included in its EHA-B child counts for the two years in question a total of 234 children whose eligibility to be counted could not be documented. Massachusetts filed a timely appeal of the FLD and the case was docketed for hearing before the Education Appeal Board. The parties filed briefs pursuant to a schedule established by the Education Appeal Board panel hearing the case.

As a result of settlement negotiations between the Assistant Secretary for Special Education and Rehabilitative Services and Massachusetts and a review of relevant materials, the Acting Deputy Under Secretary for Management proposes to compromise this claim for $31,000. The Acting Deputy Under Secretary for Management has determined that it would not be practicable or in the public interest to continue this proceeding. In addition, Massachusetts has provided adequate assurance that the practice which resulted in the claim has been corrected and will not recur. More specifically, Massachusetts has agreed that, for purposes of the child counts on which its future applications for EHA-B funds are to be based, it will include as eligible only those students with handicaps in the State who are receiving special education and related services in accordance with an individualized education program that meets the requirements of 34 CFR 300.340-300.349. This proposed compromise meets the requirements of section 452(f)(1) of the General Education Provisions Act, 20 U.S.C. 1234a(f)(1) (1988), and will not adversely affect any other audit proceedings currently pending before the Education Appeal Board.

The public is invited to comment on the Acting Deputy Under Secretary's intent to compromise this claim. Additional information may be obtained by writing to Mr. Sergio Kapfer at the address given at the beginning of this Notice.

Authority: 20 U.S.C. 1234a(f) (1982).

Dated: August 22,1989.

Gary J. Rasmussen,

Acting Deputy Under Secretary for Management.

BILLING CODE 4000-01-M

Fund for the Improvement and Reform of Schools and Teaching Board; Closed Meeting

AGENCY: Fund for the Improvement and Reform of Schools and Teaching Board.

ACTION: Notice of a closed meeting.

SUMMARY: This notice sets forth the schedule and agenda of a closed meeting of a subcommittee of the Fund for the Improvement and Reform of Schools and Teaching Board. This notice also describes the functions of the council. Notice of this meeting is required under section 10(a) (2) of the Federal Advisory Committee Act.

DATES: August 14, 1989, 9:00 a.m.—5:00 p.m. (Closed) August 15, 1989, 9:00 a.m.—5:00 p.m. (Closed).

ADDRESS: U.S. Department of Education, 555 New Jersey Avenue, NW., Room 328, Washington, DC 20208-5524.

FOR FURTHER INFORMATION CONTACT: Richard T. LaPointe, Director, Fund for the Improvement and Reform of Schools and Teaching, U.S. Department of Education, 555 New Jersey Avenue, NW. Room 522, Washington, DC 20208-5524, (202) 357-6496.

SUPPLEMENTARY INFORMATION: The Fund for the Improvement and Reform of Schools and Teaching Board (FIRST) is established under section 3231 of the Hawkins-Stafford Elementary and Secondary School Improvement Amendments of 1988 (Pub. L. 100-297). The Board is established to advise the Secretary concerning developments in education that merit his attention; identifying promising initiatives to be supported under the authorizing legislation; and advise the Secretary and the Director of the Fund on the selection of projects under consideration for support, and on planning documents, guidelines and procedures for grant competitions carried out by the Fund.

The Department is in the process of awarding grants under the Family-School Partnership Program and the Schools and Teachers Program to schools throughout the United States. During the closed meeting, the subcommittee reviewed grant proposals under these programs. Because of the need to award these grants at the earliest possible moment and because of scheduling difficulties, notice in the Federal Register could not be produced before the meeting was held.

The meeting was closed under the authority of section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. Appendix I) and under exemptions (4) and (6) of section 552b(c) of the Government in the Sunshine Act. (Pub. L. 94-409; 5 U.S.C. 552b). This closed meeting involved discussion on matters that would have disclosed sensitive information about the applicants, funding levels and requests, and comments of expert reviewers who conducted the initial screening of applications. Any such discussion might disclose trade secrets and commercial or financial information obtained from a person and privileged or confidential, and disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of privacy if conducted in open session. Such matters are protected by exemptions (c)(4) and (6) of section 552b of Title 5 U.S.C.

A summary of the activities at the closed session and related matters, which are informative to the public consistent with policy of Title 5 U.S.C. 552b will be available to the public within fourteen days after the meeting. Records are kept of all Council proceedings, and are available for public inspection at the office of the Fund for Improvement and Reform of Schools and Teaching, U.S. Department of Education, 555 New Jersey Avenue, NW. Room 522, Washington, DC 20208-5524 from the hours of 8:30 a.m. to 5:00 p.m.

Dated: August 21, 1989.

Bruno V. Manno,

Acting Assistant Secretary Educational Research and Improvement.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collections Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration.

ACTION: Notice of requests submitted to the Office of Management and Budget for review.

SUMMARY: The Energy Information Administration (EIA) has submitted the energy information collection(s) listed at the end of this notice to the Office of Management and Budget (OMB) for review under provisions of the Paperwork Reduction Act (Public Law 96-511, 44 U.S.C. 3501 et seq.).

The listing does not include information collection requirements contained in new or revised regulations which are to be submitted under section 3504(h) of the Paperwork Reduction Act, nor management and procurement assistance requirements collected by the Department of Energy (DOE).

Each entry contains the following information: (1) The sponsor of the collection (the DOE component or Federal Energy Regulatory Commission (FERC)); (2) Collection number(s); (3) Current OMB docket number (if applicable); (4) Collection title; (5) Type of request, e.g., new, revision, or extension; (6) Frequency of collection; (7) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (8) Affected public; (9) An estimate of the number of respondents per report period; (10) An estimate of the number of responses annually; (11) An estimate of the average hours per response; (12) The estimated total annual respondent burden; and (13) A brief abstract describing the proposed collection and the respondents.

DATES: Comments must be filed on or before September 27, 1989. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the OMB DOE Desk Officer listed below of your intention to do so as soon as possible. The Desk Officer may be telephoned at (202) 395-3084. (Also, please notify the EIA contact listed below.)

ADDRESS: Address comments to the Department of Energy Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503. (Comments should also be addressed to the Office of Statistical Standards at the address below.)

FOR FURTHER INFORMATION AND COPIES OF RELEVANT MATERIALS CONTACT: Jay Casselberry, Office of Statistical Standards (EI-70), Energy Information Administration, M.S. 1H-023, 1000 Independence Avenue SW., Washington, DC 20585. Mr. Casselberry may be telephoned at (202) 586-2172.

SUPPLEMENTARY INFORMATION: The energy information collection submitted to OMB for review was:

1. Energy Information Administration
2. FERC-73
3. 1902-0019
4. Service Life Data
5. Extension
6. On occasion
7. Mandatory
8. Businesses or other for profit
9. 26 respondents
10. 26 responses annually
11. The estimated average hours per response for each of the respondents is 210 burden hours.
12. The estimated total reporting hours are 5,460.
13. The data collected on this form are used to perform service life analysis for oil pipeline properties. These data are necessary to determine book depreciation rates.

Statutory Authority: Sec. 5(a), 5(b), 13(b), and 52, Public Law NO. 93-275, Federal Energy Administration Act of 1974, as amended, 15 U.S.C. 764(a), 764(b), 772(b), and 790a.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. RP82-124-011, RP81-53-008, RP81-55-037, RP85-149-014]

East Tennessee Natural Gas Co., Rate Filing Pursuant to Tariff Rate Adjustment Provisions

August 21, 1989.

Take notice that on August 15, 1989, East Tennessee Natural Gas Company (East Tennessee) hereby files ten copies of Substitute Fifty-First Revised Sheet No. 4 of its FERC Gas Tariff, Original Volume No. 1.

East Tennessee states that in Opinion No. 282, the Commission determined that the Mcf-mile methodology is the appropriate allocation method on the East Tennessee system and ordered East Tennessee to phase in the Mcf-mile methodology completely by 1989. Specifically, the Commission ordered

East Tennessee to: (1) Amend its rates, effective September 1, 1987, to reflect a 50–50 weighting of the first amendment, (2) amend its rates so that 75 percent of the composite zone rate differentials will be based upon the Mcf-mile methodology, and (3) in 1989, on the anniversary date, amend its rates so that 100 percent of the zone rate differentials shall be based on the Mcf-mile methodology. Accordingly, the instant filing is made in compliance with the terms of Opinion 282 in order to reflect, effective September 1, 1989, the 100% weighting of the Mcf-mile methodology pursuant to the Commission's opinion.

East Tennessee states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory Commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such protests should be filed on or before August 28, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene; provided, however, that any person who had previously filed a motion to intervene in this proceeding is not required to file a further motion. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 89–20159 Filed 8–25–89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP89–217–001]

El Paso Natural Gas Co.; Revised Tariff Filing

August 21, 1989.

Take notice that on August 15, 1989, El Paso Natural Gas Company ("El Paso") filed, pursuant to part 154 of the Federal Energy Regulatory Commission ("Commission") Regulations Under the Natural Gas Act, Substitute Third Revised Sheet No. 368–B to its FERC Gas Tariff, First Revised Volume No. 1, as a revision to the filing made by El Paso on August 3, 1989 at Docket No. RP89–217–000.

El Paso states that the tariff sheets tendered on August 3, 1989, when accepted by the Commission and permitted to become effective, serve to clarify El Paso's authority to selectively adjust (discount) its Order No. 500 Throughput Surcharge for interruptible sales service.

El Paso further states that the Commission Staff informally requested that El Paso further revise its revision to subparagraph 21.3(b) of section 21, Take-or-pay Buyout and Buydown Cost Recovery, of the General Terms and Conditions contained in its First Revised Volume No. 1 Tariff to clarify that the discount of the throughput surcharge for interruptible sales customers is specifically for interruptible sales customers udner Rate Schedule IS–1. Accordingly, El Paso revised its August 3, 1989 filing by tendering Substitute Third Revised Sheet No. 368–B which reflects the further revision to subparagaraph 21.3(b)

El Paso requested pursuant to § 154.51 of the Commission's Regulations, that waiver of the notice requirements of § 154.22 of said Regulations be granted so as to permit the tendered tariff sheet to become effective August 1, 1989, which is the effective date requested in El Paso's August 3, 1989 filing.

Copies of this filing were served upon all interstate pipeline system sales customers and shippers of El Paso and all interested state regulatory commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such protests should be filed on or before August 28, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 89–20160 Filed 8–25–89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TM89–6–16–000]

National Fuel Gas Supply Corp.; Proposed Changes in FERC Gas Tariff

August 21, 1989.

Take notice that on August 17, 1989, National Gas Supply Corporation ("National") tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, the following tariff sheets, to be effective September 1, 1989.

Eighth Revised Sheet No. 71, Page 1 of 2

Seventh Revised Sheet No. 71, Page 2 of 2

Eighth Revised Sheet No. 72, Page 1 of 3

Eighth Revised Sheet No. 72, Page 2 of 3

Eighth Revised Sheet No. 72, Page 3 of 3

National states that the purpose of this filing is to update the amount of take-or-pay charges approved by the Federal Energy Regulatory Commission to be billed to National by its pipeline-suppliers and to be recovered by National by operation of section 20 of the General Terms and Conditions to National's FERC Gas Tariff, First Revised Volume No. 1. National further states that its pipeline-supplier which received approval to flow-through take-or-pay charges to National was Texas Eastern Transmission Corporation.

Copies of National's filing were served on National's jurisdictional customers and on the interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before August 28, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

FEDERAL FINANCIAL INSTITUTIONS EXAMINATION COUNCIL

Requests for Comments on Proposed Changes to the Reports of Condition and Income Required of All FDIC-Insured Commercial Banks and All FDIC-Supervised Savings Banks

AGENCY: Federal Financial Institutions Examination Council.

ACTION: Notice of request for comments.

SUMMARY: The Federal Financial Institutions Examination Council (FFIEC) is proposing certain changes to the Reports of Conditions and Income (Call Reports) required quarterly by the Office of the Comptroller of the Currency (OCC) for national banks, the Federal Reserve Board (FRB) for state member banks, and the Federal Deposit Insurance Corporation (FDIC) for insured state nonmember commercial and savings banks. The proposed Call Report changes would fulfill two objectives: (1) To provide the banking agencies with sufficient data to permit the monitoring of banks' risk-based capital levels, while limiting the amount of information reported by individual banks on the basis of bank size and capital level and (2) to provide other data considered necessary for bank supervisory purposes, particularly with respect to the nature and extent of banks' off-balance sheet activities. These changes would be implemented through the adoption of a new risk-based capital schedule (Schedule RC–RBC), a revised version of the current off-balance sheet schedule (Schedule RC–L), and modifications of existing items or the addition of new items in five other schedules. The proposed effective date for these reporting changes is the March 31, 1990, report date, except for one new item that would be added as of June 30, 1990.

DATE: Comments must be received on or before October 13, 1989.

ADDRESS: All comments should be sent to Robert J. Lawrence, Executive Secretary, Federal Financial Institutions Examination Council, 1776 G Street, NW., Suite 701, Washington, DC 20006 or delivered to the same address between the hours of 9:00 a.m. and 5:00 p.m. on business days.

FOR FURTHER INFORMATION CONTACT:

OCC: David C. Motter, Special Assistant to the Chief National Bank Examiner, Office of the Comptroller of the Currency, 490 L'Enfant Plaza East, SW., Washington, DC 20219, (202) 447–1587.

FRB: Rhoger H. Pugh, Manager, Division of Banking Supervision and Regulation, Board of Governors of the Federal Reserve System, 20th and Constitution Avenue, NW., Washington, DC 20551, (202) 728–5883.

FDIC: Robert F. Storch, Chief, Securities and Accounting Section, Division of Bank Supervision, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, DC 20429, (202) 898–8906.

SUPPLEMENTARY INFORMATION: During the first quarter of 1989, each of the three Federal banking agencies (OCC, FRB, and FDIC) adopted risk-based capital standards that are applicable to all of the banks under their supervision. Under these standards, banks will be expected to achieve a minimum interim risk-based capital ratio of 7.25 percent by year-end 1990. A final minimum risk-based capital ratio of 8 percent should be achieved by all banks by year-end 1992. Although an explicit minimum ratio will not be in effect until December 31, 1990, the banking agencies have encouraged banks to begin monitoring their risk-based capital positions and to work toward achieving or maintaining at least the interim and final minimum risk-based capital ratios during the current transition period.

In order for the banking agencies to compare bank risk-based capital positions to the minimum standards and monitor the progress of banks whose capital levels are below the standards, the FFIEC is proposing to introduce a new risk-based capital schedule (Schedule RC–RBC) in which all banks would report the maturities of any limited-life capital instruments and their total regulatory capital as defined for risk-based capital purposes. These two items would be preceded by a simplified risk-based capital test in which banks with less than $1 billion in total assets would indicate through their response to a "yes" or "no" question whether the test calculation resulted in a risk-based capital ratio of at least eight percent. The objective of this calculation is to minimize the additional reporting burden that this new schedule would impose on banks, particularly small banks, by exempting those banks with less than $1 billion in total assets whose risk-based capital ratios exceed the required minimum from having to compile and report the data needed to more precisely measure their risk-based capital ratios. All banks with $1 billion or more in total assets and smaller banks that do not "pass" the simplified risk-based capital calculation would complete the remainder of the risk-based capital schedule each quarter. The remainder of the schedule requests information on the amount of assets and the credit equivalent amount of off-balance sheet items by risk-weight category and related data on interest rate and foreign exchange rate contracts.

Using year-end 1988 Call Report data to perform the simplified risk-based capital calculation, approximately 85 percent of all banks with less than $1 billion in total assets (including more than 88 percent of all banks with less than $100 million in total assets) met the threshold for exemption. It should be noted, however, that a bank that is exempt from this reporting requirement is not exempt from the risk-based capital requirements themselves.

The Call Report has collected information from all banks on off-balance sheet activities since June 1983. The FFIEC is proposing to expand the Call Report schedule in which such data are gathered (Schedule RC–L) to include more complete data on the nature and extent of banks' off-balance sheet activities. The changes that would be made to the schedule are intended primarily to further aid the banking agencies in carrying out their supervisory responsibilities and would be needed even in the absence of risk-based capital. The FFIEC has deferred making substantive changes to the Call Report's off-balance sheet schedule for more than three years despite its supervisory shortcomings while the risk-based capital standards, which specifically incorporate off-balance sheet exposures within their framework, were being developed by the banking agencies.

The FFIEC is also proposing certain changes to four other Call Report scheduled. Changes affecting Schedules RC, Balance Sheet, and RC–M, Memoranda, relate to the measurement of the capital components of risk-based capital. In Schedule RC–B, Securities, more detailed breakdowns of bank holdings of U.S. Government agency and corporation obligations and securities issued by states and political subdivisions in the U.S. would be collected because of the different risk weights attached to various types of agency and municipal securities under the risk-based capital framework. New memorandum items on foreign-currency denominated deposits in domestic offices and the number of deposit accounts of $100,000 or less in domestic offices would be added to Schedules RC–E, Deposit Liabilities, and RC–O, Other Data for Deposit Insurance Assessments, respectively. This latter memorandum item would be collected only with the reports for June 30 each year.

Each commercial and savings bank required to file Call Reports is being sent (1) a document describing the proposed changes in reporting requirements, (2) samples of the report schedules that would be added or otherwise modified, and (3) draft instructions for the proposed risk-based capital schedule (Schedule RC–RBC) and the revised off-balance sheet schedule (Schedule RC–L). Copies of these documents are also being sent to state banking supervisors, banking trade associations, the financial press, and interested federal agencies. The FFIEC will make copies of these documents available upon request to any other interested parties. Written requests should be directed to the address for the FFIEC shown above while telephone requests should be directed to (202) 357–0177.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96–511), the current Reports of Condition and Income required of all FDIC-insured commercial banks and all FDIC-supervised savings banks have been submitted to, and approved by, the Office of Management and Budget (OMB). (OMB Control Numbers: for OCC, 1577–0090; for FRB, 7100–0036; for FDIC, 3064–0052.) The final version of the proposed changes that are the subject of the FFIEC's request for comments, which will be developed after consideration of the comments received, will be submitted to OMB for its review.

Dated: August 22, 1989.

Robert J. Lawrence,

Executive Secretary, Federal Financial Institutions Examination Council.

BILLING CODE 6210-01-M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10220. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–200278

Title: Port of Oakland Terminal Agreement

Parties: Port of Oakland (Port) Hyundai Merchant Marine Co., Ltd. (HMM)

Synopsis: The Agreement provides for HMM to have a non-exclusive right to use certain assigned premises at the Port's Charles P. Howard Terminal with certain rights to transfer HMM's rights and obligations to other of the Port's public terminals. HMM agrees that the assigned premises shall be the regularly scheduled Northern California port of call for its vessel operations. In compensation, HMM will pay the Port certain discounted dockage and wharfage payments based on the volume of traffic generated by HMM.

By Order of the Federal Maritime Commission.

Dated: August 23, 1989.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 88N–0394]

Generic Animal Drug and Patent Term Restoration Act, Third Policy Letter; Availability

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a third policy letter, dated August 2, 1989, on the implementation of the Generic Animal Drug and Patent Term Restoration Act. The letter contains draft policy statements regarding exclusivity, withdrawal periods, substitution of active ingredients, and labeling that have been prepared by the Center for Veterinary Medicine (CVM). The agency is soliciting comments on the letter.

DATES: Written comments may be submitted at any time regarding this and previous policy letters and implementation of the new law in general.

ADDRESSES: Submit written requests for single copies of the third policy letter to the Industry Information Staff (HFV–12), Center for Veterinary Medicine, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857. Send two self-addressed adhesive labels to assist that office in processing your requests. Submit written comments on the policy letter to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857. Requests and comments should be identified with the docket number found in brackets in the heading of this document. The letter and received comments are available for public examination in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Richard B. Talbot, Center for Veterinary Medicine (HFV–100), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4313.

SUPPLEMENTARY INFORMATION: On November 16, 1988, the President signed into law the Generic Animal Drug and Patent Term Restoration Act (the new law) (Pub. L. 100–670, 102 Stat. 3971). The new law amends the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 301 *et seq.*) by extending the generic approval system to copies of new animal drugs that were approved after October 1962, and provides patent extension for certain animal drugs.

In the **Federal Register** of December 15, 1988 (53 FR 50460), FDA published a notice of availability of a policy letter, dated November 23, 1988, implementing certain aspects of the new law. The letter discusses the list of approved drugs that FDA must publish, patent certifications that generic applicants must make, the patent information that pioneer sponsors must submit, and the exclusivity claims pioneer sponsors may make.

In the **Federal Register** of June 21, 1989 (54 FR 26111), FDA published a notice of availability of a second policy letter dated June 7, 1989, implementing certain additional aspects of the new law. The letter introduced a document entitled "Generic Animal Drug and Patent Term Restoration Act—Implementation." The document includes a description of the proposed administrative procedures to be used in implementation of the new law, a draft of CVM's Manufacturing Requirements for abbreviated new animal drug applications (ANADA's), a draft Bioequivalence Guideline, and draft procedures for Environmental Review of Generic Animal Drugs.

FDA is now announcing the availability of a third policy letter dated August 2, 1989, further describing polices used to implement certain aspects of the new law. The current letter introduces five draft policy statements:

(1) "Exclusivity for Human Food Safety Data Submitted in a Supplemental Application."

(2) "Withdrawal Period for Generic Drugs."

(3) "Substitution of an Active Ingredient in a Combination Drug or in a Feed Use Combination."

(4) "Labeling Requirements for Generic Drugs."

(5) "Can a Generic Animal Drug Sponsor Obtain Exclusivity for an Innovation Approved Under a Supplement to an ANADA and Can the Pioneer Drug Sponsor Copy the Generic Innovation Without Submitting Additional Data?"

The agency anticipates that changes in these policy statements may occur in the future. When and if changes are made, copies of the revised policy statements will be placed on display in the Dockets Management Branch (address above) and a notice of availability will be published in the **Federal Register.**

Dated: August 21, 1989.

Alan L. Hoeting,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 89–20199 Filed 8–25–89; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 89N–0350]

Vitarine Pharmaceuticals, Inc.; Withdrawal of Approval of Abbreviated New Drug Application for Triamterene and Hudrochlorothiazide Capsules

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of the abbreviated new drug application (ANDA) for triamterene 50 milligrams (mg) and hydrochlorothiazide 25 mg capsules held by Vitarine Pharmaceuticals, Inc., Springfield Gardens, NY (Vitarine). At FDA's request, Vitarine has agreed that approval of the application be withdrawn and has waived its opportunity for a hearing. FDA has become aware that the application contains untrue statements of material facts.

EFFECTIVE DATE: August 28, 1989.

FOR FURTHER INFORMATION CONTACT: Margaret F. Sharkey, Division of Regulatory Affairs (HFD–366), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–295–8041.

SUPPLEMENTARY INFORMATION: Recently, FDA became aware of the submission of flase data in support of the approval of ANDA 71–737 held by Vitarine for a product containing 50 mg of triamterene and 25 mg of hydrochlorothiazide. Vitarine's product is a generic version of Dyazide Capsules manufactured by Smith Kline & French. Among other things, the bioequivalence studies submitted in support of the Vitarine product were not based on Vitarine's product but on another firm's product. Because such submission, therefore, contained untrue statements about the product's bioequivalence (in that the data were not based on Vitarine's product at all), FDA asked that Vitarine request that the approval of its application be withdrawn and waive its opportunity for a hearing. (See 21 CFR 314.150(d).) By letter dated July 12, 1989, Vitarine has complied with FDA's request and asked that the ANDA be withdrawn. Vitarine is also recalling the product to the retail level.

Therefore, under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), and under authority delegated to the Director of the Center for Drug Evaluation and Research (21 CFR 5.82), approval of abbreviated new drug application 71–737, and all amendments and supplements thereto, is hereby withdrawn, effective August 28, 1989.

Dated: August 15, 1989.

Gerald F. Meyer,

Deputy Director, Center for Drug Evaluation and Research.

[FR Doc. 89–20135 Filed 8–25–89; 8:45 am]

BILLING CODE 4160-01-M

Health Care Financing Administration

Public Information Collection Requirements Submitted to the Office of Management and Budget for Clearance

AGENCY: Health Care Financing Administration, HHS.

ACTION: The Health Care Financing Administration (HCFA) has submitted the following public information collection requirement to the Office of Management and Budget (OMB) for review and clearance in compliance with the Paperwork Reduction Act (Pub. Law 96-511).

SUMMARY: Section 4007 of the Omnibus Budget Reconciliation Act of 1987, as amended by section 411(b)(6) of the Medicare Catastrophic Act of 1988, requires the Secretary to provide for a demonstration project to determine the costs and benefits of establishing a uniform system for the reporting of Medicare participating hospitals to report balance sheet information and information specified in the legislation. Form HCFA-2552-DEMO has been developed to collect the specified information. In view of the critical importance of these cost report forms to the implementation of the demonstration project and the considerable opportunity already extended to the public for comment, the HCFA has requested the Office of Management and Budget to expedite their review by September 1, 1989.

Type of Request: Revision; *Originating Office*: Health Care Financing Administration; *Title of information collection*: Demonstration Cost Report; *Form number*: Form HCFA-2552; *Frequency*: Annual; *Respondents*: All hospitals in the State of California and Colorado; *Estimated number of responses*: 700; *Average hours per response*: 150; *Total estimated burden hours*: 105,000; *Additional Information or Comments*: A copy of Section 403.408 of BERC-483 IFC are published herewith. Written comments and recommendations for the proposed information collections should be sent directly to the following address: OMB Reports Management Branch, Attention: Allison Herron, New Executive Office Building, Room 3208, Washington, DC 20503.

Dated: August 22, 1989.

Robert A. Streimer,

Acting Administrator, Health Care Financing Administration.

Section 403.408 Requirements for hospitals in States participating in the demonstration.

(a) *General.* For cost reporting periods beginning on or after July 1, 1989 and before July 1, 1991, all hospitals in California and Colorado must submit the cost report required under §§ 413.20 and 413.24 of this chapter and the data specified in (b) below.

(b) *Cost reporting requirements for the demonstration.* Hospitals are required to submit a demonstration project cost report that includes the following information:

(1) Hospital discharges (classified by class of primary payer).

(2) Patient days (classified by class of primary payer).

(3) Licensed beds, staffed beds, and occupancy.

(4) Inpatient charges and revenues (classified by class of primary payer).

(5) Outpatient charges and revenues (classified by class of primary payer).

(6) Inpatient and outpatient hospital expenses (by cost center classified for operating and capital).

(7) Reasonable costs.

(8) Other income.

(9) Bad debt and charity care.

(10) Capital acquisitions.

(11) Capital assets.

(c) *Due date for demonstration project cost report.* Due dates for demonstration cost reports are established by HCFA through instructions but are no more often than the due dates specified in § 413.24(f) of this chapter for hospital cost reports.

(d) *Interim reporting.* Hospitals participating in the demonstration project are required to submit an interim report covering the first six months in which the hospital participates in the demonstration project. Hospitals are required to submit additional interim reports requested by HCFA on the due dates established by HCFA.

(e) *Reporting format.* Demonstration project cost reports must be submitted in an electronic format. The hospital's electronic programs must be capable of producing an output file compatible with their respective intermediary's automated systems.

[FR Doc. 89-20184 Filed 8-25-89; 8:45 am]

BILLING CODE 4120-03-M

Office of Human Development Services

Agency Information Collection Under Office of Management and Budget Review

AGENCY: Office of Human Development Services, HHS.

ACTION: Notice.

Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), the Office of Human Development Services (OHDS) has submitted to the Office of Management and Budget (OMB) a request for approval of an information collection for the Administration on Developmental Disabilities 1990 Report to Congress required under the Developmental Disabilities Assistance and Bill of Rights Act.

ADDRESSES: Copies of the information collection request may be obtained from Larry Guerrero, OHDS Reports Clearance Officer, by calling (202) 245-6275.

Written comments and questions regarding the requested approval for information collection should be sent directly to Justin Kopca, OMB Desk Officer for OHDS, OMB Reports Management Branch, New Executive Office Building, Room 3208, 725 17th Street, NW., Washington, DC 20503, (202) 395-7316.

Information on Document

Title: Administration on Developmental Disabilities 1990 Report to Congress.

OMB No.: N/A.

Description: Part B, Section 122(f) of the Developmental Disabilities Assistance and Bill of Rights Act requires that each State Developmental Disabilities Planning Council conduct a comprehensive review of all State and Federal policies that affect services for persons with developmental disabilities. It further requires that each Council conduct a survey of a representative sample of persons with developmental disabilities to determine their satisfaction with services (including Social Security) and hold public forums regarding the needs of unserved and the underserved populations. The States are required to report their findings to the Secretary. The Secretary is required to summarize the findings reported by the States in a report to Congress.

Annual Number of Respondents	56
Annual Frequency	1
Average Burden Hours Per Response	1,600
Total Burden Hours	89,600

Dated: August 21, 1989.

Donna Givens,

Deputy Assistant Secretary for Human Development Services.

BILLING CODE 4130-01-M

President's Committee on Mental Retardation; Meeting

Agency Holding the Meeting: President's Committee on Mental Retardation.

Time and Date: Executive Committee, Wednesday, September 13, 1989, 6:00 p.m.—8:00 p.m. Full Committee, September 14, 1989, 9:30 a.m.—5:30 p.m.

Presidential Forum: The Offender with Mental Retardation and the Criminal Justice System—September 15–16, 1989, 8:30 a.m.—6:00 p.m.

Place: Hyatt Regency Bethesda Hotel, One Bethesda Metro Center, Wisconsin Avenue & Old Georgetown Road, Bethesda, Maryland 20814.

Status: Meetings are open to the public. An interpreter for the deaf will be available upon advance request. All locations are barrier free.

Matters to Be Considered: Reports by members of the Executive Committee of the President's Committee on Mental Retardation (PCMR) will be given. The Committee plans to discuss critical issues concerning prevention, family and community services, full citizenship, public awareness and other issues relevent to the PCMR's goals.

The PCMR: (1) Acts in an advisory capacity to the President and the Secretary of the Department of Health and Human Services on matters relating to programs and services for persons who are mentally retarded; and (2) is responsible for evaluating the adequacy of current practices in programs for the retarded, and reviewing legislative proposals that affect the mentally retarded.

Contact Person for More Information: Jim F. Young, 330 Independence Avenue, SW., Room 4262–Wilbur J. Cohen Building, Washington, DC 20201-0001, (202) 245-7634.

Date: August 21, 1989.

George N. Bouthilet,

Acting Executive Director, PCMR.

BILLING CODE 4130-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. N-89-1917; FR-2606]

Unutilized and Underutilized Federal Buildings and Real Property Determined To Be Suitable for Use for Facilities to Assist the Homeless

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized and underutilized Federal property determined by HUD to be suitable for possible use for facilities to assist the homeless.

EFFECTIVE DATE: August 28, 1989.

ADDRESS: For further information, contact Morris Bourne, Department of Housing and Urban Development, Room 9140, 451 Seventh Street SW, Washington, DC 20410; telephone (202) 755-9075; TDD number for the hearing- and speech-impaired (202) 426-0015. (These telephone numbers are not toll-free.)

SUPPLEMENTARY INFORMATION: In accordance with the December 12, 1988 court order in *National Coalition for the Homeless v. Veterans Administration*, No. 88-2503-OG (D.D.C.), HUD publishes a Notice, on a weekly basis, identifying unutilized and underutilized Federal buildings and real property determined by HUD to be suitable for use for facilities to assist the homeless. Today's Notice is for the purpose of announcing that no additional properties have been determined suitable this week.

Dated: August 22, 1989.

C. Austin Fitts,

Assistant Secretary for Housing—Federal Housing Commissioner.

[FR Doc. 89-20224 Filed 8-25-89; 8:45 am]

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Request for Additional Public Comments on the Need for Updating the Environmental Analysis of the Administration and Management of the Pittman-Robertson Federal Aid in Wildlife Restoration Program and the Dingell-Johnson Federal Aid in Sport Fish Restoration Program as Amended.

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice; amendment.

SUMMARY: On July 14, 1989, the Fish and Wildlife Service (Service) published a notice (54 FR 29789) advising of its intention to issue a revised and updated Environmental Impact Statement (EIS) for the Federal Aid in Wildlife and Sportfish Restoration Programs. That notice is hereby revised to extend the public comment period by 30 days, to expand and clarify the alternatives listed and to provide additional explanation. The 50 States, 5 Territories and the District of Columbia are involved. A Public meeting will be called in the vicinity of the Service's headquarters in Washington, DC. Public meetings may be called in the vicinity of one or more of the Services headquarters in Portland, Oregon; Albuquerque, New Mexico; Minneapolis, Minnesota; Atlanta, Georgia; Boston, Massachusetts; Denver, Colorado; and Anchorage, Alaska in response to indicated needs. Locations and times of such meetings will be provided by notice in the Federal Register.

For clarity purposes, the contents of the previous notice are incorporated into this notice.

DATES: Written comments should be received no later than October 12, 1989.

ADDRESS: Comments should be addressed to Director, U.S. Fish and Wildlife Service, Department of the Interior, Mail Stop 322, Arlington Square, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Phillip Agee, Wildlife Biologist, U.S. Fish and Wildlife Service Division of Federal Aid; Telephone 703/358-2156.

SUPPLEMENTARY INFORMATION: The U.S. Fish and Wildlife Service is exploring the need for additional environmental documentation to supplement or replace the eixsting EIS entitled "Environmental Statement—Operation of the Federal Aid in Sport Fish and Wildlife Restoration Program" which was published in 1978. The analysis of Environmental impacts will consider actions to be carried out by the 50 States, Guam, Puerto Rico, the Virgin Island, the Northern Mariana Islands, American Samoa and the District of Columbia, with funding assistance by the Pittman-Robertson Federal Aid in Wildlife Restoration Act, as amended (16 U.S.C. 669-669i) and the Dingell-Johnson Federal Aid in Sport Fish Restoration Act as amended (16 U.S.C. 777–777k)). The existing regulations for implementing these Acts are found in 50 CFR part 80.

Federal funds utilized in this program are derived from excise taxes and fees which are levied on products employed in hunting, fishing, shooting and boating. The resulting revenue is allocated annually among the States in conformance with statutory formulae based on geographic areas and numbers of licensed hunters and fishermen and among the Territories and Insular Possessions listed above based on prescribed percentage shares.

A State may propose specific activities within prescribed categories (land acquisition, development, research, surveys and inventories, hunter education, aquatic education, boating facilities, etc.). If the Service, acting on behalf of the Secretary, finds the proposal to be substantial in character and design, the State may proceed with accomplishing the activity, using non-Federal funds. The State may then claim reimbursement of up to 75 percent of the cost. Territories and Insular Possessions may claim up to 100 percent.

The States' average annual use of funds from these two assistance programs during fiscal years 1985, 1986 and 1987 are summarized as follows:

Activity	Funds ($1000) and percent of total expended	
	Pittman-Robertson	
	Amount	Percent
Hunter education	$7,865	9
Land acquisition	5,297	6
Development	10,056	11
Surveys and inventories	15,318	17
Research	9,410	11
Technical guidance	3,258	4
Operation and maintenance	28,952	33
Planning	1,074	1
Administration	7,454	8
	Dingell-Johnson	
	Amount	Percent
Hunter education		
Land acquisition	$1,155	2
Development	10,297	21
Surveys and inventories	16,958	35
Research	11,656	24
Technical guidance	2,242	5
Operation and maintenance	2,176	4
Planning	848	2
Administration	3,174	7

It is not possible to specify with certainty the actions that will characterize this program in years ahead since the States are the primary determinants in the selection of these actions. For any analysis, anticipated activities will be based on the expectations of a panel of State officials and on records from recent years but with modifications to accommodate known trends and legislative redirections.

The environmental impacts produced by these programs are believed to be primarily beneficial. Such impacts include the maintenance of lands in a more or less natural state, the restoration and maintenance of fish and wildlife species and providing for a sustained program of public recreation and education. However, the execution of these programs may result in other impacts, such as altering certain habitats and animal populations, flooding or burning certain vegetation areas and affecting changes in local economic activity by altering the status or availability of fish and wildlife. Administration requirements are currently in place whereby proposals of such projects may not be approved until all necessary environmental analyses have been satisfactorily completed. The EIS will address these impacts including cumulative impacts that can result from individually minor but collectively significant actions taking place over a period of time.

Many of the fish and wildlife species given management attention under this program are subject to harvest by hunters, fishermen and trappers. Such harvests, if properly conceived and carried out, are considered legitimate and biologically defensible parts of fish and wildlife management. However, this activity is a State responsibility performed upon action by the State's policy-making body. Hence, hunting, fishing and trapping are not program activities and will not be addressed in any analysis.

Since their inception in 1937 and 1950, the Wildlife Restoration and Sport Fish Restoration Acts, respectively, have been primary forces in the recovery of numerous wildlife and fish species. During early years, managers focused almost exclusively on species of interest to hunters and fishermen. The States still direct all of their Dingell-Johnson funds to sport fish (as required by that Act) but only about 80 percent of their Pittman-Robertson funds to harvested species.

In the period since publication of the existing EIS, the Wildlife Restoration Program has undergone no substantial changes. Revenue has grown from $67.8 million in 1978 to $126.5 million in 1989. There were no major changes in the Act or its administration during that period. However, substantial changes have occurred in the Sport Fish Restoration Program as a result of the 1984 Wallop-Breaux amendment of the Dingell-Johnson Act. This amendment was responsible for the broadening of the list of fishing equipment subject to the manufacturers' excise tax, the capture of highway taxes paid on fuels used in motorboats, of import duties on pleasure boats, fishing equipment and of interest earned by these funds while held in the Treasury. Hence, revenues under this Act increased from about $26.3 million in 1978 to $186.7 million in 1989.

The Wallop-Breaux amendment also expanded the range of activities undertaken by the States. They now include developing and upgrading boating access facilities, authorization for aquatic education and a requirement to allocate funds for marine sport fisheries projects.

During the past decade there has been widespread and persistent interest in certain initiatives where Federal grants are involved. Among these are:

- Applying grant monies to Federal priorities in place of State priorities.
- Abolishing all Federal restraints on the States' use of Federal grants.
- Increasing attention to the management of non-harvested species and the needs of nonconsumptive users.
- Exclusive attention under the Wildlife and Sportfish Restoration Acts to harvested species and the needs of fishermen and hunters.
- Elimination of management and research practices considered to cause pain or death in animals.
- Maximization of biodiversity.

Such initiatives have been or may be proposed for imposition on this program. Thus, they suggest certain modes of operation to be considered along with the present program if an analysis is to be carried out.

No-Change Alternative. The Sport Fish and Wildlife Restoration Programs would proceed without significant changes from that described above. The types of activities authorized, the levels of funding provided and the administrative latitudes and constraints exercised would be unchanged from the present.

Alternative #1 Federal requirements would mandate that at least 50 percent of each year's Pittman-Robertson funds expended by the State would be on waterfowl habitat or in pursuit of the North American Waterfowl Management Plan and at least 50 percent of each year's Dingell-Johnson funds expended by the State would be on the protection, maintenance and improvement of aquatic habitats, including water quality.

Alternative #2. At least 50 percent of each year's Pittman-Robertson funds would be expended on restoring and enhancing terrestrial ecosystems without reference to hunted/non-hunted status. At least 50 percent of each year's Dingell-Johnson funds would be expended on restoring and enhancing aquatic ecosystems.

Alternative #3. All projects would be required to show primary benefits to harvested species of fish and/or wildlife or to sportsmen.

Alternative #4. All projects funded would be required to be free of practices considered offensive to significant portions of the public (e.g., marsh burning, the use of fish toxicants, the use of herbicides or insecticides, research resulting in death or stress on animals, etc.).

Alternative #5. By 1995, all States would be required to have in place a comprehensive plan or other systematic process for setting work priorities consistent with human needs and the status of the resource base. Thereafter, all requirements and prohibitions on activities would be repealed and the Federal role would be limited to allocating funds and, monitoring compliance with Federal statutes.

Alternative #6. All limitations and restrictions in the Federal Aid Acts and related regulations and policies would be removed to permit the States unimpeded pursuit of their own priorities.

The Service requests written comments from the public regarding this Notice. Of specific interest will be comments which:

—Propose changes, deletions or additions to the above list of alternatives.

—Address the environmental impacts, either individually or cumulatively, of the current program or any of the alternatives.

Any environmental review of this program will be conducted in accordance with the requirements of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4331, *et seq.*), National Environmental Policy Act regulations (40 CFR parts 1500–1508), other appropriate Federal laws and regulations, and Service procedures for compliance with those regulations.

The public is encouraged to participate in this process by providing comments on the above or other items related to this program. The public's comments will be incorporated into the preparation of the environmental document.

Dated: August 16, 1989.

Richard N. Smith,

Acting Deputy Director.

BILLING CODE 4310-55-M

Bureau of Land Management

[ID–010–09–4212–14; IDI–9115; IDI–26611]

Realty Action; Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Termination of recreation and public purposes classification/notice of realty action, IDI–26611, direct sale of public land in Elmore County, Idaho.

SUMMARY: This order terminates a Bureau of Land Management classification affecting 60 acres of public land near Glenns Ferry, Idaho. After termination of the classification, the underlying lands (both surface and mineral estates) will immediately become available for disposal by sale pursuant to section 203 of the Federal Land Policy and Management Act of 1976 at the appraised fair market value.

The following public lands are involved in this action:

Boise Meridian, Idaho

T. 5 S., R. 10 E.,
  Sec. 21, E½SW¼NW¼, NW¼SW¼.
  Containing 60 acres.

By virtue of the authority vested in the Secretary of the Interior by the Recreation and Public Purposes Act of June 14, 1926, as amended (43 U.S.C. 869, 869–4), it is ordered as follows: Pursuant to the regulations in 43 CFR 2091.7–1(b)(1) and the authority delegated to me by BLM Manual Section 1203 (48 FR 85), the classification on the 60 acres of public land as suitable for recreation and public purposes under the Act of June 14, 1926, as amended (43 U.S.C. 869–4), under serial number IDI–9115, is hereby revoked. Upon termination of the classification the lands (both surface and mineral estates) will be sold under the authority of section 203 of the Federal Land Policy and Management Act to Elmore County.

The previously-described land has been examined and through land use planning and public input has been determined to be suitable for disposal by sale pursuant to section 203 of the Federal Land Policy and Management Act of 1976.

DATES: The sale offering will be held on October 31, 1989, at 10:00 a.m. If the parcel is not sold at that time, the sale will be cancelled.

The previously-described lands are hereby segregated from appropriation under the public land laws, including the mining laws, except section 203 of the Federal Land Policy and Management Act of 1976, for a period of 270 days or until patent is issued, whichever comes first.

For a period of 45 days from the date of publication of this notice in the Federal Register, interested parties may submit comments to the District Manager, Bureau of Land Management, at the address shown below.

ADDRESS: The sale offering will be held at the Boise District Office, Bureau of Land Management, 3948 Development Avenue, Boise, Idaho 83705.

FOR FURTHER INFORMATION CONTACT: Detailed information concerning the sale can be obtained by contacting John Thornburgh, Realty Specialist, at (208) 334–1306 or at the above address.

SUPPLEMENTARY INFORMATION: When patented, the lands will be subject to the following reservations:

1. Ditches and canals constructed by the authority of the United States, Act of August 30, 1890, 26 Stat. 391, 43 U.S.C. 945.

2. A perpetual right-of-way over and across a strip of land 30 feet wide along the existing road crossing the E½SW¼NW¼, section 21, T. 5 S., R 10 E., Boise Meridian, Idaho, for public access and use by the people of the United States generally.

3. Subject to those rights for an existing country road exercised under RS 2477 and noted under serial number IDI–20029.

This parcel is being offered directly to Elmore County based on historical use, adjacent land use, and value added by them to the land. Failure of the proponent to purchase the land on the date of the sale will result in cancellation of the sale, and the lands will be withdrawn from sale and will continue under management by the Bureau of Land Management.

The offer to purchase will be at fair market value and will constitute an application to purchase the mineral estate. A 30 percent (30%) deposit must accompany the offer. An additional $50 non-returnable mineral conveyance processing fee is required. The filing fee and deposit must be paid by certified check, money order, bank draft or cashier's check. The offer will be rejected if accompanied by payment other than as listed above.

The remainder of the full price shall be paid within 180 days of the date of the sale. Failure to pay the full price within the 180 days shall disqualify the purchaser and cause the deposit to be forfeited to the BLM.

Objections to this Notice of Realty Action will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

Dated: August 21, 1989.

Rodger E. Schmitt,

Associate District Manager.

National Park Service

Draft Legislative Environmental Impact Statement on the Exchange of Land Interests in Gates of the Arctic Preserve, AK

AGENCY: National Park Service, Interior.

ACTION: Delay in availability of draft environmental impact statement.

SUMMARY: The Notice of Intent for the Draft Legislative Environmental Impact Statement on the Exchange of Land Interests in Gates of the Arctic National Park and Preserve, Federal Register, Vol. 54, No. 15, Wednesday, January 15, 1989, stated that the draft statement would be available for public review by June 1989.

As a result of a change in the schedule for preparation of this document, it will

not be available for public review until the fall of 1989. Issuance of final document is anticipated by January 1990.

FOR FURTHER INFORMATION CONTACT: Paul Haertel, Associate Regional Director, Resource Services, National Park Service, 2525 Gambell Street, Room 107, Anchorage, Alaska 99503–2892. Telephone: (907) 257–2684.

Dated: August 22, 1989.

James W. Stewart,

Assistant Director, Planning.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31517]

Chattanooga & Chickamauga Railway Co.; Lease and Operation of Railroad Lines and Property of Central of Georgia Railroad Co., et. al.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Exemption.

SUMMARY: Pursuant to 49 U.S.C. 10505, the Interstate Commerce Commission exempts Chattanooga & Chickamauga Railway Co. from the prior approval requirements of 49 U.S.C. 11343, *et seq.*, for the lease and operation of two lines of railroad and rail-related property known as the Lyerly and Hedges Lines, which are presently owned and operated by rail subsidiaries of the Norfolk Southern Corporation. These lines run between Chattanooga, TN, on the one hand, and, Lyerly and Hedges, GA, on the other. The exemption is subject to employee protective conditions and an Historic Preservation Act condition.

DATES: This exemption is effective on September 7, 1989. Petitions for reconsideration must be filed by September 22, 1989.

ADDRESSES: Send pleadings referring to Finance Docket No. 31517 to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

(2) Petitioners' representatives: Lester A. Sittler, P.O. Box 128, 137 Main Street, Cooperstown, NY 13326.

and

Mark D. Perreault, Norfolk Southern Corporation, Three Commercial Place, Norfolk, VA 23510.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 275–7245. [TDD for hearing impaired: (202 275–1721).]

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To obtain a copy of the full decision, write to, call, or pick up in person from: Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289–4357/4359. (Assistance for the hearing impaired is available through TDD services (202) 275–1721.)

Decided: August 18, 1989.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Andre, Lamboley, and Phillips.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

[Docket No. AB–55 (Sub-No. 193)]

CSX Transportation, Inc.; Abandonment of Railroad Line in Vermilion County, IL; Findings

The Commission has issued a certificate authorizing CSX Transportation, Inc., to abandon its 5.93-mile line of railroad between Collison (milepost ZE 120.05) and Brothers (milepost ZE 125.98) in Vermilion County, IL.

The abandonment certificate will become effective 30 days after this publication unless the Commission also finds that: (1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and the applicant no later than 10 days from publication of this Notice. The following notation shall be typed in bold face on the lower left-hand corner of the envelope containing the offer: "Rail Section, AB'OFA." Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.

Decided: August 18, 1989.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners André, Lamboley, and Phillips.

Noreta R. McGee,

Secretary.

DEPARTMENT OF LABOR

Office of the Secretary

Renewal; Child Labor Advisory Committee

Notice is given that after consultation with the General Services Administration (GSA), it has been determined that the Child Labor Advisory Committee whose charter expires August 5, 1989, is hereby renewed for the period August 5, 1989 to August 5, 1991. This action is necessary and in the public interest.

The Committee will advise the Secretary of Labor on the effective administration of the child labor provisions of the Fair Labor Standards Act.

Committee membership is designed to insure that all major groups affected by the Acts and the regulations issued thereunder are represented. The Committee shall consist of 21 members, appointed by the Secretary of Labor, and shall include representatives from such fields as child advocacy groups, employers, unions, the education community, civic organizations, State officials, child guidance professionals, and safety groups.

The members are selected on the basis of their expertise and serve in their individual capacities, not as representatives of their organizations.

The Committee will function solely as an advisory body and in compliance

with the provisions of the Federal Advisory Committee Act. The charter will be filed with GSA and the appropriate Congressional Committee.

Further information may be obtained from: Paula V. Smith, Administrator, Wage and Hour Division, Department of Labor, Room S3502, 200 Constitution Avenue, NW., Washington, DC 20210; telephone: (202) 523–8305.

Signed at Washington, DC, this 22nd day of August 1989.

Elizabeth Dole

Secretary of Labor.

[FR Doc. 89–20209 Filed 8–25–89; 8:45 am]

BILLING CODE 4510-27-M

State Research Advisory Committee on Occupational Safety and Health Statistics; Establishment

In accordance with the provisions of the Federal Advisory Committee Act, and after consultation with the General Services Administration, the Secretary of Labor has determined that the establishment of the State Research Advisory Committee to the Bureau of Labor Statistics (BLS) on Occupational Safety and Health Statistics is in the public interest in connection with the performance of duties imposed on the Department of Labor by the Occupational Safety and Health Act of 1970 (29 USC 651). The Committee will advise the Commissioner for the Bureau of Labor Statistics on the broader aspects of proposals for the redesign of the Bureau's occupational safety and health program, including developmental as well as implementational facets.

The Committee will consist of one representative from each State, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, and Guam. A Chairperson will be selected from the membership by the Commissioner for the Bureau of Labor Statistics and appointed by the Secretary of Labor. Nominations for Committee representatives will be made by each jurisdiction and forwarded to the BLS Regional Commissioner for the BLS regional office serving each jurisdiction.

The Committee will function solely as an advisory body and in compliance with the provisions of the Federal Advisory Committee Act; its charter will be filed under the Act 15 days from the date of this publication.

Interested persons are invited to submit comments regarding the establishment of the State Research Advisory Committee on Occupational Safety and Health Statistics to the Bureau of Labor Statistics. Such comments should be addressed to William M. Eisenberg, Assistant Commissioner for Occupational Safety, Health and Working Conditions, Bureau of Labor Statistics, Department of Labor, Room 4014, Patrick Henry Building, 601 D Street, NW., Washington, DC 20212, telephone: 202—272–3487.

Signed at Washington, DC this 22nd day of August 1989.

Elizabeth Dole,

Secretary of Labor.

LEGAL SERVICES CORPORATION

Request for Comments on a Grant Award to the Drake University Law School Legal Clinic

AGENCY: Legal Services Corporation.

ACTION: The Legal Services Corporation (LSC) announces its intention to award a one-time, non-recurring grant of $45,000 in fiscal year 1989 to the Drake University Law School Legal Clinic and its Dispute Resolution Resource Center. The purpose for making this grant is to provide mediation services in civil and small claims cases pending in the Polk County courts, and matters referred by the Legal Aid Society of Polk County. These services will be provided to client eligible residents residing in or near Polk County, Iowa.

DATE: All comments and recommendations must be received by the Office of Field Services of LSC on or before September 27, 1989.

FOR FURTHER INFORMATION CONTACT: Victoria O'Brien, Counsel to the Director or Charles T. Moses, Associate Director, Office of Field Services, Legal Services Corporation, 400 Virginia Ave., SW., Washington, DC 20024–2751, (202) 863–1837.

SUPPLEMENTARY INFORMATION: The Legal Services Corporation is the national independent organization charged with implementing the federally funded system of legal services for low-income people. It hereby announces its intention to award a grant in the amount of $45,000 to the Drake University Law School Legal Clinic and its Dispute Resolution Resource Center. This grant is to finance the provision of mediation services by licensed attorneys to the eligible client population residing in or near Polk County, Iowa.

It is anticipated that the twelve-month term of this grant will extend from September 28, 1989 to September 27, 1990.

Interested persons are invited to submit written comments and/or recommendations concerning the above to Victoria O'Brien or Charles T. Moses.

Dated: August 23, 1989.

Ellen J. Smead,

Acting Director, Office of Field Services.

[FR Doc. 89–20223 Filed 8–25–89; 8:45 am]

BILLING CODE 7050-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–341; FERMI–2]

Detroit Edison Co. and Wolverine Power Supply Cooperative, Inc.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–43, issued to the Detroit Edison Company (DECo) and the Wolverine Power Supply Cooperative, Incorporated (the licensees) for the operation of Fermi–2 located in Monroe County, Michigan.

Environmental Assessment

Identification of Proposed Action

The proposed amendment would revise the Technical Specifications (TS) to reflect modifications which are to be made to the actuation logic for the Automatic Depressurization System (ADS). The ADS will be modified in accordance with Three Mile Island Action Plan, Item II.K.3.16 of NUREG–0737.

The proposed action is in accordance with the licensees' application for amendment dated April 3, 1989.

The Need for the Proposed Action

The proposed changes to the TS are required in order include appropriate requirements in regards to the as-modified ADS design as required by NUREG–0737.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed revision to the TS. The proposed revision would revise TS 3/4.3.3, "Emergency Core Cooling System Actuation Instrumentation," Tables 3.3.3–1, –2 and –3 and Table 4.3.3–1 to include the addition of drywell pressure-high bypass timers and manual inhibit switches, which are being added to the ADS design. The drywell pressure-high bypass timer functions to provide automatic initiation of ADS for postulated events which currently rely on manual initiation of ADS to prevent core damage. The manual inhibit switches provide a means for the operator to inhibit ADS initiation through a single action when called for by the plant emergency procedures. Currently, a sequence of actions is required to manually inhibit ADS. Administrative changes are proposed to be made to other TS tables and ACTIONS to be consistent with the above changes. Therefore, the proposed changes do not increase the probability or consequences of any accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that this proposed action would result in no significant radiological impact and could result in the reduction of the radiological impacts.

With regard to potential nonradiological impacts, the proposed changes to the TS involve systems located within the restricted area as defined in 10 CFR Part 20. They do not affect nonradiological plant effluents and have no other environmental impact. Therefore, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed amendment.

Alternative to the Proposed Action

Because the Commission has concluded that there is no significant environmental impact associated with the proposed amendment, any alternative would have either no or greater environmental impact. The principal alternative would be to deny the requested amendment. This would result in the TS not correctly reflecting all of the requirements needed for complete operability of the ADS.

Alternative Use of Resources

This action involves no use of resources not previously considered in connection with the "Final Environmental Statement Related to Operation of Fermi-2," dated August 1981.

Agencies and Persons Consulted

The Commission's staff reviewed the licensees' request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environment impact statement for the proposed license amendment.

Based upon the foregoing environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment.

The Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on July 13, 1989 (54 FR 29662). No request for hearing or petition for leave to intervene was filed following this notice.

For further details with respect to this action, see the application for amendment dated April 3, 1989, which is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, and at the Monroe County Library System, 3700 South Custer Road, Monroe, Michigan 48161.

Dated at Rockville, Maryland, this 22nd of August 1989.

For the Nuclear Regulatory Commission.

John O. Thoma,

Acting Director, Project Directorate III-1, Division of Reactor Projects—III, IV, V & Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 89-20229 Filed 8-25-89; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-282 and 50-306]

Northern States Power Co., Prairie Island Nuclear Generating Plant, Unit Nos. 1 and 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating Licenses Nos. DPR-42 and DPR-60, issued to Northern States Power Company (licensee), for operation of the Prairie Island Nuclear Generating Plant, Unit Nos. 1 and 2, located in Goodhue County, Minnesota.

Environmental Assessment.

Identification of the Proposed Action

The proposed amendments would revise Technical Specifications modifying the pressure-temperature limits taking into consideration the irradiation effects of the embrittlement of the reactor vessel material up to 20 effective full power years. Other modifications are administrative in nature serving to clarify the existing requirements.

The proposed action is in accordance with the licensee's application for amendment dated January 12, 1989.

The Need for the Proposed Action

The proposed changes to the Technical Specifications are required in order to meet the requirements of Appendices G and H to 10 CFR part 50 describing specific requirements for fracture toughness and the reactor vessel material surveillance for establishing pressure/temperature limits for the operation of the reactor coolant system. Other minor administrative changes are necessary to clarify and eliminate any possible ambiguity in the interpretation of the Technical Specifications.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed revisions to the licenses. The proposed revisions would change the pressure-temperature limits for the reactor coolant system and clarify existing requirements involving operation of safety injection pumps, minimum pressurization temperature (MPT) and the description of the steam generator and the pressurizer pressure-temperature limits. The proposed changes would in no way result in increasing the dose to the general public as referenced in the Final Environmental Statements regarding pathways from gaseous or liquid effluents. Collective doses are expected to remain the same as previously analyzed and are very unlikely to pose a significant impact on the quality of the human environment.

With regard to potential non-radiological impacts, the proposed change involves facilities located entirely within the restricted area as defined in the 10 CFR part 20, 10 CFR 51.31, and Regulatory Guide 8.8. It does not affect non-radiological plant effluents and has no other environmental impact, Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed amendment.

The Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on June 8, 1989 (54 FR 24609). No request for hearing or petition for leave to intervene was filed following this notice.

Alternative to the Proposed Action

Since the staff concluded that there are no significant environmental effects that would result from the proposed action, any alternative with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendment. This would not reduce environmental impacts of plant operation and would result in reduced operational flexibility.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statements related to the Prairie Island Nuclear Generating Plant, Unit Nos. 1 and 2 dated May 1973.

Agencies and Persons Contacted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed license amendment.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for amendment dated January 12, 1989, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, N.W., Washington, D.C., and the Technology and Science Department, Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota 55401.

Dated at Rockville, Maryland this 16th day of August 1989.

For the Nuclear Regulatory Commission.

Dominic C. DiIanni,

Acting Director, Project Directorate III—1, Division of Reactor Projects—III, IV, V & Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 89-20228 Filed 8-25-89; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-282 and 50-306]

Northern States Power Co., Prairie Island Nuclear Generating Plant, Unit Nos. 1 and 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating Licenses Nos. DPR-42 and DPR-60, issued to Northern States Power Company (licensee), for operation of the Prairie Island Nuclear Generating Plant, Units Nos. 1 and 2, located in Goodhue County, Minnesota.

Environmental Assessment

Identification of the Proposed Action

The proposed amendments would revise the provisions in the Technical Specifications relating to fuel enrichment.

The proposed action is in accordance with the licensee's application for amendment dated April 6, 1989.

The Need for the Proposed Action

The proposed changes to the Technical Specifications are required so that the licensee can use higher enrichment fuel, and provide the flexibility of extending the fuel irradiation and permitting operation of longer fuel cycles.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed revisions to the Technical Specifications. The proposed revisions would permit use of fuel enriched to 4.25 weight percent Uranium-235. The safety considerations associated with reactor operation with higher enrichment have been evaluated by the NRC staff. The staff has concluded that such a change would not adversely affect plant safety. The proposed changes have no adverse effect on the probability of any accident. The increased enrichment may slightly change the mix of fission products that might be released in the event of serious accident but such small changes would not significantly affect the consequences of serious accidents. No changes are being made in the types or amounts of any radiological effluents that may be released offsite during normal operation. There is also no significant increase in the allowable individual of cumulative occupational radiation exposure.

With regard to potential nonradiological impacts of reactor operation with higher enrichment, the proposed changes to the Technical Specifications involve systems located within the restricted area as defined in 10 CFR Part 20. They do not affect nonradiological plant effluents and have no other environmental impact.

The environmental impacts of transportation resulting from the use of higher enrichment fuel have been discussed in the staff assessment entitled, "NRC Assessment of the Environmental Effects of Transportation Resulting from Extended Full Enrichment and Irradiation," dated July 7, 1988 (53 FR 30355). As indicated therein, the environmental cost contribution of the proposed increase in the fuel enrichment is either unchanged or may in fact be reduced from those summarized in Table S-4 as set forth in 10 CFR 51.52(c).

Therefore, the staff concludes that there are no significant radiological or nonradiological environmental impacts associated with the proposed amendment.

Alternative to the Proposed Action

Since the staff concluded that there are no significant environmental effects that would result from the proposed action, any alternative with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendment. This would not reduce environmental impacts of plant operation and would result in reduced operational flexibility.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statements related to the Prairie Island Nuclear Generating Plant, Unit Nos. 1 and 2, dated May 1973.

Agencies and Persons Contacted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed license amendments.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for amendments dated April 6, 1989, which is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, and the Technology and Science Department, Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota 55401.

Dated at Rockville, Maryland this 16th day of August, 1989.

For the Nuclear Regulatory Commission.

Dominic C. DiIanni,

Acting Director, Project Directorate III-1, Division of Reactor Projects—III, IV, V & Special Projects, Office of Nuclear Reactor Regulation.

Firearms and Explosives Recognition and Detection; Training Symposium

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of training symposium.

SUMMARY: The Nuclear Regulatory Commission (NRC) will sponsor a three-day training symposium for its staff and interested licensees on the topic: "Meeting the Challenge-Firearms and Explosives Recognition and Detection."

DATES: November 28, 29, and 30, 1989.

ADDRESS: Hyatt Regency Bethesda, One Bethesda Metro Center, Bethesda, Maryland 20814.

FOR FURTHER INFORMATION CONTACT: Priscilla A. Dwyer, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Telephone (301) 492-0478.

SUPPLEMENTARY INFORMATION: This symposium is being sponsored by the Division of Safeguards and Transportation, Office of Nuclear Material and Safety and Safeguards. Its purpose is to provide to NRC staff and interested licensees information about state-of-the-art firearms and explosives technologies, methods of detection and events involving firearms and explosives. The symposium is being planned as part of a new initiative to foster technology exchange among NRC staff, NRC licensees, and the Federal community. The decision to sponsor the symposium at this time is not reflective of a change in the domestic threat environment. The symposium will be unclassified.

Based upon the training nature of the symposium and possible seating limitations which may occur based upon response, the NRC plans to use the following order of priority in approving registrants for participation in the symposium. Attendance will be limited to approximately 400.

1. NRC personnel directly engaged in the development of physical security regulations, inspection or licensing of NRC licensees required to have search capabilities.
2. Support staff of instructional personnel.
3. Personnel of NRC licensees who perform, provide training in, or establish policy for physical security searches.
4. Persons who, as agents of NRC licensees, formulate or develop licensee policy on physical security searches.
5. Personnel from other government agencies with on going programs directly related to firearms and explosives recognition and detection.
6. Other personnel desiring to participate in the training symposium.

Registration information, which is presently under development, will be made available to prospective attendees later this year. At this time it is anticipated that a registration fee in the neighborhood of $150.00 will be charged to nongovernment attendees. All attendees will be required to pre-register. There will be no registration at the training symposium.

Dated at Rockville, Maryland, this 21st day of August 1989.

For the Nuclear Regulatory Commission.

Guy A. Arlotto,

Acting Director, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590-01-M

[Docket Nos. 50-603 and 50-604; License Nos. CPEP-1 and CPEP-2]

All Chemical Isotope Enrichment, Inc.; Order Modifying Licenses and Order To Show Cause Why Licenses Should Not Be Revoked

All Chemical Isotope Enrichment, Inc. (AlChemIE or licensee), Pine Ridge Office Park, Suite 202-B, 702 Illinois Avenue, Oak Ridge, TN 37380, is the holder of Construction Permits (licenses) numbered CPEP-1 and CPEP-2, issued by the Nuclear Regulatory Commission (NRC) pursuant to 10 CFR part 50. Construction Permit No. CPEP-1 was issued on February 10, 1989, and was amended on June 20, 1989, to extend its latest date for completion to November 3, 1989. Construction Permit No. CPEP-2 was issued on February 10, 1989, and has a latest date for completion of March 31, 1992.

Construction Permit No. CPEP-1 authorizes the modification of the existing Centrifuge Plant Demonstration Facility (CPDF) at the U.S. Department of Energy's (DOE) Oak Ridge Gaseous Diffusion Plant. Specifically, CPEP-1 also authorizes the licensee to acquire ownership of and take possession of security-classified gas centrifuge machines and associated classified equipment capable of enriching uranium, to transport the equipment as necessary, and to conduct, in the CPDF, tests using up to two gas centrifuge machines. CPEP-1 also provides for the implementation of security and safeguards measures at CPDF and modification of that facility to enrich stable isotopes. Construction Permit No. CPEP-1 also authorizes the licensee to possess uranium as calibration sources and as contamination on the machines.

Construction Permit No. CPEP-2 authorizes the licensee to construct in Oliver Springs, Tennessee, a new facility for the enrichment of stable isotopes, and to possess uranium as calibration sources and as contamination on gas centrifuge machines and associated equipment brought from the Department of Energy's Gas Centrifuge Enrichment Plant (GCEP). To date no construction activities have been undertaken pursuant to Construction Permit No. CPEP-2.

II

The licensee's proposed enrichment of stable isotopes would utilize classified gas centrifuge equipment. Specifically, this gas centrifuge equipment has been tested by the DOE and has been shown to be capable of producing special nuclear material in the form of enriched uranium in such quantity as to be of significance to the common defense and security. Consequently, this equipment is a production facility which must be licensed in accordance with the Atomic Energy Act of 1954, as amended (Act) (see sections 11v, 101, and 103).

Section 103 production facilities are licensed pursuant to 10 CFR part 50. Under 10 CFR part 50, the applicant for a license is required to submit information showing that it is financially qualified to carry out, in accordance with the Commission's regulations, the activities for which the license is sought. In judging the adequacy of an application, the Commission must find, *inter alia*, that the applicant is financially qualified, and that the issuance of a license will not be inimical to the common defense and security. As described in the **Federal Register** Notice of the construction permit proceeding on this licensing action for CPEP-1 and CPEP-2 (52 FR 15315, April 28, 1988), one of the issues in this construction permit licensing proceeding was whether the applicant (now licensee) is technically and financially qualified to modify and construct the proposed facilities in such a way as to assure adequate protection of the common defense and security.

In that proceeding, the licensee provided written evidence and testimony in hearings of the Atomic Safety and Licensing Board. Based upon that information, the staff found that the licensee was technically and financially qualified to modify the existing CPDF facility in such a way as to assure adequate protection of the common defense and security; this finding appears in Construction Permit CPEP-1. A similar process led to a similar finding

regarding construction of the proposed facility in Construction Permit CPEP-2.

Since issuance of the construction permits, certain events and information materially affect the findings and conclusions required for issuance of the construction permits. A letter of June 14, 1989, from Elbert M. Cooper, Jr., attorney for the Anderson County Bank, (Bank), to AlChemIE, asserts that AlChemIE has certain loans with the Anderson County Bank, which loans were due and payable in full on November 4, 1988. Further, it is asserted in the letter that the notes were seven months delinquent on June 4, 1989. Contrary to these assertions, the licensee's submittals to the NRC staff and the Licensing Board of November 11, 1988, December 19, 1988, and January 4, 9, and 17, 1989, consistently presented an optimistic picture of, *inter alia*, its ability to obtain bank loans. Specifically, AlChemIE failed to notify the staff or the Licensing Board that its loans with the Bank were delinquent during the period of the licensing review.

By letter dated June 28, 1989, AlChemIE notified the Commission that, for protection from creditors, AlChemIE had filed for reorganization in the United States Bankruptcy Court for the Eastern District of Tennessee (Case #89-01095RS-11A). Pursuant to 10 CFR 50.54(f), in a letter dated July 17, 1989, the Director, Office of Nuclear Material Safety and Safeguards, required AlChemIE to provide in writing, by August 15, 1989, under oath or affirmation, answers to the request for information which was attached to the letter as Enclosure 1. The information was required for purposes of determining whether or not AlChemIE is currently in compliance with the licensing basis for Construction Permits Nos. CPEP-1 and CPEP-2. On August 15, 1989, documents were received from AlChemIE in response to that request for information. Based upon our review of these documents, AlChemIE has not demonstrated that it is financially qualified to conduct the activities under its license.

By letter of August 11, 1989, DOE advised AlChemIE that the Sales Agreement, (Contract No. DE-R005-880R21776 titled "Centrifuge Equipment Agreement and Bill of Sale," dated November 20, 1987), between DOE and AlChemIE for, *inter alia*, transfer to AlChemIE of gas centrifuge machines at DOE's Gas Centrifuge Enrichment Plant, was to expire on August 15, 1989, and would not be extended by DOE. DOE indicated that its decision not to extend the Sales Agreement was "based substantially on the continuing failure of AlChemIE to meet contractual commitments to the DOE, and the clear indication that AlChemIE is in no position now or in the foreseeable future to meet those commitments." Finally, DOE stated, "[i]n addition to not extending the Sales Agreement with AlChemIE, the DOE will discontinue discussions with AlChemIE on the sale of centrifuge equipment contained in and the lease of the Centrifuge Plant Demonstration Facility located at the Oak Ridge Gaseous Diffusion Plant."

III

Based on the above, it appears that the licensee failed to fully and accurately disclose to the staff or the Licensing Board its true financial condition during the licensing review period when it was presenting documents and testimony before the Board. The apparently incomplete and inaccurate information which the licensee did provide led the Staff to find that the licensee was financially qualified to modify and construct the facilities in such a way as to assure adequate protection of the common defense and security, and to issue Construction Permits Nos. CPEP-1 and CPEP-2. Had the staff known the licensee's true financial condition, the staff would not have issued construction permits to AlChemIE.

The NRC must be able to rely on its licensees to provide complete and accurate information. Section 50.9(a) of 10 CFR part 50 specifies that information provided to the Commission shall be complete and accurate in all material respects. Section 186 of the Act provides for revocation of any license for any material false statement in the application or upon obtaining other information which would warrant the Commission to refuse to grant a license on an original application. The licensee's disregard of the Commission's need for complete and accurate information in this instance cannot and will not be tolerated.

Furthermore, the issuance of the construction permits to AlChemIE was based upon the license taking possession of the classified gas centrifuge equipment under the terms of the Sales Agreement. AlChemIE has failed to take possession of the equipment and, based upon DOE's decision not to extend the said Sales Agreement, has no further opportunity to take possession. Without possession of the gas centrifuge machines, the projected activities for which AlChemIE sought licenses cannot occur. Thus, there is no longer any purpose for Construction Permits CPEP-1 and CPEP-2.

For all the above reasons and because I find that I lack the requisite reasonable assurance that the licensee can proceed with operations under Construction Permits Nos. CPEP-1 and CPEP-2 in compliance with the Commission's regulations and in such a way that there will be adequate protection of the common defense and security, I have determined that Construction Permits Nos. CPEP-1 and CPEP-2 should be modified to require notice to the Commission prior to licensee's taking possession of classified equipment. Furthermore, pursuant to 10 CFR 2.201(c) and 2.204, I find that the public interest requires that this Order Modifying Licenses be immediately effective and that no prior notice is required.

IV

Accordingly, pursuant to sections 103, 161b, 161c, 161i, 161o, 182 and 186 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.204 and 10 CFR Part 50, *it is hereby ordered*, effective immediately, That construction permits Nos. CPEP-1 and CPEP-2 are modified as follows:

As Condition III.12 in CPEP-1 and as Condition III.11 in CPEP-2 is added the following:

> Licensee shall notify in writing the Director, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555 and the Regional Administrator, NRC Region II, 101 Marietta Street, NW. Suite 2900, Atlanta, GA 30323, at least 30 days before taking possession of any classified equipment.

V

It is Further ordered, that licensee show cause why construction permits Nos. CPEP-1 and CPEP-2 should not be revoked. Pursuant to 10 CFR 2.202(b), the licnesee may show cause why its licenses should not have been modified and why its licnese should not be revoked, by filing a written answer under oath or affirmation within 20 days after the date of issuance of this Order, setting forth the matters of fact and law on which the licensee relies. The licensee may answer this Order, as provided in 10 CFR 2.202(d), by consenting to the provisions specified in section IV above.

VI

Pursuant to 10 CFR 2.202(b), the licensee may, in its answer filed under section V, request a hearing. The licensee or any other person adversely affected by this Order may request a hearing within 20 days of its issuance. Any answer to this Order or any request for hearing shall be submitted to the

Director, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies also shall be sent to the Assistant General Cousel for Hearings and Enforcement at the same address and to the Regional Administrator, NRC Region II, 101 Marietta Street, NW, Suite 2900, Atlanta, GA 30323. If a person other than the licensee requests a hearing, that person shall set forth with particularity the manner in which his interest is adversely affected by this Order and shall address the criteria set forth in 10 CFR 2.714(d). Upon the licensee's consent to the provisions set forth in section IV of this Order, or upon failure of the licensee to file and answer within the specified time, and in the absence of any other request for a hearing, the provisions specified in section IV above shall be final without further Order or proceedings. An answer under section V or A request for hearing under section VI of this order shall not stay the immediate effectiveness of this order. Upon the failure of the licensee to file an answer within the specified time, and in the absence of any other request for a hearing, Construction Permits CPEP–1 and CPEP–2 are revoked and this action shall be final without further Order or proceeding.

If a hearing is requested by the licensee or a person whose interest is adversely affected, the Commission will issue an Order designating the time and place of any hearing. If a hearing is held, the issue to be considered at such hearing shall be whether this Order should be sustained.

Dated at Rockville, Maryland this 8th day of August, 1989.

For the Nuclear Regulatory Commission.

Hugh L. Thompson, Jr.,

Deputy Executive Director for Nuclear Materials Safety, Safeguards, and Operations Support.

[FR Doc. 89–20230 Filed 8–25–89; 8:45 am]

BILLING CODE 7590-01-M

[Docket No 50–254 and 50–265]

Commonwealth Edison Co., Quad Cities Nuclear Power Station, Unit Nos. 1 and 2; Exemption

I

The Commonwealth Edison Company (CECo, the licensee) is the holder of Operating License No. DPR–29 which authorizes operation of Quad Cities Nuclear Power Station (QCNPS) Unit 1, and Operating License No. DPR–30 which authorizes operation of Unit 2. These licenses provide, among other things, that QCNPS Units 1 and 2 are subject to all rules, regulations, and Orders of the Commission now or hereafter in effect.

The station is comprised of two boiling water reactors at the licensee's site located in Rock Island County, Illinois.

II

On November 19, 1980, the Commission published revised § 50.48, "Fire Protection," and a new Appendix R to 10 CFR part 50, "Fire Protection Program for Nuclear Power Facilities Operating Prior to January 1, 1979," regarding fire protection features of nuclear power plants requried to satisfy the General Design Criterion related to fire protection (Criterion 3, Appendix A to 10 CFR part 50). The revised § 50.48 and Appendix R became self-evaluation, CECo submitted additional letters dated December 4, 1985, June 25, 1986 and July 22, 1986, September 30, October 1, and November 23, 1987. These letters modified and withdrew some previous exemption requests and proposed other exemption requests from section III.G.

Concurrent with these subsequent submittals, in response to Commission inquiries on issues concerning high impedance faults and electrical isolation deficiencies that surfaced during review of the original December 18, 1984 letter, CECo submitted further exemption requests by letters dated January 12, 1987, September 30, 1987 (different letter than as above), October 1, 1987 (same letter as above), November 20, 1987, November 23, 1987 and November 30, 1987. These letters specifically requested approval for exemptions from Subsection III.G.1, to allow manual operations, including hot shutdown repairs (i.e. pulling and/or replacing fuses), for achieving and maintaining hot shutdown which would resolve the Commissions concerns and preclude other problems associated with fire-induced spurious actuations.

On December 1 (Hot Shutdown Repairs) and December 11 (Fire Protection) of 1987, the NRC issued Safety Evaluation Reports (SER) approving all exemptions from Appendix R Section III.G requested by CECo except for those identified by CECo in applications dated September 30, October 1, and November 23, 1987 (these exemption requests are still under NRC review). By letter dated February 19, 1988, CECo provided unsolicited comments to the aforementioned SERs and requested that some specific changes be made in them to improve accuracy and clarity. Consequently, the NRC reissued revised SERs dated April 20 and July 21, 1988 (respectively).

The following is a list of the exemptions from Appendix R, section III.G requested by CECo, with a brief description. Detailed descriptions of these exemption requests and of the NRC staff's evaluation are contained in the previously mentioned CECo and NRC documents, which are located in the Public document Room.

(1) Turbine Building Northern and Southern Zone Groups (Fire Areas TB–I and TB–III) to the extent that manual operations (including hot shutdown repairs) disallowed by section III.G.1 are necessary to prevent spurious operations and high impedance faults of safe shutdown equipment.

(2) Control power circuits for Diesel Generators and certain 480V breakers to the extent that hot shutdown repairs disallowed by section III.G.1 are required to compensate for fire induced electrical isolation design deficiencies.

(3) Unit 1 Reactor Building (Fire Zones 1.1.1.2, 11.2.2, 1.1.1.1S—Torus South, 1.1.1.1N—Torus North) and Unit 2 Reactor Building (Fire Zones 1.1.2.2, 11.3.2, 1.1.2.1S—Torus South, and 1.1.2.1N Torus North) to the extent that complete 3-hour fire rated barriers pursuant to Section III.G.2.a are not provided.

(4) Unit 1 Reactor/Turbine Building Interface Boundary and Unit 2 Reactor/Turbine Building Interface Boundary to the extent that 3-hour fire rated barriers pursuant to section III.G.2.a are not provided.

(5) Unit 1 Reactor Building (Fire Zones 1.1.1.1, 1.1.1.2, 1.1.1.3, 1.1.1.4, 1.1.1.5, 1.1.1.6, 11.1.3, 11.2.1, 11.2.2, 11.2.3, and 11.2.4) and Unit 2 Reactor Building (Fire Zones 1.1.2.1, 1.1.2.2, 1.1.2.3, 1.1.2.4, 1.1.2.5, 11.1.4, 11.3.1, 11.3.2, 11.3.3, and 11.3.4) to the extent that automatic fire detection and fixed fire suppression systems pursuant to section III.G.3 are not provided.

(6) Units 1 and 2 Control Room (Fire Zone 2.0), Units 1 and 2 Auxiliary Computer Room, and Unit 1 and 2 Auxiliary Electric Equipment Room (Fire Zone 6.3) to the extent that a fixed fire suppression pursuant to section III.G is not provided.

(7) 4–KV Bus Duct Penetrations to the extent that complete 3-hour fire rated barriers pursuant to section III.G.2.a are not provided.

(8) Standby Gas Treatment System and the Reactor Building Vent System Piping Penetrations to the extent that a complete 3-hour fire rated barrier pursuant to section III.G.2.a are not provided.

(9) Drywell Expansion Gap in Units 1 and 2 to the extent that automatic fire detection and fixed fire suppression systems pursuant to section III.G.3 are not installed.

(10) Units 1 and 2 Turbine Building Southern and Central Zone Groups to the extent that a complete 3-hour fire rated barrier pursuant to section III.G.2.a is not provided.

(11) Units 1 and 2 Turbine Building Southern and Northern Zone Groups to the extent that a complete 3-hour fire rated barrier pursuant to section III.G.2.a is not provided.

(12) Turbine Building Operating Floor (Fire Zones 8.2.8.A, 8.2.8.B, 8.2.8.C, 8.2.8.D, and 8.2.8.E) to the extent that complete 3-hour fire rated barriers pursuant to section III.G.2.a are not provided.

(13) Watertight Door (Fire Zone 11.1.1.B) to the extent that a complete 3-hour fire rated barrier pursuant to section III.G.2.a is not provided.

(14) Northern/Central Zone Groups and Fire Zone 8.2.8.D to the extent that a complete 3-hour fire rated barrier pursuant to section III.G.2.a is not provided.

The NRC did not evaluate CECo's exemption request from III.G. 3 for the Turbine Building (Northern and Central Zone Group, and Operating Floor) and Southern/Northern Zone Groups (Fire Zones 8.2.1.A, 11.1.1.A, and 8.2.7.D) because exemptions are not required per the guidance contained in Generic Letter 86–10.

IV

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, these exemptions (listed above) are authorized by law, will not present an undue risk to the public health and safety, and are consistent with the common defense and security. The Commission further determines that special circumstances, as provided in 10 CFR 50.12(a)(2)(ii), are present to justify granting the exemptions; namely, that application of the regulation in these particular circumstances is not necessary to achieve the underlying purpose of the rule. In general, the underlying purpose of the rule is to accomplish safe shutdown in the event of a single fire and maintain the plant in a safe shutdown condition. This is accomplished by assuring that sufficient undamaged equipment is available to support safe shutdown assuming a fire within the area of concern. In the areas for which an exemption is being requested, passive as well as active fire protection features assure that any single fire will not result in the loss of safe shutdown capability. These features include manual actions, automatic suppression, and early detection of fires in their incipient stages. The fire protection features, in conjunction with low combustible loadings, provide a high degree of assurance that a single fire will not result in loss of safe shutdown capability. In addition, the special circumstances of 10 CFR 50.12(a)(2)(iii) apply in that compliance would result in costs that are significantly in excess of those contemplated when the regulation was adopted. Providing additional protection features, as would be required to meet the regulations, would not result in a significant increase in the level of protection and would result in undue costs and resource expenditures for the licensee in additional engineering, procurement of materials, fabrication, and installation. Accordingly, the Commission hereby grants exemptions for the conditions listed in section III above.

Pursuant to 10 CFR 51.32, the Commission has determined that granting these exemptions will have no significant impact on the environment as published in the Federal Register on July 31, 1989 (54 FR 31599).

This exemption is effective upon issuance.

Dated at Rockville, Maryland this 18th day of August, 1989.

For the Nuclear Regulatory Commission.

Gary M. Holahan,

Acting Director, Division of Reactor Projects III, IV, V, and Special Projects Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket No. 50–155]

Consumers Power Co.; Issuance of Amendments to Facility Operating License

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 100 to Facility Operating License No. DPR–6, issued to Consumers Power Company (the licensee), which revised the Technical Specifications (TSs) for operation of the Big Rock Point Plant (the facility), located in Charlevoix County, Michigan. The amendment is effective as of the date of issuance.

This amendment modified the Technical Specifications sections 6.2 and 6.5 to reflect the replacement of the Nuclear Safety Board (NSB) with the Nuclear Safety Services Department (NSSD) and the elimination of the Independent Safety Engineering Group (ISEG).

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the Federal Register on March 29, 1989 (54 FR 12977). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to the action and has determined not to prepare an environmental impact statement. Based upon the environmental assessment, the Commission has concluded that the issuance of this amendment will not have a significant effect on the quality of the human environment.

For further details with respect to the action see (1) the application for amendment dated September 22, 1988, and supplemented January 17, and April 12, 1989 (2) Amendment No. 100 to License No. DPR–6, (3) the Commission's related Safety Evaluation, and (4) the Commission's Environmental Assessment. All of these items are available for public inspection at the Commission's Public Document Room, The Gelman Building, 2120 L Street NW., Washington, DC and at the North Central Michigan College, 1515 Howard Street, Petosky, Michigan 49770. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects III, IV, V and Special Projects.

Dated at Rockville, Maryland this August 16th day of 1989.

For the Nuclear Regulatory Commission.

Robert M. Pulsifer,

Project Manager, Project Directorate III–1, Division of Reactor Projects III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 89–20231 Filed 8–25–89; 8:45 am]

BILLING CODE 7590-01-M

Duke Power Co., Oconee Nuclear Station, Units 1, 2, and 3; Exemption

[Docket Nos. 50-269, 50-270, and 50-287]

I

Duke Power Company (Duke or the licensee) is the holder of Facility Operating License Nos. DPR–38, DPR–47, and DPR–55 which authorize the operation of the Oconee Nuclear

Station, Units 1, 2, and 3 (Oconee or the facility) at steady-state power levels not to exceed 2568 megawatts thermal for each unit. These licenses provide, among other things, that the facilities are subject to all rules, regulations, and Orders of the Nuclear Regulatory Commission (the Commission) now or hereafter in effect.

The facility consists of three pressurized water reactors at the licensee's site located in Oconee County, South Carolina.

II

On November 19, 1980, the Commission published a revised 10 CFR 50.48 and a new 10 CFR part 50, appendix R, "Fire Protection Program for Nuclear Power Facilities Operating Prior to January 1, 1979." On February 17, 1981, the revised § 50.48 and appendix R became effective. Section III of Appendix R contains fifteen subsections, lettered A through O, each of which specifies requirements for a particular aspect of the fire protection features at a nuclear power plant. One of these subsections, III.G, is the subject of Duke's exemption requests.

Section III.G.2 of Appendix R requires that one train of cables and equipment necessary to achieve and maintain safe shutdown be maintained free of fire damage by one of six means. The two paragraphs, a and d, that pertain to the Duke exemption requests are as follows:

> A. Separation of cables and equipment and associated non-safety circuits of redundant trains [shall be accomplished] by a fire barrier having a 3-hour rating. Structural steel forming a part of or supporting such fire barriers shall be protected to provide fire resistance equivalent to that required of the barrier; or
>
> d. Separation of cables and equipment and associated non-safety circuits of redundant trains [shall be accomplished] by a horizontal distance of more than 20 feet with no intervening combustibles or fire hazards.

III

By letters dated November 11 and October 24, 1983, and August 14, 1984, Duke requested exemptions for Oconee from appendix R to 10 CFR part 50. By letter dated February 28, 1985, Duke sent additional information to clarify the exemption requests. Further, Duke stated that two of the submitted exemption requests would be withdrawn based on the successful fire testing of associated fire barriers. In a letter dated September 30, 1985, Duke presented the fire test data, its favorable evaluation, and their formal request to withdraw exemption requests nos. 1 and 2 of the November 11, 1983 letter. By letter dated November 14, 1986, the staff requested further information on the remaining exemption requests. By letter dated December 23, 1986, Duke responded initially to the questions. Later, in a letter dated April 21, 1987, Duke sent additional information.

The staff has reviewed the remaining five exemption requests as discussed below.

1. Auxiliary and Reactor Buildings—Expansion Joints

Duke requested an exemption from the technical requirements of section III.G.2.a of Appendix R because the seismic expansion joints, used in fire barriers between the auxiliary building and the reactor building, are not rated for 3-hour fire resistance.

The auxiliary building is next to the reactor building; these two buildings are above the east and west penetration rooms. A 3-hour fire resistive barrier was constructed to separate the east from the west penetration room. These fire barriers separate trains of safe shutdown equipment and associated circuits. Cork is embedded in the concrete slabs above and below the wall adjacent to the reactor building wall. Duke states that the exemption request is only for the compressed cork in the expansion joints, located between the auxiliary building floor slabs and the reactor building walls at the ceiling of the west penetration room. The joints have compressed cork installed as filler material. Because the compressed cork in the expansion joints is not a 3-hour, fire-rated assembly, Duke evaluated the acceptability of using these joints in fire-rated barriers.

In evaluating the exemption request, the staff considered the following three characteristics about the penetration rooms: (1) The amount of combustible material (also called combustible loading); (2) the installed smoke detectors; and (3) the distance between the combustibles and the cork.

First the combustible loading of the area is low. It consists primarily of cable insulation for fan motors and lights. No fixed combustibles are installed near the exposed cork. The penetration rooms, constructed of reinforced concrete, have a ceiling height of about 25 feet. The area above the east and west penetration rooms contains only air handling equipment. The west penetration room contains only cables of one train of equipment necessary to achieve safe shutdown. If a fire were to occur, the redundant safe shutdown equipment would not be affected. Because this area has low combustible loading, the area is unlikely to have a fire that would propagate through the expansion joints and into the east and west penetration rooms and damage the redundant safe shutdown equipment.

Second, smoke detectors have been installed by Duke throughout the east and west penetration rooms. These detectors alarm in the main control room. If a fire were to occur, the smoke detectors would give the reactor operators early warning. Although this area does not have fire suppression, it does have portable extinguishers and manual hose stations. After receiving the alarm, the reactor operators would dispatch the fire brigade to the area; the fire brigade would then extinguish the fire by using the portable extinguishers and manual hose stations.

Finally, the distance between the combustibles and the exposed cork and also the separation between the two trains of safe shutdown equipment provide sufficient protection to ensure the ability to achieve and maintain safe shutdown until Duke extinguishes the fire.

Thus, the staff finds that the low combustible loading, the automatic fire detection, the passive protection of fire area boundaries, and the separation of safe shutdown equipment provide reasonable assurance that the fire brigade would be able to extinguish a fire before it develops to the point of preventing a safe plant shutdown. Furthermore, the staff finds acceptable the compressed cork used in the seismic expansion joints located at the ceiling of the west penetration room, for each of the three units, because the cork does not decrease the level of fire protection. Therefore, the staff concludes that Duke's fire protection features meet the underlying purpose of the rule because they provide an equivalent level of fire protection as would literal compliance with appendix R.

2. Reactor Buildings—Separation Distance Between Safety Circuits and Non-Safety Circuits

Duke requested an exemption from the technical requirements of section III.G.2.d of appendix R for two cases where either the distance between redundant instruments is less than 20 feet or where the distance between redundant components necessary for achieving hot shutdown is 20 feet, but intervening combustibles exist between them.

In the first case, Duke stated that the pressurizer level transmitter in the Unit 1 reactor building is separated by about 15 feet from the balance of plant instruments although there are no intervening combustibles. In the second case, Duke states that although they are separated by more than 20 feet, the

primary and alternate trains of instrumentation have intervening combustibles between them.

In evaluating the exemption request, the staff considered the specific configuration of the cases. In the first case, although there are no intervening combustibles between them, the two instruments are separated by only 15 feet. Furthermore, in the rest of the area, the combustible loading, which consists primarily of cable, is low. To reduce the probability of a fire from transient combustibles, Duke has incorporated administrative controls to limit transient combustibles and inspections to detect any combustibles before starting the unit after an outage. Also, reactor buildings are huge structures whose appreciable volume dissipates the heat from a fire.

In the second case where the primary and alternate trains of instrumentation, i.e, cables, valves and instruments of the safe shutdown system, are located in two different areas within each reactor building, the trains are separated by more than 20 feet. However, there are also intervening combustibles between them. Although their concentration is low, the intervening combustibles consist of cable trays traversing the reactor building (RB). Because the cable insulation contained within the trays is comparable to IEEE–383 qualified cable, the cable insulation will burn slowly with an initially low rate of heat release.

Thus, for the first case of pressurizer level instrumentation, the staff finds that the low combustible loadings and large RB volume provide reasonable assurance that the fire brigade would be able to extinguish a fire before it develops to the point of preventing a safe plant shutdown. In the second, the distance between redundant and alternate standby shutdown equipment, combined with the low rate of fire propagation through the trays, provides reasonable assurance that the fire brigade will extinguish the fire before it affects redundant trains of instrumentation. Therefore, the staff concludes that Duke's fire protection features within the RB meet the underlying purpose of the rule because they provide an equivalent level of fire protection as would literal compliance with appendix R.

3. Pipe Tunnel Access Area

Duke requested an exemption from the technical requirements of section III.G.2.a of appendix R because the pipe tunnel access area holding the standby shutdown system cables located in the pipe tunnel access area does not have a 3-hour, fire-rated barrier separating it from the east penetration room above.

In evaluating the exemption request, the staff considered the amount of combustible loading and manual fire suppression.

First, the combustible loading in the pipe tunnel access is low. If a fire were to occur, it would develop slowly. Also, the fire propagation path between the standby shutdown system cables and the east penetration room is circuitous, consisting of several unrated barriers and open areas. Second, the fire brigade may use the portable extinguishers, manual hose stations, or a fire hose supplied from the fire hydrant to extinguish the fire.

Thus, the staff finds that the low combustible loading and manual fire suppression provide reasonable assurance that the fire will not propagate between the pipe tunnel access area and the east penetration room above.

Therefore, the staff concludes that the existing separation between the pipe tunnel access area and the east penetration room provides a level of fire protection equivalent to the technical requirements of section III.G.2.a of appendix R.

4. East and West Penetration Rooms

Duke requested an exemption from the technical requirements of section III.G.2.a of appendix R for pipe penetrations through the floor and ceilings of the penetration rooms.

The licensee stated that "Armaflex" and "Rubatex" insulating materials are used to seal pipe penetrations through the floor and ceilings of the east and west rooms. Armaflex is described in the Oconee Nuclear Station Fire Protection Safety Evaluation Report dated August 11, 1978, and has a flame spread rating of 50. Rubatex is a similar material with a flame spread of 25.

The licensee has stated that due to the presence of this insulating material at pipe penetrations, an exemption is required from the specific technical requirements of section III.G.2.a of appendix R.

By letter dated April 21, 1987, Duke stated that the west penetration room and cask decontamination rooms are considered a single fire area. Therefore, the exemption request applies only to the ceilings of the west penetration room.

The pipe penetrations through the ceiling of the west penetration room do not comply with the technical requirements of section III.G.2.a of appendix R because of the pipe insulation materials installed. The insulating materials used are known as Armaflex and Rubatex.

The west penetration room contains only one train of equipment necessary to achieve safe shutdown. The penetration room is constructed of reinforced concrete and has a ceiling height of approximately 25 feet. The predominant combustible within the room is cable insulation.

Smoke detectors are provided for the west penetration room. These detectors alarm in the main control room. If a fire occurs, it should be detected in its early stages and alarmed in the main control room. The fire brigade will be dispatched to the area to extinguish the fire using the portable extinguishers and manual host stations provided.

By letter dated May 11, 1984, information concerning Rubatex was submitted to the staff as part of the licensing review for the Catawba Nuclear Station. The staff has accepted the use of this material as described in Supplement 3 to the Catawba Nuclear Station Safety Evaluation Report (SSER 3) dated July 1984. The Rubatex insulation has a Flame Spread Index of 25, a Smoke Development Index of 100 (maximum), and a Fuel Contribution Index of 30.

For the Oconee Nuclear Station, "Armaflex", a similar material with a flame spread index of 50 or less, was submitted to the staff for review by Duke's letter dated January 25, 1978. The use of this material in an arrangement similar to that used in the ceiling of the west penetration room was accepted as described in the Oconee Fire Protection Safety Evaluation Report dated August 11, 1978.

Because of the limited combustibility of the insulation material, it is unlikely that a fire would propagate through the penetration seals from one fire area to the other. Should a fire occur in the penetration room, it would be detected in its incipient stage. The alarms from the detectors annunciate in the control room where the fire brigade would be dispatched to extinguish the fire manually.

Based on the above evaluation, previous acceptance of the insulating material, and the staff review of site conditions, the staff concludes that the piping penetrations at the ceiling of the west penetration room, provide reasonable assurance that a fire would not propogate through the barrier and, therefore, provide a level of fire protection equivalent to the technical requirements of section III.G.2. of appendix R.

5. Reactor Building Walls

Duke requested an exemption from the technical requirements of section

III.G.2.a of appendix R to the extent that … application of the regulation in the

Administrative Judge Gustave A. … in sections (A), (B), and (C) below, of the … Two exceptions to this new policy are

III.G.2.a of appendix R to the extent that three-hour, fire-rated pipe penetrations are not provided within the reactor building wall contiguous to the penetration rooms.

Duke has stated that the mechanical pipe penetrations in the reactor building walls are not fire rated. The reactor building walls serve as fire barriers separating redundant trains of cables in the east and west penetration rooms. Because of the presence of these unrated penetrations, the reactor building walls do not conform with the technical requirements of section III.G.2.a of appendix R to 10 CFR part 50.

The containment penetration design for pipe containing less than 150°F process fluids consists of a sleeved opening with a steel housing assembly anchored to the reactor building wall, with a pipe cap attached to the pipe for containment integrity. Penetrations for higher temperature process piping are similar in design but have insulation between the process pipe and the wall sleeve.

The mechanical pipe penetration design was observed during the plant appendix R inspection during the week of January 28–30, 1987, to be similar to penetration designs used at other facilities. The penetrations have been designed to meet multiple containment integrity criteria.

The combustion loadings near the penetration are low; therefore, a fire of significant magnitude or duration should not occur near the penetrations. If a fire does occur, it is probable that the substantial construction of the piping penetrations, combined with the large room volumes on either side of the penetrations, will prevent fire propagation through the containment boundary. It is, therefore, concluded that the existing unrated containment mechanical pipe penetrations provide reasonable assurance that a fire will not propagate through the barrier and are, therefore, an acceptable deviation from the technical requirements of section III.G.2.a of appendix R.

Based on the above evaluation, the existing mechanical pipe penetrations in the reactor building walls provide a level of fire protection equivalent to the technical requirements of section III.G.2.a of appendix R and provide reasonable assurance that the fire will not propagate through the containment boundaries.

6. 10 CFR 50.12 Determination

Pursuant to 10 CFR 50.12(a)(2), the Commission will not consider granting an exemption unless special circumstances are present. Special circumstances are present when application of the regulation in the particular circumstances would not serve the underlying purpose of the rule or is not necessary to achieve the underlying purpose of the rule.

The underlying purpose of section III.G is to provide adequate protection of redundant components of safety-related equipment by limiting damage in the event of a fire at one safety-related component location so the performance of the other redundant safety-related component is not affected. As described in the evaluation section of each exemption request, the staff has concluded that the existing fire protection systems provide equivalent protection to that which would be provided by meeting the literal separation requirements of section III.G of appendix R.

In summary, the staff has concluded that the alternative fire protection provided in support of the exemptions meets the fire protection which would otherwise occur if literal compliance with the separation requirements of appendix R were required. Therefore, the staff concludes that special circumstances exist for the licensee's requested exemptions in that imposition of the literal requirements of the regulation in these particular circumstances is not necessary to achieve the underlying purpose of appendix R to 10 CFR part 50.

IV

Accordingly, the Commission has determined, pursuant to 10 CFR 50.12(a), that (1) an exemption as described in section III. is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security, and (2) in this case, special circumstances are present as described in Section III. Therefore, the Commission hereby grants an exemption from the requirements of section III.G. of appendix R to 10 CFR part 50 as described in section III. above.

Pursuant to 10 CFR 51.32, the Commission has determined that the issuance of this exemption will have no significant impact on the environment (53 FR 50139).

This Exemption is effective upon issuance.

Dated at Rockville, Maryland, this 21st day of August 1989.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Director, Division of Reactor Projects-I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 89–20233 Filed 8–25–89; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 70-25; ASLBP No. 89-594-01-ML]

Rockwell International Corp.; Designation of Presiding Officer

Pursuant to delegation by the Commission dated December 29, 1972, published in the **Federal Register**, 37 FR 28710 (1972), and §§ 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's Regulations, all as amended, a single member of the Atomic Safety and Licensing Board Panel is hereby designated to rule on petitions for leave to intervene and/or requests for hearing and, if necessary, to serve as the presiding officer to conduct the hearing in the event that an informal adjudicatory hearing is ordered in the following Materials Licensing proceeding.

Rockwell International Corporation, Rocketdyne Division, Special Nuclear Materials License No. SNM–21

The Presiding Officer is being designated pursuant to 10 CFR 2.1207 of the Commission's Regulations, "Informal Hearing Procedures for Materials Licensing Adjudications," published in the **Federal Register**, 54 FR 8269 (1989). This action is in response to requests for an adjudicatory hearing submitted by Jon Scott and Estelle Lit, representing themselves and Jerome E. Raskins, the lead signatory on a letter to the Executive Director for Operations signed by thirty-seven individuals. The requestors desire a hearing on the application of the Rocketdyne Division of Rocketwell International Corporation for renewal of Special Material License Number SNM–21 for ten years. The License renewal request was submitted to the Commission by letter dated May 25, 1989.

The presiding officer in this proceeding is Administrative Judge Peter B. Bloch.

Following consultation with the Panel Chairman, pursuant to the provisions of 10 CFR 2.722, the Presiding Officer has appointed Administrative Judge Gustave A. Linenberger, Jr., to assist the Presiding Officer in taking evidence and in preparing a suitable record for review.

All correspondence, documents and other materials shall be filed with Judge Bloch and Judge Linenberger in accordance with 10 CFR 2.701. Their addresses are:

Administrative Judge Peter B. Bloch,
Presiding Officer, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555

Administrative Judge Gustave A.
Linenberger, Jr., Special Assistant, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Issued at Bethesda, Maryland, this 21st day of August 1989.

Robert M. Lazo,

Acting Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–27153; File No. SR–Amex–89–18]

Self-Regulatory Organizations; Proposed Rule Change by American Stock Exchange, Inc. Relating to Audit Committee Requirements and Other Listing Guidelines and Instructions

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on July 26, 1989, the American Stock Exchange, Inc. ("Amex" or "Exchange") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Amex. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Amex is proposing to amend certain provisions of the Company Guide to require listed companies to establish and maintain audit committees, and conform certain other listing guidelines and instructions with current practices and procedures.

The text of the proposed rule change is available at the Office of the Secretary, Amex and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Amex included statements concerning the purpose of and basis for the proposed rule change and discussed comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Amex has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Purpose

Audit Committees. Audit committees have come to be accepted as a necessary and integral part of corporate boards of directors. Beginning with the 1960's, many business leaders began embracing the idea of audit committees as a way of coping with criticism regarding the accuracy and completeness of financial statements, and the growing complexities of accounting and business matters in general. This trend has accelerated since 1978 when the Amex determined to strongly encourage domestic listed companies to establish audit committees.[1]

Over the past several months, the Amex has been reconsidering its position on audit committees in light of evolving industry practice, and recently concluded that an audit committee requirements for Amex-listed companies is now appropriate.

A recent survey of listed company proxy statements shows that approximately 85% of all Amex domestic listed companies with a traditional corporate board structure already have audit committees, and that nearly 93% of such companies have two or more independent directors. While the Exchange is aware that some who have written on this subject have suggested that audit committees be comprised solely of independent directors,[2] it is not convinced that this is necessary and/or practical for Amex-listed companies, and accordingly, proposes that only a majority of the audit committees members be required to be outside directors. This would be consistent with the requirements for NASDAQ National Market System Securities that has been approved by the Commission.[3]

Two exceptions to this new policy are proposed: first, the Exchange believes that the rule should not apply to foreign issuers if inconsistent with the custom and/or practice in the company's country of domicile. This is contemplated by the Exchange's foreign issuer guideline [4] and consistent with the audit committee rules of the other marketplaces.[5]

Second, neither audit committees (nor for that matter independent directors) should be required—as a condition to listing—for any entity which is not structured along traditional corporate lines. For example, publicly traded partnerships without a corporate general partner should not be require to establish a special structure solely to accommodate an audit committee.[6] Similarly, the rule is not intended to be applied to an issuer of preferred stock or debt whose common stock is privately held. In these latter cases, which typically arise in the context of a leveraged buy-out, the rights and obligations of the parties are essentially contractual in nature. To require audit committees and/or independent directors in these situations appeers impractical.

Finally, to allow sufficient time for existing listed companies to comply with this new requirement, and if necessary, secure added outside directors, the Exchange proposes a phase-in period for existing companies of 12–18 months following SEC approval. New companies which apply for listing after SEC approval would, however, be expected to have or to establish an audit committee within approximately 90 days following the commencement of trading.

Conforming changes to listing guidelines and instructions. The Amex also proposes several other minor changes to its existing published requirements to conform existing guidelines and instructions with current practices and procedures. These revisions are not viewed as substantive policy changes, but rather are intended as clarification of our existing requirements.

Independent directors. Section 121 of the Amex Company Guide states that the Exchange recommends that listed companies have at least two independent directors on the board. This statement of policy has evolved over the years to the point where it is now viewed as a requirement. Accordingly, the Exchange proposes to amend this provision to make explicit what has come to be current practice; namely, that each domestic listed company with publicly traded common stock is required to have at least two independent directors.

---

[1] Currently, section 121 of the Amex Company Guide, among other things, recommends that every listed company establish and maintain an audit committee composed solely of independent directors.

[2] See Report of National Commission on Fraudulent Financial Reporting (October 1987) at 40–41; GAO Report on CPA Audit Quality (March 1989) at 40–41.

[3] Schedule D, Section 5(d) of the NASD By-Laws provides that each NASDAQ/NMS issuer shall establish and maintain an Audit Committee, a majority of the members of which shall be independent directors.

[4] Section 110 of the Amex Company Guide sets forth the original listing requirements for securities of foreign companies.

[5] For example, paragraph 303.00 of the NYSE Listed Company Manual requires each domestic company with common stock listed on the Exchange, as a condition to listing or continued listing of its securities on the Exchange, to establish an Audit Committee comprised solely of directors independent of management.

[6] However, all partnerships with corporate general partners would be strongly encouraged to establish such a committee.

Listing applications—Exhibits. Section 213 of the Company Guide specifies a number of exhibits required to be filed in support of an original listing application. Review has shown, however, that certain of these items no longer serve any regulatory purpose and are seldom—if ever—considered by the Staff during the listing evaluation process.

Accordingly, the Exchange proposes that the three exhibits mentioned below (Items 10, 11 and 12) be eliminated, and a general provision added reserving to the Exchange the right to request such material on an as-needed basis:

- Item 10 requires the production of certified copies of each option, bonus, profit-participation, pension and retirement plan.
- Item 11 requires certified copies of patent or royalty agreements.
- Item 12 calls for all state "Blue Sky" memoranda and related correspondence with the various State Securities Administrators.

Warrant listing fees. Section 140 of the Company Guide provides that listing fees for warrants are to be based on the aggregate number of shares into which the warrants are exercisable. Although the overwhelming majority of warrants are initially issued on a 1-to-1 conversion basis, the Exchange has, on occasion, encountered a new warrant issue which provides that each warrant is exercisable into more than one share of stock. Were section 140 to be applied literally, such issuers would be required to pay a higher fee for listing their warrants than for any other new equity issue. Section 140 is, therefore, being amended to provide that the fees for listing a new warrant issue shall be based solely upon the number of warrants to be listed, and not the number of shares into which they are exercisable.

Listing fee refunds. Companies leaving the Exchange, whether because of merger, transfer or otherwise, have always been entitled to a pro-rated refund of any pre-paid annual fee. Since there is typically a time delay of several months between the cessation of trading and formal SEC approval of the company's removal application, companies should not be charged for this "stub" period. As presently written, however, section 141 states that issuers must formally apply for a refund, and that any pro-rated fee should be calculated from the time of "removal". Section 141, as amended, would make clear that the Exchange will automatically remit a pro-rated refund calculated from the date of suspension from trading.

(2) Basis

The proposed rule change is consistent with section 6(b) of the Act in general and furthers the objectives of section 6(b)(5) in particular in that it is intended to prevent fraudulent and manipulative acts and practices, and protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will impose no burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were either solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Amex consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Amex. All submissions should refer to File No. SR-Amex-89-18 and should be submitted by September 18, 1989.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: August 21, 1989.

Shirley E. Hollis,

Assistant Secretary

[FR Doc. 89-20193 Filed 8-25-89; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-27161; File No. IDD-89-02]

Self-Regulatory Organizations; The Options Clearing Corporation; Order Approving Proposed Amendment to Index Participations Disclosure Document

On August 21, 1989, the Options Clearing Corporation ("OCC"), in conjunction with the Philadelphia ("Phlx") and American ("Amex") Stock Exchanges and the Chicago Board Options ("CBOE") Exchange, Inc. [collectively, the self-regulatory organizations ("SROs")] submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Rule 9b-1 of the Securities Exchange Act of 1934 ("Act")[1] copies of an amendment to the Index Participations ("IPs") Disclosure Document ("IDD").[2]

The proposed amendment to the IDD provides disclosure concerning the August 18, 1989, opinion of the United States Court of Appeals for the Seventh Circuit ("Seventh Circuit") holding that IPs are futures contracts subject to the exclusive jurisdiction of the Commodity Futures Trading Commission, and that the Commission orders approving the proposed SRO rule changes to list for trading and to issue, clear, and settle IPs should be set aside.[3] The amendment notes that the Court's mandate will issue and the orders will be set aside effective on September 8, 1989, unless a petition for rehearing is pending at that time or an earlier or later date is established by action of the Seventh Circuit.[4] The amendment notes further, however, that from August 21, 1989, until further notice, trading in IPs is restricted to closing transactions, except (1) trading by IPs market makers or specialists, (2) trading to facilitate the liquidation of customer IP positions, or (3) as otherwise may be approved by an exchange for the protection of investors, the maintenance of fair and orderly markets or the safeguarding of securities or funds.

Rule 9b-1 provides that an options market must file five copies of amendments to a disclosure document with the Commission at least 30 days prior to the date definitive copies are furnished to customers unless the Commission determines otherwise having due regard to the adequacy of the information disclosed and the protection of investors.[5]

The Commission has reviewed the IDD amendment and finds that it provides adequate disclosure of the change in IP's status due to the Seventh Circuit opinion as well as the trading restrictions put in place to comply with the opinion. In addition, the Commission believes it is consistent with the public interest and the protection of investors to allow its distribution as of August 22, 1989, less than 30 days prior to the date definitive copies are furnished to customers. Specifically, allowing immediate distribution of the IDD amendment should help eliminate any possible investor confusion concerning the restrictions applicable to IPs trading as a result of the Seventh Circuit opinion.

For the Commisison, by the Division of Market Regulation, pursuant to delegated authority.[6]

Dated: August 22, 1989.

Shirley E. Hollis,

Assistant Secretary.

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Area No. 2354; Amdt. No. 7]

Louisiana and Contiguous Counties in the States of Texas, Arkansas and Mississippi; Declaration of Disaster Loan Area

On July 25, 1989, the Small Business Administration amended the above-numbered declaration in accordance with the Notice of Amendment to the President's declaration, dated July 13, 1989, to include the parishes of Jackson and Webster, in the State of Louisiana, as a result of damages from severe storms and flooding which occurred May 4 through May 27, 1989.

As the termination date for filing applications for physical damage closed on July 18, 1989, prior to the amendment cited above, the termination date for filing applications for physical damage is extended to September 20, 1989, 30 days from the date of this action. The termination date for filing applications for economic injury remains the close of business on February 20, 1990.

[License No. 06/10-0150]

Capital Marketing Corp.; Application for Conflict of Interest Transaction

Notice is hereby given that Capital Marketing Corporation (CMC), 100 Nat Gibbs Drive, Keller, Texas 76248, a Federal Licensee under the Small Business Investment Act of 1958, as amended (the Act), has filed an application with the Small Business Administration (SBA) pursuant to § 107.903(b)(5) of the Regulations governing small business investment companies (13 CFR 107.903(b)(5) (1989)) for an exemption from the provisions of the cited Regulations.

CMC proposes to loan $275,000 to Kenneth R. Wright to purchase Woody's Discount Food & Family Center (Discount), located at 104 Main Street, Wolfe City, Texas 75496.

The proposed financing is brought within the purview of § 107.903(b)(5) of the Regulations because James T. Woodruff, a partial owner of the Discount grocery store, is an Associate of CMC by virtue of his being a member of the Board of Directors of Affiliated Food Stores, Inc., a more than 10% owner of CMC.

Notice is hereby given that any interested person may, not later than fifteen (15) days from the date of publication of this Notice, submit written comments on the proposed transaction to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, DC 20416.

A copy of this Notice will be published in a newspaper of general circulation in Keller, Texas.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

BILLING CODE 8025-01-M

[Application No. 03/03-5189]

Millicom Capital Corporation; Application for License To Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company (SBIC) under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended, (the Act), (15 U.S.C. 661 *et seq.*), has been filed by Millicom Capital Corporation (Applicant), 1200 18th Street, NW., Suite 705, Washington, DC 20036, with the Small Business Administration (SBA), pursuant to 13 CFR 107.102 (1989).

The officers, directors and sole shareholder of the Applicant are as follows:

J. Shelby Bryan, Chairman of the Board, Director, 220 East 63rd Street, New York, NY 10021.
Walter L. Treadgill, President, CEO, Director, 5006 Weaver Terrace, NW. Washington, DC 20016.
Lawrence Melillo, Secretary, Treasurer, Director, 20 Summer Court, Emerson, NJ 07630.
Millicom Incorporated, Sole Shareholder, Suite 5500, 155 East 53rd Street, New York, NY 10022.

The following three individuals, collectively, have voting control (51.8 percent) of Millicom Incorporated, a company whose stock is traded over the counter:

J. Shelby Bryan, 200 East 63rd Street, New York, NY 10021.
Bjorn Wissen, 333 East 68th Street, New York, NY 10021.
Madison H. Haythe, 142 Peruvian Avenue, Palm Beach, FL 33480.

The Applicant, a Delaware corporation, will begin operations with $1,000,000 paid-in capital and paid-in surplus. It will conduct its operations primarily in the District of Columbia, and in the states of Maryland, Virginia, West Virginia, Pennsylvania, Delaware and North Carolina.

As an SBIC under section 301(d) of the Act, the Applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended, from time to time, and will provide assistance solely to small business investment concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in free enterprise system is hampered because of social or economic disadvantage.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owner and management, and the probability of successful operations of the company under their management, including adequate profitability and financial soundness, in accordance with the Act and the SBA Rules and Regulations.

Notice is further given that any person may, no later than 30 days from the date of publication of this Notice, submit written comments on the Applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, NW., Washington, DC 20416.

A copy of this Notice will be published in a newspaper of general circulation in Washington, DC.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: August 21, 1989.

Robert G. Linsberry,

Deputy Associate Administrator for Investment.

TENNESSEE VALLEY AUTHORITY

Information Collection Under Review by the Office of Management and Budget

AGENCY: Tennessee Valley Authority.

ACTION: Information Collection Under Review by the Office of Management and Budget (OMB).

SUMMARY: The Tennessee Valley Authority (TVA) has sent to OMB the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), as amended by Pub. L. 99-591.

Requests for information, including copies of the information collection proposed and supporting documentation, should be directed to the Agency Clearance Officer whose name, address, and telephone number appear below. Questions or comments should be directed to the Agency Clearance Officer and also to the Desk Officer for the Tennessee Valley Authority, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503; Telephone: (202) 395-3084.

Agency Clearance Officer: Mark R. Winter, Tennessee Valley Authority, Edney Building 4W 13B, Chattanooga, TN 37402; (615) 751-2523.

Type of Request: Regular submission.

Title of Information Collection: Forest Industries Survey 1989.

Frequency of Use: On occasion.

Type of Affected Public: Businesses or other for-profit and small businesses or organizations.

Small Businesses or Organizations Affected: Yes.

Federal Budget Functional Category Code: 452.

Estimated Number of Annual Responses: 3600.

Estimated Total Annual Burden Hours: 2401.

Estimated Average Burden Hours Per Response: 667.

Need For and Use of Information: The purpose of this information collection is to measure trends in industrial wood use, employment, and number and kinds of forest industries. These data will be used to evaluate progress in forest industrial development.

Louis S. Grande,

Vice President, Information Services, Senior Agency Official.

BILLING CODE 8120-01-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. EX89-3; Notice 2]

Avanti Automotive Corp.; Grant of Petition for Temporary Exemption From Federal Motor Vehicle Safety Standard No. 208

This notice grants the petition by Avanti Automotive Corporation of Youngstown, Ohio, for a temporary exemption of its convertible models from the automatic crash protection requirements of Motor Vehicle Safety Standard No. 208, Occupant Restraint Systems, but only for two years, and not the three years that it had requested. The basis of the petition was that compliance would cause substantial economic hardship.

Notice of receipt of the petition was published on July 6, 1989, and an opportunity afforded for comment (54 FR 28550).

Petitioner's total production from January 1987 to June 1989 was 434 passenger cars. Of these, 203 were convertibles, and 231 were coupes. It requested an exemption of three years from the automatic protection requirements of Motor Vehicle Safety Standard No. 208 for its convertible models, which become effective September 1, 1989, for that type of motor vehicle. The company's coupes and contemplated 4-door sedans are and will

be fitted with automatic protection systems.

In arguing that compliance would cause it substantial economic hardship, Avanti discussed the recent troubled history of the company. The original Avanti Corporation acquired tooling from the Studebaker Corporation in 1964, and manufactured passenger cars in South Bend, Indiana, from that time until 1987. In 1985, Avanti filed for bankruptcy. It assets were purchased in 1986, and formed the basis of a new corporation, The New Avanti Motor Corporation. Business interests in Youngstown, Ohio, offered incentives to move production to that "economically troubled area", including "an eight million dollar financial package * * * which included loans and grants from the State of Ohio, local grants, private financing, and equity". New Avanti accepted, and moved in September 1987. However, start-up costs, including the training of a new work force, absorbed available capital, and the specter of bankruptcy again arose. A reorganization occurred in the Fall of 1988, and the Avanti Automotive Corporation emerged. Much of the year since then has been devoted to a reevaluation of its market, a search for a suitable chassis for its 1991 and subsequent models, and an examination of ways to reduce production costs. Although "over the last four months, Avanti Automotive Corporation has received additional capital of $600,000 per month", such an infusion is required to compensate for the company's continuing losses over the past few years. The latest income statement it made available (June 1—November 30, 1988) showed a net loss of over $2,000,000 incurred in that time period. In the year ending April 30, 1988, it had a net loss of almost $3,000,000. In the year ending April 30, 1987, it had a net gain of slightly less than $25,000.

With regard to its efforts to comply with Standard No. 208, Avanti investigated the feasibility of providing a three-point automatic safety belt system. However, this system is feasible in the Avanti convertible only with a roll bar. In Avanti's opinion, installation of a roll bar would substantially reduce the consumer appeal of the convertible (This could result in fewer sales, with a resulting negative effect on the income that would be available for development and implementation of an airbag system). Nevertheless, it is attempting to make the roll bar/three-point automatic belt system available as an option, "possibly as early as the 1990 model year". In the meantime, it has been planning to install a driver's side air bag, and commenced its efforts in the Spring of 1988. It has learned from Breed Corporation and Allied Signal that total design and tooling costs will exceed $1,500,000 for the convertible alone (it believes that this system will be easily adaptable for the coupe and planned 4-door sedan). Avanti did not have sufficient funds to undertake this, at that time, since it did not know whether it would even be in business 18 months later when the requirement came into effect. However, it believes that it could develop and implement an air bag system over the 3-year period that its exemption would be in effect, and thus, produce a conforming convertible by September 1, 1992, if not 6 to 12 months before then. It estimated that, if the exemption is granted, 600 convertibles will be produced over the next 3 years and covered by it. In the absence of an exemption, Avanti argued that it would be forced to cease operations as the convertible now forms a large majority (64% thus far in 1989) of its production.

Petitioner stated that an exemption would be in the public interest and consistent with the objectives of the National Traffic and Motor Vehicle Safety Act. Its convertibles would continue to be equipped with the three-point active safety belt system presently installed, and the small number of vehicles likely to be produced under the exemption will not materially affect motor vehicle safety. An exemption would afford Avanti the opportunity to modify the intended air bag system for use in its enclosed vehicles, to replace the automatic belt system presently offered in those vehicles. Avanti affords job opportunities in an economically depressed area, its payroll approximately $250,000 a month. Other jobs have been created by suppliers to Avanti. Finally, maintaining the existing diversity of motor vehicles is also in the public interest and an objective of the Vehicle Safety Act.

No comments were recieved on the petition.

The authority of the Administrator to grant a temporary exemption in this case is premised upon finding that immediate compliance of Avanti convertibles with the automatic protection requirement would cause a small volume manufacturer substantial economic hardship and that the manufacturer has, in good faith, attempted to comply with the standard from which it requests to be exempted. In addition, a finding must be made that the exemption is in the public interest and consistent with the objectives of the National Traffic and Motor Vehicle Safety Act.

In the past, the agency has tended to view a continuing net loss position as constituting substantial economic hardship *per se.* On this basis, the cumulative net loss of almost $5,000,000 experienced by New Avanti/Avanti Automotive in the 25-month period from April 30, 1986, to November 30, 1988, is evidence of the long-standing and continuing precarious finacial condition of the enterprise. If a manufacturer is convinced that funds necessary for its compliance will be lessened by shot-term modifications that may reduce the sales appeal of its product, that view must be accorded consideration, though it is necessarily a somewhat speculative and subjective argument if not supported by consumer surveys. In other words, the economic conditions of a low volume manufacturer may prevent immediate compliance, or the method of compliance achievable by that manufacturer could itself create substantial economic hardship through reduction of sales of a model whose volume of sales is necessary to the continued well-being of the small manufacturer. Avanti Automotive has represented that the convertible now represents almost two-thirds of its vehicle sales, and could become as high as 70%. NHTSA accepts the argument that this volume is critical to Avanti's fortunes.

With respect to the company's good faith efforts to conform, these are not in doubt. Although not mentioned in Avanti's petition, NHTSA has recently concluded without penatly an investigation (agency file IR 143) of the failure of the company to meet the automatic protection requirements of Standard No. 208 for the production year September 1, 1986-August 30, 1987. This noncompliance came to the agency's attention in the course of a telephone call initiated by an Avanti engineer, seeking to ensure that the company was meeting all Federal requirements. Avanti was able to ensure that it met the then-current requirements in the short time remaining in the production year, and its coupes have been in conformance ever since. Avanti has also concluded that within a relatively short time it could conform its convertibles through a roll bar/automatic belt system, but that this might result in a failure to generate enough funds to develop an airbag system for installation by 1992 in all its models, whether open or closed.

NHTS also accepts the arguments of Avanti Automotive that it is contributing to the economy of a troubled industrial area by providing employment to its workers, and job opportunities to its local suppliers. It further agrees that one of the objectives of the Vehicle Safety Act was to afford a continuing wide choice of vehicles of the motoring public. However, considerations of public interest and objectives must take into account in this instance the demonstrated efficacy of automatic protection systems. The development and requirement of such systems has been a goal of this agency almost since its founding. In NHTSA's view, Avanti's petition merits favorable consideration, but for a period of time less than that requested. In its petition, Avanti Automotive represented that it "is attempting to make a three-point passive restraint system and roll bar combination available to interested customers, possibly as early as the 1990 model year." NHTSA interprets this as an indication that, if the petition were denied. Avanti would seek to offer a convertible/roll bar combination rather than drop the convertible from its line, and that the engineering of such a system is fairly complete. NHTSA does not wish to compromise Avanti's stated goal of 100% compliance with the automatic protection requirements through airbags, but the agency is interested in helping to introduce automatic protection to Avanti convertible purchasers in the near future, and in the company's achieving full conformance with Standard No. 208 before 1992. The agency is therefore providing a 2-year exemption, rather than the 3-year exemption that was sought. While the exemption is in effect, NHTSA encourages Avanti to afford its convertible buyers the option of a roll bar/automatic belt system, in addition to a convertible with the three-point system. Should the company require the additional year it sought, it may petition for a renewal of the exemption. As part of any argument that Avanti has attempted in good faith to meet the requirement by September 1, 1991, NHTSA will consider the company's efforts to offer and market convertibles with the rollbar/automatic belt option.

In consideration of the foregoing it is hereby found that compliance of convertibles with the automatic protection requirements woud cause Avanti Automotive Corporation substantial economic hardship and that it has in good faith attempted to comply with these requirements. It is further found that a temporary exemption would be in the public interest and consistent with the objectives of the National Traffic and Motor Vehicle Safety Act. Accordingly, Avanti Automotive Corporation is hereby granted NHTSA Temporary Exemption No. EX89-3 from paragraph S4.1.4 of 49 CFR 571.208 Motor Vehicle Safety Standard No. 208 Occupant Restraint Systems for its convertible models only, such exemption to expire September 1, 1991.

(15 U.S.C. 1410; delegation of authority at 49 CFR 1.50.)

Issued on: August 22, 1989.

Jeffrey R. Miller,

Acting Administrator.

BILLING CODE 4910-59-M

DEPARTMENT OF THE TREASURY

Office of the Secretary

[Department Circular—Public Debt Series—No. 24-89]

Treasury Notes of August 31, 1991, Series AD-1991

Washington, August 17, 1989.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of chapter 31 of title 31, United States Code, invites tenders for approximately $9,500,000,000 of United States securites, designated Treasury Notes of August 31, 1991, Series AD-1991 (CUSIP No. 912827 XX 5), hereafter referred to as Notes. The Notes will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the yield of each accepted bid. The interest rate on the Notes and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of the Notes may be issued to Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the Notes may also be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The Notes will be dated August 31, 1989, and will accure interest from that date, payable on a semiannual basis on February 28, 1990, and each subsequent 6 months on August 31 and February 28 through the date that the principal becomes payable. They will mature August 31, 1991, and will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next business day.

2.2. The Notes are subject to all taxes imposed under the Internal Revenue Code of 1954. The Notes are exempt from all taxation now or hereafter imposed on the obligation or interest thereof by any State, any possession of the United States, or any local taxing authority, except as provided in 31 U.S.C. 3124.

2.3. The Notes will be acceptable to secure deposits of Federal public monies. They will not be acceptable in payment of Federal taxes.

2.4. The Notes will be issued only in book-entry form in denominations of $5,000, $10,000, $100,000, and $1,000,000, and in multiples of those amounts. They will not be issued in registered definitive or in bearer form.

2.5. The Department of the Treasury's general regulations governing United States securities, i.e., Department of the Treasury Circular No. 300, current revision (31 CFR part 306), as to the extent applicable to marketable securities issued in book-entry form, and the regulations governing book-entry Treasury Bonds, Notes, and Bills, as adopted and published as a final rule to govern securities held in the TREASURY DIRECT Book-Entry Securities System in Department of the Treasury Circular, Public Debt Series, No. 2-86 (31 CFR part 357), apply to the Notes offered in this circular.

3. Sales Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, DC 20239-1500, prior to 1:00 p.m., Eastern Daylight Saving time, Tuesday, August 22, 1989. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Monday, August 21, 1989, and received no later than Thursday, August 31, 1989.

3.2. The par amount of Notes bid for must be stated on each tender. The minimum bid is $5,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specific yield.

3.3. A single bidder, as defined in Treasury's single bidder guidelines, shall not submit noncompetitive tenders totaling more than $1,000,000. A noncompetitive bidder may not have entered into an agreement, nor make an agreement to purchase or sell or otherwise dispose or any noncompetitive awards of this issue prior to the deadline for receipt of tenders.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and are on the list of reporting dealers published by the Federal Reserve Bank of New York, may submit tenders for accounts of customers if the names of the Customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.5. Tenders for their own account will be received without deposit from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; and Federal Reserve Banks. Tenders from all others must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.6. Immediately after the deadline for receipt of tenders, tenders will be opened, following by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, at a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.500. That stated rate of interest will be paid on all the Notes. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance of their bids. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price at the average yield is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of Notes specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for the Notes allotted must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on Notes allotted to institutional investors and to others whose tenders are accompanied by a guarantee as provided in section 3.5. must be made or completed on or before Thursday, August 31, 1989. Payment in full must accompany tenders submitted by all other investors. Payments must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Tuesday, August 29, 1989. In addition, Treasury Tax and Loan Note Option Depositaries may make payment for the Notes allotted for their own accounts and for accounts of customers by credit to their Treasury Tax and Loan Note Accounts on or before Thursday, August 31, 1989. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tendered and the purchase price is under par, the discount will be remitted to the bidder.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Notes allotted shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered definitive securities tendered in payment for the Notes allotted and to be held in TREASURY DIRECT are not required to be assigned if the inscription on the registered definitive security is identical to the registration of the note being purchased. In any such case, the tender form used to place the Notes allotted in TREASURY DIRECT must be completed to show all the information required thereon, or the TREASURY DIRECT account number previously obtained.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessery, to receive payment for, and to issue, maintain, service, and make payment on the Notes.

6.2. The Secretary of the Treasury may, at any time, supplement or amend provisions of this circular if such supplements or amendments do not adversely affect existing rights of holders of the Notes. Public announcement of such changes will be promptly provided.

6.3. The Notes issued under this circular shall be obligations of the United States, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Notes.

Gerald Murphy,

Fiscal Assistant Secretary.

[FR Doc. 89-20275 Filed 8-24-89; 10:13 am]

BILLING CODE 4810-40-M

[Department Circular—Public Debt Series—No. 25-89]

Treasury Notes of November 15, 1994, Series L-1994

Washington, August 17, 1989.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $7,750,000,000 of United States securities, designated Treasury Notes of November 15, 1994, Series L-1994 (CUSIP No. 912827 XY 3), hereafter referred to as Notes. The Notes will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the yield of each accepted bid. The interest rate on the Notes and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of the Notes may be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The Notes will be dated September 1, 1989, and will accrue interest from that date, payable on a semiannual basis on May 15, 1990, and each subsequent 6 months on November 15 and May 15 through the date that the principal becomes payable. They will mature November 15, 1994, and will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next business day.

2.2. The Notes are subject to all taxes imposed under the Internal Revenue Code of 1954. The Notes are exempt from all taxation now or hereafter imposed on the obligation or interest thereafter by any State, any possession of the United States, or any local taxing authority, except as provided in 31 U.S.C. 3124.

2.3. The Notes will be acceptable to secure deposits of Federal public monies. They will not be acceptable in payment of Federal taxes.

2.4. The Notes will be issued only in book-entry form in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000, and in multiples of those amounts. They will not be issued in registered definitive or in bearer form.

2.5. The Department of the Treasury's general regulations governing United States securities, i.e., Department of the Treasury Circular No. 300, current revision (31 CFR part 306), as to the extent applicable to marketable securities issued in book-entry form, and the regulations governing book-entry Treasury Bonds, Notes, and Bills, as adopted and published as a final rule to govern securities held in the TREASURY DIRECT Book-Entry Securities System in Department of the Treasury Circular, Public Debt Series, No. 2–86 (31 CFR part 357), apply to the Notes offered in this circular.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, DC, 20239–1500, prior to 1:00 p.m., Eastern Daylight Saving time, Wednesday, August 23, 1989. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, August 22, 1989, and received no later than Friday, September 1, 1989.

3.2. The par amount of Notes bid for must be stated on each tender. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield.

3.3. A single bidder, as defined in Treasury's single bidder guidelines, shall not submit noncompetitive tenders totaling more than $1,000,000. A noncompetitive bidder may not have entered into an agreement, nor make an agreement to purchase or sell or otherwise dispose of any noncompetitive awards of this issue prior to the deadline for receipt of tenders.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purposes are defined as dealers who make primary markets in Government securities and are on the list of reporting dealers published by the Federal Reserve Bank of New York, may submit tenders for accounts of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.5. Tenders for their own account will be received without deposit from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; and Federal Reserve Banks. Tenders from all others must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.6. Immediately after the deadline for receipt of tenders, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, at a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 98.750. That stated rate of interest will be paid on all of the Notes. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance of these bids. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price at the average yield is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of Notes specified in section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this section is final.

5. Payment and Delivery

5.1. Settlement for the Notes allotted must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on Notes allotted to institutional investors and to others whose tenders are accompanied by a guarantee as provided in section 3.5 must be made or completed on or before Friday, September 1, 1989. Payment in full must accompany tenders submitted

by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Wednesday, August 30, 1989. In addition, Treasury Tax and Loan Note Option Depositaries may make payment for the Notes allotted for their own accounts and for accounts of customers by credit to their Treasury Tax and Loan Note Accounts on or before Friday, September 1, 1989. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder.

5.2. In every case where full payment has been completed on time, an amount of up to 5 percent of the par amount of Notes allotted shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered definitive securities tendered in payment for the Notes allotted and to be held in TREASURY DIRECT are not required to be assigned if the inscription on the registered definitive security is identical to the registration of the note being purchased. In any such case, the tender form used to place the Notes allotted in TREASURY DIRECT must be completed to show all the information required thereon, or the TREASURY DIRECT account number previously obtained.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment for, and to issue, maintain, service, and make payment on the Notes.

6.2. The Secretary of the Treasury may, at any time, supplement or amend provisions of this circular if such supplements or amendments do not adversely affect existing rights of holders of the Notes. Public announcement of such changes will be promptly provided.

6.3. The Notes issued under this circular shall be obligations of the United States, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Notes.

Gerald Murphy,

Fiscal Assistant Secretary.

BILLING CODE 4810-40-M

DEPARTMENT OF VETERANS AFFAIRS

Information Collection Under Office of Management and Budget Review

AGENCY: Department of Veterans Affairs.

ACTION: Notice.

The Department of Veterans Affairs has submitted to OMB the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). This document lists the following information: (1) The agency responsible for sponsoring the information collection; (2) the title of the information collection; (3) the Department form number(s), if applicable; (4) a description of the need and its use; (5) frequency of the information collection, if applicable; (6) who will be required or asked to respond; (7) an estimate of the number of responses; (8) an estimate of the total number of hours needed to complete the information collection; and (9) an indication of whether section 3504(h) of Public Law 96–511 applies.

ADDRESSES: Copies of the proposed information collection and supporting documents may be obtained from John Turner, Veterans Benefits Administration, (203C), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233–2744.

Comments and questions about the items on the list should be directed to VA's OMB Desk Officer, Joseph Lackey, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, (202) 395–7316. Please do not send applications for benefits to the above addresses.

DATES: Comments on the information collection should be directed to the OMB Desk Officer on or before September 27, 1989.

Dated: August 16, 1989.

By direction of the Secretary.

David N. Stone,

Executive Assistant, Office of Information Management and Statistics.

Extension

1. Veterans Benefits Administration
2. Request for Information Concerning Medical, Legal or Other Expenses
3. VA Form 21–8416
4. This form is used to report medical, legal or other expenses paid in connection with claims for VA pension or other income-based benefits. These expenses may be excluded from countable income in determing the correct rate of VA benefit payment.
5. On occasion
6. Individuals or households
7. 56,400 responses
8. ⅙ hour
9. Not applicable

BILLING CODE 8320-01-M

Geriatrics and Gerontology Advisory Committee; Meeting

The Department of Veterans Affairs gives notice under Public Law 92–463 that a meeting of the Geriatrics and Gerontology Advisory Committee (GGAS) will be held September 28, 1989, at the VA Medical Center, 1660 S. Columbian Way, Seattle, Washington 98108 in Auditorium BB108. The purpose of the Geriatrics and Gerontology Advisory Committee is to advise the Secretary of Veterans Affairs and the Chief Medical Director relative to the care and treatment of the aging veterans, and to evaluate the Geriatric Research, Education and Clinical Centers. The meeting will convene at 8:30 a.m. and adjourn at 5:30 p.m. and is open to the public up to the seating capacity of the room. For those wishing to attend contact Jacqueline Holmes, Program Assistant, Office of Assistant Chief Medical Director for Geriatrics and Extended Care (phone 202/233–5983) prior to September 22, 1989.

The purpose of this meeting is to discuss activities of the Office of Geriatrics and Extended Care, future plans of the GGAC and review site visits to Portland and Spokane.

Dated: August 15, 1989.

By direction of the Secretary.

Sylvia Chaves Long,

Committee Management Officer.

BILLING CODE 8320-01-M

Veterans' Advisory Committee on Rehabilitation; Meeting

The Department of Veterans Affairs gives notice that a meeting of the Veterans' Advisory Committee on Rehabilitation, authorized by 38 U.S.C. 1521, will be held in Room 201, Building 65, Foot Root, N. Little Rock, AR 72115, September 12, 13, and 14, 1989. The sessions will begin at 9 a.m. The Committee will be discussing issues related to the administration of veterans' rehabilitation programs.

The meeting will be open to the public up to the seating capacity of the conference room. Because of the limited seating capacity, it will be necessary for those wishing to attend to contact Dr. Carole J. Westerman, Executive Secretary, Veterans' Advisory Committee on Rehabilitation (phone 202–233–6525) prior to September 6, 1989.

Interested persons may attend, appear before, or file statements with the Committee. Statements, if in written form, may be filed before or within 10 days after the meeting. Oral statements will be heard at 10 a.m. on September 13, 1989.

Dated: August 17, 1989.

By direction of the Secretary.

Sylvia Chavez Long,

Committee Management Officer.

Sunshine Act Meetings

Federal Register
Vol. 54, 165
Monday, August 28, 1989

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:06 p.m. on Tuesday, August 22, 1989, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider: (1) A memorandum regarding proposed revisions to the Corporation's General Travel regulations; (2) matters relating to the possible failure of certian insured banks; (3) matters relating to the Corporation's assistance agreements with insured banks; and (4) a personnel matter.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Director Robert L. Clarke (Comptroller of the Currency), concurred in by Chairman L. William Seidman and Director M. Danny Wall (Director of the Office of Thrift Supervision), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2), (c)(6), (c)(8), (c)(9)A)(ii), (c)(9)(B), and (c)(10)).

The meeting was held in the Board Room of the FDIC Building located at 550–17th Street, NW., Washington, DC.

Dated: August 23, 1989.

Federal Deposit Insurance Corporation,

Robert E. Feldman,

Deputy Executive Secretary.

NATIONAL MEDIATION BOARD

TIME AND DATE: 2:00 p.m., Wednesday, September 13, 1989.

PLACE: Board Hearing Room, 8th Floor, 1425 K Street, NW., Washington, DC.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Ratification of the Board actions taken by notation voting during the month of August, 1989.
2. Other priority matters which may come before the Board for which notice will be given at the earliest practicable time.

SUPPLEMENTARY INFORMATION: Copies of the monthly report of the Board's notation voting actions will be available from the Executive Director's office following the meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Charles R. Barnes, Executive Director, Tel: (202) 523–5920.

Date of Notice: August 21, 1989.

Charles R. Barnes,

Executive Director, National Mediation Board.

14 CFR Part 71

Proposed Alteration of the Seattle Terminal Control Area; Washington; Notice of Proposed Rulemaking

BEST COPY AVAILABLE

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 89-AWA-10]

Proposed Alteration of the Seattle Terminal Control Area; Washington

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the Seattle, WA, Terminal Control Area (TCA). This proposal would raise the upper limits of the TCA to 10,000 feet mean sea level (MSL) to enable air traffic control (ATC) to provide terminal ATC service to arriving and departing turbojet aircraft in a TCA environment throughout transition to an from the en route structure. Additionally, this proposal would extend the lateral limits of the TCA north and south to 30 nautical miles, east and west to 18 nautical miles from the airport, to provide an area wherein ATC can provide TCA control and services throughout critical maneuvering phases of flight operations in the terminal area. This proposal redefines several existing subareas which would enhance air traffic procedures and simplify visual flight rules (VFR) transient operations outside TCA airspace.

DATES: Comments must be received on or before October 27, 1989.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket [AGC-10], Airspace Docket No. 89-AWA-10, 800 Independence Avenue, SW., Washington, DC 20591.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, DC.

An informal docket may also be examined during normal business hours at the Office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Betty W. Harrison, Airspace Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 10591; telephone: (202) 267-9255.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89-AWA-10." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contaned in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Centr, APA-230, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267-3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Cicular No. 11-2A which describes the application procedure.

Related Rulemaking Actions

On May 21, 1970, the FAA published Federal Aviation Regulation (FAR) Amendment 91-78 (35 FR 7782) which enabled the establishment of TCA's. On October 14, 1988, the FAA published a final rule which revised the classification and pilot/equipment requirements for conducting operations in a TCA (53 FR 40318). Specifically, the rule: (a) Establishes a single-class TCA; (b) requires the pilot-in-command of a civil aircraft operating within a TCA to hold at least a private pilot certificate, except for a student pilot who has received certain documented training; and (c) eliminates the helicopter exception from the minimum navigational equipment requirement.

The FAA published a final rule on June 21, 1988, which requires Mode C equipment when operating within 30 nautical miles of any designated TCA primary airport from the surface up to 10,000 feet MSL, except for operations by certain aircraft types specifically excluded (53 FR 23356).

On February 3, 1987, the FAA published a final rule which established requirements pertaining to the use, installation, inspection, and testing of Air Traffic Control Radar Beacon System (ATCRBS) and Mode S transponders in U.S.-registered civil aircraft (53 FR 3380). The rule adopted continues to require a transponder for operation in each TCA.

Background

The TCA program was developed to reduce the midair collision potential in the congested airspace surrounding airports with high density air traffic by providing an area in which all aircraft will be subject to certain operating rules and equipment requirements.

The density of traffic and the types of operations being conducted in the airspace surrounding major terminals increase the probability of midair collisions. In 1970, an extensive study found that the majority of midair collisions occurred between a general aviation (GA) aircraft and an air carrier, military or another GA aircraft. The basic causal factor common to these conflicts was the mix of uncontrolled aircraft operating under VFR and controlled aircraft operating under instrument flight rules (IFR). TCA's provide a method to accommodate the increasing number of IFR and VFR operations. The regulatory requirements of TCA airspace afford the greatest protection for the greatest number of people by providing TC with an increased capability to provide aircraft separation service, thereby minimizing the mix of controlled and uncontrolled aircraft.

To date, the FAA has established a total of 24 TCA's. The FAA is proposing to take action to modify or implement the application of these proven control techniques to more airports to provide greater protection of air traffic in the airspace regions most commonly used by passenger-carrying aircraft.

Pre-NPRM Public Input

Airspace Meetings

Informal airspace meetings were held in the Seattle area on November 29, 30, and December 2, 1988. These meetings permitted local aviation interests and airspace users an opportunity to give their input on the proposed alteration of the Seattle TCA.

Over 100 written comments were received during the public comment period following the informal airspace meetings. These comments were from a congressional office, aviation organizations and services, helicopter and fixed-wing aircraft pilots, balloonists, sport parachutists, glider pilots, and a newspaper for aviation interests and private citizens.

The comments received addressed the FAA's proposed alteration as presented at the informal airspace meetings. Public comments, along with FAA findings and justifications, are summarized as follows:

1. Many commenters requested Boeing Field be excluded from the surface area of the TCA. The reasons given for this request are the expected delays departing/arriving Boeng Field caused from: (1) Increased contoller/pilot communications; (2) beacon-code assignments; (3) increased separation requirements; and (4) airspace saturation. Certain parties were concerned that some student pilots would opt to relocate because of the additional cost incurred from delays.

The FAA analyzed all comments concerning the design of the TCA around Boeing Field and excluded Boeing Field from its proposed alteration.

2. Many commenters opposed a 12,500 foot MSL ceiling. Commenters felt that if services were unavailable or not desired within the TCA, the option to overfly the ceiling of the TCA would be eliminated for most users.

The FAA adopted this suggestion and lowered the proposed ceiling to 10,000 feet MSL.

3. Some commenters felt that the TCA altitudes over Puget Sound were too low. Fixed winged and helicopter pilots favored altitudes that would allow operations over the area without TCA involvement.

The proposed TCA design has a 2,000-foot MSL floor directly east of, and within 4 nautical miles, of the Seattle-Tacoma International Airport, and a 3,000-foot floor outside of 4 nautical miles. This configuration would provide sufficient airspace below the TCA for nonparticipating aircraft in the Puget Sound area without compromising safety inside the TCA.

4. Several commenters suggested that the FAA raise the TCA floor overlaying the Auburn Airport. Commenters stated that sufficient airspace is not available for aircraft entering the traffic pattern. A comment from a hot air balloon club stated that a TCA floor of less than 3,000 feet MSL would restrict ballooning in the Auburn area.

The FAA agrees with these comments and will retain the 3,000 foot MSL floor in the Auburn Airport area in this NPRM.

5. Some comments received suggested the FAA avoid using VFR altitudes in the designation of the TCA floor. These altitudes would preclude the use of certain VFR altitudes in the affected areas.

This suggestion was adopted and is reflected in this NPRM.

6. Several comments were received requesting the FAA to raise the floor of the proposed alteration, east of Seattle-Tacoma International Airport, to provide sufficient airspace for aircraft not requesting TCA service.

In the proposal, the FAA raised a TCA segment beyond 9 nautical miles east of the Seattle-Tacoma International Airport to 6,000 feet MSL. This alteration would allow VFR aircraft ample airspace along the west slope of the Cascades. Two TCA segments, northeast and southeast of Seattle-Tacoma International Airport, were raised to 5,000 feet MSL. An area 18 nautical miles east of the Seattle-Tacoma International Airport was eliminated because of high terrain. The TCA floor was raised to 8,000 feet MSL, 20 nautical miles southeast of the Seattle-Tacoma International Airport, to accommodate a private airport's glider operations. However, the TCA floor will remain at 3,000 feet MSL, 23 nautical miles northeast of the Seattle-Tacoma International Airport. This area protects a major IFR route.

7. A parachuting club requested the TCA floor be raised to 8,000 feet MSL, 28 nautical miles south of the Seattle-Tacoma International Airport. This would provide sufficient airspace for jumps without TCA involvement.

The FAA finds that during periods of adverse weather or traffic saturation, it becomes necessary to extend the final approach segment of Runway 34. When this extension is required, the airspace in the vicinity of the parachuting club is affected from 6,000 feet MSL and above, thus precluding parachuting activity. Jump operations would, however, be available during favorable weather and lighter traffic periods.

8. Many commenters felt that visual landmarks should be used to define the TCA boundaries. Other commenters expressed concern over the use of more than one navigational aid (NAVAID) to define different segments in the FAA's "straw man" proposal.

The boundaries of the design proposed herein as defined by radials and distance measuring equipment (DME) distances from the Seattle very high frequency omni-directional radio range and tactical air navigational aid (VORTAC), prominent geographic landmarks, and lines of longitude that coincide with prominent geographical landmarks. Many of the radials and DME arcs contained in this proposal define the existing TCA.

9. Some commenters requested to delete V-287 from the TCA. Federal Airway V-287 provides a north/south routing west of the Seattle-Tacoma International Airport for aircraft not desiring TCA services.

Two of the four primary inbound and outbound routes for the Seattle area overlie segments of V-287. For this reason, the proposed design retains same airspace along V-287. However, based on user input, the proposed TCA floor in these areas would be raised to 8,000 feet MSL. This would provide altitudes of up to 6,500 feet MSL and 7,500 feet MSL for VFR flight along V-287 without TCA clearance.

10. Comments were received requesting a VFR corridor extending east/west over the Seattle-Tacoma International Airport where a clearance would not be required.

Presently, east/west flights are accommodated within the TCA with negligible delays. Air traffic control provides radar vectors and control techniques acooding to traffic demands in the area surrounding the Seattle-Tacoma International Airport. The FAA feels that the suggested corridor would not create a safer or more efficient environment.

11. Some commenters felt that extending the TCA outward to 30 nautical miles is not necessary.

The proposed design has areas that extend to 30 nautical miles over arrival gates or on final approach segments. These areas are needed to protect aircraft in critical stages of flight. However, the TCA floor in these areas is no lower than 6,000 feet MSL. This will allow VFR aircraft sufficient airspace below the TCA.

12. Many commenters feel that there is no need to modify the current Seattle TCA.

Since the TCA's implementation in 1974, traffic increases and operational conditions dictate a need to modify the current TCA. The present volume of traffic cannot be accommodated by the present TCA airspace. This proposal takes into consideration updated procedures and provides TCA airspace for all IFR operations requiring TCA protection, while providng airspace for VFR operations.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to modify the TCA at Seattle, WA. The increase in annual enplaned passengers at the Seattle-Tacoma International Airport is 7,178,491 which dictates a need to alter the present TCA configuration. This alteration will better serve the users, as well as the FAA, by providing airspace configured to handle new procedures and the increased amount of operations. The FAA has determined that modifying the TCA at the Seattle-Tacoma International Airport is in the interest of flight safety and will result in a greater degree of protection for the greatest number of people during flight in the terminal area. The proposed alteration is depicted on the attached chart.

Section 91.90 of part 91 of the Federal Aviation Regulations (14 CFR part 91) defines TCA's and prescribes operating rules for aircraft in airspace designated as a TCA. The TCA rule provides, in part, that prior to entering the TCA, any pilot arriving at any airport within the TCA or flying through the TCA must: (1) Obtain appropriate authorization from ATC; (2) comply with applicable procedures established by ATC for pilot training operations at an airport within a TCA; (3) hold at least a private pilot certificate; and (4) meet the requirements of § 61.95 of the Federal Aviation Regulations if the aircraft is operated by a student pilot.

Any aircraft arriving at any airport within a TCA or flying through a TCA must: have an operable VOR or TACAN receiver; have an operable two-way radio capable of communications with ATC on appropriate frequencies for that TCA; and be equipped with the applicable operating transponder and automatic altitude-reporting equipment specified in paragraph (a) of § 91.24 of the Federal Aviation Regulations, except as provided in paragraph (d) of that section. Unless otherwise authorized by ATC, all large, turbine-engine aircraft operating to or from a primary airport must be operated above the designated floors of a TCA. The pilot of any aircraft departing from an airport located within a TCA is required to receive a clearance from ATC prior to takeoff.

All aircraft operating within a TCA are required to comply with all ATC clearances and instructions, and any FAA arrival or departure traffic pattern for the airport of intended operation. However, the TCA rule permits ATC to authorize deviations from any of the operating requirements of the rule when safety considerations justify the deviation or more efficient utilization of the airspace can be attained. Ultralight vehicle operations and parachute jumps in a TCA may only be conducted under the terms of an ATC authorization.

Definitions, operating requirements, and specific airspace designations applicable to TCA's may be found in §§ 71.12, 71.401, and 71.403 of part 71 of the Federal Aviation Regulations (14 CFR part 71); and §§ 91.1 and 91.90 of part 91 of the Federal Aviation Regulations (14 CFR part 91).

The standard configuration of a TCA consists of three concentric circles centered on the primary airport extending to 10, 20, and 30 nautical miles respectively. The vertical limits of the TCA are 12,500 feet MSL, with the floor established at the surface in the inner area and at levels appropriate to containment of operations in the outer areas. Variations of these criteria may be authorized contingent upon terrain, adjacent regulatory airspace, and factors unique to the terminal area. The airspace configuration proposed herein is the result of an extensive staff study conducted by the local FAA authority after obtaining public input from informal airspace meetings and coordinating with the FAA regional office. The FAA has determined that the proposed alteration of airspace for the Seattle TCA is consistent with TCA objectives. The proposed configuration considers the present terminal area flight operations and terrain as follows:

1. This alteration basically retains the structure of the existing inner-core area and that airspace overlying Boeing Field. Some airspace is added east and west of the Seattle-Tacoma International Airport. Additional airspace is required to protect the Runway 16 final approach course for aircraft transitioning to final approach visually or on radar vectors for an instrument approach. An extension of 12 miles is added to the north and south of the inner core area. The Puget Sound shoreline is used to depict the TCA boundary.
2. The intermediate area retains the 3,000-foot MSL floor of the existing TCA west of the Seattle-Tacoma International Airport. The TCA floor beyond 11 nautical miles is raised from 3,000 feet MSL to 6,000 feet MSL. This would provide an additional 3,000 feet for nonparticipating aircraft in the Bremerton and Port Orchard areas. A 3,000-foot MSL TCA floor is added to the area east of the Seattle-Tacoma International Airport to accommodate downwind traffic in the radar traffic pattern for the primary airport. This airspace is needed for aircraft transitioning to the final approach course from downwind and base legs. The intermediate area is defined by an 18-mile DME arc, radials of the Seattle VORTAC, and longitude lines.
3. The outer area, with floors varying from 5,000 to 8,000 feet MSL, provides airspace for aircraft transitioning from the en route to the terminal environment. Turbojet and turboprop aircraft would enter terminal airspace from four designated areas. These areas contain 8,000-foot MSL floors to provide airspace necessary for aircraft descending into the TCA. The outer area is designed for vectoring and sequencing aircraft for the final approach course, while preserving airspace below the TCA for nonparticipating aircraft.

The preceding summary of the proposed alteration of the TCA airspace configuration identifies that airspace which is necessary to contain large turbojet aircraft operations at the Seattle-Tacoma International Airport. Air traffic control would provide control and separation of all flights within the proposed airspace boundaries. Furthermore, ATC authorization is required for aircraft operations within that airspace. Modifying this TCA would greatly enhance the safety of flight within the congested airspace overlying the Seattle metropolitan area by facilitating the separation of controlled and uncontrolled flight operations. Section 71.403 of part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6E dated January 3, 1989.

Regulatory Evaluation Summary

The FAA is required to examine the potential benefits and costs of each proposed rulemaking action to ensure that the public is not burdened with rules where costs outweigh benefits. This section of the preamble evaluates both quantitatively and qualitatively, to the maximum possible extent, the potential costs and benefits expected to accrue from the proposed modification of the Seattle TCA.

Costs-Benefits Analysis

a. Costs

The FAA believes that there would be no costs associated with the implementation of this proposed rule either to the agency or to aircraft operators for the reasons discussed below.

In terms of the FAA, the proposed rule would not impose any additional administrative cost in terms of either personnel or equipment. The additional operations workload generated by the proposed rule would be absorbed by current personnel and equipment resources which are already in place at the Seattle TCA.

In terms of aircraft operators, the proposed rule would not impose any additional costs either in the form of avionics equipment or circumnavigation. The proposed rule would not adversely impact aircraft operators operating under instrument flight rules (IFR). Aircraft operators operating routinely under IFR conditions primarily consist of large air carrier, business jet, commuter, and air taxi operators. Thus, the proposed rule would potentially impact aircraft operators operating routinely under visual flight rules (VFR). Those aircraft operators operating routinely under VFR conditions primarily consist of small, general aviation (GA) (single-engine, piston) operators and other GA aircraft operators such as glider and balloon operators. Other airspace user groups operating within the proximity of the Seattle TCA would also be potentially impacted by the proposed rule. Such user groups would consist of sport parachutists and some student pilots.

Under the proposed rule, the TCA ceiling would be raised from 7,000 feet MSL to 10,000 feet MSL. Since the subject GA aircraft operators and user groups rarely, if ever, operate in airspace above 10,000 feet MSL, the focus of potential cost impact falls on the proposed expanded segments of the TCA floor. As a result of the proposed rule, expanded segments of the TCA floor would range from 5,000 feet to 8,000 feet MSL. While enhancing aviation safety, the proposed expanded segments of the TCA floor would be adopted with all due consideration to small GA airplane operators, glider pilots, and balloonists.

The proposal would allow such aircraft operators to circumnavigate the Seattle TCA in a manner that would not require much deviation from current flying practices. Thus, this proposal would permit such operators to operate their respective aircraft beneath the expanded segments of the TCA floor. This assessment also holds true for sport parachutists. The expanded segments of the proposed TCA floor would be adopted at 8,000 feet MSL to provide sufficient airspace for jumps on the part of sport parachutists without TCA involvement. The proposed rule would not have an adverse impact on student pilots because Boeing Field, where most flight instruction is conducted, would remain outside of the TCA.

b. Benefits

The proposed rule is expected to generate potential benefits primarily in the form of enhanced safety to the aviation community and the flying public. Such safety would take the form of reduced casualty losses (namely, aviation fatalities and property damage) as a result of the lowered likelihood of midair collisions due to the increase in positive control airspace for the Seattle TCA.

The proposed expansion of the Seattle TCA would restrict more of the airspace to controlled aircraft operations from 7,000 feet to 10,000 feet MSL, and along the northern, southern, western, and eastern lateral boundaries. Due to the proactive nature of the proposed rule, the potential safety benefits are extremely difficult, if not impossible, to quantify in monetary terms. The proposed rule is proactive in the sense that the FAA is taking action to prevent a safety problem from occurring. In this case the symptom is increased complexity (or density) of aircraft operations in the vicinity of the present ceiling and lateral boundaries of the Seattle TCA. As the result of the increased complexity of aircraft operations, the controlled airspace is proposed to be expanded in the aforementioned areas of the TCA.

Up to now, safety has been maintained in the vicinity of the existing Seattle TCA in the face of steady growth in activity by such measures as traffic management and procedural changes. While the FAA believes that these measures will not be adequate in the future, they have been successful in the past as evidenced by a record of no midair collisions in the TCA. Without documented evidence of a midair collision in the Seattle TCA, estimating the probability of a potential occurrence in the absence of this proposal cannot be determined with a reliable degree of certainty. Despite this difficulty, the FAA believes that certain measures must be taken to maximize aviation safety. In the absence of this proposal, aviation safety in the vicinity of the TCA would be expected to become critical and lead to potentially catastrophic consequences.

Ordinarily, the potential safety benefits of the proposed rule would be an incremental reduction in the likelihood of all midair collisions caused by the proposed TCA modification as opposed to the existing TCA configuration. However, with the presence of the Mode C rule (and to some extent, the TCAS rule), the number of potential midair collisions avoided by this proposal is expected to be significantly lower. Nevertheless, this proposal is still expected to accrue benefits in terms of enhanced aviation safety, though on a much smaller scale. Thus, the potential safety benefits of this proposal and the Mode C and TCAS rules are considered to be inextricably linked.

In view of the estimated zero cost of compliance and enhanced aviation safety, the FAA firmly believes the proposed rule is cost-beneficial.

The regulatory evaluation that has been placed in the docket contains additional detailed information related to the costs and benefits that are expected to accrue from implementation of this proposed rule.

Initial Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (RFA) was enacted to ensure that small entities are not unnecessarily and disproportionately burdened by government regulations. The RFA requires agencies to review rules which may have "a significant economic impact on a substantial number of small entities."

The small entities which could be potentially affected by the implementation of this proposed rule are unscheduled operators of aircraft for hire owning nine or fewer aircraft.

Only those unscheduled aircraft operators without the capability to operate under IFR conditions would be impacted by the proposed rule. The FAA believes that all of the potentially impacted unscheduled aircraft operators are already equipped to operate under IFR conditions. This is because such operators fly regularly around airports where radar approach control services have been established. Therefore, the FAA believes this proposed rule would not have a significant economic impact on a substantial number of small entities.

International Trade Impact Assessment

The proposed rule would neither have an effect on the sale of foreign aviation products or services in the United States, nor would it have an effect on the sale of U.S. products or services in foreign countries. This is because the proposed rule would neither impose costs on aircraft operators nor aircraft manufacturers (U.S. or foreign).

Federalism Implications

This proposed regulation would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, preparation of a Federalism assessment is not warranted.

Conclusion

For the reasons discussed under "Regulatory Evaluation," the FAA has determined that this proposed regulation (1) is not a "major rule" under Executive Order 12291; and (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). It is certified that this proposal, if adopted, would not have a significant economic impact on a substantial number of small entities.

Aviation safety, Terminal control areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.403 [Amended]

2. Section 71.403 is amended as follows:

Seattle, WA [Revised]

Primary Airport. Seattle-Tacoma International Airport (lat. 47°27'57" N., long. 122°18'29" W.).

Boundaries. Based on Seattle VORTAC (SEA) (lat. 47°26'08" N., long. 122°18'30" W.) arcs, DME distances, radials, lines of longitude, and the Puget Sound shoreline.

Area A. That airspace extending upward from the surface to and including 10,000 feet MSL within an area bounded by a line beginning at the 2-mile DME on the SEA 012° radial to a point on the 4-mile arc of the SEA 007° radial, then counterclockwise along the 4-mile arc of the SEA 007° radial to the Puget Sound shoreline then south along the Puget Sound shoreline to the 2-mile arc of the SEA VORTAC then counterclockwise along the 2-mile arc of the SEA VORTAC to the SEA 192° radial extending to the 6-mile arc of the SEA 192° radial then counterclockwise along the 6-mile arc of the SEA VORTAC to the SEA 163° radial extending to the 2-mile arc of the SEA 192° radial then counterclockwise along the 2-mile arc of the Seattle VORTAC to the point of beginning.

Area B. That airspace extending upward from 1,100 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 4-mile DME point on the SEA 007° radial extending to the 6-mile arc of the SEA 007° radial then counterclockwise along the 6-mile arc of the SEA VORTAC to the SEA 342° radial to the 4-mile arc of the SEA 342° radial then clockwise along the 4-mile arc of the SEA VORTAC to the point of beginning.

Area C. That airspace extending upward from 1,800 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 6-mile DME on the SEA 192° radial to the 12-mile arc of the SEA 192° radial then counterclockwise along the 12-mile arc of the SEA VORTAC to the SEA 163° radial to the 6-mile arc of the SEA 163° radial then clockwise along the 6-mile arc of the SEA VORTAC to the point of beginning.

Area D. That airspace extending upward from 1,800 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 6-mile arc of the SEA 007° radial then counterclockwise along the 6-mile arc of the SEA VORTAC to the SEA 342° radial to the 12-mile arc of the SEA 342° radial then clockwise along the 12-mile arc of the SEA VORTAC of the SEA 007° radial to the point of beginning.

Area E. That airspace extending upward from 2,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 4-mile arc of the SEA 192° radial then clockwise along the 4-mile arc of the SEA VORTAC to the Puget Sound shoreline then south along the Puget Sound shoreline to the 2-mile arc of the SEA VORTAC counterclockwise along the 2-mile arc of the SEA VORTAC to the SEA 192° radial to the point of beginning.

Area F. That airspace extending upward from 2,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 4-mile DME on the SEA 342° radial and extending north on the 342° radial to the Puget Sound shoreline then south along the Puget Sound shoreline to the 4-mile arc of the SEA VORTAC then clockwise along the 4-mile arc of the SEA VORTAC to the point of beginning.

Area G. That airspace extending upward from 2,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 2-mile arc of the SEA 012° radial then clockwise along the 2-mile arc of the Seattle VORTAC to the SEA 163° radial to the 4-mile arc of the SEA 163° radial then counterclockwise along the 4-mile arc of the Seattle VORTAC to the SEA 022° radial to the 12-mile arc of the SEA 022° radial then counterclockwise along the 12-mile arc of the Seattle VORTAC to the SEA 007° radial to the 4-mile DME of the SEA 007° radial to the point of beginning.

Area H. That airspace extending upward from 3,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 18-mile arc of the SEA 322° radial then clockwise along the 18-mile arc of the Seattle VORTAC to the SEA 032° radial then southwest along the SEA 032° radial to a point at lat. 47°30'17" N., long. 122°06'20" W.; to lat 47°17'14" N., long. 122°06'20" W.; then southeast on the SEA 137° radial to the 18-mile arc of the SEA 137° radial then clockwise along the 18-mile arc of the Seattle VORTAC to the SEA 232° radial then northeast on the SEA 232° radial to a point at lat. 47°16'52" N., long. 122°32'10" W.; to lat. 47°37'56" N., long. 122°32'10" W.; to the point of beginning, excluding that airspace in the Areas A through G.

Area I. That airspace extending upward from 5,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 18-mile arc of the SEA 322° radial then clockwise along the 18-mile arc of the Seattle VORTAC to the SEA 032° radial extending to the 22-mile arc of the SEA 032° radial then counterclockwise along the 22-mile arc of the Seattle VORTAC to the SEA 322° radial to the point of beginning.

Area J. That airspace extending upward from 5,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 18-mile arc of the SEA 032° radial then clockwise along the 18-mile arc of the Seattle VORTAC to the SEA 052° radial to a point at lat. 47°32'34" N., long. 122°06'20" W.; to lat. 47°30'17" N., long. 122°06'20" W.; to the point of beginning.

Area K. That airspace extending upward from 5,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 18-mile arc of the SEA 117° radial then clockwise to the SEA 137° radial then northwest on the SEA 137° radial to a point at lat. 47°17'14" N., long. 122°06'20" W.; to lat. 47°21'55" N., long. 122°06'20" W.; then southeast on the SEA 117° radial to the point of beginning.

Area L. That airspace extending upward from 5,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 18-mile arc of the SEA 192° radial then counterclockwise along the 18-mile arc of the Seattle VORTAC to the SEA 163° radial extending to the 25-mile arc of the SEA 163° radial then clockwise along the 25-mile arc of the Seattle VORTAC to the SEA 192° radial to the point of beginning.

Area M. That airspace extending upward from 6,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 18-mile arc of the SEA 322° radial then counterclockwise along the 18-mile arc of the Seattle VORTAC to the SEA 232° radial then northeast on the SEA 232° radial to a point at lat. 47°16'52" N., long. 122°32'10" W.; to lat. 47°37'56" N., long. 122°32'10" W.; to the point of beginning.

Area N. That airspace extending upward from 6,000 feet MSL to and including 10,000 feet MSL within in area bounded by a line beginning at the 18-mile arc of the SEA 052° radial then clockwise along the 18-mile arc of the Seattle VORTAC to the SEA 117° radial then northwest on the SEA 117° radial to a point at lat. 47°21'55" N., long. 122°06'20" W.; to lat. 47°32'34" N., long. 122°06'20" W.; then northeast on the SEA 052° radial to the point of beginning.

Area O. That airspace extending upward from 6,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 22-mile arc of the SEA 342° radial then clockwwise along the 22-mile arc of the Seattle VORTAC to the SEA 032° radial to the 30-mile arc of the SEA 032° radial then counterclockwise along the 30-mile arc of the Seattle VORTAC to the SEA 342° radial to the point of beginning.

Area P. That airspace extending upward from 6,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 18-mile arc of the SEA 232° radial then counterclockwise along the 18-mile arc of the Seattle VORTAC to the SEA 192° radial to the 25-mile arc of the SEA 192° radial then clockwise along the 25-mile arc of the Seattle VORTAC to the SEA 232° radial to the point of beginning.

Area Q. That airspace extending upward from 6,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 25-mile arc of the SEA 192° radial then counterclockwise along the 25-mile arc of the Seattle VORTAC to the SEA 163° radial to the 30-mile arc of the SEA 163° radial then clockwise along the 30-mile arc of the Seattle VORTAC to the SEA 192° radial to the point of beginning.

Area R. That airspace extending upward from 6,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 18-mile arc of the SEA 163° radial then counterclockwise along the 18-mile arc of the Seattle VORTAC to the SEA 137° radial to the 25-mile arc of the SEA 137° radial then clockwise along the 25-mile arc of the Seattle VORTAC to the SEA 163° radial to the point of beginning.

Area S. That airspace extending upward from 8,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 18-mile arc of the SEA 137° radial then counterclockwise along the 18-mile arc of the Seattle VORTAC to the SEA 117° radial to the 30-mile arc of the SEA 117° radial then clockwise along the 30-mile arc of the Seattle VORTAC to the SEA 137° radial to the point of beginning.

Area T. That airspace extending upward from 8,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 18-mile arc of the SEA 032° radial then clockwise along the 18-mile arc of the Seattle VORTAC to the SEA 052° radial to the 30-mile arc of the SEA 052° radial then counterclockwise along the 30-mile arc of the Seattle VORTAC to the SEA 032° radial to the point of beginning.

Area U. That airspace extending upward from 8,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 22-mile arc of the SEA 342° radial then counterclockwise along the 22-mile arc of the Seattle VORTAC to the SEA 322° radial to the 30-mile arc of the SEA 322° radial then clockwise along the 30-mile arc of the Seattle VORTAC to the SEA 342° radial to the point of beginning.

Area V. That airspace extending upward from 8,000 feet MSL to and including 10,000 feet MSL within an area bounded by a line beginning at the 25-mile arc of the SEA 232° radial then counterclockwise along the 25-mile arc of the Seattle VORTAC to the SEA 219° radial extending to the 30-mile arc of the SEA 219° radial then clockwise along the 30-mile arc of the Seattle VORTAC to the SEA 232° radial to the point of beginning.

Issued in Washington, DC, on August 17, 1989.

Harold W. Becker,

Manager, Airspace-Rules and Aeronautical Information Division.

Office of Management and Budget

Initial Sequester Report to the President and Congress for Fiscal Year 1990

OFFICE OF MANAGEMENT AND

OFFICE OF MANAGEMENT AND BUDGET

Initial Sequester Report to the President and Congress for Fiscal Year 1990

AGENCY: Office of Management and Budget.

ACTION: Report Transmittal.

SUMMARY: This notice transmits the Initial OMB Sequester Report to the President and Congress for Fiscal Year 1990 in accordance with the provisions of the Balanced Budget and Emergency Deficit Control Act of 1985 (Pub. L. 99–177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Pub. L. 100–119).

Date: August 25, 1989.

Richard G. Darman,

Director.

Dear Mr. President:

Enclosed is the Initial OMB Sequester Report to the President and Congress for Fiscal Year 1990. It is being submitted to you today, August 25, 1989, pursuant to Section 251 of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended.

Respectfully yours,

Richard G. Darman

HONORABLE THOMAS S. FOLEY

INITIAL OMB SEQUESTER REPORT TO THE PRESIDENT AND CONGRESS FOR FISCAL YEAR 1990

August 21, 1989

NOTE

Section 251(a)(2)(B) of the Balanced Budget and Emergency Deficit Control Act, as amended, requires that the initial OMB sequester report be submitted to the President and the Congress on August 25th. This report, issued August 21, 1989, will be resubmitted without change on August 25th, and will be published in the *Federal Register* pursuant to Section 251(b), in compliance with law.

EXECUTIVE OFFICE OF THE PRESIDENT
OFFICE OF MANAGEMENT AND BUDGET
WASHINGTON, D.C. 20503

THE DIRECTOR

The following is the text of a letter transmitting the Initial OMB Sequester Report to the President and Congress for Fiscal Year 1990.

August 21, 1989

The President
The White House
Washington, DC 20500

Dear Mr. President:

Enclosed please find the *Initial OMB Sequester Report to the President and Congress for Fiscal Year 1990*. It has been prepared in accordance with the requirements of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99–177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100–119).

The budget estimates contained in this report are based on economic and technical assumptions published by the Office of Management and Budget in the July 18th Mid-Session Review, and on laws enacted and final regulations promulgated as of August 15, 1989.

The report finds that, under current law, sequestration would be necessary in October in order to meet the Gramm-Rudman-Hollings deficit reduction target. Accordingly, an initial Presidential sequestration order has been prepared for issuance on August 25th. It would require the withholding of funds as of October 1st.

But sequestration remains avoidable. As you know, Congress and the Administration reached a Bipartisan Budget Agreement in April. If the Agreement were fully implemented, sequestration would not be necessary. Although there has been some progress toward its implementation, virtually none of the reconciliation legislation required to fulfill the terms of the Agreement has yet been enacted. As a result, this initial sequester report estimates the fiscal year 1990 deficit to be $16.2 billion above the $100 billion deficit target. If there were no change in law by the snapshot date of the final report, a final $16.2 billion sequester order would go into effect.

If, on the other hand, appropriations bills were enacted at levels consistent with the Agreement, and if (as the House intends) the military pay shift were not permitted, then the reconciliation process would have to produce net savings of at least $12.0 billion in order to avoid sequester. If appropriations bills were to exceed the Agreement levels (according to OMB scoring), the amount saved through reconciliation would have to be correspondingly higher in order to avoid sequester. The Congressional Budget Resolution calls for reconciliation savings of about $14 billion. Full implementation of the Budget Resolution should be sufficient to avoid sequester.

This report provides calculations of the amounts and percentages by which various budgetary resources would be reduced under current law—that is, under the assumption of a necessary $16.2 billion sequester. As required by law, the report includes projected budget baseline levels, economic assumptions, a discussion of the sequestration calculations, and comparisons with the estimates provided by the Director of the Congressional Budget Office in his report of August 21st. It also includes an assessment of the risk of sequester and an illustrative discussion of associated programmatic effects. The appendix lists sequestration reductions by agency and budget account.

IDENTICAL LETTERS SENT TO HONORABLE DAN QUAYLE, HONORABLE THOMAS S. FOLEY

The risk of sequester is greater than implied in the baseline deficit estimate taken by itself—as the report explains. But it remains my hope, and my cautiously optimistic expectation, that necessary legislation may be enacted prior to the snapshot date of the final report in order to avoid sequestration.

Respectfully yours,

Richard G. Darman
Director

GENERAL NOTES

1. All years referred to are fiscal years unless otherwise noted.
2. Details in the tables and text may not add to totals because of rounding.
3. Unless otherwise noted, the source of all data in this report is the Office of Management and Budget.
4. Unless otherwise noted, "the Act" refers to the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99–177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100–119).

I. THE BASELINE DEFICIT

The Balanced Budget and Emergency Deficit Control Act of 1985, as amended, (commonly known as Gramm-Rudman-Hollings, or G-R-H) sets deficit targets for 1990 through 1993. The Act requires automatic reductions in selected programs (a sequester) to achieve these targets if they cannot be reached through the legislative process. The table below shows the deficit targets specified in the Act. Except in 1993, the Act allows for a $10 billion margin-of-error. Thus, there will be no sequester for 1990 unless the deficit in the final sequester report exceeds the sequester trigger level of $110 billion. However, if the 1990 G-R-H baseline deficit exceeds $110 billion, the Act requires a sequester sufficient to reduce the baseline deficit to the target level of $100 billion.

Deficit Targets

(In billions of dollars)

Fiscal Year	Target Deficit	Sequester Trigger
1990	100.0	110.0
1991	64.0	74.0
1992	28.0	38.0
1993	zero	zero

Under the Act, the Director of the Office of Management and Budget (OMB) is obliged to determine each year whether or not sequestration is necessary and, if so, the magnitude of the sequester. The Congressional Budget Office (CBO) is obliged to prepare independently its own sequestration reports. The CBO reports are transmitted to the Director of OMB and to Congress, and provide a basis for comparison against which Congress and others may assess the OMB reports. The OMB reports to the President and the Congress provide the basis for sequestration orders to be issued by the President. The timetable for the OMB and CBO reports and Presidential orders for calendar year 1989 is as follows:

Report or Order	Date
Snapshot date for initial OMB and CBO reports	August 15th
Initial CBO report	August 21st
Initial OMB report	August 25th
Initial Presidential order	August 25th
Revised CBO report	October 10th
Revised OMB report	October 16th
Final Presidential order	October 16th

OMB issued an estimate of the G-R-H baseline deficit in the Mid-Session Review of the Budget, which was published on July 18, 1989. Under the Act, subsequent G-R-H reports must use the same economic and technical assumptions as in the Mid-Session Review. CBO is issuing its initial sequestration report on August 21st. The next step in the G-R-H process is the issuance of this report. Both the initial OMB and CBO sequestration reports are based on laws enacted and regulations promulgated as final as of August 15th (the snapshot date).

As required by the Act, this report:

—estimates the 1990 G-R-H baseline deficit, using the economic and technical assumptions OMB used in the Mid-Session Review;

—calculates the sequester amounts required; and

—presents and explains significant differences between the estimates in this report and the estimates in the CBO report.

This report shows the G-R-H baseline deficit to be $116.2 billion, $16.2 billion above the $100 billion deficit target specified in the Act for 1990 and $6.2 billion above the level that would trigger a sequester. These estimates differ from those presented in the Mid-Session Review of the Budget primarily as a result of the enactment of the Financial Institutions Reform, Recovery, and Enforcement Act and the Disaster Assistance Act. Because these estimates indicate that, under current law, a sequester would be required for 1990, the President is required to issue an initial sequester order to withhold, beginning October 1st, funds necessary to reduce outlays by $16.2 billion. The initial order for 1990 will be issued on August 25, 1989, and become effective on October 1, 1989.

The final sequester report and final Presidential order for 1990 are to be issued on October 16, 1989. The final report will take into account additional measures enacted or promulgated by the snapshot date that affect the deficit estimates. If such additional measures bring the estimated deficit down below the "trigger" level ($110 billion), there will be no need for sequester.

As shown in Table 1, OMB's current 1990 G-R-H baseline estimate for receipts is $1,074.8 billion. Baseline outlays are estimated to total $1,191.0 billion.

Table 1.—G-R-H Baseline Totals for 1990

(In billions of dollars)

	Laws and regulations in effect as of—		
	January 1, 1989	July 10, 1989	August 15, 1989

Outlays	1,201.5	1,202.4	1,191.0
Deficit	127.1	128.1	116.2

The estimates assume that current law for revenues and spending authority (including most entitlements) will continue unchanged, and that expiring provisions of law providing revenues and spending authority will terminate as scheduled, except as provided in the G-R-H Act.[1] Because no 1990 appropriations bills have been enacted, baseline estimates for discretionary spending accounts are based on the 1989 appropriations adjusted for inflation and pay costs. The baseline estimates also include the receipts and outlays of the off-budget social security trust funds, although social security benefits themselves are exempt from sequestration.

OMB's estimate of the baseline deficit is further affected by a technical spendout requirement specified in the G-R-H Act. The Act requires that in developing the G-R-H baseline the Director of OMB shall assume that the aggregate spendout rate (the ratio of new outlays to new budgetary resources) from sequesterable discretionary resources for defense programs not differ by more than one-half percentage point from the comparable rate contained in the sequester report submitted for the previous fiscal year. The Act applies the same requirement to nondefense programs. The estimates for nondefense programs meet this requirement. To meet the requirement for defense programs, however, a $4.1 billion downward adjustment of the estimated outlays from new budgetary resources is needed in order to bring the aggregate spendout rate within one-half a percentage point of the benchmark rate.

---

[1] The G-R-H Act allows for continuation of expiring programs in the following cases: excise taxes dedicated to a trust fund (but not spending authority in that trust fund); Commodity Credit Corporation price support programs; contract authority for transportation trust funds; and authority to provide insurance through the Federal Housing Administration fund.

Estimates of the G-R-H baseline using current economic and technical assumptions but assuming laws and regulations in effect on January 1, 1989, produce a fiscal year 1990 deficit of $127.1 billion. Table 2 shows the impact on this estimated deficit of legislation enacted and final regulations promulgated since January. In total, these policy changes have decreased the baseline deficit by $10.9 billion.

The Dire Emergency Supplemental Appropriations Act of 1989 (Public Law 101–45) increased the 1990 baseline deficit by $0.9 billion. Other enacted legislation and final regulations decreased the baseline deficit by less than $50 million as of the Mid-Session Review. The Disaster Assistance Act of 1989 (Public Law 101–82) increased the baseline deficit by $0.9 billion. Other changes, including a final regulation for the veterans housing loan guarantee program, have decreased the baseline deficit by less than $50 million. Since the Mid-Session Review, the change in the estimated deficit is primarily the result of the enactment of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (Public Law 101–73), which reduced the 1990 baseline deficit by $12.8 billion.

Table 2.—G-R-H Baseline Deficits for 1990—Based on Laws in Effect in January, July, and August

(In billions of dollars)

January Baseline Deficit	127.1
Legislation enacted between January 1st and July 10th:	
Supplemental Appropriations Act, 1989 (Public Law 101–45)	0.9
Other (net, including debt service)	0.1
Subtotal, legislation enacted January 1st–July 10th	0.9
July (Mid-Session Review) Baseline Deficit	128.1
Legislation enacted between July 10th and August 15th:	
Financial Institutions Reform, Recovery, and Enforcement Act, 1989 (Public Law 101–73):	
Federal Savings and Loan Insurance Corporation	–13.0
Federal Deposit Insurance Corporation	–0.8
Revenue changes	–0.5
Net interest	1.5
Subtotal, FIRREA	–12.8
Disaster Assistance Act, 1989 (Public Law 101–82)	0.9
Other (net, including debt service)	–*
Subtotal, legislation enacted July 10th–August 15th	–11.9
August Baseline Deficit	116.2
MEMORANDUM	
Net Deficit Reduction Achieved January 1st–August 15th	–11.0

*$50 million or less.

II. THE RISK OF SEQUESTER

The Prospect for Sequester

The gap between the baseline deficit of $116.2 billion and the sequester trigger of $110 billion may seem relatively small. In fact, however, the problem of avoiding sequester is greater than the $6.2 billion difference would suggest.

One reason is that enactment of the 11 nondefense appropriations bills, assuming they comply with the terms of the Bipartisan Budget Agreement (BBA), would result in a level of outlays $1.6 billion above the G-R-H baseline. Some of the bills also threaten to exceed the BBA limits. These threats include classifying discretionary expenditures (such as non-emergency firefighting costs) as mandatory expenditures. Based on OMB's assessment, the nondefense appropriations bills currently being considered by Congress would add another $1.0 billion to the G-R-H baseline.

Enactment of the defense program at the Bipartisan Budget Agreement level would result in outlays of about $1.3 billion more than assumed in the G-R-H baseline. Also, if Congress should reverse the decision of the Secretary of Defense to move the first pay date in fiscal year 1990, which falls on a weekend, to September 29th, the deficit would increase by an additional $2.9 billion. This would mean an increase of $4.2 billion above the G-R-H baseline deficit.

In total, therefore, enactment of the 13 appropriation bills could increase the G-R-H baseline deficit to $123.0 billion, $13.0 billion above the level that would require a sequester.

As Congress considers reconciliation and other legislation to implement the BBA, it should be aware that the magnitude of deficit reduction needed to avoid a sequester will not be $6 billion, but could be a figure in excess of $13 billion. The total amount of savings to be gained from current reconciliation instructions—if fully complied with—would be only about $14 billion. Clearly, the margin for error is very small—and the margin available for additional spending is nil.

The Consequences of Sequester

If a $16.2 billion sequester proves necessary, program reductions would be in amounts as noted in the Appendix. An illustrative sample of associated program effects is as follows:

- Defense Department—A sequester would reduce Defense budget authority to a level $4.4 billion less than the amount appropriated in 1989. This reduced level would be 4.4 percent below the 1989 total adjusted for inflation and even below the inflation-adjusted 1983 level. Active duty military personnel could be reduced by about 160,000, roughly equivalent to the combined manpower strength of an Army division, 25 ships, and 2 Air Force wings. Defense operations and maintenance accounts would also be severely affected. Operation and training rates would be cut, leading to a degradation of force readiness. Modernization programs would be delayed, and production costs would increase. There would also be a significant reduction in contractor employment. If a sequester were to occur in October, the President could submit an alternative plan that would propose protecting certain high-priority programs, including military personnel. If, however, such an alternative plan were accepted by Congress, it would lead to even deeper reductions in the remaining defense programs.
- Drug Enforcement Administration (DEA)—A sequester would reduce DEA's budget authority below the 1989 enacted level, and could undermine its ability to wage an aggressive war on drugs. An immediate personnel freeze of DEA agents and staff could be required. In addition, DEA could be forced to make 10 percent across-the-board cuts in drug enforcement programs, such as domestic marijuana eradication and State and local task force programs. Otherwise, to avoid cutting these drug enforcement programs, DEA could defer purchases and installation of radio equipment that permits secure communications between DEA agents, and reduce personnel transfers, thus hindering the improvement of DEA's operational capability.

- HIV/AIDS—A sequester would significantly hamper the Public Health Service's efforts to prevent HIV transmission and conduct research into therapies and vaccines. The Administration has requested a 24 percent increase in these activities; if funds were instead cut by more than 5 percent through a sequester, fewer promising therapies could be tested, fewer education and prevention programs could be supported, and fewer research initiatives to develop cures and therapies could be pursued.
- Federal Aviation Administration (FAA)—The impact of a sequester on FAA operations could include a furlough of up to three days per month of all FAA staff, including air traffic control and maintenance personnel. Other possibilities include delaying certain training initiatives, delaying routine maintenance of navigational and other equipment, and reducing the purchase of spare parts. For FAA capital programs, the cut could force FAA to restructure the National Airspace System Plan by foregoing certain contract options and renegotiating major contracts.
- Internal Revenue Service (IRS)—A sequester would reduce 1990 funding for the IRS below the 1989 enacted level of $5.2 billion. This cut could require the IRS to forego all its 1990 initiatives, including the $0.5 billion revenue initiative specified in the Bipartisan Budget Agreement. It could also force the IRS to lose approximately 4,700 current staff, resulting in additional revenue losses and up to 10 million fewer taxpayer assistance telephone calls answered. Even if the IRS were to curtail contracts substantially, many of which are in the data processing areas, 1990 initiatives would have to be deferred, and there would still be some reduction in current staffing and revenue losses.
- Education Department—Budget authority for Pell grants for needy college students would be reduced to $4.4 billion under a sequester. This amount is $246 million less than the G-R-H baseline, but more than $1 billion below what the Department estimates is necessary to fund fully the Pell grant program under current law with the current maximum grant level. A sequester would eliminate grants to about 1.0 million students and reduce awards to another 523,000.
- Environmental Protection Agency (EPA)—Several new EPA programs to address emerging issues such as pollution prevention and radon reduction could be delayed or cancelled under a sequester, and the implementation of new ocean dumping and medical waste legislation could be delayed. In addition, EPA's compliance and enforcement activities may be hampered.
- National Institutes of Health (NIH)—A sequester would impair the Federal Government's substantial commitment to pursuing new scientific opportunities and searching for new cures and therapies. A sequester could reduce by over 1,000 the number of NIH-supported research grants and cut by over 500 the number of scientists receiving research training.
- Coast Guard—A sequester could require the Coast Guard to ground aircraft used for critical drug interdiction activities, tie up vessels used for fisheries patrols, and curtail its capability to detect and respond to oil spills. In addition, there could be significant reductions in Coast Guard personnel or closings of essential Coast Guard facilities. Other possibilities include deferring training of Coast Guard personnel, delaying routine maintenance of Coast Guard shore facilities and vessels, and reducing the purchase of supplies and spare parts.

IV. COMPOSITION OF G-R-H BASELINE OUTLAYS AND RESOURCES

III. ECONOMIC ASSUMPTIONS

The principal economic assumptions underlying the G-R-H baseline estimates for 1990 are shown in Table 3. The Act also requires the OMB Director to estimate the rate of real GNP growth for the last two quarters of fiscal year 1989 and for each quarter of fiscal year 1990. These estimates are shown in Table 4. As required by law, all these economic assumptions are the same as those used by OMB for its Mid-Session Review of the Budget.

Table 3.—Economic Assumptions

(Fiscal year 1990)

Gross National Product:	
Current dollars (in billions of dollars)	5,482.0
Percent change, year over year	6.7
Constant dollars (in billions of 1982 dollars)	4,179.7
Percent change, year over year	2.4
GNP Implicit Price Deflator (percent change, year over year)[1]	4.2
CPI-W (percent change, year over year)	4.4
Civilian Unemployment Rate (percent, fiscal year average)	5.4
Interest Rates (fiscal year average):	
91-day Treasury bills	7.1
10-year Treasury notes	7.8

[1] As required under the Act, the discretionary program inflation adjustment and pay raise costs are estimated using the increase in the GNP deflator (3.6 percent) from the economic assumptions presented in January. All other estimates in this report, however, use the economic assumptions presented in the Mid-Session Review of the Budget and shown in this table.

Table 4.—Real Economic Growth Rates by Quarter

(In percent, annual rates)

FY 1989			FY 1990			
Actual		Estimate	Estimates			
Jan.–Mar. 1989[1]	Apr.–June 1989[2]	July–Sept. 1989	Oct.–Dec. 1989	Jan.–Mar. 1990	Apr.–June 1990	July–Sept. 1990
4.4	2.2	2.2	2.1	2.2	2.5	2.4

[1] As reported by the Department of Commerce (June 22, 1989) and published in the Mid-Session Review of the Budget. Subsequently, the Department of Commerce revised the "actual" for January–March 1989 to 3.7 percent. Pursuant to the Act, OMB may not update the Mid-Session figure for purposes of estimating the G-R-H baseline.

[2] On July 27, 1989, the Department of Commerce reported an advance "actual" for April–June 1989 of 1.7 percent.

IV. COMPOSITION OF G-R-H BASELINE OUTLAYS AND RESOURCES SUBJECT TO SEQUESTER

For defense and nondefense programs combined, an estimated $765.5 billion in outlays, or 64 percent of total outlays, are associated with budgetary resources exempt from sequestration. The burden of sequestration falls on programs that comprise the remaining 36 percent of budget outlays. Of these outlays, defense programs account for 44 percent, special rule nondefense programs account for 29 percent, and other nondefense programs account for 26 percent.

Table 5 provides further detail on the G-R-H baseline outlay estimates for 1990. An estimated $187.6 billion of 1990 outlays for defense programs, or 65 percent of total defense outlays, are associated with budgetary resources subject to an across-the-board percentage reduction.

An estimated $237.9 billion of outlays for nondefense programs, or 26 percent of total nondefense outlays, are associated with sequesterable budgetary resources. About $125.3 billion of these outlays, or 14 percent of total nondefense outlays, are for programs with automatic spending increases and for certain special rule programs, the largest of which is medicare. The Act limits the extent of spending reductions for these programs. Of the total estimated 1990 nondefense outlays of $900.3 billion, an estimated $112.6 billion—about 13 percent of nondefense outlays—are associated with budgetary resources subject to an across-the-board percentage reduction.[2] An estimated $662.4 billion of nondefense outlays, or 74 percent of total nondefense outlays, are exempt from sequestration.

A sequester does not reduce outlays directly; rather, it permanently cancels budget authority and other authority to obligate and expend funds (except that special rules apply to amounts sequestered in special and trust funds). For defense programs, sequesterable budgetary resources consist of new budget authority provided for 1990 and unobligated balances of budget authority provided in previous years. For nondefense programs, the sequesterable budgetary resources are new budget authority; new direct loan obligations, commitments, or limitations; new guaranteed loan commitments or limitations; obligation limitations; and spending authority as defined in Section 401(c)(2) of the Congressional Budget Act of 1974. This definition of spending authority includes various mandatory and permanent appropriations, as well as Federal payments financed by offsetting collections that are credited to budget accounts.

The Act exempts a number of programs and activities of the Federal Government from the sequestration process. As shown in Table 5, the largest are social security benefits, net interest, certain low-income programs, most Federal retirement and disability benefits, veterans compensation and pensions, and regular State unemployment insurance benefits. Also exempt from sequestration are prior legal obligations of the Government in certain specified budget accounts. Outlays from obligated or unobligated balances of prior-year appropriations for nondefense programs are generally not subject to sequestration.

Federal administrative expenses for most otherwise exempt programs and activities, however, are sequesterable, including programs that are self-supporting. Although budgetary resources available for Federal pay are subject to sequestration, the Act provides that rates of pay for civilian employees (and rates of basic pay, basic subsistence allowances, and basic quarter allowances for members of the uniformed services), or any scheduled pay increases, may not be reduced pursuant to a sequestration order.

Certain programs and activities, while not exempt, are subject to special rules that have the effect of limiting the amount of the spending reduction. For example, the sequestration reduction for medicare, veterans medical care, and certain health programs (but not for the administrative expenses of these programs) is limited to two percent annually. In addition, the total amount of the automatic spending increases in three programs specified in the Act is sequesterable, but the program bases are exempt. Although the Federal share of extended unemployment benefits is sequesterable, if States act to increase their share by the amount of the reduction in the Federal share, total budget outlays, which include both the Federal and State shares, will not be changed by the sequestration.

---

[2] The estimated $112.6 billion nondefense total subject to across-the-board reduction shown in Table 5 excludes $6.3 billion of 1991 outlays for Commodity Credit Corporation (CCC) that would also be subject to a 1990 sequester.

For credit programs, the measures governing sequesterable budgetary resources are direct loan obligations and guaranteed loan commitments. In the event of a sequester, the Act requires that credit limitations enacted in annual appropriations acts be reduced, and that *de facto* limitations be imposed on both types of new credit activity where there is no enacted limitation.

Table 5.—Composition of G-R-H Baseline Outlay Estimates for 1990

(Dollar amounts in billions)

	Estimate	Percent of Total
Defense programs: [1]		
Subject to across-the-board reduction	187.6	15.8
Exempt from sequestration [2]	103.1	8.7
Subtotal, defense programs	290.7	24.4
Nondefense programs:		
Subject to sequestration:		
Certain programs with automatic spending increases [3]	1.3	0.1
Certain special rule programs [4]	124.0	10.4
Subject to across-the-board reductions [5]	112.6	9.5
Subtotal, subject to sequestration	237.9	20.0
Exempt from sequestration:		
Social security	247.0	20.7
Federal retirement, disability, and workers compensation	66.6	5.6
Earned income tax credit	4.0	0.3
Low-income programs [6]	83.5	7.0
Veterans compensation and pensions	14.2	1.2
State unemployment benefits	15.1	1.3
Offsetting receipts and collections	–64.1	–5.4
Net interest	178.3	15.0
Other [7]	117.7	9.9
Subtotal, exempt from sequestration	562.4	55.6
Subtotal, nondefense programs	900.3	75.6
Total	1,191.0	100.0

[1] Function 050, excluding Federal Emergency Management Agency (FEMA) programs.

[2] Largely outlays from obligated balances.

[3] National Wool Act, special milk, and vocational rehabilitation programs.

[4] Guaranteed student loans, foster care and adoption assistance, medicare, veterans medical care, and other health programs.

[5] Excludes $6.3 billion in estimated 1991 outlays for CCC that would be subject to a 1990 sequester.

[6] Family support payments, child nutrition, medicaid, food stamps, SSI, and WIC.

[7] Outlays from prior-year appropriations, certain prior legal obligations, and other exempt programs.

V. SEQUESTRATION CALCULATIONS

This report indicates that, under current law, an outlay reduction of $16.2 billion, the difference between the current baseline deficit and the target of $100 billion, is required. The reductions are determined using the following steps, as shown in Table 6.

First, one-half of the required deficit reduction, $8.1 billion, is assigned to defense programs (budget accounts in the national defense function, 050, excluding the Federal Emergency Management Agency) and the other half to nondefense programs.

Second, the savings from eliminating automatic spending increases in three specific programs, which are listed in Table 7, are applied to the required reduction in outlays for nondefense programs. The amount of savings from eliminating these adjustments in 1990 is $48 million.

Third, the amount of outlay savings to be obtained from programs subject to other special sequestration rules, also listed in Table 7, is then calculated. The estimated savings from these special rule programs, $1.8 billion for 1990, are applied toward the required spending reductions in nondefense programs.

Table 6.—Sequestration Calculations for 1990

(Dollar amounts in billions)

	Estimate
Required deficit reduction	16.2
Defense programs: [1]	
Total required outlay reductions	8.1
Estimated outlays associated with across-the-board sequesterable budgetary resources	187.6
Uniform reduction percentage	4.3%
Nondefense programs:	
Total required outlay reductions	8.1
Estimated savings from automatic spending increases	*
Estimated savings from the application of special rules	1.8
Amount remaining to be obtained from uniform percentage reductions of budgetary resources	6.3
Estimated outlays associated with across-the-board sequesterable budgetary resources [2]	118.9
Uniform reduction percentage	5.3%

* $50 million or less.

[1] Function 050, excluding FEMA programs.

[2] Includes $6.3 billion in estimated 1991 outlays for the CCC and $3.5 billion in outlays from offsetting collections that are subject to a 1990 sequester.

The reductions in defense programs and remaining reductions in nondefense programs are applied to budgetary resources on a uniform percentage basis, computed separately for each category. The uniform reduction percentages are computed from outlay estimates. The remaining outlay savings to be achieved separately in defense and nondefense spending are divided by the estimated outlays associated with sequesterable budgetary resources in each category. The two resulting uniform reduction percentages for defense and nondefense are then applied separately to all of the remaining sequesterable budgetary resources (budget authority, credit authority, and other spending authority) in each category.

Under current estimates, the uniform percentage reduction is 5.3 percent for nondefense programs. For defense programs, the uniform percentage reduction is 4.3 percent. The Act specifies special

---

---

calculations to achieve the uniform percentage reduction for child support enforcement (CSE). The Federal matching rate on most CSE expenditures would be reduced from 66.0 percent to 63.5 percent, and the rate for computer-related expenditures and genetic testing would be reduced from 90.0 percent to 84.0 percent. Nondefense savings from the across-the-board reductions also include $0.3 billion in 1991 outlay savings from the Commodity Credit Corporation (CCC). Under the Act, CCC outlay reductions in 1991 resulting from contract adjustments made in 1990 following a sequester are to be credited to the overall outlay reduction required in 1990.

Table 7.—Programs Subject to Special Sequestration Rules

(Outlay amounts in millions of dollars)

	Required Outlay Reductions	Scheduled Increase (percent)
Programs with Automatic Spending Increases Subject to Sequestration:		
National Wool Act [1]	—	—
Special milk program [2]	1	5.7
Vocational rehabilitation [3]	45	4.2
Total	46	
Other Programs Subject to Special Sequestration Rules:		
Guaranteed student loans	34	
Foster care and adoption assistance	4	
Health programs with sequester limited to 2 percent:		
Medicare	1,527	
Veterans medical care and other health programs	202	
Total	1,766	

[1] Payment increases are based on changes in the wool parity price. No automatic increase is projected for 1990.

[2] Benefits are indexed to the Producer Price Index for Fresh Processed Milk.

[3] The automatic spending increase for this program, as specified in the program's authorizing legislation, results in a 4.2 percent increase in funding for the State grant portion of the program.

Table 8.—G-R-H Pre- and Post-Sequester Baseline Estimates for 1990 by Function

(In billions of dollars)

Function	Baseline		Post-Sequester		Sequester Estimate	
	Budget Authority	Outlays	Budget Authority	Outlays	Budget Authority	Outlays
National defense [1]	307.6	291.1	294.4	283.0	13.3	8.1

Total	1,347.7	1,191.0	1,321.6	1,174.4	26.1	16.6

* $50 million or less.

[1] Estimates exclude $6.3 billion of 1991 CCC budget authority and outlays that would be subject to a sequester of $0.3 billion in 1990.

[2] Defense estimates include the impact of the aggregate spendout rate adjustment required by the Act.

[3] Estimates reflect the $0.8 billion debt service reduction that results from the sequester.

VI. COMPARISONS WITH CONGRESSIONAL BUDGET OFFICE ESTIMATES

CBO is issuing its initial sequester report on August 21st. As shown in Table 10, CBO estimates that the baseline deficit for 1990 is $141.5 billion, $25.4 billion above the OMB estimate of $116.2 billion. Under CBO assumptions, a sequester of $41.5 billion would be triggered if no further policy changes were made, while OMB estimates that a sequester of $16.2 billion would be required. This section provides the comparisons between OMB and CBO estimates that are required by the G-R-H Act.

Table 10.—Differences Between OMB and CBO G-R-H Baselines

(In billions of dollars)

	Outlays	Receipts	Deficit
OMB baseline	1,191.0	1,074.8	116.2
Differences:			
Economic assumptions:			
Level of GNP and incomes	—	–9.4	9.4
Interest rates	1.8	0.2	1.5
Discretionary program inflation:			
Defense	1.3	—	1.3
Nondefense	0.6	—	0.6
Cost-of-living adjustments	0.7	—	0.7
Debt service	0.8	—	0.8
Subtotal, economic	5.2	–9.1	14.3
Technical:			
Federal Savings and Loan Insurance Corporation	11.5	—	11.5
Defense:			
Transfers	0.9	—	0.9
Other	3.6	—	3.6
Absorption of 1989 nondefense pay raise	1.0	—	1.0
Farm price supports	–2.5	—	–2.5
Medicaid	–0.9	—	–0.9
Federal Housing Administration	–0.8	—	–0.8
Net interest	–0.8	—	–0.8
Other (including debt service)	0.5	5.7	–5.2
Subtotal, technical	12.5	5.7	6.8
G-R-H requirements:			
Defense spend-out adjustment	4.1	—	4.1
Debt service	0.2	—	0.2
Subtotal, G-R-H requirements	4.3	—	4.3
Total differences	22.0	–3.4	25.4
CBO baseline	1,213.0	1,071.4	141.5

Different economic assumptions account for $14.3 billion of the difference between OMB and CBO baseline deficit estimates. CBO forecasts slower real growth and higher interest and inflation rates than OMB. As a result, CBO estimates lower incomes and thus lower receipts ($9.4 billion), higher interest costs, and higher inflation adjustments for outlays. Technical estimating differences account for an additional $6.8 billion difference in the baseline deficit estimates, as discussed below. In addition, the adjustment for the aggregate defense spendout rate (discussed in the section on G-R-H baseline totals), which is required by law to be included in OMB baseline estimates, does not affect the CBO baseline; if OMB were not required to make this adjustment, the difference between OMB and CBO would narrow by $4.3 billion.

Technical differences include $5.7 billion higher baseline receipts under CBO assumptions, due to higher assumed levels of capital gains realizations that more than offset other technical differences, and $12.5 billion higher baseline outlays, of which $11.5 billion is attributable to outlays for savings and loans pursuant to the Financial Institutions Reform, Recovery, and Enforcement Act. Specifically, this $11.5 billion outlay difference results from: (1) a CBO assumption that $5 billion of the $20 billion that the Administration expects to spend on insolvent savings and loan case resolution and on the replacement of high-rate deposits before the end of 1989 will slip into 1990, adding to 1990 outlays; (2) a CBO assumption that borrowing by the Resolution Funding Corporation (REFCORP) will not provide enough funds to deal with all case resolutions in 1990 and that, therefore, $7.5 billion of Resolution Trust Corporation promissory notes will be issued in 1990; and (3) other estimating differences (–$1.0 billion) relating to new asset liquidation proceeds, premium income required for guaranteeing REFCORP bond principal, and other technical assumptions.

For national defense, CBO estimates $4.5 billion more in outlays than OMB primarily because CBO assumes a faster spendout of new budgetary resources and the transfer of budget authority to faster-spending accounts. Both OMB and CBO assume the final pay date for 1989 will occur before the end of that fiscal year, rather than in 1990, as was assumed in January. The CBO estimate of nondefense pay is $1.0 billion higher than the OMB estimate, because OMB assumes that the January 1989 pay raise for Federal civilian employees was fully funded in 1989 appropriation bills, while CBO does not. This difference, and the differences between OMB and CBO estimates shown in Table 10 for defense transfers ($0.9 billion) and discretionary program inflation ($1.9 billion), will disappear once appropriations are enacted.

CBO estimates farm price support costs for 1990 to be $2.5 billion lower than OMB. This difference is due in part because of an assumption of no growth in Commodity Credit Corporation contingency funds, and in part because the CBO estimate takes into account a July crop report that was not available to be incorporated into the OMB estimates when they were originally prepared for the July 18th Mid-Session Review.

CBO's estimate of medicaid outlays is $0.9 billion lower than OMB's, primarily due to differences in estimating methodologies and assumptions about the number of eligible beneficiaries, utilization of medical services, and price factors. The CBO estimate of Federal Housing Administration outlays is $0.8 billion lower than the OMB estimate, due to differences in assumptions about program activity, such as the payment of mortgage-insurance claims. For net interest, there is an estimating difference between OMB and CBO regarding the maturity mix and seasonal distribution of Treasury borrowing. As a result, CBO's estimate of net interest is $0.8 billion below the OMB estimate.

The Act requires three comparisons of differences between OMB and CBO estimates. Table 11 shows, by type of sequesterable resource for defense and nondefense programs, the amount of budgetary resources that would be sequestered using the OMB estimate of the required outlay reductions and CBO's estimating methodology. Table 12 identifies differences between OMB and CBO estimates of the aggregate amount of resources to be sequestered by type of resource for defense and nondefense programs. Table 13 identifies differences for accounts where OMB and CBO estimates of sequesterable resources differ by $5 million or more. Explanations of these differences are presented in the footnotes, which appear at the end of the table.

Monday, August 28, 1989

Presidential Documents

Title 3—

The President

Initial Order of August 25, 1989

Emergency Deficit Control Measures for Fiscal Year 1990

By the authority vested in me as President by the statutes of the United States of America, including section 252 of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law No. 99–177), as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law No. 100–119) (hereafter referred to as "the Act"), and in accordance with the report of the Director of the Office of Management and Budget issued August 25, 1989, pursuant to section 251(a)(2) of the Act, I hereby order, pursuant to section 252(a), that the following actions be taken effective October 1, 1989, to implement the sequestrations and reductions determined by the Director in that report:

(1) Each automatic spending increase that would, but for the provisions of the Act, take effect during fiscal year 1990 is suspended as provided in section 252. The programs with such automatic spending increases subject to reduction in this manner, specified by account title, are National Wool Act; Special milk program; and Vocational rehabilitation.

(2) The following are sequestered as provided in section 252: new budget authority; unobligated balances; new loan guarantee commitments or limitations; new direct loan obligations, commitments, or limitations; spending authority as defined in section 401(c)(2) of the Congressional Budget Act of 1974, as amended; and obligation limitations.

(3) For accounts making payments otherwise required by substantive law, the head of each Department or agency is directed to modify the calculation of each such payment to the extent necessary to reduce the estimate of total required payments for the fiscal year by the amount specified in the Director's report.

(4) For accounts making commitments for guaranteed loans and obligations for direct loans as authorized by substantive law, the head of each Department or agency is directed to reduce the level of such commitments or obligations to the extent necessary to conform to the limitations established by the Act and specified in the Director's determination of August 25, 1989.

(5) Each Department or agency head may, to the extent otherwise not prohibited by law, use existing authority to deobligate balances of budgetary resources as necessary to apply the required reduction or sequestration in as uniform a manner as possible for any person or other recipient entitled to payments under any formula-driven calculations specified in the substantive law. Deobligations may include budgetary obligations for which checks have not been issued or funds not otherwise disbursed (funds obligated but unexpended).

In accordance with section 252(a)(4)(A), amounts suspended or sequestered under this Order shall be withheld from obligation or expenditure pending the issuance of a final order under section 252(b).

If Congress acts to reduce the deficit projected in this report by $6.2 billion prior to the snapshot date for the Final Report of the Director, then a final order will be issued cancelling the sequester. If the deficit is reduced by a lesser amount, the final order will direct that funds be sequestered in accordance with section 252 of the Act.

This Order shall be reported to Congress and shall be published in the **Federal**

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last List August 22, 1989

Microfiche Editions Available...

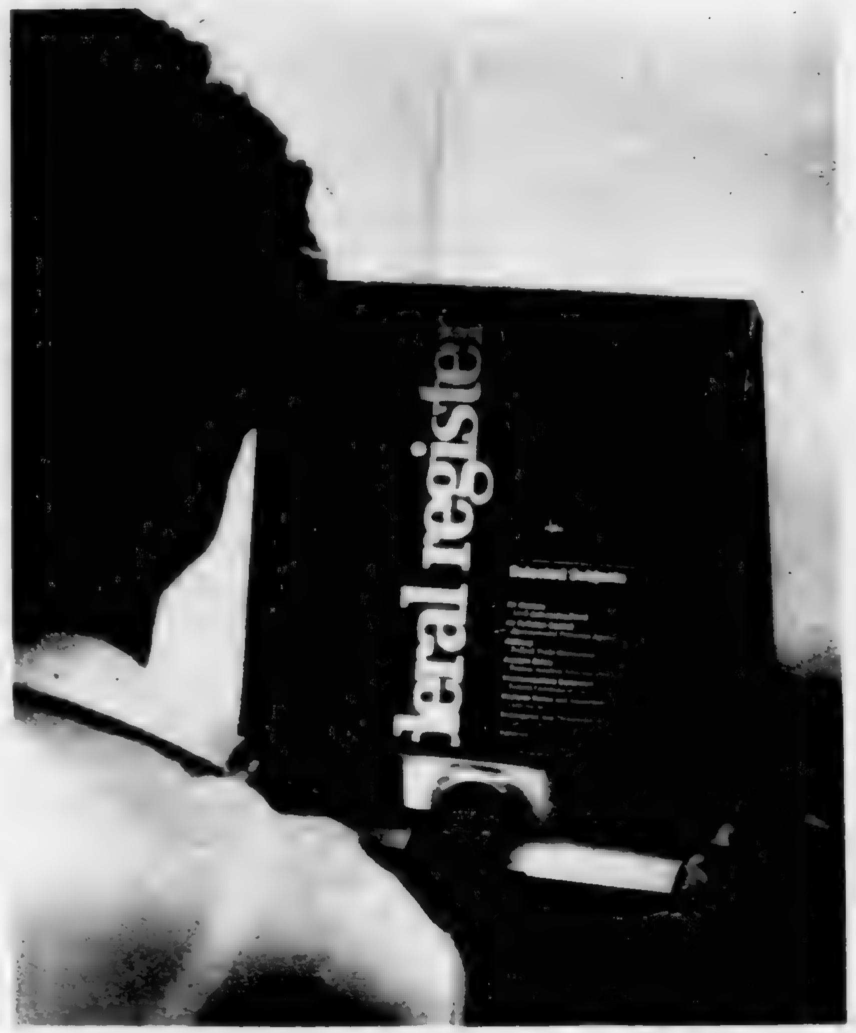
Microfiche Editions Available...

Federal Register

The Federal Register is published daily in 24x microfiche format and mailed to subscribers the following day via first class mail. As part of a microfiche Federal Register subscription, the LSA (List of CFR Sections Affected) and the Cumulative Federal Register Index are mailed monthly.

Code of Federal Regulations

The Code of Federal Regulations, comprising approximately 193 volumes and revised at least once a year on a quarterly basis, is published in 24x microfiche format and the current year's volumes are mailed to subscribers as issued. Or, the previous year's full set may be purchased at a reduced price and mailed as a single shipment.



Microfiche Subscription Prices:

Federal Register:

One year: $195
Six months: $97.50

Code of Federal Regulations:

Current year (as issued): $188

Previous year's full set: $115
(single shipment)

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 54 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

ATLANTA, GA

WHEN: September 20; at 9:00 a.m.
WHERE: Room 808, 75 Spring Street, SW.
Richard B. Russell Federal Building
Atlanta, GA
RESERVATIONS: Call the Federal Information Center
404-331-6895

WASHINGTON, DC

WHEN: September 25; at 9:00 a.m.
WHERE: Office of the Federal Register
First Floor Conference Room
1100 L Street NW., Washington, DC
RESERVATIONS: 202-523-5240

Rules and Regulations

Federal Register
Vol. 54, No. 166
Tuesday, August 29, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 301

[Docket No. 89-146]

Mediterranean Fruit Fly

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule and request for comments.

SUMMARY: We are quarantining an area in Los Angeles County in California because of the Mediterranean fruit fly and restricting the interstate movement of regulated articles from the quarantined area. This action is necessary on an emergency basis to prevent spread of the Mediterranean fruit fly into noninfested areas of the United States.

DATES: Interim rule effective August 23, 1989. Consideration will be given only to comments received on or before October 30, 1989.

ADDRESSES: To help ensure that your comments are considered, send an original and three copies to Chief, Regulatory Analysis and Development, PPD, APHIS, USDA, Room 866, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please state that your comments refer to Docket Number 89-146. Comments received may be inspected at Room 1141 of the South Building, 14th and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Milton C. Holmes, Senior Operations Officer, Domestic and Emergency Operations, PPQ, APHIS, USDA, Room 642, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-8247.

SUPPLEMENTARY INFORMATION:

Background

We are amending the "Domestic Quarantine Notices" in 7 CFR part 301 by adding a new subpart 301.78, "Mediterranean Fruit Fly" (referred to below as the regulations). These regulations quarantine a portion of Los Angeles County, California, because of the Mediterranean fruit fly and restrict the interstate movement of regulated articles from the quarantined area.

The Mediterranean fruit fly, *Ceratitis capitata* (Wiedemann), is one of the world's most destructive pests of numerous fruits and vegetables, especially citrus fruits. The Mediterranean fruit fly (Medfly) can cause serious economic losses. Heavy infestations can cause complete loss of crops, and losses of 25 to 50 percent are not uncommon. The short life cycle of this pest permits the rapid development of serious outbreaks.

Recent trapping surveys by inspectors of California State and county agencies and by inspectors of the Animal and Plant Health Inspection Service (APHIS), a unit within the U.S. Department of Agriculture (USDA), reveal that a portion of Los Angeles County, California, is infested with the Mediterranean fruit fly. Specifically, since July 20, 1989, a total of 40 Medfly adults and 40 larvae have been found within a 3-square-mile area of Los Angeles County. The Mediterranean fruit fly is not known to occur anywhere else in the United States, except in Hawaii.

In cooperation with APHIS, officials of State agencies of California have begun an intensive Mediterranean fruit fly eradication program in the quarantined area in California. Also, as explained below, California has taken action to restrict the intrastate movement of certain articles from the quarantined area to prevent the spread of the Mediterranean fruit fly within California. However, it is also necessary to restrict the interstate movement of certain articles from the quarantined area to prevent the spread of the Mediterranean fruit fly to noninfested areas in other states. Accordingly, to prevent the spread of the Mediterranean fruit fly, this document establishes Federal regulations, which are described below by section.

Restrictions on Interstate Movement of Regulated Articles (Section 301.78)

Section 301.78 prohibits any person from moving any regulated article interstate from any quarantined area except in accordance with conditions prescribed in the regulations. For informational purposes, a footnote (number 1) has been added to reference the authority of an employee to stop and inspect persons and means of conveyance, and to seize, quarantine, treat, apply remedial measures to, or otherwise dispose of regulated articles as provided in section 10 of the Plant Quarantine Act (7 U.S.C. 164a) and sections 105 and 107 of the Federal Plant Pest Act (7 U.S.C. 150dd, 150ff).

Definitions (Section 301.78-1)

Section 301.78-1 contains, for informational purposes, definitions of the following terms: "Administrator," "Animal and Plant Health Inspection Service," "Certificate," "Compliance Agreement," "Infestation," "Inspector," "Interstate," "Limited permit," "Mediterranean fruit fly," "Moved," "Person," "Quarantined Area," "Regulated article" and "State."

Regulated Articles (Section 301.78-2)

The regulations impose conditions on the interstate movement of those articles that present a significant risk of spreading Mediterranean fruit fly if moved without restrictions from quarantined areas into or through noninfested areas. These articles, which are designated as regulated articles, may not be moved interstate from quarantined areas except in accordance with conditions specified in §§ 301.78-4 through 301.78-10.

Section 301.78-2 designates as regulated articles a number of fruits, nuts, vegetables, and berries, and soil within the drip line of plants that produce the fruits, nuts, vegetables, or berries. Based on research and experience, the articles listed in § 301.78-2 (a) and (b) as regulated articles are articles that are likely to cause the spread of the Mediterranean fruit fly. In addition, § 301.78-2(c) allows designation of any other product, article, or means of conveyance as a regulated article if an inspector determines that it presents a risk of spreading the Mediterranean fruit fly and notifies the person in possession of the product, article, or means of conveyance that it is subject to the restrictions in the regulations. This provision for "any other product, article, or means of conveyance" allows an inspector who discovers a risk of spreading Mediterranean fruit fly (e.g., a truck with Medfly pupae in cracks in the floorboards) to regulate the affected articles immediately, by informing the person in possession of the product, article, or means of conveyance that it is being regulated.

Fruits, nuts, vegetables, or berries that are canned, dried, or frozen below −17.8 °C. (0 °F.) are not included as regulated articles since the Mediterranean fruit fly could not survive under those conditions.

Quarantined Areas (Section 301.78–3)

As stated in § 301.78–3(a), it is necessary to quarantine areas in which the Mediterranean fruit fly has been found by an inspector, areas in which the Administrator has reason to believe the Mediterranean fruit fly is present, and areas the Administrator considers necessary to quarantine because of their inseparability for quarantine enforcement purposes from localities where Mediterranean fruit flies have been found.

Section 301.78–3(a) further provides that less than an entire state will be designated as a quarantined area only if the Administrator determines that (1) the state has adopted and is enforcing restrictions on the intrastate movement of the regulated articles that are equivalent to those imposed by our regulations with respect to the interstate movement of these articles; and (2) quarantining less than the entire state will prevent the interstate spread of the Mediterranean fruit fly. These determinations would indicate that infestations are confined to the quarantined areas and eliminate the need for designating an entire state as a quarantined area.

In accordance with these criteria, we are designating as a quarantined area an area in Los Angeles County in California. This area is as follows:

Los Angeles County: That portion of the county in the Elysian Park area bounded by a line drawn as follows: Beginning at the intersection of U.S. Highway 101 and Barham Boulevard; then northerly along this boulevard to its intersection with Forest Lawn Drive; then northeasterly along this drive to its intersection with State Highway 134; then easterly along this highway to its intersection with Interstate Highway 5; then southerly along Interstate Highway 5 to its intersection with Colorado Boulevard; then easterly along this boulevard to its intersection with Eagle Rock Boulevard; then southwesterly along Eagle Rock Boulevard to its intersection with York Boulevard; then southeasterly along York Boulevard to its intersection with Figueroa Street; then southwesterly along this street to its intersection with Avenue 60; then southeasterly along this avenue to its intersection with Monterey Road; then southerly along this road to its intersection with Huntington Drive North; then southwesterly along this drive to its intersection with Soto Street; then southwesterly along this street to its intersection with Whittier Boulevard; then westerly along this boulevard to its intersection with 6th Street; then northwesterly along this street to its intersection with Broadway; then southwesterly along Broadway to its intersection with Interstate Highway 10; then westerly along this highway to its intersection with Western Avenue; then north along this avenue to its intersection with Venice Boulevard; then westerly along this boulevard to its intersection with Crenshaw Boulevard; then northeasterly along this boulevard to its intersection with Olympic Boulevard; then westerly along this boulevard to its intersection with Highland Avenue; then northerly along this avenue to its intersection with U.S. Highway 101; then northwesterly along this highway to the point of beginning.

It is necessary to designate this portion of Los Angeles County as a quarantined area because it is an area in which the Mediterranean fruit fly has been found, or in which the Administrator has reason to believe the Mediterranean fruit fly is present, or an area necessary to regulate because of its inseparability for quarantine enforcement purposes from localities where Mediterranean fruit fly has been found.

There does not appear to be any reason to designate any other quarantined areas in California other than those areas specified above. California has adopted and is enforcing regulations imposing restrictions on the intrastate movement of the regulated articles that are equivalent to those imposed on the interstate movement of regulated articles under this subpart.

Section 301.78–3(b) provides that the Administrator or an inspector may designate an area as a quarantined area temporarily without publication in the **Federal Register** if there is a basis for listing the area as a quarantined area under § 301.78–3(a) and if the owner or person in possession of the area to be quarantined is given written notice of this action. This is necessary in order to prevent spread of the Mediterranean fruit fly before restrictions can be published in the **Federal Register** concerning the interstate movement of regulated articles from the designated area.

Conditions Governing the Interstate Movement of Regulated Articles From Quarantined Areas (Sections 301.78–4 Through 301.78–10)

Section 301.78–4

Section 301.78–4(a) requires regulated articles moved interstate from quarantined areas to be accompanied by a certificate or limited permit issued and attached as prescribed by §§ 301.78–5 and 301.78–8, unless moved as prescribed in § 301.78–4(b).

Section 301.78–4(b) allows a regulated article to move interstate without a certificate or limited permit if the article originates outside of a quarantined area, if it is moved through the quarantined area without stopping except for refueling or for traffic conditions such as traffic lights and stop signs, if it is shipped in an enclosed vehicle or is completely covered so as to prevent access by Mediterranean fruit flies, if the point of origin is indicated on the waybill, and if the enclosed vehicle or the enclosure which contains the regulated article is not opened, unpacked, or unloaded in the quarantined area.

Also, § 301.78–4(c) allows the Department to move regulated articles interstate without a certificate or limited permit for experimental or scientific purposes. However, the regulated articles must be moved in accordance with a permit issued by the Administrator, under conditions that prevent the spread of Mediterranean fruit fly.

Section 301.78–4 contains a footnote to remind persons of other applicable domestic plant quarantine and regulation requirements that need to be met for interstate movement.

Section 301.78–5

Under Federal domestic plant quarantine programs, there is a difference between the use of certificates and limited permits. Certificates are issued for regulated articles upon a finding by an inspector that, because of certain conditions (e.g. the article is free of Mediterranean fruit fly), there is an absence of a pest risk prior to movement. Regulated articles accompanied by a certificate can be moved interstate without further restrictions being imposed. Limited permits are issued for regulated articles when an inspector has determined that, because of a possible pest risk, such articles may be safely moved interstate only subject to further restrictions, such as movement to limited areas and movement for limited purposes. Section 301.78–5 explains the conditions for issuing a certificate or limited permit.

Specifically, § 301.78–5(a) provides that a certificate shall be issued by an inspector for the movement of a regulated article if the inspector determines that the article: (1) is free of Mediterranean fruit fly, has been treated under direction of an inspector in accordance with § 301.78–10, or comes from a premises of origin free from Mediterranean fruit fly; (2) will be moved through the quarantined area in an enclosed vehicle or is completely covered to prevent access by Mediterranean fruit flies; (3) will be moved in compliance with any additional emergency conditions the Administrator may impose, under section 105 of the Federal Plant Pest Act (7 U.S.C. 150dd), to prevent the spread of the Mediterranean fruit fly; and (4) is eligible for unrestricted movement under all other Federal domestic plant quarantines and regulations applicable to that article.

A footnote explains that the Secretary of Agriculture may, pursuant to section 105 of the Federal Plant Pest Act (7 U.S.C. 105dd), take emergency actions.

Section 301.78–5(b) provides for the issuance of a limited permit (in lieu of a certificate) by an inspector for movement of a regulated article if the inspector determines that the article is to be moved to a specified destination for specified handling, utilization or processing (such as juicing, freezing, canning, or drying), and that the movement will not result in the spread of Mediterranean fruit fly.

Section 301.78–5(c) allows any person who has entered into and is operating under a compliance agreement to execute a certificate or limited permit for the interstate movement of a regulated article after an inspector has made a determination that the article is eligible for a certificate or limited permit in accordance with § 301.78–5(a) or (b).

Also, § 301.78–5(d) contains provisions for the withdrawal of a certificate or limited permit by an inspector upon a determination by the inspector that the holder of the certificate or limited permit has not complied with conditions for the use of the document. This section also contains provisions for notifying the holder of the reasons for the withdrawal and for holding a hearing if there is any conflict concerning any material fact.

Section 301.78–6

Section 301.78–6 provides for the issuance and cancellation of compliance agreements. Specifically, compliance agreements can be entered into by any person engaged in growing, handling, or moving regulated articles who agrees in writing to comply with the provisions of Subpart 301.78. Compliance agreements are provided for the convenience of persons who are involved in shipments of regulated articles from quarantined areas; they are written to ensure that persons issuing certificates or limited permits are knowledgeable with respect to the requirements of Subpart 301.78 and have agreed to comply with them.

Section 301.78–6 also provides that an inspector supervising enforcement of a compliance agreement may cancel the agreement upon finding that a person who has entered into the agreement has failed to comply with any of the provisions of the regulations. The inspector will notify the holder of the compliance agreement of the reasons for cancellation and offer an opportunity for a hearing to resolve any conflicts of material fact. This section contains a footnote to explain where compliance agreement forms can be obtained.

Sections 301.78–7, 301.78–8, and 301.78–9

Section 301.78–7 provides that any person who desires a certificate or limited permit to move regulated articles must, as far in advance of movement as possible (no less than 48 hours before the desired movement), request the services of an inspector to issue a certificate or limited permit. This provision ensures that persons desiring inspection services can obtain them before the intended movement date. A footnote is added for informational purposes to indicate how to contact the inspectors for inspection or how to obtain additional information from offices of the Animal and Plant Health Inspection Service.

Section 301.78–8 requires the certificate or limited permit issued for the movement of the regulated article to be attached to the regulated article, or to a container carrying the regulated article, or to the accompanying waybill during the interstate movement. This provision is necessary for enforcement purposes.

Section 301.78–9 explains the APHIS policy that services of an inspector that are needed to comply with the provisions of the regulations in Subpart 301.78 are provided without cost during normal business hours (8:00 a.m. to 4:30 p.m., Monday through Friday, except holidays), but that we will not be responsible for any other costs or charges.

Section 301.78–10

Section 301.78–10 identifies treatments for the Mediterranean fruit fly that are contained in the Plant Protection and Quarantine Treatment Manual. The Plant Protection and Quarantine Treatment Manual is incorporated by reference in the Code of Federal Regulations in 7 CFR Part 300. Research has determined that these treatments would be adequate to destroy the Mediterranean fruit fly. The treatment schedules for tomato, bell pepper and tomato, and soil in § 301.78–10 are as follows:

(a) *Tomato:* Fumigation with methyl bromide at normal atmosphere pressure with 32 g/m^3 for 3½ hours at 21 °C. (70 °F.) or above.

(b) *Bell pepper and tomato:* Heat the article by saturated water vapor at 44.4 °C. (112 °F.) until approximate center of articles reaches 44.4 °C. (112 °F.) and maintain at 44.4 °C. (112 °F.) for 8¾ hours, then immediately cool.

Note—Commodities should be tested by the shipper to determine each commodity's tolerance to the treatment before commercial treatments are attempted.

(c) *Soil:* Soil within the drip area of plants that are producing or have produced the fruits, nuts, vegetables, and berries listed in § 301.78–2(a) of this subpart: Apply diazinon at the rate of 5 pounds actual ingredient per acre to the soil within the drip area with sufficient water to wet the soil to a depth of at least ½ inch. Both immersion and pour-on treatment procedures are also acceptable.

Emergency Action

James W. Glosser, Administrator of the Animal and Plant Health Inspection Service, has determined that an emergency situation exists, which warrants publication of this interim rule without prior opportunity for public comment. Immediate action is necessary to prevent the Mediterranean fruit fly from spreading to noninfested areas of the United States.

Since prior notice and other public procedures with respect to this interim rule are impracticable and contrary to the public interest under these conditions, there is good cause under 5 U.S.C. 553 to make it effective upon signature. We will consider comments received within 60 days of publication of this interim rule in the **Federal Register**. After the comment period closes, we will publish another document in the **Federal Register**, including a discussion of any comments we receive and any amendments we are making to the rule as a result of the comments.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived the review process required by Executive Order 12291.

This regulation affects the interstate movement of regulated articles from a portion of Los Angeles County, California. Within the regulated area there are approximately 234 entities that would be affected, including 2 citrus processing plants, 1 farmers market, 25 nurseries, 1 community garden, 5 wholesale markets, and 200 retail fruit/produce vendors. Those entities affected represent less than 5 percent of the total of similar enterprises operating in the State of California.

Although these are small entities, they sell regulated articles primarily for local intrastate, not interstate, movement. The effect on those few persons who do move regulated articles interstate is minimized by the availability of various treatments, that in most cases will permit the interstate movement of regulated articles with very little additional cost. Also many of these entities sell other items in addition to the regulated articles so that the effect, if any, of this regulation on these entities would be minimal. Further, the number of affected entities is small compared with the thousands of small entities that move these articles interstate from nonquarantined areas in California and other states.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

The regulations in this subpart contain no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR 3015, Subpart V).

List of Subjects in 7 CFR Part 301

Agricultural commodities, Plant diseases, Plant pests, Plants (Agriculture), Quarantine, Transportation, Mediterranean fruit fly, Incorporation by reference.

PART 301—DOMESTIC QUARANTINE NOTICES

Accordingly, 7 CFR Part 301 is amended as follows:

1. The authority citation for Part 301 continues to read as follows:

Authority: 7 U.S.C. 150dd, 150ee, 150ff; 161, 162, and 164–167; 7 CFR 2.17, 2.51, and 371.2(c).

2. Part 301 is amended by adding a new "Subpart-Mediterranean Fruit Fly" to read as follows:

Subpart—Mediterranean Fruit Fly

Sec.
301.78 Restrictions on interstate movement of regulated articles.
301.78–1 Definitions.
301.78–2 Regulated articles.
301.78–3 Quarantined areas.
301.78–4 Conditions governing the interstate movement of regulated articles from quarantined areas.
301.78–5 Issuance and cancellation of certificates and limited permits.
301.78–6 Compliance agreement and cancellation.
301.78–7 Assembly and inspection of regulated articles.
301.78–8 Attachment and disposition of certificates and limited permits.
301.78–9 Costs and charges.
301.78–10 Treatments.

Subpart—Mediterranean Fruit Fly

§ 301.78 Restrictions on interstate movement of regulated articles.

No person shall move interstate from any quarantined area any regulated article except in accordance with this subpart.[1]

§ 301.78–1 Definitions.

In this subpart the following definitions apply:

Administrator. The Administrator, Animal and Plant Health Inspection Service, or any person authorized to act for the Administrator.

Animal and Plant Health Inspection Service. The Animal and Plant Health Inspection Service of the United States Department of Agriculture (APHIS).

Certificate. A document in which an inspector or person operating under a compliance agreement affirms that a specified regulated article is free of Mediterranean fruit fly and may be moved interstate to any destination.

Compliance agreement. A written agreement between APHIS and a person engaged in growing, handling, or moving regulated articles, wherein the person agrees to comply with the provisions of this subpart and any conditions imposed pursuant to it.

Infestation. The presence of the Mediterranean fruit fly or the existence of circumstances that make it reasonable to believe that the Mediterranean fruit fly is present.

Inspector. Any employee of the Animal and Plant Health Inspection Service, U.S. Department of Agriculture, or other person authorized by the Administrator to enforce this subpart.

Interstate. From any State into or through any other State.

Limited permit. A document, in which an inspector or person operating under a compliance agreement affirms that the regulated article identified on the document is eligible for interstate movement in accordance with § 301.78–5(b) of this subpart only to a specified destination and only in accordance with specified conditions.

Mediterranean fruit fly. The insect known as Mediterranean fruit fly *Ceratitis capitata* (Wiedemann) in any stage of development.

Moved (Move, Movement). Shipped, offered for shipment, received for transportation, transported, carried, moved, or allowed to be moved.

Person. Any association, company, corporation, firm, individual, joint stock company, partnership, society, or other entity.

Quarantined area. Any State, or any portion of a State, listed in § 301.78–3(c) of this subpart or otherwise designated as a quarantined area in accordance with § 301.78–3(b) of this subpart.

Regulated article. Any article listed in § 301.78–2 (a) or (b) of this subpart or otherwise designated as a regulated article in accordance with § 301.78–2(c) of this subpart.

State. The District of Columbia, Puerto Rico, the Northern Mariana Islands, or any state, territory or possession of the United States.

---

[1] Any properly identified inspector is authorized to stop and inspect persons and means of conveyance, and to seize, quarantine, treat, apply other remedial measures to, destroy, or otherwise dispose of regulated articles as provided in section 10 of the Plant Quarantine Act (7 U.S.C. 164a) and sections 105 and 107 of the Federal Plant Pest Act (7 U.S.C. 150dd, 150ff).

§ 301.78–2 Regulated articles.

The following are regulated articles:

(a) The following fruits, nuts, vegetables and berries:

Almond with husk (*Prunus dulcis* (*P. amygdalus*))
Apple (*Malus sylvestris*)
Apricot (*Prunus armeniaca*)
Avocado (*Persea americana*)
Black Myrobalan (*Terminalia cherbula*)
Cherries (sweet and sour) (*Prunus avium, P. cerasus*)
Citrus citron (*Citrus medica*)
Date (*Phoenix dactylifera*)
Fig (*Ficus carica*)
Grape (*Vitis* spp.)
Grapefruit (*Citrus paradisi*)
Guava (*Psidium guajava*)
Japanese persimmon (*Diospyros kaki*)
Japanese plum (*Prunus salicina*)
Kiwi (*Actinidia chinensis*)
Kumquat (*Fortunella japonica*)
Lemon (*Citrus limon*) (except smooth-skinned lemon of commerce that is cleaned and waxed)
Lime, sweet (*Citrus aurantiifolia*)
Loquat (*Eriobotrya japonica*)
Mandarin orange (*Citrus reticulata*) (tangerine)
Mango (*Mangifera indica*)
Mock orange (*Murraya exotica*)
Mountain apple (*Syzigium malaccense* (*Eugenia malaccensis*))
Natal plum (*Carissa macrocarpa*)
Nectarine (*Prunus persica* var. *nectarina*)
Olive (*Olea europea*)
Opuntia cactus (*Opuntia* spp.)
Orange, calamondin (*Citrus reticulata* x. *Fortunella*)
Orange, Chinese (*Fortunella japonica*)
Orange, king (*Citrus reticulata* x. *C. sinensis*)
Orange, sweet (*Citrus sinensis*)
Orange, Unshu (*Citrus reticulata* var. *Unshu*)
Papaya (*Carica papaya*)
Peach (*Prunus persica*)
Pear (*Pyrus communis*)
Pepper (*Capsicum frutescens, C. annuum*)
Pineapple guava (*Feijoa sellowiana*)
Plum (*Prunus americana*)
Pomegranate (*Punica granatum*)
Prune (*Prunus domestica*)
Pummelo (*Citrus grandis*)
Quince (*Cydonia oblonga*)
Rose apple (*Eugenia jambos*)
Sour orange (*Citrus aurantium*)
Spanish cherry (Brazilian plum) (*Eugenia dombeyi* (*E. brasiliensis*)
Strawberry guava (*Psidium cattleianum*)
Surinam cherry (*Eugenia uniflora*)
Tomato (pink and red ripe) (*Lycopersicon esculentum*)
Walnut with husk (*Juglans* spp.)
White sapote (*Casimiroa edulis*)
Yellow oleander (Bestill) (*Thevetia peruviana*)

Any fruits, nuts, vegetables, or berries that are canned or dried or frozen below −17.8 °C. (0 °F.) are not regulated articles.

(b) Soil within the drip area of plants that are producing or have produced the fruits, nuts, vegetables, or berries listed in paragraph (a) of this section.

(c) Any other product, article, or means of conveyance, not covered by paragraph (a) or (b) of this section, that presents a risk of spread of the Mediterranean fruit fly and an inspector notifies the person in possession of it that the product, article, or means of conveyance is subject to the restrictions of this subpart.

§ 301.78–3 Quarantined areas.

(a) Except as otherwise provided in paragraph (b) of this section, the Administrator shall list as a quarantined area in paragraph (c) of this section, each State, or each portion of a State, in which the Mediterranean fruit fly has been found by an inspector, in which the Administrator has reason to believe that the Mediterranean fruit fly is present, or that the Administrator considers necessary to regulate because of its inseparability for quarantine enforcement purposes from localities in which the Mediterranean fruit fly has been found. Less than an entire State will be designated as a quarantined area only if the Administrator determines that:

(1) The State has adopted and is enforcing restrictions on the intrastate movement of the regulated articles that are equivalent to those imposed by this subpart on the interstate movement of regulated articles; and

(2) The designation of less than the entire State as a quarantined area will prevent the interstate spread of the Mediterranean fruit fly.

(b) The Administrator or an inspector may temporarily designate any nonquarantined area in a State as a quarantined area in accordance with the criteria specified in paragraph (a) of this section for listing such area. The Administrator will give a copy of this regulation along with a written notice of this temporary designation to the owner or person in possession of the nonquarantined area; thereafter, the interstate movement of any regulated article from an area temporarily designated as a quarantined area is subject to this subpart. As soon as practicable, this area will be added to the list in paragraph (c) of this section or the designation shall be terminated by the Administrator or an inspector. The owner or person in possession of an area for which designation is terminated will be given notice of the termination as soon as practicable.

(c) The areas described below are designated as quarantined areas:

California

Los Angeles County

That portion of the county in the Elysian Park area bounded by a line drawn as follows: Beginning at the intersection of U.S. Highway 101 and Barham Boulevard; then northerly along this boulevard to its intersection with Forest Lawn Drive; then northeasterly along this drive to its intersection with State Highway 134; then easterly along this highway to its intersection with Interstate Highway 5; then southerly along Interstate Highway 5 to its intersection with Colorado Boulevard; then easterly along this boulevard to its intersection with Eagle Rock Boulevard; then southwesterly along Eagle Rock Boulevard to its intersection with York Boulevard; then southeasterly along York Boulevard to its intersection with Figueroa Street; then southwesterly along this street to its intersection with Avenue 60; then southeasterly along this avenue to its intersection with Monterey Road; then southerly along this road to its intersection with Huntington Drive North; then southwesterly along this drive to its intersection with Soto Street; then southwesterly along this street to its intersection with Whittier Boulevard; then westerly along this boulevard to its intersection with 6th Street; then northwesterly along this street to its intersection with Broadway; then southwesterly along Broadway to its intersection with Interstate Highway 10; then westerly along this highway to its intersection with Western Avenue; then north along this avenue to its intersection with Venice Boulevard; then westerly along this boulevard to its intersection with Crenshaw Boulevard; then northeasterly along this boulevard to its intersection with Olympic Boulevard; then westerly along this boulevard to its intersection with Highland Avenue; then northerly along this avenue to its intersection with U.S. Highway 101; then northwesterly along this highway to the point of beginning.

§ 301.78–4 Conditions governing the interstate movement of regulated articles from quarantined areas.

Any regulated article may be moved interstate from a quarantined area [2] only if moved under the following conditions:

(a) With a certificate or limited permit issued and attached in accordance with §§ 301.78–5 and 301.78–8 of this subpart;

(b) Without a certificate or limited permit, if:

(1) The regulated article originated outside of any quarantined area and is moved through (without stopping except for refueling, or for traffic conditions, such as traffic lights or stop signs) the quarantined area in an enclosed vehicle or is completely enclosed by a covering adequate to prevent access by Mediterranean fruit flies (such as canvas, plastic, or closely woven cloth) while moving through the quarantined area, and

---

[2] Requirements under all other applicable federal domestic plant quarantines and regulations must also be met.

(2) The point of origin of the regulated

(4) The regulated article is eligible for

limited permit has been withdrawn may

(2) The point of origin of the regulated article is indicated on the waybill and the enclosed vehicle or the enclosure which contains the regulated article is not opened, unpacked, or unloaded in the quarantined area.

(c) Without a certificate or limited permit, if the regulated article is moved:

(1) By the United States Department of Agriculture for experimental or scientific purposes;

(2) Pursuant to a permit issued by the Administrator for the regulated article;

(3) Under conditions specified on the permit and found by the Administrator to be adequate to prevent the spread of Mediterranean fruit fly; and,

(4) With a tag or label bearing the number of the permit issued for the regulated article attached to the outside of the container of the regulated article or attached to the regulated article itself if not in a container.

§ 301.78–5 Issuance and cancellation of certificates and limited permits.

(a) A certificate shall be issued by an inspector [3] for the interstate movement of a regulated article if the inspector determines that:

(1)(i) The regulated article has been treated under the direction of an inspector in accordance with § 301.78–10 of this subpart; or

(ii) Based on inspection of the premises of origin, that the premises are free from the Mediterranean fruit fly; or

(iii) Based on inspection of the regulated article, that it is free of Mediterranean fruit fly; and

(2) The regulated article will be moved through the quarantined area in an enclosed vehicle or is completely enclosed by a covering adequate to prevent access by Mediterranean fruit fly; and

(3) The regulated article is to be moved in compliance with any additional emergency conditions the Administrator may impose, under section 105 of the Federal Plant Pest Act (7 U.S.C. 150dd),[4] to prevent the spread of the Mediterranean fruit fly; and

(4) The regulated article is eligible for unrestricted movement under all other federal domestic plant quarantines and regulations applicable to the regulated articles.

(b) An inspector [5] will issue a limited permit for the interstate movement of a regulated article if the inspector determines that:

(1) The regulated article is to be moved interstate to a specified destination for specified handling, utilization, or processing (the destination and other conditions to be listed in the limited permit), and this interstate movement will not result in the spread of the Mediterranean fruit fly because life stages of the Mediterranean fruit fly will be destroyed by the specified handling, utilization, or processing;

(2) The regulated article is to be moved in compliance with any additional emergency conditions the Administrator may impose, under section 105 of the Federal Plant Pest Act (7 U.S.C. 150dd),[6] to prevent the spread of the Mediterranean fruit fly; and

(3) The regulated article is eligible for interstate movement under all other federal domestic plant quarantines and regulations applicable to the regulated article.

(c) Certificates and limited permits for use for interstate movement of regulated articles may be issued by an inspector or person operating under a compliance agreement. A person operating under a compliance agreement may issue a certificate for the interstate movement of a regulated article if an inspector has made the determination that the regulated article is otherwise eligible for a certificate in accordance with paragraph (a) of this section. A person operating under a compliance agreement may issue a limited permit for interstate movement of a regulated article when an inspector has made the determination that the regulated article is eligible for a limited permit in accordance with paragraph (b) of this section.

(d) Any certificate or limited permit that has been issued may be withdrawn by an inspector orally or in writing, if he or she determines that the holder of the certificate or limited permit has not complied with all conditions under this subpart for the use of the certificate or limited permit. If the withdrawal is oral, the withdrawal and the reasons for the withdrawal shall be confirmed in writing as promptly as circumstances allow. Any person whose certificate or limited permit has been withdrawn may appeal the decision in writing to the Administrator within ten days after receiving the written notification of the withdrawal. The appeal must state all of the facts and reasons upon which the person relies to show that the certificate or limited permit was wrongfully withdrawn. As promptly as circumstances allow, the Administrator will grant or deny the appeal, in writing, stating the reasons for the decision. A hearing will be held to resolve any conflict as to any material fact. Rules of practice concerning a hearing will be adopted by the Administrator.

§ 301.78–6 Compliance agreement and cancellation.

(a) Any person engaged in growing, handling, or moving regulated articles may enter into a compliance agreement when an inspector determines that the person understands this subpart.[7]

(b) Any compliance agreement may be cancelled orally or in writing by an inspector whenever the inspector finds that the person who has entered into the compliance agreement has failed to comply with this subpart or any conditions imposed pursuant to this subpart. If the cancellation is oral, the cancellation and the reasons for the cancellation shall be confirmed in writing as promptly as circumstances allow. Any person whose compliance agreement has been cancelled may appeal the decision, in writing, within ten days after receiving written notification of the cancellation. The appeal must state all of the facts and reasons upon which the person relies to show that the compliance agreement was wrongfully cancelled. As promptly as circumstances allow, the Administrator will grant or deny the appeal, in writing, stating the reasons for the decision. A hearing will be held to resolve any conflict as to any material fact. Rules of practice concerning a hearing will be adopted by the Administrator.

§ 301.78–7 Assembly and inspection of regulated articles.

(a) Any person (other than a person authorized to issue certificates or limited permits under § 301.78–5(c)), who desires to move a regulated article interstate accompanied by a certificate or limited permit must notify an inspector,[8] as far in advance of the desired interstate movement as possible (no less than 48 hours before the desired interstate movement).

(b) The regulated article must be assembled at the place and in the manner the inspector designates as necessary to comply with this subpart.

§ 301.78–8 Attachment and disposition of certificates and limited permits.

(a) A certificate or limited permit required for the interstate movement of a regulated article, at all times during the interstate movement, must be attached to the outside of the container containing the regulated article, attached to the regulated article itself if not in a container, or attached to the consignee's copy of the accompanying waybill: *Provided however,* That the requirements of this section may be met by attaching the certificate or limited permit to the consignee's copy of the waybill only if the regulated article is sufficiently described on the certificate or limited permit, and on the waybill to identify the regulated article.

(b) The certificate or limited permit for the interstate movement of a regulated article must be furnished by the carrier to the consignee at the destination of the regulated article.

§ 301.78–9 Costs and charges.

The services of the inspector during normal business hours (8:00 a.m. to 4:30 p.m., Monday through Friday, except holidays) will be furnished without cost. The United States Department of Agriculture will not be responsible for any other costs or charges.

§ 301.78–10 Treatments.

Treatment schedules listed in the Plant Protection and Quarantine Treatment Manual to destroy Mediterranean fruit fly can be used on regulated articles. The Plant Protection and Quarantine Treatment Manual is incorporated by reference. For the full identification of this standard, see § 300.1 of this chapter, "Materials incorporated by reference." The following treatments can be used for tomato, bell pepper and tomato, and soil:

(a) *Tomato:* Fumigation with methyl bromide at normal atmospheric pressure with 32g/m^3 for 3½ hours at 21 °C. (70 °F.) or above.

(b) *Bell pepper and tomato:* Heat the article by saturated water vapor at 44.4 °C. (112 °F.) until approximate center of article reaches 44.4 °C. (112 °F.) and maintain at 44.4 °C. (112 °F.) for 8¾ hours, then immediately cool.

Note: Commodities should be tested by the shipper to determine each commodity's tolerance to the treatment before commercial treatments are attempted.

(c) *Soil:* Soil within the drip area of plants that are producing or have produced the fruits, nuts, vegetables, and berries listed in § 301.78–2(a) of this subpart: Apply diazinon at the rate of 5 pounds actual ingredient per acre to the soil within the drip area with sufficient water to wet the soil to a depth of at least ½ inch. Both immersion and pour-on treatment procedures are also acceptable.

Done in Washington, DC, this 23rd day of August 1989.

A. Strating,

Acting Administrator, Animal and Plant Health Inspection Service.

Agricultural Marketing Service

7 CFR Part 989

[Docket No. FV–89–035FR]

Raisins Produced From Grapes Grown in California; Increase in Compensation Rate for Handlers' Services

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule increases handlers' compensation for receiving, storing, fumigating, and handling reserve tonnage raisins acquired by handlers during a particular crop year and held for the account of the Raisin Adminstrative Committee (RAC) and also for reserve tonnage raisins held beyond the crop year of acquisition under the California raisin marketing order. Handlers' compensation for receiving, storing, fumigating, and handling reserve tonnage raisins will increase from $38.75 per ton to $40.00 per ton. Additional payment for storing, fumigating, and handling reserve tonnage raisins held beyond the crop year of acquisition will also be increased from $1.94 per ton to $2.00 per ton for each month of the three-month period ending November 30, and from $1.00 per ton to $1.03 per ton for each month of the next nine months. This action was recommended by the RAC, which is responsible for local administration of the order. The changes more closely reflect current industry costs.

EFFECTIVE DATE: August 29, 1989.

FOR FURTHER INFORMATION CONTACT: Maureen T. Pello, Marketing Order Adminisration Branch, Fruit and Vegetable Division, AMS, USDA, Room 2525–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 382–1754.

SUPPLEMENTARY INFORMATION:

This final rule is issued under Marketing Agreement and Order No. 989 (7 CFR part 989) both as amended, regulating the handling of raisins produced from grapes grown in California. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This rule has been reviewed under Executive Order 12291 and Departmental Regulation No. 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 23 handlers of raisins who are subject to regulation under the raisin marketing order and approximately 5,000 producers in the regulated area. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having gross annual revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of producers and a minority of handlers of California raisins may be classified as small entities.

This final rule increases handlers' compensation under the California raisin marketing order. This action will increase the rates at which handlers are paid for receiving, storing, fumigating, and handling reserve tonnage raisins and also for reserve tonnage raisins held by handlers beyond the crop year of acquisition for the account of the RAC. Both of these changes were recommended by the RAC.

The marketing order authorizes, for the total annual California raisin crop, the establishment of final free and reserve percentages for volume regulation purposes. Raisins in the reserve percentage category must be held by handlers in a reserve pool on handlers' premises for the account of the RAC. Currently, for example, handlers are free to market 70 percent of the Natural (sun-dried) Seedless raisins they receive and must hold 30 percent in reserve.

This final rule will increase the compensation rate for receiving, storing, fumigating, and handling reserve tonnage raisins acquired by handlers during a particular crop year and held for the account of the RAC and for reserve tonnage raisins held by handlers beyond the crop year of acquisition for the account of the RAC. Since August 1, 1983, handlers have been compensated at a rate of $38.75 per ton for providing these services. Additional payment for reserve tonnage raisins held beyond the crop year of acquisition has been $1.94 per ton for each month of the three-month period ending November 30 and $1.00 per ton for each month of the next nine months.

The RAC conducted a survey among handlers on the cost of receiving, storing, fumigating, and handling the 1988–89 raisin reserve pool. The RAC determined that costs ranged from approximately $30.00 per ton to approximately $57.00 per ton. Therefore, the RAC recommended that the compensation rate be increased from $38.75 per ton to $40.00 per ton to more closely reflect increases in the costs for handlers to provide services on reserve pool raisins. In addition, the RAC recommended that payment to handlers for reserve held beyond the end of the crop year be increased proportionately. Therefore, additional payment for reserve tonnage raisins held beyond the crop year of acquisition will be increased from $1.94 per ton to $2.00 per ton for each month of the three-month period ending November 30 and from $1.00 per ton to $1.03 per ton for each month of the next nine months.

Based on available information, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

A proposed rule (54 FR 29343) was published in the **Federal Register** on July 12, 1989, and public comments were invited for a period of 15 days, during which interested individuals had the opportunity to comment on the proposed requirement. No comments were received.

After consideration of all relevant matter presented, including the RAC's recommendation and other available information, it is found that the changes hereinafter set forth will tend to effectuate the declared policy of the Act.

It is also found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** (5 U.S.C. 553). This action will relax restrictions on handlers by increasing the compensation rate for receiving, storing, fumigating, and handling reserve tonnage raisins acquired by handlers during a particular crop year and held for the account of the RAC and also for reserve tonnage raisins held beyond the crop year of acquisition. It should be effective as soon as possible since August 1 is the beginning of the 1989–90 crop year.

List of Subjects in 7 CFR Part 989

California, Grapes, Marketing agreements and orders, Raisins.

For the reasons set forth in the preamble, 7 CFR part 989 is to be revised to read as follows:

Note [*This section will appear in the Code of Federal Regulations.*]

PART 989—RAISINS PRODUCED FROM GRAPES GROWN IN CALIFORNIA

1. The authority citation for 7 CFR Part 989 continues to read as follows:

AUTHORITY: Secs. 1–19, 48 Stat. 31, as amended, 7 U.S.C. 601–674.

Subpart—Schedule of Payments

2. Paragraphs (a)(1) and (b) of § 989.401 are revised to read as follows:

§ 989.401 Payments for services performed with respect to reserve tonnage raisins.

(a) *Payment for crop year of acquisition*—(1) *Receiving, storing, fumigating, and handling.* Each handler shall be compensated at a rate of $40.00 per ton (natural condition weight at the time of acquisition) for receiving, storing, fumigating, and handling the reserve tonnage raisins, as determined by the final reserve tonnage percentage, acquired during a particular crop year and held by the handler for the account of the Raisin Administrative Committee during all or any part of the same crop year.

(2) * * *

(b) *Additional payment for reserve tonnage raisins held beyond the crop year of acquisition.*

Additional payment for reserve tonnage raisins held beyond the crop year of acquisition shall be made in accordance with this paragraph. Each handler holding such raisins for the account of the Committee on August 15 and the following September 1 shall be compensated for storing, handling and fumigating such raisins at the rate of $2.00 per ton per month, or any part thereof, for each month of the three-month period ending November 30, and $1.03 per ton per month, or any part thereof, for each month of the next nine months. Such services shall be completed so that the Committee is assured that the raisins are maintained in good condition.

* * * * *

Dated: August 24, 1989.

William J. Doyle,

Acting Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410-02-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 89–AWP–8]

Revision of Los Alamitos, CA, Control Zone

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action revises the shape and dimensions of the Los Alamitos Control Zone where it adjoins the Long Beach, California Control Zone. Due to weather reporting and communications requirements when Los Alamitos is not activated, the control zone will not be under jurisdiction of Long Beach, California, but will revert to public use.

EFFECTIVE DATE: 0901 u.t.c., November 16, 1989.

FOR FURTHER INFORMATION CONTACT: Daniel K. Martin, Airspace and Procedures Specialist, Airspace and Procedures Branch, AWP–530, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261, telephone (213) 297–0433.

SUPPLEMENTARY INFORMATION:

History

On April 19, 1989, the FAA proposed

to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to revise the Los Alamitos, CA, control zone (54 FR 15776). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. The U.S. Army did not concur. They expressed concern due to the absence of controlled airspace for safety of flight below the 700 foot transition area for special flights occurring after Los Alamitos is closed when the control zone is not effective. Long Beach is unable to provide the necessary service to aircraft transiting this control zone. When Los Alamitos is not activated, the Los Alamitos control zone will revert to public use.

The Rule

This amendment to part 71 of the FAR revises the shape and lateral dimensions of the Los Alamitos Control Zone. Control jurisdiction of this control zone will no longer revert to Long Beach when Los Alamitos is not activated. Required are hourly and special weather observations during the times and dates a control zone is activated, taken on the airport upon which the control zone is designated. Long Beach is unable to provide the necessary service to aircraft transiting this control zone. When Los Alamitos is not activated, the Los Alamitos control zone will revert to public use.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (71 FR 171), is amended, as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.171 [Amended]

2. § 71.171 is amended as follows:

Los Alamitos, CA [REVISED]

Within a 5-mile radius of Los Alamitos Armed Forces Reserve Center (lat. 33°47'30" N., long. 118°02'50" W). Excluding that portion within the Long Beach, CA, control zone, and excluding the portion within a 1-mile radius of Meadowlark Airport (alt. 33°43'08" N., long. 118°02'13" W). This control zone is effective from 0700 to 2200 hours local time daily, or during specific times and dates established in advance by a Notice to Airmen which will be continuously published in the *Airport/Facility Directory.*

Issued in Los Angeles, California, on July 28, 1989.

Jacqueline L. Smith,

Manager, Air Traffic Division, Western-Pacific Region.

[FR Doc. 89–20270 Filed 8–28–89; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 89–AWP–7]

Revision of Long Beach, CA, Control Zone

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action revises the shape and dimensions of the Long Beach Control Zone. Due to weather-reporting and communications requirements, this action eliminates the assumption of the Los Alamitos Control Zone by Long Beach when Los Alamitos is not activated.

EFFECTIVE DATE: 0901 u.t.c., November 16, 1989.

FOR FURTHER INFORMATION CONTACT: Daniel K. Martin, Airspace and Procedures Specialist, Airspace and Procedures Branch, AWP–530, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261, telephone (213) 297–0433.

SUPPLEMENTARY INFORMATION:

History

On May 19, 1989, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to revise the Long Beach, CA, control zone dimensions and eliminate the assumption of Los Alamitos control zone when Los Alamitos is not effective (54 FR 21629). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposals to the FAA. The U.S. Army did not concur, expressing concern at the absence of controlled airspace for safety of flight below the 700 foot transition area for special flights occurring after Los Alamitos is closed when the control zone is not effective. Long Beach is unable to provide the necessary service to aircraft transiting the Los Alamitos Control Zone. For these reasons, when Los Alamitos is not activated, the Los Alamitos control zone will revert to public use.

The Rule

This amendment to Part 71 of the FAR revises the lateral dimensions of the Long Beach Control Zone. The assumption by Long Beach of the Los Alamitos Control Zone when Los Alamitos is not active is eliminated. Hourly and special weather reporting is required during the times and dates a control zone is designated, based on the airport upon which the control zone is designated. Long Beach is unable to provide the necessary service to aircraft transiting the Los Alamitos Control Zone. For these reasons, when Los Alamitos is not activated, the Los Alamitos control zone will revert to public use.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Polices and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (71 FR 171), is amended, as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

2. § 71.171 is amended as follows:

Long Beach, CA [REVISED]

Within a 5-mile radius of Long Beach Municipal Airport (lat. 33°49′07″N., long. 118°09′04″W). This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will, thereafter, be continuously published in the *Airport/Facility Directory*.

Issued in Los Angeles, California, on July 28, 1989.

Jacqueline L. Smith,

Manager, Air Traffic Division, Western-Pacific Region.

BILLING CODE 4910-13-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 177

[Docket No. 88F–0024]

Indirect Food Additives; Polymers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for an increase in the maximum level of mineral oil that may be used in certain repeated-use rubber articles intended for contact with food. This action is in response to a petition filed by Monsanto Chemical Co.

DATES: Effective August 29, 1989; written objections and requests for a hearing by September 28, 1989.

ADDRESSES: Written objections may be sent to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Andrew D. Laumbach, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of March 1, 1988 (53 FR 6203), FDA announced that a food additive petition (FAP 8B4058) had been filed by Monsanto Chemical Co., 800 North Lindbergh Boulevard, St. Louis, MO 63166, proposing that § 177.2600 *Rubber articles intended for repeated use* (21 CFR 177.2600) be amended to provide for an increase in the maximum level of mineral oil that may be used in certain repeated-use rubber articles intended for contact with food.

FDA has evaluated data in the petition and other relevant material. The agency concludes that the proposed food additive use is safe, and that 21 CFR 177.2600(c)(4)(iv) should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Any person who will be adversely affected by this regulation may at any time on or before September 28, 1989, file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitite a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objection received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 177

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director, Center for Food Safety and Applied Nutrition, part 177 is amended as follows:

PART 177—INDIRECT FOOD ADDITIVES: POLYMERS

1. The authority citation for 21 CFR part 177 continues to read as follows:

Authority: Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

2. Section 177.2600 is amended in paragraph (c)(4)(iv) by revising the paragraph heading and the entry for "Mineral oil" to read as follows:

§ 177.2600 Rubber articles intended for repeated use.

* * * * *

(c) * * *

(4) * * *

(iv) *Plasticizers (total not to exceed 30 percent by weight of rubber product unless otherwise specified).*

* * * * *

Mineral oil; (1) In rubber articles complying with this section, not to exceed 30 percent by weight; (2) Alone or in combination with waxes, petroleum, total not to exceed 45 percent by weight of rubber articles that contain at least 20 percent by weight of ethylene-propylene copolymer elastomer complying with paragraph (c)(4)(i) of this section, in contact with foods of Types I, II, III, IV, VI, VII, VIII, and IX idenified in Table 1 of § 176.170(c) of this chapter.

BILLING CODE 4160-01-M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1910

RIN 1218–AA 62

Occupational Exposure to Formaldehyde

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Extension of administrative stay.

SUMMARY: On December 4, 1987, the Occupational Safety and Health Administration (OSHA) published a final rule in the **Federal Register** on occupational exposure to formaldehyde (29 CFR 1910.1048, 52 FR 46168). In response to numerous public comments which indicated confusion about the hazard warning provisions of the newly revised Formaldehyde Standard, on December 16, 1988, OSHA announced an administrative stay of paragraphs (m)(1)(i) through (m)(4)(ii) for a period of nine months. OSHA also announced its intention to revoke paragraphs (m)(1)(i) through (m)(4)(ii) and invite comments on replacing them with the Hazard Communication Standard (29 CFR 1910.1200) or another equally protective alternative which would be less confusing to the public (53 FR 50198).

OSHA has not yet completed work on certain proposed amendments to the Hazard Communication Standard (see 53 FR 29822, 8/8/88). These amendments are relevant to the decision as to whether it would be appropriate to substitute the amended Hazard Communication Standard for stayed paragraph (m)(1)(i) through (m)(4)(ii) of the Formaldehyde Standard. Consequently OSHA is extending the stay an additional nine months and will consider further developments in the Hazard Communication rulemaking in determining what regulatory action to propose on formaldehyde. While this stay is in effect, affected employers must continue to comply with the provisions of OSHA's Hazard Communication Standard.

EFFECTIVE DATE: The administrative stay of 29 CFR 1910.1048 (m)(1)(i) through (m)(4)(ii) will be effective until June 13, 1990.

FOR FURTHER INFORMATION CONTACT: Mr. James Foster, Occupational Safety and Health Administration, Office of Information and Consumer Affairs, U.S. Department of Labor, Room N–3647, 200 Constitution Avenue NW., Washington, DC 20210. Telephone (202) 523–8151.

Authority and Signature

This document was prepared under the direction of Alan C. McMillan, Acting Assistant Secretary of Labor for Occupational Safety and Health, 200 Constitution Avenue NW., Washington, DC 20210.

This action is taken pursuant to section 4(b), 6(b), and 8(c) of the Occupational Safety and Health Act of 1970 (84 Stat. 1593, 1597, 1599; 29 U.S.C. 653, 655, 657); Secretary of Labor's Order No. 9–83 (48 FR 35736) and 29 CFR part 1911.

List of Subjects in 29 CFR Part 1910

Formaldehyde, Occupational safety and health, Chemicals, Cancer, Health, Risk assessment.

§ 1910.1048 [Stayed in part]

Therefore, 29 CFR 1910.1048 (m)(1)(i), through (m)(4)(ii) is stayed until June 13, 1990.

Signed at Washington, DC this 22nd day of August, 1989.

Alan C. McMillan,

Acting Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510-26-M

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2676

Valuation of Plan Benefits and Plan Assets Following Mass Withdrawal

CFR Correction

In title 29 of the Code of Federal Regulations, part 1927 to end, revised as of July 1, 1988, § 2676.13(b)(1), in the portion of paragraph (b)(1) which immediately follows the equation, some of the symbols were incorrectly displayed.

§ 2676.13 [Corrected]

On page 731, in the second column, paragraph (b)(1) is revised to read as follows:

(1) If the payment is not contingent on the survival of any person:

$$v^{0:n}=\left(\frac{1}{1+i_{k+1}}\right)^{j}\cdot\prod_{t=1}^{k}\frac{1}{1+i_{t}},$$

where $n = k + j$, k is an integer, $0 \leq j < 1$, $v^{0:0}= 1$, and i_t is the interest rate determined under § 2676.15 applicable to the year ending on the *k*th anniversary of the valuation date.

BILLING CODE 1505-01-M

DEPARTMENT OF THE TREASURY

Fiscal Service

31 CFR Parts 235, 240, 245, 248

Indorsement and Payment of Checks Drawn on the United States Treasury

AGENCY: Financial Management Service, Fiscal Service, Treasury.

ACTION: Final rule.

SUMMARY: This rule amends existing regulations governing the indorsement and payment of checks drawn on the United States Treasury and the processing of claims on Treasury checks. The changes are required by Title X of the Competitive Equality Banking Act of 1987 which: (1) Provides that Treasury may decline payment on a Treasury check unless it is negotiated within one year; (2) provides for the cancellation of Treasury checks outstanding after one year; and (3) decreases the time limit for claims on Treasury checks to be brought by or against the United States.

EFFECTIVE DATE: October 1, 1989.

ADDRESSES: Financial Management Service, Prince Georges Center II Building, 3700 East-West Highway, Hyattsville, Maryland 20782.

FOR FURTHER INFORMATION CONTACT: Joan Pesata, Director, Limited Payability Project, Financial Management Service, Room 816–C, Prince Georges Center II Building, 3700 East-West Highway, Hyattsville, Maryland 20782; telephone (301) 436–7172, (FTS) 436–7172.

SUPPLEMENTARY INFORMATION: On August 10, 1987, Congress enacted the Competitive Equality Banking Act of 1987 (CEBA), Public Law No. 100–86, 101 Stat. 552, 659. Title X of CEBA changed the laws governing the payment of checks drawn on the United States Treasury and the filing of claims on

account of Treasury checks. Formerly,

Such interagency matters will be

legend, or inadvertent lack thereof, does

provisional credit for the item to the

survivor(s) as payees of a check with

have not been paid and remain

account of Treasury checks. Formerly, Treasury checks were payable without limitation of time. Under CEBA, Treasury is not required to pay a Treasury check issued on or after the effective date of the legislation unless it is negotiated to a financial institution within 12 months after the date of issuance of the check. Treasury is not required to pay a Treasury check issued before the effective date of the legislation unless it is negotiated to a financial institution within 12 months after the effective date. Checks outstanding more than one year are to be cancelled.

Formerly, a claim on a paid Treasury check could be brought for 6 years from the date of payment. Under CEBA, any claim on account of a Treasury check is barred unless presented to the agency that authorized the issuance of the check within one year after the date of issuance. Claims on checks issued before the effective date of the legislation must be filed within one year after the effective date. CEBA reduces the period during which Treasury may reclaim the amount of a check which has been paid over a forged or unauthorized indorsement.

Section 1005 of Title X of CEBA authorizes the Secretary of the Treasury to prescribe rules, regulations and procedures as he deems necessary to implement the amendments made by sections 1002, 1003 and 1004, including the recertification of Treasury checks which have been cancelled or for which a claim has been asserted or barred. Sections 1002, 1003 and 1004 of Title X of CEBA were to be effective 6 months after enactment or on such later date as the Secretary of the Treasury prescribed. In the February 8, 1988, **Federal Register** (53 FR 3584), Treasury set October 1, 1989 as the effective date.

Pursuant to CEBA, in the March 13, 1989, **Federal Register** (54 FR 10366), Treasury issued a Proposed Rule to amend the regulations governing the payment of checks and check claims.

Response to Comments

Five comments were received from Federal agencies and fourteen comments were received from financial institutions or other organizations. Two agencies were concerned that the amendments will increase agency responsibilities for agency payments and agency collections. One effect of CEBA is to make agencies more responsible for the financial consequences of their programs. This effect is reflected in the amendments. Other agency comments involved interagency procedural relationships. Such interagency matters will be addressed in specific implementing instructions and Volume I, Part 4 of the Treasury Financial Manual.

Many financial institution comments expressed support for the rulemaking. Other comments addressed regulations unaffected by CEBA or the amendments. These remarks have been forwarded to appropriate Treasury offices. Several comments concerned the need for a strong public awareness campaign in conjunction with the publication of the final rule. Over the past two years, the Financial Management Service (FMS) has conducted a broad public awareness effort, targeting the major audiences affected. FMS has worked with Federal agencies and with organizations representing large segments of check recipients to enlist their assistance in educating payees and constituents. The awareness effort included liaison with Federal Reserve Banks (FRBs) and banking organizations to reach member financial institutions. In addition, a series of news articles is scheduled for publication in August and September 1989.

One financial institution requested reimbursement procedures when a check is received for deposit and funds are paid out after the one year negotiability period and no recourse is available to the depositor's account. The financial institution will be able to ascertain from the face of the check if a check is not properly payable pursuant to § 240.3. Financial institutions that accept checks which are not properly payable do so at their own risk.

One comment stated that the term "Commission" in §§ 240.4(a)(3) and 240.6(d) should be "Commissioner." The term was corrected to "Commissioner" in the above-cited sections of the final rule.

The following is a section by section discussion of the remaining comments made to specific sections of the final rule.

Section 240.3 Limitations on Payment

1. *Comment:* Several comments offered alternatives to the legend "Void After One Year." One comment suggested a specific placement and size of the legend.

Response: Available space on the check restricted the length of the legend, but "Void After One Year" is one of many legend variations in common use. CEBA does not require that a legend appear on the checks. In addition to the constructive notice in § 240.3, the legend will be actual notice to payees and indorsers of a general limitation on the payment and negotiability of Treasury checks. The regulations provide that the legend, or inadvertent lack thereof, does not limit, or otherwise affect, the rights of the Commissioner under the law. When new check stock is ordered, delivered, and used, the legend will appear printed on the blank check stock. Until existing check stock is depleted, the legend will be typed on the check stock at the same time that other fields of information are included.

2. *Comment:* One comment requested a definition of the 12 month negotiability period.

Response: The period of negotiability, which begins on the date of issuance printed on the check, extends for 12 months. The check must be negotiated within one year from the date printed on the check. For example, a check issued dated October 31, 1989, must be negotiated on, or before, October 30, 1990.

Section 240.4 Cancellation and Distribution of the Proceeds of Checks

1. *Comment:* One comment offered that the regulations should specify that cancellation applies to any check that has not been accepted for payment, or deposit, by a financial institution.

Response: The cancellation of a check that remains outstanding for more than twelve (12) months from the later of the date of issuance or October 1, 1989 will occur at the end of the fourteenth (14) month. Based on current FRBs processing time for Government checks, the time period between the negotiation and cancellation and distribution of proceeds allows for the processing of checks through the FRBs and Treasury's payment system.

2. *Comment:* One comment stated that § 240.4(b) should include a provision requiring Treasury to maintain records related to checks dated prior to October 1, 1989 that will be cancelled.

Response: Information on Treasury's record retention policy is included in § 245.7.

Section 240.6 Reclamation of Amounts of Paid Checks

1. *Comment:* One comment recommended that the term "date of payment" be defined for reclamations under this section.

Response: Section 240.6(d) states the time period for reclamations. The language of § 240.6(d) is specific to the governing statute and will remain unchanged. As described in the summary to the proposed rules, Treasury may reclaim within one year after the date of payment. For purposes of this section, Treasury considers the date of payment to be the date on which the Federal Reserve Bank gives

provisional credit for the item to the member bank or clearing bank.

2. *Comment:* One comment requested that, where multiple consecutive checks have been issued and fraudulently negotiated, Treasury should reclaim the proceeds from indorsers based on the age of the last check paid, rather than on the date of payment of each check.

Response: The language and intent of CEBA (31 U.S.C. 3712(a)(1)) is contrary to the recommendation. The reclamation period will not be extended on the basis described.

3. *Comment:* One comment stated that the term "provisional credit" used on section 240.6 is obsolete and should be replaced with "credit."

Response: "Provisional credit" appears in the summary and comment of the rule, but is not used in the text of the regulation. In the context of Treasury procedures, the term "provisional credit" accurately reflects the processing for payment of Treasury checks as set forth in § 240.9, whereby FRBs provide immediate credit subject to examination and credit by the United States Treasury.

4. *Comment:* One comment disagreed with the extension of the reclamation period for an additional 180 days beyond the one year period.

Response: The extended time for reclamation does not alter payee claim periods. Rather, CEBA provides the additional 180-day reclamation period in cases where a timely claim was filed under provisions of 31 U.S.C. 3702. The additional time allows for administrative processing and for the time necessary to obtain documentation supporting a forgery claim.

Section 240.9 Processing of Checks

1. *Comment:* One comment indicated that § 240.9(a)(2), appeared to have omitted the word "not".

Response: In the proposed rule the word "not" was inadvertently omitted from § 240.9(a)(2). A correction was published on May 18, 1989, at 54 FR 21527.

2. *Comment:* One comment requested that Treasury be required to return a certified true copy of the check when payment is refused.

Response: By agreement with the FRBs, when payment of a check is refused for the reason that it was negotiated more than 12 months after the date on which the check was issued, the original check will be returned through the line of endorsers.

Section 240.11 Indorsement by Payees

Comment: One comment disagreed with the change which places responsibility for the redesignation of survivor(s) as payees of a check with the agency, rather than with Treasury.

Response: The present language of § 240.10(f) will be retained in the final rule at § 240.11(f). Thus, the responsibility for redesignation of survivor(s) as payees of a check remains unchanged from present regulations.

Section 245.1 Introductory

Comment: One comment questioned Treasury's authority to issue regulations on the recertification of Treasury checks which have been cancelled or for which a claim has been asserted or barred.

Response: "Treasury may prescribe such rules, regulations, and procedures as the Secretary deems necessary to implement the amendments made by sections 1002, 1003, 1004, including the recertification of Treasury checks which have been cancelled or for which a claim has been asserted or barred." CEBA, Public Law No. 100–86, 101 stat. 552, 859.

Section 245.2 Definitions

Comment: One commenter stated that the definition of "replacement check" should be supplemented by a definition of "settlement check."

Response: Section 245.2(f) defines "replacement check" as "a check issued pursuant to the recertification of payment by a certifying official." This definition accurately reflects the implementation of CEBA and the process of recertifying Treasury checks and will remain unchanged.

Section 245.3 Time Limit for Check Claims

1. *Comment:* One comment suggested clarification of the fact that the new limitation on negotiability of Government checks does not affect the person's entitlement to payment. The commenter stated that they believe that § 245.3(a) and § 245.3(c) are contradictory.

Response: A claim on account of a Treasury check is distinct from a claim on the underlying obligation. The language of §§ 245.3(a) and 245.3(c) is consistent and accurately reflects the statutory language of CEBA.

2. *Comment:* One comment stated that the proposed mechanism for making a claim pursuant to section 245 does not appear to operate for checks which have been cancelled pursuant to § 240.4.

Response: Section 245.3(a) provides that any claim on account of a Treasury check must be presented to the agency that authorized the issuance of such check within one year after the date of issuance of the check or within one year after October 1, 1989, whichever is later. Section 240.4 provides that checks, that have not been paid and remain outstanding for more than 12 months, shall be cancelled either 12 months from October 1, 1989, pursuant to § 240.4(a), or no later than April 1, 1991, pursuant to § 240.4(b). The period for claims on account of a Treasury check will end before the cancellation period. The provisions do not present a conflict.

Section 245.5 Recertification.

1. *Comment:* Four commenters stated that implementation of section 245.5 should be delayed.

Response: Section 245.5 applies to Federal agencies and implements agency recertification under CEBA. By specific arrangement with the Treasury, where operational and system limitations compel a phased integration, agency responsibilities under recertification may be temporarily assisted by Treasury.

2. *Comment:* Two commenters stated that payee forgery claims should be settled by Treasury's use of the Check Forgery Insurance Fund.

Response: As the later enacted statute, specific to the issues of check claims, payments, and reclamations, the 1987 enactment of CEBA is the controlling law with respect to these issues. Regulatory amendments, issued under authority of CEBA, explicitly confirm and expand upon existing, longstanding, government-wide policies and processes for check payments and check claims.

Section 245.7 Check Status Inquiry

Comment: Five comments requested that Treasury reconsider the decision to return records to agencies after 18 months beyond a check's issue date.

Response: Section 245.7 has been amended to read, "The Commissioner will provide the status and a copy of the check if available, upon request, to the agency which authorized the issuance of the check."

Section 245.8 Receipt or Recovery of Original Check

Comment: One comment requested that the policy of returning checks to the Treasury continue rather than returning checks to the program agencies.

Response: The section reflects the relationship of the certifying agency to its constituents and the availability of detailed constituent records to the certifying agencies. By specific agreement, FMS Regional Financial Centers may temporarily assist agencies incapable of immediate implementation of this provision.

BEST COPY AVAILABLE

Except as noted above, the Final Rule is the same as was published as a Proposed Rule in the Federal Register.

Regulatory Procedures

Executive Order 12291

The Treasury Department has determined that this regulation is not a "major rule" within the meaning of Executive Order 12291 (46 FR 13193, February 19, 1981). It is not likely to result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State or local Government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Therefore, preparation of a Regulatory Impact Analysis is not required.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603 and 604) are not applicable to this rule because it will not have a significant economic impact on a substantial number of small entities. The regulation will not impose, or otherwise cause, a significant increase in reporting, recordkeeping, or other compliance burdens on a substantial number of small entities. The regulation is not expected to have significant secondary or incidental effects on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of Section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this rule will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

The collection of information contained in this final regulation has been reviewed and approved by the Office of Management and Budget in accordance with the requirements of the Paperwork Reduction Act (44 U.S.C. 3504(h)) under control number 1510-0058. The estimated average burden associated with the collection of information in this final rule is .167 hours per respondent or recordkeeper.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the Financial Management Service at the address previously specified and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attention Desk Officer for the Financial Management Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, title 31, chapter II, subchapter A of the Code of Federal Regulations is amended as follows:

PART 235—ISSUANCE OF SETTLEMENT CHECKS FOR FORGED CHECKS DRAWN ON DESIGNATED DEPOSITARIES

1. The authority citation for Part 235 is revised to read as follows:

Authority: 31 U.S.C. 3343.

2. Part 235 is amended by revising the part heading as set forth above.

§ 235.1 [Amended]

3. Section 235.1 is amended by removing "drawn on the United States Treasury and."

§ 235.3 [Amended]

4. Section 235.3 is amended by removing "the Commissioner, Financial Management Service, with respect to a check drawn on the United States Treasury, or."

5. Section 235.6 is revised to read as follows:

§ 235.6 Implementing instructions.

Procedural instructions implementing these regulations will be issued by the Commissioner of the Financial Management Service in volume I, part 4 of the Treasury Financial Manual.

Parts 240 and 245 are revised to read as follows:

PART 240—INDORSEMENT AND PAYMENT OF CHECKS DRAWN ON THE UNITED STATES TREASURY

General Provisions

Sec.
240.1 Scope of regulations.
240.2 Definitions.
240.3 Limitations on payment.

240.15 Powers of attorney.

Appendix A—Standard Forms for Power of Attorney and Their Application

Authority: 5 U.S.C. 301; 12 U.S.C. 391; 31 U.S.C. 3328; 31 U.S.C. 3331; 31 U.S.C. 3343; 31 U.S.C. 3711; 31 U.S.C. 3716; 31 U.S.C. 3717; 332 U.S. 234 (1947); 318 U.S. 363 (1943).

General Provisions

§ 240.1 Scope of regulations.

The regulations in this part prescribe the requirements for indorsement and the conditions for payment of checks drawn on the United States Treasury. These regulations also establish procedures for collection of amounts due the United States Treasury because of payments on checks bearing forged or other unauthorized indorsements or other material defects or alterations.

§ 240.2 Definitions.

(a) *Certifying agency* means an agency for whom a Treasury disbursing officer or a non-Treasury disbursing officer makes payment in accordance with 31 U.S.C. 3325. The responsibilities of a certifying official are set forth at 31 U.S.C. 3528.

(b) *Check* or *Checks* means a check or checks drawn on the United States Treasury.

(c) *Check payment* means the amount paid to a presenting bank in accordance with § 240.9(a)(3) of this part.

(d) *Commissioner* means the Commissioner of the Financial Management Service, Department of the Treasury, 401 14th Street SW., Washington, DC 20227.

(e) *Days* means calendar days.

(f) *Financial institution* means any bank, savings bank, savings and loan association, Federal or State chartered credit union, or similar institution.

(g) *Item* means a reference in a monthly interest billing statement to a check for the amount of which Treasury has demanded refund from a presenting bank.

(h) *Monthly interest billing statement* means a statement prepared by Treasury and sent to a presenting bank which includes the following information regarding each outstanding demand for refund:

(1) The reclamation date;

(2) The reclamation number;

(3) Check identifying information; and

(4) The balance due, including interest.

(i) *Person* or *persons* means an individual or individuals, or an institution or institutions including all forms of financial institutions.

(j) *Presenting bank* means:

(1) A financial institution which, either directly or through a correspondent banking relationship, presents checks to and receives provisional credit from a Federal Reserve Bank; or

(2) A depositary which is authorized to charge checks directly to the General Account of the United States Treasury and present them to Treasury for payment through a designated Federal Reserve Bank.

(k) *Protest* means a presenting bank's written statement and any supporting documentation tending to prove that it is not liable for refund of the reclamation balance.

(l) *Reclamation* means a demand by Treasury for refund of the amount of a check payment.

(m) *Reclamation date* means the date on which a demand for refund was prepared. Normally, demands are sent to presenting banks within two working days of the reclamation date.

(n) *Treasury* means the United States Treasury.

(o) *U.S. securities* means securities of the United States and securities of Federal agencies and wholly or partially government-owned corporations for which the Treasury acts as the transfer agent.

(p) *Unauthorized indorsement* means:

(1) An indorsement made by a person other than the payee, except as authorized by and in accordance with § 204.5 and §§ 240.11 through 240.15;

(2) An indorsement by a financial institution under circumstances in which the financial institution breaches the guaranty required of it by 31 CFR 209.9(a) (*See*, 31 CFR 209.8); or

(3) A missing indorsement where the depositary bank had no authority to supply the indorsement.

§ 240.3 Limitations on payment.

(a) As a general rule,

(1) The Commissioner shall not be required to pay a Treasury check issued on or after October 1, 1989 unless it is negotiated to a financial institution within 12 months after the date on which the check was issued; and

(2) The Commissioner shall not be required to pay a Treasury check issued before October 1, 1989 unless it is negotiated to a financial institution no later than October 1, 1990.

(b) All checks drawn on the United States Treasury and issued on or after October 1, 1989 shall bear a legend, stating "Void After One Year." The legend is notice to payees and indorsers of a general limitation on the payment of Treasury checks. The legend, or the inadvertent lack thereof, does not limit, or otherwise affect, the rights of the Commissioner under the law.

(c) The Treasury shall have the usual right of a drawee to examine checks presented for payment and refuse payment of any checks. The Treasury shall have a reasonable time to make such examination.

(d) Checks shall be deemed to be paid by the United States Treasury only after first examination has been fully completed.

(e) If the Treasury is on notice of a question of law or fact about whether a Treasury check is properly payable when the check is presented for payment, the Commissioner may defer payment until the Comptroller General settles the question.

§ 240.4 Cancellation and distribution of proceeds of checks.

(a) *Checks issued on or after October 1, 1989.* (1) Any check issued on or after October 1, 1989 that has not been paid and remains outstanding for more than 12 months shall be cancelled by the Commissioner.

(2) The proceeds from checks cancelled pursuant to paragraph (a) of this section shall be returned to the agency which authorized the issuance of the check and credited to the appropriation or fund account initially charged for the payment.

(3) Beginning January 1, 1991, and monthly thereafter, the Commissioner shall provide to each agency that authorizes the issuance of Treasury checks a list of those checks issued for such agency which were cancelled during the preceding month pursuant to paragraph (a) of this section.

(b) *Checks issued before October 1, 1989.* (1) Any check issued before October 1, 1989 that has not been paid and remains outstanding for more than 12 months shall be cancelled by the Commissioner no later than April 1, 1991.

(2) The proceeds from checks cancelled pursuant to paragraph (b) of this section shall be applied as required by 31 U.S.C. 3334.

§ 240.5 Guaranty of indorsements.

The presenting bank and the indorsers of a check presented to the Treasury for payment are deemed to guarantee to the Treasury that all prior indorsements are genuine, whether or not an express guaranty is placed on the check. When the first indorsement has been made by one other than the payee personally, the presenting bank and the indorsers are deemed to guarantee the Treasury, in addition to other warranties, that the person who so indorsed had unqualified capacity and authority to indorse the check on behalf of the payee.

§ 240.6 Reclamation of amounts of paid checks.

(a) If, after a check has been paid by Treasury, it is found to:

(1) Bear a forged or unauthorized indorsement; or

(2) Contain any other material defect or alteration which was not discovered upon first examination, then, upon demand by the Treasury in accordance with the procedures specified in § 240.7 of this part, the presenting bank or other indorser shall refund the amount of the check payment.

(b) Interest on any unpaid item shall commence to accrue on the sixty-first day after the reclamation date. Interest shall be calculated at the rate set from time to time for purposes of 31 U.S.C. 323. Interest shall continue to accrue until the amount demanded is paid or the reclamation is abandoned by Treasury.

(c) In addition to its right to recover interest, Treasury shall have the right to recover such other applicable charges *(e.g.,* administrative collection costs, late payment penalties) as may be authorized or required by law.

(d) If the Treasury determines that a check has been paid over a forged or unauthorized indorsement, the Commissioner may reclaim the amount of the check from the presenting bank or any other indorser that breached its guarantee of indorsement prior to:

(1) The end of the one-year period beginning on the date of payment; or

(2) The expiration of the 180-day period beginning on the close of the period described in paragraph (d)(1) of this section if a timely claim under 31 U.S.C. 3702 is presented to the agency which authorized the issuance of the check.

§ 240.7 Demand and protest.

(a) For all reclamations an initial demand for refund of the amount of a check payment will be made by sending a "Request for Refund (Reclamation)," to the presenting bank or any other indorser. This Request shall advise the presenting bank of the amount demanded and the reason for the demand. Treasury will make follow-up demands by including each unpaid item on at least three monthly interest billing statements sent to the presenting bank. Monthly interest billing statements will identify any unpaid reclamation demands and will also show the amount of any accrued interest for each outstanding reclamation. Any discrepancies should be brought to Treasury's attention immediately at the address listed in paragraph (b) of this section. Monthly interest billing statements will contain or be accompanied by notice to the bank:

(1) That Treasury intends to collect the debt through administrative offset if the reclamation is not paid within 120 days of the reclamation date;

(2) That the bank has an opportunity to inspect and copy Treasury's records with respect to the reclamation;

(3) That the bank may, by filing a protest, request Treasury to review its decision that the bank is liable for the reclamation; and

(4) That the bank has an opportunity to enter into a written agreement with Treasury for the repayment of the amount of the reclamation. A request for a payment agreement must be accompanied by proof that satisfies the Treasury that the requesting bank is unable to repay the entire amount owed at the time that it is due.

(b) Requests for an appointment to inspect and copy Treasury's records with respect to a reclamation and requests to enter into repayment agreements should be sent in writing to: Department of the Treasury, Financial Management Service, Operations Division, Reclamation Branch, Room 700–D, 3700 East-West Highway, Hyattsville, MD 20782.

(c)(1) If a presenting bank wishes to contest its liability for the principal amount demanded, it shall send a protest, *i.e.*, a written statement and copies of all documentary evidence (*e.g.*, affidavits, account agreements, signature cards) and other written information raising a question of law or fact which, if resolved in the bank's favor, would show that the bank is not liable, to: Department of the Treasury, Financial Management Service, Operations Division, Reclamation Branch Room 700–D, 3700 East-West Highway, Hyattsville, MD 20782.

The Director, Operations Division, who has supervisory authority over the Reclamation Branch, or his authorized subordinate, shall consider and decide any protest properly submitted under this paragraph. Neither the Director, Operations Division, nor any of his subordinates, shall have any involvement in the process of making findings or demands under § 240.6(a). In order to be considered, and to be timely, a protest must be received not later than 90 days after the reclamation date. Treasury will refrain from collection in accordance with § 240.8 while a timely protest is being considered. Unresolved protested items will be appropriately annotated on the monthly interest billing statement.

(2) If Treasury accepts the protest, the presenting bank shall be notified in writing that efforts to collect the item and any accrued interest have been abandoned.

(3) If the evidence sent by the presenting bank does not satisfy Treasury that refund of the amount demanded is not required under § 240.6(a), Treasury will notify the presenting bank in writing of its decision that the bank is liable for the amount demanded and the reasons for its decision. If the presenting bank fails to send the amount demanded within 30 days of the date of Treasury's decision, Treasury shall proceed to collect the amount owed in accordance with § 240.8, provided that no offset shall be taken sooner than 120 days after the reclamation date.

(4) If an item, and/or accrued interest relating to that item remains unpaid for 90 days after the reclamation date and if there is no unresolved protest associated with the item, the monthly interest billing statement will be annotated with a notice that the presenting bank has until the next billing date to make payment on the item or be subject to offset thereon.

§ 240.8 Offset.

(a) If an item, and/or accrued interest relating to that item, remains unpaid for 120 days after the reclamation date and the presenting bank has been sent at least one monthly interest billing statement informing it that Treasury intends to collect that item by offset, Treasury may refer the matter to any Federal agency and request that agency to offset the indebtedness and other applicable charges against amounts otherwise owed by the Federal agency to the presenting bank. Monthly interest billing statements will be annotated to identify those specific items that are to be referred to an agency for offset.

(b) If a bank wishes to make payment on an item referred to an agency for offset, it should contact Treasury at the address listed in § 240.7(b) to reduce the possibility of a double collection. If an agency to which an indebtedness is referred in accordance with this paragraph is unable to effect offset in whole or in part, Treasury may then refer the debt to any other agency and request offset in accordance with this paragraph. Treasury designates each agency acting under this paragraph as its designee for the sole purpose of effecting offset. No such designee shall be liable to any party for any loss resulting from its action under this paragraph.

(c) If Treasury is unable to collect an amount owed by use of the offset described in paragraph (a) of this section, Treasury shall take such action against the presenting bank as may be necessary to protect the interests of the United States, including referral to the Department of Justice.

(d) If Treasury effects offset under this section and it is later determined that the presenting bank paid the amount of the reclamation and accrued interest thereon, or that a presenting bank which had timely filed a protest was not liable for the amount of the reclamation, Treasury shall promptly refund to the presenting bank the amount of its payment.

§ 240.9 Processing of checks.

(a) *Federal Reserve Banks.* (1) Federal Reserve Banks shall cash checks for Government disbursing officers when such checks are drawn by the disbursing officers to their own order. Payment of such checks shall not be refused except for alteration or counterfeiting of the check, or forged signature of the drawer.

(2) Federal Reserve Banks shall not be expected to cash Government checks presented directly to them by the general public.

(3) As a depository of public funds, each Federal Reserve Bank shall:

(i) Receive checks from its member banks, nonmember clearing banks, or other depositors, when indorsed by such banks or depositors who guarantee all prior indorsements thereon;

(ii) Give immediate credit therefore in accordance with their current Time Schedules and charge the amount of the checks cashed or otherwise received to the account of the Treasury, subject to examination and payment by the United States Treasury;

(iii) Forward payment records and copies of checks to Treasury; and

(iv) Release the original checks to a designated Federal Records Center upon notification from Treasury. The Treasury shall return to the forwarding Federal Reserve Bank a photocopy of any check the payment of which is refused upon first examination. Federal Reserve Banks shall give immediate credit therefor in the United States

Treasury's account, thereby reversing the previous charge to the account for such check. The Treasury authorizes each Federal Reserve Bank to release the original check to the endorser when payment is refused in accordance with § 240.3(a).

(b) *Depositaries outside of the mainland of the United States.* Banks outside of the mainland of the United States designated as depositaries of public money and permitted to charge checks to the General Account of the United States Treasury shall be governed by the operating instructions contained in the letter of authorization to them from Treasury and shall assume the obligations of presenting banks set forth in §§ 240.5 and 240.6. Checks charged to the General Account of the United States Treasury along with the supporting credit voucher shall be shipped to the Federal Reserve Bank of Richmond. The Treasury shall return to the presenting depositary bank a photocopy of any check the payment of which is refused upon first examination. The depositary bank shall give immediate credit therefor in the General Account of the United States Treasury, thereby reversing the previous charge to the Account for such check. Treasury authorizes the Federal Reserve Bank of Richmond to return to the presenting depositary bank the original check when payment is refused in accordance with § 240.3(a).

§ 240.10 Release of original checks.

An original check may be released to a responsible indorser upon receipt of a properly authorized request showing the reason it is required and that the request is in conformity with all applicable law including the Privacy Act.

Indorsement of Checks

§ 240.11 Indorsement by payees.

(a) *General requirements.* Checks shall be indorsed by the payee or payees named, or by another on behalf of such payees as set forth in this part.

(b) *Checks indorsed by the payee or payees named.* When a check is indorsed by the payee or payees named, the forms of indorsement shall conform to those recognized by general principles of law and commercial usage for negotiation, transfer or collection of negotiable instruments.

(c) *Checks indorsed by another on behalf of the named payee or payees*—(1) *Acceptable indorsement.* The only acceptable indorsement of a check by another on behalf of the named payee or payees (except when a check is indorsed by a financial institution under the payee's or payees' authorization) is one which indicates that the person indorsing is doing so on behalf of the named payee or payees. Such an acceptable indorsement shall include the signature of the indorser and sufficient wording to indicate that the indorser is indorsing on behalf of the named payee or payees, pursuant to authority expressly conferred by or under law or other regulation. An example would be: "John Jones by Mary Jones." This example states the minimum indication acceptable. However, §§ 240.12(a)(1), 240.13(a)(1), and 240.15(d) specify the addition of an indication in specified situations of the actual capacity in which the person other than the named payee is indorsing. Checks indorsed "for collection" or "for deposit only to the credit of the within named payee or payees," are acceptable without any signature. However, in the absence of a signature, the presenting bank will be deemed to guarantee its good title to such checks to all subsequent indorsers and to Treasury.

(2) *Unacceptable indorsement.* The indorsement by another on behalf of the named payee or payees, which consists of the name(s) of the payee(s), whether as purported signature(s) or otherwise, and *not* the signature of the person other than named payee or payees indorsing the check, regardless of the relationship between the indorser and the named payee or payees, will be rebuttably presumed to be a forgery and is unacceptable. The indorsement by a person who purports to indorse for the named payee(s) with an indorsement consisting of the name(s) of the payee(s), whether as purported signature(s) or otherwise, and the indorsing person's signature and no indication of the indorsing person's representative capacity, will create a rebuttable presumption that the indorsing person was not authorized to indorse for the named payee(s). In these circumstances it is the responsibility of the individual or institution accepting a check from a person other than the named payee(s) to determine that such person is authorized and has the capacity to indorse and negotiate the check. Evidence of the basis for such a determination may be required by the Treasury in the event of a dispute.

(d) *Indorsement of checks by a financial institution under the payee's authorization.* When a check is credited by a financial institution to the payee's account under the payee's or payees' authorization, the financial institution may use an indorsement substantially as follows: "Credit to the account of the within-named payee in accordance with the payee's or payees' instructions. XYZ." A financial institution using this form of indorsement will be deemed to guarantee to all subsequent indorsers and to the Treasury that it is acting as an attorney-in-fact for the payee or payees, under the payee's or payees' authorization, and that this authority is currently in force and has neither lapsed nor been revoked either in fact or by the death or incapacity of the payee or payees.

(e) *Indorsement of checks drawn in favor of financial institutions.* All checks drawn in favor of financial institutions, for credit to the accounts of persons designated payment so to be made, shall be indorsed in the name of the financial institutions as payee in the usual manner. Financial institutions receiving and indorsing such checks shall comply fully with Part 209 of this chapter.

(f) *Social Security benefit checks issued jointly to individuals of the same family.* A social security benefit check issued jointly to 2 or more individuals of the same family shall, upon the death of 1 of the joint payees prior to the negotiation of such check, be returned to the Social Security District Office or the Treasury Regional Financial Center. Payment of the check to the surviving payee or payees may be authorized by placing on the face of the check a stamped legend signed by an official of the Social Security Administration or the Treasury Regional Financial Center, redesignating such survivor or survivors as the payee or payees of the check. A check bearing such stamped legend, signed as herein prescribed, may be indorsed and negotiated by the person or persons named as if such check originally had been drawn payable to such person or persons.

§ 240.12 Checks issued to incompetent payees.

(a) *Classes of checks which may be indorsed by guardian or fiduciary.* Where the payee of a check of any class listed in § 240.13(a) has been declared incompetent:

(1) If a check is indorsed by a legal guardian or other fiduciary, such legal guardian or fiduciary shall include, as a part of the indorsement, an indication of the capacity in which the legal guardian or fiduciary is indorsing. An example would be: "John Jones by Mary Jones, guardian of John Jones." When a check indorsed in this fashion is presented for payment by a bank, it will be paid by the Treasury without submission to the Treasury of documentary proof of the authority of the guardian or other fiduciary, with the understanding that evidence of such claimed authority to

other than those shown under Standard Form

and any other entity to which a check

which authorized the issuance of the

indorse may be required by the Treasury in the event of a dispute.

(2) If a guardian has not been or will not be appointed, and if the check:

(i) Was issued in payment of goods and services, tax refunds or redemption of currency, it shall be forwarded for advice to the certifying agency; or

(ii) Was issued in payment of principal or interest on U.S. securities, it shall be forwarded to the Bureau of the Public Debt, Division of Loans and Currency, Washington, DC 20226, with a full explanation of the circumstances.

(b) *Classes of checks which may not be indorsed by guardian or fiduciary.* Where the payee of a check of any other class has been declared incompetent, the check shall not be indorsed by a guardian or other fiduciary. The check shall be returned to the Government agency which certified the payment, with information as to the incompetency of the payee and submission of documentary evidence showing the appointment of the guardian or other explanation in order that a replacement check, and others to be issued subsequently, may be drawn in favor of the guardian.

§ 240.13 Checks issued to deceased payees.

(a)(1) *Classes of checks which may be indorsed by an executor or administrator.* Checks issued for the classes of payments indicated below, the right to which under law does not terminate with the death of the payee, when indorsed by an executor or administrator, shall include, as part of the indorsement, an indication of the capacity in which the executor or administrator is indorsing. An example would be: "John Jones by Mary Jones, executor of the estate of John Jones." Such checks, when presented for payment by a bank, will be paid by the Treasury without the submission of documentary proof of the authority of the executor or administrator, with the understanding that evidence of such claimed authority to indorse may be required by the Treasury in the event of a dispute. The classes of payments to which this subsection refers are:

(i) Payments for the redemption of currencies or for principal or interest on U.S. securities;

(ii) Payments for tax refunds; and

(iii) Payments for goods and services.

(2) If an executor has not been appointed, persons claiming as owners shall return the checks for appropriate handling to the Government agency that certified the payment. If there is doubt as to whether the proceeds of the check or checks pass to the estate of the deceased payee, the checks shall be handled in accordance with paragraph (b) of this section.

(b) *Classes of checks which may not be indorsed by an executor or administrator.* Checks issued for classes of payment other than those specified in paragraph (a) of this section may not be negotiated after the death of the payee, but must be returned to the Government agency that certified the payment for determination whether, under applicable laws, payment is due and to whom it may be made.

§ 240.14 Checks issued to minor payees in certain cases.

Checks issued to minors in payment of principal or interest on U.S. securities may be indorsed by either parent with whom the minor resides, or, if the minor does not reside with either parent, by the person who furnishes his chief support. The parent or other person indorsing in behalf of the minor shall present with the check his signed statement giving the minor's age, stating that the payee either resides with the parent or receives his chief support from the person indorsing in his behalf, and that the proceeds of the checks will be used for the minor's benefit.

§ 240.15 Powers of attorney.

(a) *Specific powers of attorney.* Any check may be negotiated under a specific power of attorney executed after the issuance of the check and describing it in full.

(b) *General powers of attorney.* Checks issued for the following classes of payments may be negotiated under a general power of attorney in favor of an individual, financial institution or other entity:

(1) Payments for the redemption of currencies or for principal or interest on U.S. securities.

(2) Payments for tax refunds, but subject to the limitations concerning the mailing of Internal Revenue refund checks contained in 26 CFR 601.506(b).

(3) Payments for goods and services.

(c) *Special powers of attorney.* Under discussions of the Comptroller General of the United States, classes of checks other than those specified in paragraph (b) of this section may be negotiated under a special power of attorney which names a financial institution as attorney-in-fact, and recites that it is not given to carry into effect an assignment of the right to receive payment, either to the attorney-in-fact or to any other person.

(d) *Proof of authority.* Checks indorsed by an attorney-in-fact shall include, as part of the indorsement, an indication of the capacity in which the attorney-in-fact is indorsing. An example would be: "John Jones by Paul Smith, attorney-in-fact for John Jones." Such checks when presented for payment by a bank, will be paid by the Treasury without the submission of documentary proof of the claimed authority, with the understanding that evidence of such claimed authority to indorse may be required by the Treasury in the event of a dispute.

(e) *Revocation of powers of attorney.* Powers of attorney are revoked by the death of the grantor and may also be revoked by notice from the grantor to the parties known, or reasonably expected, to be acting on the power of attorney. Notice of revocation to the Treasury will not ordinarily serve to revoke the power.

(f) *Acknowledgment of powers of attorney.* Where desirable or where required by foreign, state or local law, powers of attorney shall be acknowledged before a notary public or other officer authorized by law to administer oaths generally.

(g) *Seal or certificate of attesting officers.* Where acknowledgment of powers of attorney is desirable or required pursuant to paragraph (f) of this section, seals of attesting officers shall be impressed or stamped upon the power of attorney form, or the power of attorney shall be accompanied by a certificate from an appropriate official showing that the officer was in commission on the date of acknowledgment.

(h) *Forms.* Power of attorney forms issued under this part are listed in the appendix to this part. They may be obtained from the Financial Management Service, Property and Supply Section, Ardmore East Business Center, 3361–L 75th Avenue, Landover, MD 20785.

Appendix A—Standard Forms for Power of Attorney and Their Application

Standard Form 231. A general power of attorney on this form may be executed by an individual, firm, or sole owner, for checks drawn on the United States Treasury, in payment: (1) For redemption of currencies or for principal or interest on U.S. securities, (2) for tax refunds, and (3) for goods and services.

Standard Form 232. A specific power of attorney on this form, which must be executed after the issuance of the check, describing the check in full, may be used to authorize the indorsement of any class of check drawn on the United States Treasury.

Standard Form 233. A special power of attorney on this form naming a financial organization as attorney-in-fact and reciting that it is not given to carry into effect an assignment of the right to receive payment, either to the attorney-in-fact or to any other person, may be used for classes of payments

other than those shown under Standard Form 231.

Standard Form 234–5. A general power of attorney may be executed by a corporation for the classes of payment listed under Standard Form 231.

Standard Form 236–7. A specific power of attorney may be executed on this form by a corporation to cover a specific check for any class of payment.

PART 245—CLAIMS ON ACCOUNT OF TREASURY CHECKS

Sec.
245.1 Introductory.
245.2 Definitions.
245.3 Time limit for check claims.
245.4 Advice of nonreceipt or loss.
245.5 Recertification of payment.
245.6 Claim by an indorser.
245.7 Check status inquiry.
245.8 Receipt or recovery of original check.
245.9 Procedural instructions.
245.10 Performance of functions of the Commissioner.

Authority: R.S. 3646, as amended; 31 U.S.C. 3328; 31 U.S.C. 3331

§ 245.1 Introductory.

This part governs the issuance of replacement checks for checks drawn on the United States Treasury, when

(a) The original check has been lost, stolen, destroyed or mutilated or defaced to such an extent that it is rendered non-negotiable;

(b) The original check has been negotiated and paid on a forged or unauthorized indorsement, and

(c) The original check has been cancelled pursuant to § 204.4 of this chapter.

§ 245.2 Definitions.

For purposes of this part:

(a) Agency means each authority of the United States for which the Treasury of the United States issues checks or for which checks drawn on the Treasury of the United States are issued.

(b) Check means a check drawn on the United States Treasury.

(c) Certifying Agency means an agency for whom a Treasury disbursing officer or a non-Treasury disbursing officer makes payment in accordance with 31 U.S.C. 3325. The responsibilities of a certifying official are set forth at 31 U.S.C. 3528.

(d) Commissioner means the Commissioner of the Financial Management Service, Department of the Treasury, 401 14th Street, SW., Washington, DC 20227.

(e) Person means an individual, a partnership, a corporation, a labor organization, a government or a subdivision or instrumentality thereof, and any other entity to which a check may be issued.

(f) Replacement check means a check issued pursuant to the recertification of payment by a certifying official.

(g) Secretary means the Secretary of the Treasury.

§ 245.3 Time limit for check claims.

(a) Any claim on account of a Treasury check must be presented to the agency that authorized the issuance of such check within one year after the date of issuance of the check or within one year after October 1, 1989, whichever is later.

(b) Any claim by an indorser under § 245.6 will be considered timely if presented to the Commissioner within one year after the date of issuance of the check or within one year after October 1, 1989, whichever is later.

(c) Nothing in this subsection affects the underlying obligation of the United States, or any agency thereof, for which a Treasury check was issued.

§ 245.4 Advice of nonreceipt or loss.

(a) In the event of the nonreceipt, loss or destruction of a check drawn on the United States Treasury, or the mutilation or defacement of such a check to an exent which renders it nonnegotiable, the claimant should immediately notify the agency that authorized the issuance of such check, describing the check, stating the purpose for which it was issued and giving, if possible, its date, amount, Treasury symbol and number.

(b) In cases involving mutiliated or defaced checks, the claimant should enclose the mutilated or defaced check with his communication to the agency.

§ 245.5 Recertification of payment.

Upon receipt of a claim concerning the nonreceipt, loss, destruction, mutilation or defacement of a check, or the cancellation of a check pursuant to § 240.4 of this chapter, the certifying agency may certify a new payment.

§ 245.6 Claim by an indorser.

When one or more Treasury checks are lost, stolen or destroyed in a single incident while in the possession of a person to whom the checks have been negotiated by the payee, and if the checks have not been paid, the Commissioner may issue a replacement check to the person to whom the checks had been negotiated.

§ 245.7 Check status inquiry.

The Commissioner will provide the status and a copy of the check if available, upon request, to the agency which authorized the issuance of the check.

§ 245.8 Receipt or recovery of original check.

(a) If the original check is received or recovered by the claimant after he has requested the agency to issue a replacement check, but before a replacement check has been received, he should immediately advise the agency and hold such check until receipt of instructions with respect to the negotiability of such check.

(b) If the original check is received or recovered by the claimant after a replacement check has been received by him, the original shall not be cashed, but shall be forwarded immediately to the agency that authorized the issuance of such check. Under no circumstances should both the original and replacement checks be cashed.

§ 245.9 Procedural instructions.

The Commissioner of the Financial Management Service may issue procedural instructions, implementing these regulations, in Volume I, Part 4 of the Treasury Financial Manual.

§ 245.10 Performance of functions of the Commissioner.

The Commissioner of the Financial Management Services may authorize any officer of the Treasury Department to perform any of his functions under this part and to redelegate such authority within such limits as the Commissioner may prescribe.

(Approved by the Office of Management and Budget under control number OMB No. 1510–0058)

PART 248—ISSUE OF SUBSTITUTES OF LOST, STOLEN, DESTROYED, MUTILATED AND DEFACED CHECKS OF THE UNITED STATES DRAWN ON ACCOUNTS MAINTAINED IN DEPOSITARY BANKS IN FOREIGN COUNTRIES OR UNITED STATES TERRITORIES OR POSSESSIONS

1. The authority citation for Part 248 is revised to read as follows:

Authority: 31 U.S.C. 3331.

2. Section 248.1 is revised to read as follows:

§ 248.1 Introductory.

This part governs the issuance of substitutes for checks of the United States drawn on United States dollar or foreign currency accounts, maintained with designated depositaries in foreign countries or territories or possessions of the United States. Checks of the United States drawn on such depositaries are hereafter referred to as "depositary checks."

§ 248.5 [Amended]

3. Section 248.5 is amended by removing "§ 368.4" and adding in its place "§ 248.4."

W.E. Douglas,

Commissioner.

BILLING CODE 4810-36-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Parts 100 and 165

[CGD 89-064]

Safety and Security Zones; Temporary Rules

AGENCY: Coast Guard, DOT.

ACTION: Notice of Temporary Rules Issued.

SUMMARY: This document gives notice of temporary safety zones, security zones, and local regulations. Periodically the Coast Guard must issue safety zones, security zones, and special local regulations for limited periods of time in limited areas. Safety zones are established around areas where there has been a marine casualty or when a vessel carrying a particularly hazardous cargo is transiting a restricted or congested area. Special local regulations are issued to assure the safety of participants and spectators of regattas and other marine events.

DATES: The following list includes safety zones, security zones, and special local regulations that were established between April 1, 1989 and June 30, 1989 and have since been terminated. Also included are several zones established earlier but inadvertently omitted from the past published list.

ADDRESS: The complete text of any temporary regulation may be examined at, and is available on request from, Executive Secretary, Marine Safety Council (G-LRA-2), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593-0001.

FOR FURTHER INFORMATION CONTACT: Mr. Bruce Novak, Executive Secretary, Marine Safety Council at (202) 267-1477.

SUPPLEMENTARY INFORMATION: The local Captain of the Port must be immediately responsive to the safety needs of the waters within his jurisdiction; therefore, he has been delegated the authority to issue these regulations. Since events and emergencies usually take place without advance notice or warning, timely publication of notice in the **Federal Register** is often precluded. However, the affected public is informed through Local Notices to Mariners, press releases, and other means. Moreover, actual notification is frequently provided by Coast Guard patrol vessels enforcing the restrictions imposed in the zone to keep the public informed of the regulatory activity. Because mariners are notified by Coast Guard officials on scene prior to enforcement action, **Federal Register** notice is not required to place the special local regulation, security zone, or safety zone in effect. However, the Coast Guard, by law, must publish in the **Federal Register** notice of substantive rules adopted. To discharge this legal obligation without imposing undue expense on the public, the Coast Guard publishes a periodic list of these temporary local regulations, security zones, and safety zones. Permanent safety zones are not included in this list. Permanent zones are published in their entirety in the **Federal Register** just as any other rulemaking. Temporary zones are also published in their entirety if sufficient time is available to do so before they are placed in effect or terminated.

Non-major safety zones, special local regulations, and security zones have been exempted from review under E.O. 12291 because of their emergency nature and temporary effectiveness.

The following regulations were placed in effect temporarily during the period April 1, 1989 through June 30, 1989 unless otherwise indicated.

Docket Number	Location	Type	Date
1-89-022	Arthur Kill between New York & New Jersey	Safety Zone	20 APR 89
1-89-017	New York Harbor, New York, NY	Safety Zone	29 APR 89
1-89-020	East River, New York, NY	Safety Zone	29 APR 89

BILLING CODE 4910-14-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 0

Editorial Amendment of List of Office of Management and Budget Approved Information Collection Requirements

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action amends the Commission's list of Office of Management and Budget approved information collection requirements contained in the Commission's Rules.

This action is necessary to comply with the Paperwork Reduction Act, which requires that agencies display a current control number assigned by the Director of the Office of Management and Budget for each agency information collection requirement.

This action will provide the public with a current list of information collection requirements in the Commission's Rules which have OMB approval.

EFFECTIVE DATE: August 29, 1989.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Jerry Cowden, Office of Managing Director, (202) 632-7513.

SUPPLEMENTARY INFORMATION:

Order

Adopted: August 1, 1989.
Released: August 10, 1989.

1. Section 3507(f) of the Paperwork Reduction Act of 1980, as amended, 44 U.S.C. 3507(f), requires agencies to display a current control number assigned by the Director of the Office of Management and Budget ("OMB") for each agency information collection requirement.

2. Section 0.408 of the Commission's Rules displays the OMB control numbers assigned to the Commission's information collection requirements. OMB control numbers assigned to Commission forms are not listed in this section since those numbers appear on the forms.

3. This Order amends § 0.408 to remove listings of information collections which the Commission has eliminated or to add listings of new information collections which OMB has approved.

4. Authority for this action is contained in section 4(i) of the Communications Act of 1934 (47 U.S.C. 154(i)), as amended, and § 0.231(d) of the Commission's rules. Since this amendment is editorial in nature, the public notice, procedure, and effective date provisions of 5 U.S.C. 553 do not apply.

5. Accordingly, *it is ordered,* That § 0.408 of the rules is amended, effective on the date of publication in the Federal Register.

6. Persons having questions on this matter should contact Jerry Cowden at (202) 632-7513.

List of Subjects in 47 CFR Part 0

Reporting and recordkeeping requirements.

Federal Communications Commission.

Edward J. Minkel,

Managing Director.

Part 0 of title 47 of the Code of Federal Regulations is amended as follows:

PART 0—COMMISSION ORGANIZATION

1. The authority citation for part 0 continues to read:

Authority: Secs. 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303, unless otherwise noted.

2. In 47 CFR 0.408, paragraph (b) is amended by removing § 43.31 and its corresponding OMB control number 3060-0058.

3. In 47 CFR 0.408, paragraph (b) is further amended by adding the following sections and their corresponding OMB control numbers to read as follows:

§ 0.408 OMB control numbers assigned pursuant to the Paperwork Reduction Act.

* * * * *

(b) * * *

47 CFR part or section where identified and described	Current OMB Control No.

BILLING CODE 6712-01-M

---

47 CFR Part 73

[MM Docket No. 88-413, RM-6370]

Radio Broadcasting Services; Ringgold, GA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: At the request of James E. Price, *See* 53 FR 35337, September 13, 1988, this document allots Channel 229A to Ringgold, Georgia, as that community's second local FM service. Channel 229A can be allotted to Ringgold, in compliance with the Commission's minimum distance separation requirements with a site restriction of 6.3 kilometers (3.9 miles) west to avoid a shortspacing to Station WJLA(FM), Channel 228A, Ellijay, Georgia. The coordinates for this allotment are North Latitude 34-54-01 and West Longitude 85-10-37. With this action, this proceeding is terminated.

DATES: Effective October 10, 1989; the window period for filing applications will open on October 11, 1989, and close on November 9, 1989.

FOR FURTHER INFORMATION CONTACT: Nancy J. Walls, Mass Media, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 88-413, adopted August 7, 1989, and released August 23, 1989. The full text of this Commission decision is available for inspection and copying during normal

business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Radio broadcasting.

PART 73—AMENDED

1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303.

§ 73.202 [Amended]

2. Section 73.202(b), the Table of FM Allotments is revised by adding Ringgold, Georgia, Channel 229A.

Karl A Kensington,

Chief, Allocations Branch, Policy and Rules Division, Mass Media Bureau.

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Parts 171 and 173

[Docket No. HM-166V; Amendment Nos. 171-103; 173-214]

RIN No. 2137-AB10

Hazardous Materials; Uranium Hexafluoride

AGENCY: Research and Special Programs Administration (RSPA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This final rule amends the Hazardous Materials Regulations (HMR) to permit the transport of uranium hexafluoride (UF_6) in certain packagings that do not meet the requirements of either the American National Standard N14.1-1987 (ANSI N14.1-1987) or the specification for Class DOT-106A multi-unit tank car tanks as required by 49 CFR 173.420, and to permit the transport of depleted UF_6 in packagings filled to a capacity not exceeding 62% by volume at 20 °C (68 °F). This action is necessary to permit the continued use of UF_6 packagings that have been demonstrated to be safe based on exemption experience data.

DATES: Effective date: September 28, 1989. However, compliance with the regulations as amended herein is authorized as of August 29, 1989.

FOR FURTHER INFORMATION CONTACT: Michael E. Wangler, Chief, Radioactive Materials Branch, Technical Division, Office of Hazardous Materials Transportation, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366-4545.

SUPPLEMENTARY INFORMATION:

Background

On July 6, 1987, RSPA published a notice of proposed rulemaking (Docket HM-166V, Notice No. 87-7) in the **Federal Register** (52 FR 25342) which proposed to amend the HMR to permit the transport of UF_6 in certain packagings. These packagings do not meet the requirements of either the American National Standard N14.1-1982 (ANSI N14.1-1982) or the specification for Class DOT-106A multi-unit tank car tanks, as required by § 173.420.

On April 6, 1988, RSPA published a notice (Notice 88-2; 53 FR 11320) containing supplemental proposals to update the regulatory reference of ANSI N14.1 to the 1987 edition and to revise § 173.420(a)(4) to permit the transport of depleted UF_6 in packagings filled to a capacity of 62% by volume. The supplemental proposal to reference the revised ANSI Standard N14.1-1987 rather than ANSI N14.1-1982 was based on the merits of comments received in response to Notice 87-7. Commenters to Notice 87-7 stated that unlike previous ANSI N14.1 standards, N14.1-1987 recognizes certain packagings currently in service, but not specifically covered by an ANSI N14 standard, as acceptable if the packagings are used within their original design limitations and are inspected, tested, and maintained to conform with ANSI N14.1-1987. Additionally. ANSI N14.1-1987 establishes several new packagings and the standards for those packagings.

The supplemental proposal to amend § 173.420(a)(4) to permit the transport of depleted UF_6 in packagings filled to a capacity not exceeding 62% by volume at 20 °C (68 °F) was based on a petition received from the Department of Energy (DOE). A filling limit of 62% of the volumetric capacity is allowed by ANSI N14.1-1987. The current filling limit of 61% of the volumetric capacity was derived from Table 1 of ANSI N14.1-1982.

Prior to issuing a final rule on Notice 88-7, RSPA published a related final rule on September 20, 1988 in the **Federal Register** under Docket HM-190 (52 FR 26548), which amended the requirements for the fabrication, modification and maintenance of the DOT 21PF-1 overpack used in the transport of UF_6 cylinders. In order to provide regulatory consistency between §§ 173.417 and 173.420 in HM-190, RSPA incorporated ANSI N14.1-1987 by reference in § 171.7(d)(4)(iii) and amended §§ 173.417 and 173.420 to remove references to the 1982 edition of ANSI N14.1. That final rule eliminated the need to address that particular issue in this document

RSPA received three comments in response to Notice 87-7 and three comments to the supplemental proposals which are discussed in this document. Two commenters questioned the acceptability of continuing to authorize the use of Class DOT-106A multi-unit tank car tanks. Section 173.420(a)(2)(ii) authorizes UF_6 to be transported in Class DOT-106A multi-unit tank car tanks conforming to §§ 179.300, 179.301 and 179.302. The Model 30A is the industry designation for the Class DOT-106A packaging used for the transport of UF_6. The commenters stated that no ANSI standard has established criteria for the design, fabrication, use, or cleaning of Model 30A packagings. The commenters further noted that the ANSI standards prescribe a Model 30B as a replacement packaging for the Model 30A. One commenter implied that RSPA apparently does not consider the Model 30A to be an acceptable packaging since it does not appear in the table specifying minimum wall thicknesses found in proposed § 173.420(a)(2)(iv)(D). The minimum wall thickness for the Class DOT-106A packagings is found in existing § 179.301 for an existing DOT specification packaging. Therefore, it is unnecessary to respecify its minimum wall thickness in the table.

Another commenter requested that, for purely informational purposes, RSPA include the following statement in § 173.420(a)(2)(iii): "The 30A cylinder is obsolete having been replaced by 30B. After December 31, 1992, the Department of Energy will no longer accept 30A cylinders for filling at their facilities." Through this comment, users of the Model 30A cylinder would be informed that the DOE will not be accepting the Model 30A at its facilities after the specified date.

The focus of this and the other comments on the suitability of the 30A cylinder relates to operational factors, particularly cleaning, rather than transportation safety concerns. RSPA knows of no significant safety problems resulting from use of Class DOT-106A packagings for transporting a number of different materials, including UF_6. Accordingly, RSPA finds no basis to restrict or discontinue the use of this packaging at this time for UF_6 transport. If additional information develops that supports its discontinuance, RSPA will consider further rulemaking in this area.

exceed 62% of the certified volumetric

RSPA is also denying the request that a statement be placed in § 173.420 concerning the acceptance of the Model 30A at DOE facilities because the statement is informational and not regulatory.

A commenter questioned the requirement found in existing § 173.420(a)(2)(ii) that Class DOT–106A packagings must meet the additional special commodity requirements in § 179.302. The commenter pointed out that there are no special commodity requirements in § 179.302 for UF_6 packagings. RSPA agrees with the commenter and the reference to § 179.302 is removed from § 173.420(a)(2)(ii) in this final rule.

Section 173.420(a)(2) contains the requirements on the design, fabrication and marking of cylinders. Section 173.420(b) provides that UF_6 packagings must be inspected, tested and marked in accordance with ANSI N14.1–1987. One commenter stated that the minimum wall thicknesses found in proposed subparagraph (a)(2)(iv)(D) should be placed in paragraph (b). RSPA disagrees with the commenter. The minimum wall thicknesses in proposed subparagraph (a)(2)(iv)(D) are for use as a design criteria for certain cylinders. The minimum wall thicknesses that must be met for continued use of a cylinder are found in ANSI N14.1–1987.

Paragraph 6.3.2 of ANSI N14.1–1987 provides that a cylinder whose wall thicknesses fall below the levels specified in that standard (which are actually the same as those contained in the § 173.420(a)(2)(iii)(D) table) is no longer authorized for use. These requirements for continued use of a cylinder are made applicable by § 173.420(b), which incorporates ANSI N14.1.

RSPA received two comments which were editorial in nature in response to the supplemental proposals. The commenters suggested that the word "may" be changed to "must" in § 173.420(a)(4) and that the word "certified" be added before the words "volumetric capacity" to be consistent with the ANSI N14.1 requirement that the manufacturer certify, in writing, the volumetric capacity of the cylinder. RSPA agrees with these commenters and their suggestions are adopted in this final rule.

Administrative Notices

RSPA has determined that this final rule (1) is not "major" under Executive Order 12291; (2) is not "significant" under DOT's regulatory policies and procedures (44 FR 11034); (3) will not affect not-for-profit enterprises, or small governmental jurisdictions; and (4) does not require an environmental impact statement under the National Environmental Policy Act (40 U.S.C. 4321 et seq.). A regulatory evaluation is available for review in the docket. I certify that this regulation will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

I have reviewed this regulation in accordance with Executive Order 12612 ("Federalism"). It has no substantial direct effects on the States, on the Federal-State relationship or on the distribution of power and responsibilities among levels of government. Thus, this regulation contains no policies that have Federalism implications as defined in Executive Order 12612.

A regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Regulatory Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross reference this action with the Unified Regulatory Agenda.

List of Subjects

49 CFR Part 171

Hazardous materials transportation, Incorporation by reference.

49 CFR Part 173

Hazardous materials transportation. Packaging, Radioactive materials.

In consideration of the foregoing, 49 CFR Parts 171 and 173 are amended as follows:

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

1. The authority citation for Part 171 continues to read as follows:

Authority: 49 App. U.S.C. 1802, 1803, 1804, and 1808; 49 CFR Part 1.

2. In § 171.7(d)(4), a new paragraph (iv) is added to read as follows:

§ 171.7 Matter incorporated by reference.

* * * * *

(d) * * *

(iv) For purposes of § 173.420(a)(2) of this subchapter, previous editions of American National Standard N14.1 which are also incorporated are titled "Standard for Packaging of Uranium Hexafluoride for Transport," 1971 and 1982 editions

* * * * *

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

3. The authority citation for Part 173 continues to read as follows:

Authority: 49 U.S.C. 1803, 1804, 1805, 1806, 1807, 1808; 49 CFR Part 1, unless otherwise noted.

4. Section 173.420 is revised to read as follows:

§ 173.420 Uranium hexafluoride (fissile and low specific activity).

(a) In addition to any other applicable requirements of this subchapter, uranium hexafluoride, fissile or low specific activity, must be offered for transportation as follows:

(1) Before initial filling and during periodic inspection and test, packagings must be cleaned in accordance with American National Standard N14.1.

(2) Packagings must be designed, fabricated, inspected, tested and marked in accordance with—

(i) American National Standard N14.1 (1987, 1982 or 1971 edition) in effect at the time the packaging was manufactured;

(ii) Specifications for Class DOT–106A multi-unit tank car tanks (§§ 179.300 and 179.301 of this subchapter); or

(iii) Section VIII, Division I of the ASME Code, provided the packaging—

(A) Was manufactured on or before June 30, 1987;

(B) Conforms to the edition of the ASME Code in effect at the time the packaging was manufactured;

(C) Is used within its original design limitations; and

(D) Has shell and head thicknesses that have not decreased below the minimum value specified in the following table—

Packaging model	Minimum thickness millimeters (inches)
1S, 2S	1.58 (0.062)
5A, 5B, 8A	3.17 (0.125)
12A, 12B	4.76 (0.187)
30B	7.93 (0.312)
48A, F, X, and Y	12.70 (0.500)
48T, O, OM, OM Allied, HX, H, and G	6.35 (0.250)

(3) Uranium hexafluoride must be in solid form.

(4) The volume of solid uranium hexafluoride, except solid depleted uranium hexafluoride, at 20 °C (68 °F.) must not exceed 61% of the certified volumetric capacity of the packaging. The volume of solid depleted uranium hexafluoride at 20 °C (68 °F.) must not

exceed 62% of the certified volumetric capacity of the packaging.

(5) The pressure in the package at 20 °C (68 °F) must be less than 101.3 kPa (14.8 psia).

(b) Packagings of uranium hexafluoride must be periodically inspected, tested, marked and otherwise conform with the American National Standard N14.1–1987.

(c) Each repair to a packaging for uranium hexafluoride must be performed in accordance with American National Standard N14.1–1987.

Issued in Washington, DC on August 21, 1989 under authority delegated in 49 CFR Part 1.

Travis P. Dungan,

Administrator, Research and Special Programs Administration.

conform with the District of Columbia

unaffected in their applicability to DC

Authority: 5 U.S.C 6311; Section 630.303

Proposed Rules

Federal Register
Vol. 54, No. 166
Tuesday, August 29, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 534

Performance Awards in the Senior Executive Service

AGENCY: Office of Personnel Management.

ACTION: Proposed rule.

SUMMARY: OPM is issuing proposed regulations to require that Senior Executive Service (SES) Performance Review Boards be composed of a majority of career SES members when making recommendations on performance awards for career SES appointees. This action is necessary to assure that the composition of the Boards is the same for performance award purposes as it is when the Boards are making recommendations on performance appraisals of career appointees.

DATES: Comments will be considered if received no later than September 28, 1989.

ADDRESSES: Send or deliver written comments to the Director, Office of Executive Personnel, Office of Executive Administration, Office of Personnel Management, Room 6R48, 1900 E Street NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Neal Harwood, (202) 632-4486.

SUPPLEMENTARY INFORMATION: Under 5 U.S.C. 4314(c)(5), Senior Executive Service (SES) Performance Review Boards are specifically required to be composed of a majority of career SES members in the case of an appraisal of a career SES appointee, unless OPM determines that there exists an insufficient number of career appointees available to comply with the requirement. The requirement is reflected in § 430.307(d) of title 5 of the Code of Federal Regulations.

The basis for the requirement was stated in the Report of the Senate Committee on Governmental Affairs on the Civil Service Reform Act of 1978 as follows: "In this way persons who are knowledgeable and directly involved in the day-to-day responsibilities of Federal executives will have a large voice in judging their peers. Their status as career executives will protect the appraisal from being unduly influenced by political considerations." (Report No. 95-969, 95th Congress, 2d Session, p. 61.)

There is no similar, specific requirement in title 5, U.S. Code, when Performance Review Boards are making recommendations on performance awards for career SES appointees under 5 U.S.C. 5384(d). OPM has concluded, however, that in keeping with the spirit of the law, Performance Review Boards should also have a majority career membership when acting on performance awards. The only exception would be when OPM has determined under 5 CFR 430.307(d), which implements 5 U.S.C. 4314(c)(5), that there exists an insufficient number of career appointees available to comply with the requirement for majority career membership when the Boards are making recommendations on performance appraisals. It should be noted that OPM has not previously granted any waivers to the requirement regarding Board composition for performance appraisals.

The annual performance appraisal period for most agencies ends on September 30. Although OPM is aware of only one agency that currently is not in conformity with the proposed regulation, in order to assure that the proposed regulation is effective for this year's performance award recommendations for all of these agencies, the Director of OPM finds that good cause exists for shortening the comment period to 30 days.

E.O. 12291 Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because it deals with the SES employees of the Federal Government.

List of Subjects in 5 CFR Part 534

Government employees, Wages.

U.S. Office of Personnel Management.
Constance Berry Newman,
Director.

Accordingly, OPM is proposing to amend 5 CFR part 534 as follows:

PART 534—PAY UNDER OTHER SYSTEMS

1. The authority for part 534 continues to read as follows:

Authority: 5 U.S.C. 1104, 5351, 5352, 5353, 5361, 5383, 5384, 5385, and 5541.

2. The heading for subpart D is revised and § 534.403(a) is revised to read as follows:

Subpart D—Pay and Performance Awards under the Senior Executive Service

§ 534.403 Performance awards.

(a) This section covers the payment of performance awards to career appointees in the Senior Executive Service (SES).

(1) To be eligible for an award, the appointee's most recent performance rating of record under part 430, subpart C, of this chapter must have been "Fully Successful" or higher.

(2) When making recommendations on performance awards, more than one-half of the membership of a Performance Review Board must be career SES appointees. The only exception is if OPM has determined under § 430.307(d) of this chapter that the Board does not have to have a majority of career members when making recommendations on performance appraisals of career appointees because there exists an insufficient number of career appointees.

BILLING CODE 6325-01-M

---

5 CFR Part 630

Absence and Leave; Coverage of DC Government Employees

AGENCY: Office of Personnel Management.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Office of Personnel Management published a proposal on February 27, 1985 (50 FR 7922), to amend its leave regulations in 5 CFR Part 630 to conform with the District of Columbia Comprehensive Merit Personnel System. Final regulations were never issued. The present proposed rule amends some of the same sections of those regulations, but limits the restriction on the applicability of the Federal leave law to DC government employees to that contained in 5 U.S.C. 6301(2)(B). That section defines "employee" for Federal leave purposes as "an individual first employed by the government of the District of Columbia before October 1, 1987."

DATES: Comments must be received on or before October 30, 1989.

ADDRESSES: Send or deliver comments to Barbara L. Fiss, Assistant Director for Pay and Performance Management, Personnel Systems and Oversight Group, Office of Personnel Management, Room 7H30, 1900 E Street NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Frank Derby, (202) 632-5056.

SUPPLEMENTARY INFORMATION: When our earlier proposed regulations were published, it was our view that DC Law 2-139, which established the District of Columbia Comprehensive Merit Personnel System, ended title 5, U.S.C., leave coverage for DC government employees. However, subsequent opinions by the Comptroller General and the Department of Justice's Office of Legal Counsel (OLC) have clarified the effect of that DC statute. On September 30, 1986, the Comptroller General determined that annual and sick leave are transferable from the DC government to the Federal Government (B-214541). The Comptroller General did not agree that the DC statute had superseded Federal law regarding the transfer of leave by DC government employees. In a subsequent opinion dated October 15, 1987, the Justice Department's Office of Legal Counsel agreed that Federal law had not been superseded.

The Office of Personnel Management then asked the Office of Legal Counsel to rule on the question of lump-sum annual leave payments under 5 U.S.C. 5551 and 6306 to individuals moving to the DC government without a break in service. The question arose in the light of the new definition of "employee" established by section 207(c) of Public Law 99-335 (June 6, 1986), which amended 5 U.S.C. 6301(2)(B) to limit the definition of "employee" for Federal leave purposes to individuals "first employed by the government of the District of Columbia before October 1, 1987."

OLC's opinion of February 10, 1989, states that 5 U.S.C. 5551 and 6306 are unaffected in their applicability to DC government employees by the new definition of "employee." Therefore, under 5 U.S.C. 5551, individuals entering DC government service from Federal service without a break in service should have their leave transferred and are not entitled to a lump-sum annual leave payment. Under 5 U.S.C. 6306, lump-sum monies will have to be repaid if a separated DC government employee enters Federal service before the expiration of the time represented by the lump-sum payment.

The new definition of "employee," which excludes individuals first employed by the DC government on or after October 1, 1987, does, however, affect the transfer of leave for those individuals. Any leave earned by such individuals while employed by the DC government is outside of the Federal leave system. Therefore, there is no statutory or regulatory basis upon which to accept the transfer of that leave upon subsequent employment in the Federal service.

The proposed regulations are intended to clarify the coverage of the Federal annual and sick leave program with respect to former DC government employees. In addition, we are proposing to remove obsolete references in 5 CFR 630.202(b) and 630.502(b)(2) to the U.S. Postal System and the Regional Action Planning Commissions (established under 42 U.S.C. 3182 and abolished by Public Law 97-35). Additional guidance to Federal agencies on pay and leave entitlements in movements between the DC government and Federal agencies will be provided through the Federal Personnel Manual System.

E.O. 12291, Federal Regulation

OPM has determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they will affect only Federal employees and agencies.

List of Subjects in 5 CFR Part 630

Government employees.

U.S. Office of Personnel Management.
Constance B. Newman,
Director.

Accordingly, OPM proposes to amend 5 CFR part 630 as follows:

PART 630—ABSENCE AND LEAVE

1. The authority citation for part 630 continues to read as follows:

Authority: 5 U.S.C 6311; Section 630.303 also issued under 5 U.S.C. 6133(a); Section 630.501 and subpart F also issued under E.O. 11228; subpart G also issued under 5 U.S.C. 6305; subpart H issued under 5 U.S.C. 6325; subpart I also issued under 5 U.S.C. 6332 and Public Law 100-566; subpart J also issued under 5 U.S.C. 6362 and Public Law 100-566.

2. In § 630.202, paragraph (b) is revised to read as follows:

§ 630.202 Full biweekly pay period; leave earnings.

* * * * *

(b) *Part-time employees.* Hours in a pay status in excess of an agency's basic working hours in a pay period are disregarded in computing the leave earnings of a part-time employee

3. In § 630.502, paragraphs (b), (c), and (d)(1) are revised to read as follows:

§ 630.502 Sick leave recredit.

* * * * *

(b) Except as provided in paragraphs (c) and (d) of this section, an employee who is separated from the Federal Government or the government of the District of Columbia for other than retirement purposes is entitled to a recredit of sick leave if reemployed in the Federal Government within 3 years after separation is effected.

(c) An employee who is employed by the Appalachian Regional Commission established under 40 U.S.C. 101, App. A, within 4 calendar days after separation from the Federal Government is entitled to a recredit of sick leave if—

(1) Reemployed by the Federal Government within 6 months after separation from the Commission; and

(2) Employment with the Commission exceeded 2 years and 6 months without a break of more than 3 calendar days.

(d)(1) An employee who is separated from the Federal Government or the government of the District of Columbia to accompany a civilian or uniformed sponsor on official assignment to an overseas area is entitled to a recredit of sick leave within the time limit provided by paragraph (b) of this section or within no more than 2 years after he or she returns to the United States from an overseas area to which the sponsor was assigned, whichever is later, provided the individual—

(i) Was a family member of a Federal civilian employee or a member of a uniformed service who was assigned to an overseas area; and

(ii) Accompanied the civilian employee or uniformed sponsor on official assignment in the overseas area during the 3-year period specified in paragraph (b) of this section.

BILLING CODE 6325-01-M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 955

[Docket No. FV-AO-88-3; FV-88-109]

RIN 0581-AA29

Vidalia Onions Grown in Georgia; Final Decision and Referendum Order on Proposed Marketing Agreement and Order

AGENCY: Agricultural Marketing Service (AMS), USDA.

ACTION: Proposed rule and referendum order.

SUMMARY: This decision proposes the issuance of a marketing agreement and order for Vidalia onions. A marketing agreement and order are currently in effect on an interim basis. For the purposes of this document, the term "Vidalia onions" refers to onions grown in the designated production area, which consists of thirteen counties and portions of six other counties in southeastern Georgia. The interim order authorizes production and marketing research and promotion projects, including paid advertising, for Vidalia onions. The program is administered by a nine member industry committee consisting of eight growers, of whom at least four must also be handlers, and a public member. The program is financed by assessments levied on Vidalia onions. The program is administered by a nine member industry committee consisting of eight growers, of whom at least four must also be handlers, and a public member. The program is financed by assessments levied on Vidalia onion handlers. A primary objective of the program is to improve grower returns by strengthening consumer demand through various promotion activities and by reducing costs through production and marketing research. Vidalia onion producers will vote in a referendum to determine whether they favor issuance of the marketing order regulating the handling of Vidalia Onions grown in Georgia.

DATES: The referendum shall be conducted from September 13–15, 1989. The representative period for the purposes of the referendum herein ordered in July 31, 1988, to August 1, 1989.

FOR FURTHER INFORMATION CONTACT: John R. Toth or William G. Pimental, Fruit and Vegetable Division, USDA, AMS, P.O. Box 2276, Winter Haven, Florida 33883, telephone 813-229-4770; or Kenneth G. Johnson, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, D.C. 20090-6456, telephone 202-447-5331.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding: Notice of Hearing—Issued August 19, 1988, and published in the **Federal Register** on August 23, 1988 (53 FR 32054); Tentative Decision and Referendum Order and Opportunity to File Written Exceptions—Issued February 21, 1989, and published in the **Federal Register** on February 24, 1989 (54 FR 8160); Interim Order—Issued March 10, 1989, and published in the **Federal Register** on March 16, 1989 (54 FR 10972).

Preliminary Statement

This administrative action is governed by the provisions of sections 556 and 557 of title 5 of the United States Code, and therefore is excluded from the requirements of Executive Order 12291.

This decision is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act, and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR part 900).

The tentative marketing agreement and interim order were formulated on the record of a public hearing held at the Toombs County Courthouse in Lyons, Georgia, on September 20–21, 1988. Notice of the hearing was published in the August 23, 1988, issue of the **Federal Register**. The notice set forth a proposed order submitted by a group of Vidalia onion producers and handlers known as FAVOR (Farmers Allied for the Vidalia Onion Referendum). The principal feature of the proposal was the authority to collect assessments from handlers of Vidalia onions grown in a designated part of Georgia to fund research and promotion activities.

Upon the basis of evidence introduced at the hearing and the record thereof, the Deputy Assistant Secretary for Marketing and Inspection Services on February 21, 1989, filed with the Hearing Clerk, U.S. Department of Agriculture, a Tentative Decision and Referendum Order, directing that a referendum be conducted during the period March 1–3, 1989, among producers of Vidalia onions to determine whether they favored issuance of the proposed interim marketing order. In the referendum, the marketing order was favored by more than two-thirds of the producers voting in the referendum and also by producers of more than two-thirds of the production represented in the referendum. The tentative marketing agreement was signed by handlers who, during the representative period, handled not less than 50 percent of the volume of Vidalia onions covered by the interim order. The tentative marketing agreement and interim marketing order were issued on March 10, 1989, and became effective upon publication in the **Federal Register** on March 16, 1989.

The Tentative Decision and Referendum Order also provided interested persons the opportunity to file written exceptions thereto by June 30, 1989. Four exceptions were received. Exceptions were filed by Congressman Lindsay Thomas, on behalf of a group of Vidalia onion producers; Mr. Frank M Grasberger, on behalf of the Farmers Allied for the Vidalia Onion Referendum (FAVOR); Mr. Terence J. Center, Associate Professor, College of Agriculture, University of Georgia; and T.M. "Mort" Ewing, President of the Georgia Farm Bureau Federation. These exceptions to the Tentative Decision are discussed and ruled upon in this document.

Small Business Considerations

In accordance with the provisions of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Administrator of the Agricultural Marketing Service (AMS) has determined that this action would not have a significant economic impact on a substantial number of small entities. Small agricultural producers have been defined by the Small Business Administration (SBA) (13 CFR 121.2) as those having average annual gross revenues for the last three years of less than $500,000. Small agricultural service firms, which would include handlers under this proposed order, are defined as those with gross annual revenues of less than $3.5 million.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. The Act requires the application of uniform rules to regulated handlers. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are normally brought about through group action of essentially small entities acting on their own behalf. This, both the RFA and the Act have small entity orientation and compatibility.

There are approximately 160 handlers of Vidalia onions. During the 1987 season, commercial shipments totalled about 738,400 50-pound bags at an average f.o.b. price of $16.75 for a total value of about $12.4 million. An undetermined volume was also sold locally at roadside stands and through mail order operations. While there is a great variance in size of individual handler operations, almost all the handlers that would be regulated under this proposed order would qualify as small firms under the SBA's definition.

There are about 280 Vidalia onion growers in Georgia. The average acreage of onions grown is 27 acres, with the smallest farm being one-tenth of an acre and the largest farm having 600 acres of Vidalia onions. About 5 percent of the growers farm in excess of 100 acres, and almost 30 percent have less than 5 acres. The majority of these growers could be classified as small businesses.

Because most of the growers and handlers of Vidalia onions are small in size, they have been unable to individually finance the types of research and promotion efforts needed by the industry. The marketing order program provides a means for these small entities to pool their resources and work together to solve their common problems. Such action is necessary for this relatively small industry to remain profitable in the face of intense competition from larger industries.

The marketing order authorizes the collection of assessments from handlers of Vidalia onions grown in a designated part of Georgia. Assessment funds can be used to finance production research projects that could reduce costs by improving post-harvest handling techniques and reducing the occurrence of onion diseases. Assessment funds can also be used to strengthen demand and expand markets for Vidalia onions through marketing research and product promotion programs, including paid advertising. The order is administered by a committee composed of Vidalia onion producers and a public member nominated by growers and selected by the Secretary. Daily administration of the order is carried out by a staff hired by the Vidalia Onion Committee (committee). The order does not regulate the production of Vidalia onions and places no restrictions on the quality or quantity of Vidalia onions that may be handled.

The principal requirement of the order which affects handlers is the requirement that they pay assessments on fresh market shipments of Vidalia onions to fund research and promotion programs. Any assessment rate that may be established would be recommended by the committee to the Secretary for approval.

Acreage and supplies of Vidalia onions have risen dramatically in recent years, and the marketing order provides a means of halting the drop in grower returns experienced in past seasons. This could be achieved by strengthening demand and developing new markets for these increasing supplies through promotion of Vidalia onion. Also, costs could be reduced through research. Thus, the marketing order could be expected to have a positive impact on grower returns.

The order also imposes some reporting and recordkeeping requirements on handlers. The burden that is imposed with respect to these requirements is negligible. Most of the information that is reported to the committee is already compiled by handlers for other uses and is readily available. In compliance with the Office of Management and Budget (OMB) regulations (15 CFR part 1320) which implement the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) and section 3504(h) of that Act, the information collection and recordkeeping requirements that are imposed by the interim final rule have been approved by the OMB and assigned OMB No. 0581-0160. The provisions contained in the interim final rule are the same as those proposed in this final decision. The currently approved requirements impose an estimated annual reporting burden of approximately one hour on each of the 160 handlers covered by the order and an estimated recordkeeping burden of about 15 minutes. Any additional reporting requirements that may be imposed under the order would not become effective prior to the OMB review. Such requirements would be evaluated against the potential benefits to be derived, and any added burden resulting from increased reporting would not be significant when compared to those anticipated benefits.

The Act requires that prior to the issuance of a marketing order, a referendum be conducted of affected producers to determine whether they favor issuance of th order. The ballot material that will be used in conducting the referendum has also been submitted to and approved by the OMB. It has been estimated that it will take an average of 10 minutes for each of the approximately 280 Vidalia onion growers to participate in the voluntary referendum balloting. Additionally, it has been estimated that it will take approximately five minutes for each of the 160 handlers to complete the marketing agreement.

In determining that the order would not have a significant economic impact on a substantial number of small entities, all of the issued discussed above were considered. The marketing order provisions have been carefully reviewed and every effort has been made to eliminate any unnecessary costs or requirements. Although the order may impose some additional costs and requirements on handlers, it is anticipated that the order would help strengthen demand for Vidalia onions grown in Georgia. Therefore, any additional costs should be offset by the benefits derived from expanded markets and sales benefiting handlers and producers alike. Accordingly, it is determined that the marketing order would not have a significant impact on small handlers or producers.

In accordance with Executive Order 12612, consideration has been given as to whether the marketing order has substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. To this end, notice of the hearing conducted to consider the establishment of a Federal marketing order program for Vidalia onions grown in Georgia was provided to the Governor of Georgia as well as to the State's Commissioner of Agriculture. One State official provided testimony at the hearing that concluded that the proposed Federal program would not conflict with any State statute, would not interfere with any State function, and would impose no burden on the State of Georgia, either financial or otherwise. It is therefore determined that this proposed rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Findings and Conclusions

The material issues, findings and conclusions, rulings, and general findings and determinations included in the Tentative Decision set forth in the February 24, 1989, issue of the **Federal Register** (54 FR 8160), are hereby reaffirmed and adopted in this Decision subject to the following modifications to the findings and conclusions.

The findings and conclusions in material issue 3 of the Tentative Decision concerning the definition of the term "Vidalia onion" are amended by adding the following two paragraphs after the ninth paragraph of material issue 3 to read as follows:

Exceptions were filed by Mr. Frank M.

proposed order (Compliance), that no

which are applicable to the same

The agents of the Secretary to conduct

and provisions applicable to different

Sec.

Exceptions were filed by Mr. Frank M. Grasberger, Mr. Terence J. Centner, and T. M. "Mort" Ewing relating to the definition of the term "Vidalia onion". Each took exception to the use of other terms, such as "Georgia Vidalia Onions" and "Vidalia onions grown in Georgia" as being inconsistent with the term defined in the interim marketing order. Mr. Grasberger stated that, since § 955.5 of the interim marketing order defines "Vidalia onion" to mean only yellow granex onions and similar varieties that are grown in the designated production area in Georgia, the use of such terms as "Georgia Vidalia onion" is redundant. The exceptions further pointed out that these terms are misleading in that they imply that Vidalia onions can be grown in States other than Georgia, and that persons outside the production area could market their onions as Vidalia onions. The commentors contend that, on the contrary, "Vidalia onion" is recognized as a term that applies exclusively to onions grown in Southeastern Georgia. To support this contention, the commentors pointed to record evidence that shows the term "Vidalia onion" is a term recognized in the trade and therefore needs no further qualification as to the State of origin. Mr. Centner used as evidence to support his claim a letter from the National Onion Association which indicated that Vidalia onions refer only to onions grown in the Vidalia district of Georgia. Each exception recommended that all references to "Georgia Vidalia onions" or "Vidalia onions grown in Georgia" in the Tentative Decision be revised to read "Vidalia onions".

The Act provides that a marketing order be applicable to a defined commodity grown in a specified geographic area. References in the Tentative Decision to "Vidalia onions grown in Georgia" or "Georgia Vidalia onions" were intended to make it clear that the proposed marketing order would be limited in its applicability to a specified production area in the State of Georgia. These references are therefore appropriate for purposes of the proposed marketing order. Therefore, the exceptions with respect to material issue 3 are denied.

Based on the exceptions filed by Mr. Grasberger and Congressman Lindsay Thomas, the findings and conclusions of material issue 5(f) of the Tentative Decision concerning compliance are hereby amended by adding the following four paragraphs after the fourth paragraph of material issue 5(f) to read as follows:

Mr. Grasberger took exception to the lack of a provision in § 955.80 of the proposed order (Compliance), that no person located either inside or outside the production area may apply the term "Vidalia onion" or any other term using the word "Vidalia" to any container of onions unless the product meets the definition of Vidalia onions set forth in the marketing order. Mr. Grasberger contended that such provision is necessary to achieve the objectives of the marketing order program. He argued that limiting the use of "Vidalia onions" to those onions grown in the production area would contribute to the effectiveness of research and promotion activities conducted under the order, and would provide the trade and consumers with confidence that the onions they are purchasing as Vidalia onions are, in fact, Vidalias as defined in the order. Further, Mr. Grasberger stated that restricting the use of the term "Vidalia onion" under the marketing order would not constitute regulating the handling of, or prescribing labelling requirements for, onions produced outside the production area.

A similar exception was filed by Congressman Lindsay Thomas on behalf of a group of Vidalia onion producers. That exception contended that consumers are being deceived when they purchase onions labeled "Vidalia", and those onions are not the same as the true Vidalia onions grown in Georgia. The exception stated that section 11(c) of the Act, "Regional Application", provides the Secretary with the discretion to restrict the use of a term under a marketing order for the purpose of distinguishing a product grown in one area from similar products grown elsewhere to give due recognition to regional differences in production. The exception urged the use of such discretion to stop the widespread abuse of the term "Vidalia onion".

The interim marketing order was promulgated to provide authority for research and promotion programs funded by handler assessements. Proponents believed that a marketing order with such authority could improve grower returns by strengthening consumer demand for Vidalia onions. There is no authority in the Act to preclude the use of the term "Vidalia onions" by persons handling onions grown outside the area covered by the marketing order. The Tentative Decision concluded that the proponents' proposal to prevent the labelling of onions grown outside the production area as Vidalias was not consistent with the authority in the act and was therefore not included in the proposed order.

Section 11(c) of the Act states that "All orders issued under this section which are applicable to the same commodity or product thereof shall, so far as practicable, prescribe such different terms, applicable to different production areas and marketing areas, as the Secretary finds necessary to give due recognition to the differences in production and marketing of such commodity or product in such areas." Section 11(c) does not provide the Secretary with the authority to specify the conditions under which onions not subject to regulation under a marketing order may be handled. For these reasons, the two exceptions filed with respect to material issue 5(f) are denied.

Rulings on Exceptions

In arriving at the findings and conclusions and the regulatory provisions of this decision, the exceptions to the Tentative Decision were carefully considered in conjunction with the record evidence. To the extent that the findings and conclusions and the regulatory provisions of this decision are at variance with the exceptions, such exceptions are denied for the reasons previously stated in this decision.

Marketing Agreement and Order

Annexed hereto and made a part hereof are two documents entitled, respectively, "Order Regulating the Handling of Vidalia Onions Grown in Georgia" and "Marketing Agreement Regulating the Handling of Vidalia Onions Grown in Georgia." These documents have been decided upon as the detailed and appropriate means of effectuating the foregoing findings and conclusions.

It is hereby ordered, that this entire decision be published in the **Federal Register**. The provisions of the marketing agreement are identical to those contained in the order as hereby proposed by the annexed order which is published with this decision.

Referendum Order

It is hereby directed that a referendum be conducted in accordance with the procedure for the conduct of referenda (7 CFR 900.400 et seq.) to determine whether the issuance of the annexed order regulating the handling of Vidalia onions grown in Georgia is approved or favored by producers, as defined under the terms of the order, who during the representative period were engaged in the production of Vidalia onions in the aforesaid production area.

The representative period for the conduct of such referendum is hereby determined to be July 31, 1988 to August 1, 1989.

The agents of the Secretary to conduct such referendum are hereby designated to be John R. Toth, Fruit and Vegetable Division, USDA, AMS, P.O. Box 2276, Winter Haven, Florida 33883, telephone 813–299–4770; and Kenneth G. Johnson, Marketing Order Administration Branch, Fruit and Vegetable Division, USDA, AMS, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456, telephone 202–447–5331.

Georgia, Marketing agreements and orders, Vidalia onions.

Dated: August 24, 1989.

John Frydenlund,

Acting Assistant Secretary, Marketing and Inspection Services.

Order Regulating the Handling of Vidalia Onions Grown in Georgia [1]

Findings and Determinations Upon the Basis of the Hearing Record

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure effective thereunder (7 CFR part 900), a public hearing was held upon a proposed marketing agreement and order regulating the handling of Vidalia onions grown in Georgia.

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The marketing agreement and order, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The marketing agreement and order regulate the handling of Vidalia onions grown in the production area in the same manner as, and are applicable only to persons in the respective classes of commercial and industrial activity specified in, the marketing agreement and order upon which a hearing has been held;

(3) The marketing agreement and order are limited in their application to the smallest regional production area which is practicable, consistent with carrying out the declared policy of the Act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the Act;

(4) There are no differences in the production and marketing of Vidalia onions produced in the production area which make necessary different terms and provisions applicable to different parts of such area; and

(5) All handling of Vidalia onions grown in the production area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

Order Relative to Handling

It is therefore ordered, That on and after the effective date hereof, all handling of Vidalia onions grown in the production area shall be in conformity to, and in compliance with, the terms and conditions of the said marketing agreement and order, as follows:

The provisions of the tentative marketing agreement and interim order as contained in the tentative decision issued by the Deputy Assistant Secretary for Marketing and Inspection Services on February 21, 1989 and published in the **Federal Register** on February 24, 1989 (54 FR 8160), shall be and are the terms and provisions of this order and are set forth in full herein. Those sections identified with an asterisk (*) apply only to the marketing agreement and not to the marketing order.

Definitions

§ 955.1 Secretary.

Secretary means the Secretary of Agriculture of the United States, or any officer or employee of the Department of Agriculture who has been delegated, or who may hereafter be delegated, the authority to act for the Secretary.

§ 955.2 Act.

Act means Public Act No. 10, 73d Congress (May 12, 1933), as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (Sec. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601 *et seq.*).

§ 955.3 Person.

Person means an individual, partnership, corporation, association, or any other business unit.

§ 955.4 Production area.

Production area means that part of the State of Georgia enclosed by the following boundaries: Beginning at a point in Laurens County where U.S. Highway 441 intersects Highway 16; thence continue southerly along U.S. Highway 441 to a point where it intersects the southern boundary of Laurens County; thence southwesterly along the border of Laurens County to a point where it intersects the county road known as Jay Bird Springs Road; thence southeasterly along Jay Bird Springs Road to a point where it intersects U.S. Highway 23; thence easterly to a point where U.S. Highway 23 intersects the western border of Telfair County; thence southwesterly following the western and southern border of Telfair County to a point where it intersects with Jeff Davis County; thence following the southern border of Jeff Davis County to a point where it intersects with the western

border of Bacon County; thence southerly and easterly along the border of Bacon County to a point where it intersects Georgia State Road 32; thence easterly along Georgia State Road 32 to Seaboard Coastline Railroad; thence northeasterly along the tracks of Seaboard Coastline Railroad to a point where they intersect Long County and Liberty County; thence northwesterly and northerly along the southwestern border of Liberty County to a point where the border of Liberty County intersects the southern border of Evans County; thence northeasterly along the eastern border of Evans County to the intersection of the Bulloch County border; thence northeasterly along the Bulloch County border to a point where it intersects with the Ogeechee River; thence northerly along the main channel of the Ogeechee River to a point where it intersects with the southeastern border of Screven County; thence northeasterly along the southeasterly border of Screven County to the main channel of the Savannah River; thence northerly along the main channel of the Savannah River to a point where the northwestern boundary of Hampton County, South Carolina intersects the Savannah River; thence due west to a point where State Road 24 intersects Brannen Bridge Road; thence westerly along Brannen Bridge Road to a point where it intersects with State Road 21; thence westerly along State Road 21 to the intersection of State Road 17; thence westerly along State Road 17 to the intersection of State Road 56 and southerly to the northern border of Emanuel County; thence westerly and southerly along the border of Emanuel County to a point where it intersects the Treutlen County border; thence southerly to a point where the Truetlen County border intersects Interstate Highway 16; thence westerly to the point of beginning in Laurens County.

§ 955.5 Vidalia onion.

Vidalia onion means all varieties of Allium cepa of the hybrid yellow granex, granex parentage or any other similar variety recommended by the committee and approved by the Secretary, that are grown in the production area.

§ 955.6 Handler.

Handler is synonymous with "shipper" and means any person (except a common or contract carrier of Vidalia onions owned by another person) who handles Vidalia onions, or causes Vidalia onions to be handled.

§ 955.7 Handle.

Handle or *ship* means to package, load, sell, transport, or in any other way to place Vidalia onions, or cause Vidalia onions to be placed, in the current of commerce within the production area or between the production area and any point outside thereof. Such term shall not include the transportation, sale, or delivery of field-run Vidalia onions to a person within the production area for the purpose of having such Vidalia onions prepared for market.

§ 955.9 Producer.

Producer is synonymous with "grower" and means any person engaged in a proprietary capacity in the production of Vidalia onions for market.

§ 955.10 Producer-Handler.

Producer-Handler means a producer who handles Vidalia onions.

§ 955.12 Committee.

Committee means the Vidalia Onion Committee, established pursuant to § 955.20.

§ 955.13 Fiscal period.

Fiscal period means the 12-month period beginning on September 16 and ending on September 15 of the next year or such other period that may be recommended by the committee and approved by the Secretary.

Committee

§ 955.20 Establishment and membership.

(a) There is hereby established a Vidalia Onion Committee, consisting of nine members, to administer the terms and provisions of this part. Eight members shall be producers, and one shall be a public member. At least four of the producer members shall be producer-handlers. Each member shall have an alternate who shall have the same qualifications as the member.

(b) Each member, other than the public member, shall be an individual who is, prior to selection and during such member's term of office, a resident of the production area and a grower or an officer or employee of a grower.

(c) The public member shall be a resident of the production area and shall have no direct financial interest in the commercial production, financing, buying, packing or marketing of Vidalia onions, except as a consumer, nor shall such person be a director, officer or employee of any firm so engaged.

§ 955.21 Term of office.

(a) Except as otherwise provided in paragraph (b) of this section, the term of office of committee members and their respective alternates shall be for two years and shall begin as of September 16 or for such other period as the committee may recommend and the Secretary approve. The terms shall be determined so that approximately one-half of the total committee membership shall terminate each year. Members and alternates shall serve in such capacity during the term of office or portion thereof for which they are selected and until their respective successors are selected.

(b) The term of office of the initial members and alternates shall begin as soon as possible after the effective date of this part. As determined by lot drawn at the initial nomination meeting, one-fourth of the initial grower members and alternates shall serve for a one-year term, one-fourth shall serve for a two-year term, one-fourth shall serve for a three-year term, and one-fourth shall serve for a four-year term. The term of office for the initial public member and alternate shall be for two years.

(c) The consecutive terms of office of members shall be limited to three 2-year terms.

§ 955.22 Nominations.

(a) Initial members. For nominations to the initial committee, a meeting of producers shall be held by the Secretary.

(b) Successor members. (1) The committee shall hold or cause to be held not later than August 1 of each year, or such other date as may be specified by the Secretary, a meeting or meetings of growers for the purpose of designating one nominee for each position as member and for each position as alternate member of the committee which is vacant, or which is about to become vacant.

(2) Nominations for members and alternates shall be supplied to the Secretary in such manner and form as the Secretary may prescribe, not later than August 15 of each year, or by such other date as may be specified by the Secretary.

(3) The Secretary may, upon recommendation of the committee, divide the production area into districts for the purpose of nominating committee members and their alternates.

(c) Only producers may participate in designating nominees to serve as committee members. Each producer is entitled to cast only one vote on behalf of such producer and such producer's agents, subsidiaries, affiliates, and representatives in designating nominees for committee members and alternates. An eligible voter's privilege of casting only one vote shall be construed to

permit a voter to cast one vote for each position to be filled.

(d) The producer members shall nominate the public member and alternate member at the first meeting following the selection of members for a new term of office. Nominations for the public member and alternate member shall be supplied to the Secretary in such manner and form as the Secretary may prescribe, not later than November 1, or such other date as may be specified by the Secretary.

§ 955.23 Selection.

From the nominations made pursuant to § 955.22 or from other qualified persons, the Secretary shall select members and alternate members of the committee.

§ 955.24 Acceptance.

Any person nominated to serve as a member or alternate member of the committee shall, prior to selection by the Secretary, qualify by filing a written acceptance indicating such person's willingness to serve in the position for which nominated.

§ 955.25 Alternates.

An alternate member of the committee shall act in the place and stead of the member for whom such person is an alternate during such member's absence or when designated to do so by such member. In the event both a member of the committee and that member's alternate are unable to attend a committee meeting, the member, the alternate, or the committee, in that order, may designate another alternate from the same district (if applicable) and the same group (producer or producer-handler) to serve in such member's stead. Only the public member's alternate is authorized to serve in the place and stead of the public member. In the event of the death, removal, resignation or disqualification of a member, that member's alternate shall serve until a successor to such member is selected.

§ 955.26 Vacancies.

To fill any vacancy occasioned by the failure of any person nominated as a member or as an alternate to qualify, or in the event of the death, removal, resignation, or disqualification of a member or alternate, a successor for the unexpired term may be selected by the Secretary from nominations made pursuant to § 955.22, or from other eligible persons.

§ 955.27 Failure to nominate.

If nominations are not made within the time and manner prescribed in § 955.22, the Secretary may, without regard to nominations, select members and alternates on the basis of the representation provided for in § 955.20.

§ 955.28 Procedure.

(a) Five members of the committee shall constitute a quorum, and five concurring votes shall be required to pass on any motion or approve any committee action.

(b) The committee may provide for meetings by telephone, telegraph, or other means of communication, and any vote cast orally at such meetings shall be confirmed promptly in writing: *Provided,* That if an assembled meeting is held, all votes shall be cast in person.

§ 955.29 Expenses.

Members and alternates shall serve without compensation but shall be reimbursed for such expenses authorized by the committee and necessarily incurred by them in attending committee meetings and in the performance of their duties under this part.

§ 955.30 Powers.

The committee shall have the following powers:

(a) To administer the provisions of this part in accordance with its terms;

(b) To make rules and regulations to effectuate the terms and provisions of this part;

(c) To receive, investigate, and report to the Secretary complaints of violation of the provisions of this part; and

(d) To recommend to the Secretary amendments to this part.

§ 955.31 Duties.

The committee shall have, among others, the following duties:

(a) As soon as practicable after the beginning of each term of office, to meet and organize, to select a chairman and such other officers as may be necessary, to select subcommittees of committee members or alternates, and to adopt such rules and regulations for the conduct of its business as it deems necessary;

(b) To act as intermediary between the Secretary and any producer or handler;

(c) To furnish to the Secretary such available information as may be requested;

(d) To appoint such employees, agents, and representatives as it may deem necessary, to determine the compensation and define the duties of each person, and to protect the handling of committee funds;

(e) To investigate from time to time and to assemble data on the growing, harvesting, shipping, and marketing conditions with respect to Vidalia onions;

(f) To keep minutes, books, and records which clearly reflect all of the acts and transactions of the committee. Such minutes, books, and records shall be subject to examination at any time by the Secretary or the Secretary's authorized agent or representative. Minutes of each committee meeting shall be furnished promptly to the Secretary;

(g) Prior to the beginning of each fiscal period, to prepare and submit to the Secretary a budget of its projected income and expenses for such fiscal period, together with a report thereon and a recommendation as to the rate of assessment for such period;

(h) To cause its books to be audited by a Certified Public Accountant at least once each fiscal period, and at such other time as the committee may deem necessary or as the Secretary may request. The report of such audit shall show the receipt and expenditure of funds collected pursuant to this part. A copy of each report shall be furnished to the Secretary. A copy shall also be made available at the principal office of the committee for inspection by producers and handlers provided that confidential information shall be removed;

(i) To give the Secretary the same notice of meetings of the committee and its subcommittees as is given to its members.

Expenses and Assessments

§ 955.40 Expenses.

The committee is authorized to incur such expenses as the Secretary may find are reasonable and likely to be incurred by the committee for its maintenance and functioning, and enable it to exercise its powers and perform its duties in accordance with the provisions of this part. The funds to cover such expenses shall be acquired in the manner prescribed in §§ 955.42 and 955.45.

§ 955.41 Budget.

At least 60 days prior to each fiscal period, or such date as may be specified by the Secretary, and as may be necessary thereafter, the committee shall prepare an estimated budget of income and expenditures necessary for the administration of this part. The committee may recommend a rate of assessment calculated to provide adequate funds to defray its proposed expenditures. The committee shall present such budget to the Secretary with an accompanying report showing the basis for its calculations.

BEST COPY AVAILABLE

paid advertising, shall be subject to the

found that such provisions do not tend

§ 955.73 Effect of termination or

§ 955.42 Assessments.

(a) The funds to cover the committee's expenses shall be acquired by the levying of assessments upon handlers as provided in this subpart. Each person who first handles Vidalia onions shall pay assessments to the committee upon demand, which assessments shall be in payment of such handler's pro rata share of the committee's expenses.

(b) Assessments shall be levied upon handlers at rates established by the Secretary. Such rates may be established upon the basis of the committee's recommendations or other available information.

(c) At any time during, or subsequent to, a given fiscal period that committee may recommend the approval of an amended budget and an increase in the rate of assessment. Upon the basis of such recommendations, or other available information, the Secretary may approve an amended budget and increase the assessment rate. Such increase shall be applicable to all Vidalia onions which were handled during such fiscal period.

(d) The payment of assessments for the maintenance and functioning of the committee may be required under this part throughout the period it is in effect irrespective of whether particular provisions of this part are suspended or become inoperative.

(e) To provide funds for the administration of the provisions of this part during the initial fiscal period or the first part of a fiscal period when neither sufficient operating reserve funds nor sufficient revenue from assessments on the current season's shipments are available, the committee may accept payment of assessments in advance or may borrow money for such purposes.

(f) The committee may impose a late payment charge or an interest charge or both, on any handler who fails to pay any assessment in a timely manner. Such time and the rates shall be recommended by the committee and approved by the Secretary.

§ 955.43 Accounting.

(a) All funds received by the committee pursuant to the provisions of this part shall be used solely for the purposes specified in this part.

(b) The Secretary may at any time require the committee, its members and alternates, employees, agents and all other persons to account for all receipts and disbursements, funds, property, or records for which they are responsible. Whenever any person ceases to be a member or alternate of the committee, such person shall account for all receipts and disbursements and deliver all property and funds in such member's possession to the committee, pertaining to the committee's activities for which such person was responsible, and shall execute such assignments and other instruments as may be necessary or appropriate to vest in the committee full title to all of the property, funds, and claims vested in such person.

(c) The committee may make recommendations to the Secretary for one or more of the members thereof, or any other person, to act as a trustee for holding records, funds or any other committee property during periods of suspension of this part, or during any period or periods when regulations are not in effect and, upon determining such action is appropriate, the Secretary may direct that such person or persons shall act as trustee or trustees for the committee.

§ 955.44 Excess funds.

If, at the end of a fiscal period, the assessments collected are in excess of expenses incurred, such excess shall be accounted for as follows:

(a) The committee, with approval of the Secretary, may establish an operating reserve and may carry over to subsequent fiscal periods excess funds in a reserve so established, except funds in the reserve shall not exceed the equivalent of approximately three fiscal periods' budgeted expenses. Such reserve funds may be used:

(1) To defray any expenses authorized under this part;

(2) To defray expenses during any fiscal period prior to the time assessment income is sufficient to cover such expenses;

(3) To cover deficits incurred during any fiscal period when assessment income is less than expenses;

(4) To defray expenses incurred during any period when any or all provisions of this part are suspended or are inoperative; and

(5) To cover necessary expenses of liquidation in the event of termination of this part.

Upon termination of this part, any funds not required to defray the necessary expenses of liquidation shall be disposed of in such manner as the Secretary may determine to be appropriate except that to the extent practicable, such funds shall be returned pro rata to the persons from whom funds were collected.

(b) If such excess is not retained in a reserve as provided in paragraph (a) of this section, each handler entitled to a proportionate refund of the excess assessments collected shall be credited at the end of a fiscal period with such refund against the operations of the following fiscal period unless such handler demands payment thereof, in which event such proportionate refund shall be paid.

§ 955.45 Contributions.

The committee may accept voluntary contributions but these shall only be used to pay expenses incurred pursuant to § 955.50. Such contributions shall be free from any encumbrances by the donor, and the committee shall retain complete control of their use.

Research and Development

§ 955.50 Research and development.

(a) The committee, with the approval of the Secretary, may establish or provide for the establishment of production research, marketing research and development and marketing promotion projects, including paid advertising, designed to assist, improve, or promote the marketing, distribution, consumption, or efficient production of Vidalia onions. Any such project for the promotion and advertising of Vidalia onions may utilize an identifying mark which shall be made available for use by all handlers in accordance with such terms and conditions as the committee, with the approval of the Secretary, may prescribe. The expense of such projects shall be paid from funds collected pursuant to § 955.42 or § 955.45.

(b) In recommending projects pursuant to this section, the committee shall give consideration to the following:

(1) The expected supply of Vidalia onions in relation to market requirements;

(2) The supply situation among competing areas and commodities;

(3) The anticipated benefits from such projects in relation to their costs;

(4) The need for marketing research with respect to any market development activity; and

(5) Other relevant factors.

(c) If the committee should conclude that a program of research and development should be undertaken, or continued, in any fiscal period, it shall submit the following for the approval of the Secretary:

(1) Its recommendations as to the funds to be obtained pursuant to § 955.42 or § 955.45;

(2) Its recommendations as to any research projects; and

(3) Its recommendations as to promotion activity and paid advertising.

(d) Upon conclusion of each activity, but at least annually, the committee shall summarize and report the results of such activity to the Secretary.

(e) All marketing promotion activity engaged in by the committee, including paid advertising, shall be subject to the following terms and conditions:

(1) No marketing promotion, including paid advertising, shall refer to any private brand, private trademark or private trade name;

(2) No promotion or advertising shall disparage the quality, use, value or sale of like or any other agricultural commodity or product, and no false or unwarranted claims shall be made in connection with the product; and

(3) No promotion or advertising shall be undertaken without reason to believe that returns to producers will be improved by such activity.

Reports and Recordkeeping

§ 955.60 Reports and recordkeeping.

Upon request of the committee, made with the approval of the Secretary, each handler shall furnish to the committee, in such manner and at such time as it may prescribe, such reports and other information as may be necessary for the committee to perform its duties under this part.

(a) Such reports may include, but are not limited to, the following:

(1) The quantities of Vidalia onions received by a handler;

(2) The quantities disposed of by the handler;

(3) The date of each such disposition; and

(4) The identification of the carrier transporting such Vidalia onions.

(b) All such reports shall be held under appropriate protective classification and custody by duly appointed employees of the committee, so that the information contained therein which may adversely affect the competitive position of any handler in relation to other handlers will not be disclosed. Compilations of general reports from data submitted by handlers is authorized, subject to the prohibition of disclosure of an individual handler's identity or operations.

(c) Each handler shall maintain for at least two succeeding years such records of the Vidalia onions received and disposed of by such handler as may be necessary to verify reports submitted to the committee pursuant to this section.

Miscellaneous Provisions

§ 955.71 Termination or suspension.

(a) The Secretary may at any time terminate the provisions of this part by giving at least one day's notice by means of a press release or in any other manner which the Secretary may determine.

(b) The Secretary shall terminate or suspend the operations of any or all provisions of this part whenever it is found that such provisions do not tend to effectuate the declared policy of the Act.

(c) The Secretary shall terminate the provisions of this part at the end of any fiscal period whenever it is found that such termination is favored by a majority of producers who, during a representative period, have been engaged in the production of Vidalia onions: *Provided*, That such majority has, during such representative period, produced for market more than fifty percent of the volume of such Vidalia onions produced for market, but such termination shall be effective only if announced on or before June 15 of the then current fiscal period.

(d) Within six years of the effective date of this part, the Secretary shall conduct a continuance referendum to ascertain whether continuance of this part is favored by producers. Subsequent referenda to ascertain continuance shall be conducted every six years thereafter.

(e) The provisions of this part shall, in any event, terminate whenever the provisions of the Act authorizing them cease to be in effect.

§ 955.72 Proceedings after termination.

(a) Upon the termination of the provisions of this subpart, the then functioning members of the committee shall continue as joint trustees, for the purpose of liquidating the affairs of the committee, of all funds and property then in the possession, or under control, of the committee, including claims for any funds unpaid or property not delivered at the time of such termination. Action by said trusteeship shall require the concurrence of a majority of the said trustees.

(b) The said trustees shall continue in such capacity until discharged by the Secretary; shall, from time to time, account for all receipts and disbursements and deliver all property on hand, together with all books and records of said committee and of the trustees, to such person as the Secretary may direct; and shall upon the request of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person full title and right to all of the funds, property, and claims vested in said committee or the trustees pursuant to this subpart.

(c) Any person to whom funds, property, or claims have been transferred or delivered by the committee or its members pursuant to this section shall be subject to the same obligations imposed upon the members of the committee and upon the said trustees.

§ 955.73 Effect of termination or amendment.

Unless otherwise expressly provided by the Secretary, the termination of this subpart or of any regulation issued pursuant to this subpart, or the issuance of any amendments to either thereof, shall not:

(a) Affect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provision of this subpart or any regulation issued under this subpart;

(b) Release or extinguish any violation of this subpart or of any regulations issued under this subpart; or

(c) Affect or impair any rights or remedies of the Secretary or of any other person with respect to any such violations.

§ 955.80 Compliance.

No handler shall handle Vidalia onions except in conformity with the provisions of this part.

§ 955.81 Right of the Secretary.

The members of the committee (including successors and alternates) and any agent or employee appointed or employed by the committee shall be subject to removal or suspension by the Secretary at any time. Each and every order, regulation, decision, determination, or other act of the committee shall be subject to the continuing right of the Secretary to disapprove of the same at any time. Upon such disapproval, the disapproved action of the committee shall be deemed null and void except as to acts in reliance thereon or in compliance therewith prior to such disapproval by the Secretary.

§ 955.82 Duration of immunities.

The benefits, privileges, and immunities conferred upon any person by virtue of this part shall cease upon the termination of this part, except with respect to acts done under and during the existence of this part.

§ 955.83 Agents.

The Secretary may, by designation in writing, name any person, including any officer or employee of the Government, or name any agency in the United States Department of Agriculture, to act as the Secretary's agent or representative in connection with any of the provisions of this part.

§ 955.85 Derogation.

Nothing contained in this part is, or shall be construed to be, in derogation or in modification of the rights of the Secretary or of the United States to

exercise any powers granted by the Act or otherwise, or, in accordance with such powers, to act in the premises whenever such action is deemed advisable.

§ 955.85 Personal liability.

No member or alternate of the committee or any employee or agent thereof, shall be held personally responsible, either individually or jointly with others, in any way whatsoever, to any handler or to any person for errors in judgment, mistakes, or other acts, either of commission or omission, as such member, alternate, employee, or agent, except for acts of dishonesty, willful misconduct, or gross negligence.

§ 955.86 Separability.

If any provision of this part is declared invalid, or the applicability thereof to any person, circumstance, or thing is held invalid, the validity of the remainder of this part, or the applicability thereof to any other person, circumstance, or thing shall not be affected thereby.

§ 955.87 Amendments.

Amendments to this part may be proposed, from time to time, by the committee or by the Secretary.

Marketing Agreement

*§ 955.90 Counterparts.

This agreement may be executed in multiple counterparts and when one counterpart is signed by the Secretary, all such counterparts shall constitute, when taken together, one and the same instrument as if all signatures were contained in one original.

*§ 955.91 Additional parties.

After the effective date thereof, any handler may become a party to this agreement if a counterpart is executed by such handler and delivered to the Secretary. This agreement shall take effect as to such new contracting part at the time such counterpart is delivered to the Secretary, and the benefits, privileges, and immunities conferred by this agreement shall then be effective as to such new contracting party.

*§ 955.92 Order with marketing agreement.

Each signatory hereby requests the Secretary to issue, pursuant to the Act, an order providing for regulating the handling of Vidalia onions in the same manner as is provided for in this agreement.

United States Department of Agriculture

Agricultural Marketing Service

Marketing Agreement Regulating the Handling of Vidalia Onions Grown in Georgia

OMB Approval No: 0581–0160

Expiration Date: 2/29/92

The parties hereto, in order to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended (Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674), and in accordance with the applicable rules of practice and procedure effective thereunder (7 CFR part 900) desire to enter into this agreement regulating the handling of Vidalia onions grown in Georgia; and each party hereto agrees that such handling shall, from the effective date of this marketing agreement, be in conformity to, and in compliance with, the provisions of said marketing agreement as hereby enacted.

The provisions of §§ 955.1–955.92, inclusive, of the order annexed to and made a part of the decision of the Secretary of Agriculture with respect to a proposed marketing agreement and order regulating the handling of Vidalia onions grown in Georgia, plus the following additional provisions shall be, and the same hereby are, the terms and conditions hereof; and the specified provisions of said annexed order are hereby incorporated into this marketing agreement as if set forth in full herein:

§ 955.90 Counterparts.

This agreement may be executed in multiple counterparts and when one counterpart is signed by the Secretary, all such counterparts shall constitute, when taken together, one and the same instrument as if all signatures were contained in one original.

§ 955.91 Additional parties.

After the effective date hereof, any handler may become a party to this agreement if a counterpart is executed by such handler and delivered to the Secretary. This agreement shall take effect as to such new contracting part at the time such counterpart is delivered to the Secretary, and the benefits, privileges, and immunities conferred by this agreement shall then be effective as to such new contracting party.

§ 955.92 Order with marketing agreement.

Each signatory handler requests the Secretary to issue, pursuant to the Act, an order providing for regulating the handling of Vidalia onions in the same manner as is provided for in this agreement.

The undersigned hereby authorizes the Director, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, to correct any typographical errors which may have been made in this marketing agreement.

In witness whereof, the contracting parties, acting under the provisions of the Act, for the purpose and subject to the limitations therein contained, and not otherwise, have hereto set their respective signatures and seals.

Food Safety and Inspection Service

9 CFR Part 327

[Docket No. 89–021P]

Imported Product; Withdrawal of Panama from the List of Countries Eligible for the Importation of Meat Products

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Food Safety and Inspection Service (FSIS) is proposing to withdraw the country of Panama from the list of countries eligible for importation of their products of cattle, sheep, swine, and goats into the United States under the Federal Meat Inspection Act (FMIA). The FMIA requires that, in order for a country to be eligible to export meat products to the United States, the meat inspection system of the country must assure compliance with requirements that are "at least equal to" the requirements of the FMIA and regulations as applied to official establishments in the United States and their products. FSIS has determined that Panama has not certified that any plant met U.S. standards in 1988, that it has not conducted residue testing and therefore did not receive a residue certification in 1988, and that reliance cannot be placed upon the certifications required of Panamanian authorities under the FMIA. Because of the lack of current information and the failure of Panama to demonstrate its "equal to" status, the Administrator is proposing to withdraw the country of Panama from the list of countries eligible for importation of their meat products into the United States.

DATES: Comments must be received on or before October 30, 1989.

ADDRESS: Written comments to: Policy Office, Attn: Linda Carey, FSIS Hearing Clerk, Room 3171, South Agriculture Building, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250. (See also "comments" under **SUPPLEMENTARY INFORMATION.**)

FOR FURTHER INFORMATION, CONTACT: Dr. Lawrence Skinner, Director, Foreign Programs Division, International Programs, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447–6933.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This proposed rule is issued in conformance with Executive Order 12291, and has been determined not to be a "major rule." It will not result in an annual effect of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. There are currently no domestic importers of Panamanian meat products.

Effect on Small Entities

The Administrator, Food Safety and Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities, as defined by the Regulatory Flexibility Act (5 U.S.C. 601) because there are currently no domestic importers of Panamanian meat products.

Comments

Interested persons are invited to submit written comments concerning this proposal. Written comments should be sent to the Policy Office and should refer to the docket number located in the heading of this document. All comments submitted in response to this proposal will be made available for public inspection in the Policy Office between 9:00 a.m. and 4:00 p.m., Monday through Friday.

Background

Pursuant to the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601 *et seq.*), the Secretary of Agriculture is responsible for administering the programs which are designed to ensure that meat and meat food products distributed to consumers are wholesome, not adulterated, and properly marked, labeled, and packaged. The Administrator of FSIS has been delegated the authority to issue regulations and implement appropriate procedures to ensure compliance with the requirements of the FMIA. The regulations addressing imported meat are contained in 9 CFR Part 327. In these regulations, the Administrator has established procedures by which foreign countries desiring to export meat or meat products to the United States may become eligible to do so (9 CFR 327.2(a)(2)(iii)).

The Agriculture and Food Act of 1981 (Farm Bill) amended the FMIA to require that imported meat products meet the same inspection, sanitation, quality, species verification, and residue standards applied to domestically prepared product. The Farm Bill directed the Secretary to enforce its provisions through random inspections of imported product at port of entry for residues and species verification, and requires exporting countries to conduct random sampling and testing of internal organs and fat of carcasses at the point of slaughter in accordance with methods approved by the Secretary.

The Food Security Act of 1985 (Farm Bill, Pub. L. 99–198) amended the FMIA by requiring that each foreign country from which meat is offered for importation into the United States obtain a certification issued by the Secretary stating that the country maintains a program using reliable analytical methods to ensure compliance with the United States standards for residues in such meat, and further provides that no meat articles shall be permitted entry into the United States from a country for which the Secretary has not issued such a certification.

Regulations implementing the 1981 Farm Bill requirements were published in the **Federal Register** on February 10, 1983 (48 FR 6091). All countries eligible to export product to the United States were notified of the 1985 Farm Bill changes by letter dated July 13, 1987.

To continue to export meat to the United States, a country must demonstrate that it maintains, among other things, a residue program that meets United States standards. FSIS collects information to verify that the United States standards are being met. This information includes: Annual residue testing results, the findings of FSIS technical experts from on-site reviews, and results of port-of-entry reinspections. In March 1987, FSIS notified Panama that it had not demonstrated continued proficiency in residue testing and further specified the information that must be provided before initiating any plans to certify product for export to the United States. The response from Panama indicated that no residue testing was done in 1987 and 1988.

Panama did not certify that any plants met United States standards in 1988, and therefore, no on-site reviews of the inspection system in operation were made. On-site reviews of plants are normally confined to those certified to export to the United States. A portion of these reviews is devoted to obtaining information concerning random selection of residue samples at slaughter. In addition, residue testing laboratories are reviewed to determine if analytical methods meet United States standards. Since no plants were certified and no residue testing was

being conducted, FSIS was not able to

withdraw Panama from the list of

DATES: Comments must be received on

by submitting a request to the Manager,

PART 71—DESIGNATION OF FEDERAL

letters should refer to File No. S7–23–89.

being conducted, FSIS was not able to obtain current information. Therefore Panama did not receive a residue certification for 1988. This means that FSIS will not accept any plant certifications from Panama until it demonstrates that its residue program meets United States standards. Without certified plants, shipments of meat products to the United States cannot legally occur.

Although Panama had no plants certified, three consignments of meat product arrived at the port of New Orleans, Louisiana, in January, April and May, 1989, accompanied by a Panamanian meat inspection certificate stating that the meat was produced in certified plants and met United States standards. None of these consignments was accepted for entry. Following the January consignment, FSIS notified Panama that neither plant nor product certifications would be accepted until United States requirements were met. However, Panamanian officials have continued to certify product.

Section 327.4(a) (9 CFR 327.4(a)) requires that any fresh meat or fresh meat byproducts consigned to the United States from a foreign country be accompanied by a foreign meat inspection certificate (health certificate) certifying that the product therein described was derived from livestock which received ante-mortem and post-mortem veterinary inspections at the time of slaughter in certified plants.

Section 327.2(a)(4) (9 CFR 327.2(a)(4)) states that:

> * * * The listing of any foreign country under this section may be withdrawn whenever it shall be determined by the Administrator that the system of meat inspection maintained by such foreign country does not assure compliance with requirements at least equal to all * * * requirements of the Act and the regulations * * * as applied to official establishments in the United States; or that reliance cannot be placed upon certificates required * * * from authorities of such foreign country; or * * * for lack of current information concerning the system of meat inspection being maintained by such foreign country * * *.

Therefore, the Administrator of FSIS has determined that, in the absence of certified plants, residue testing, and current information about the operation of Panama's meat inspection system, Panama's "equal to" status has not been demonstrated; and, moreover, that reliance cannot be placed upon certificates required under the regulations (9 CFR Part 327) from the authorities of such foreign country.

Therefore, pursuant to § 327.2 of the Federal meat inspection regulations (9 CFR 327.2), FSIS is proposing to withdraw Panama from the list of countries from which cattle, sheep, swine, and goat products may be imported into the United States.

Proposed Rule

Accordingly, § 327.2 of the Federal meat inspection regulations would be amended as set forth below:

List of Subjects in 9 CFR Part 327

Imported products; Meat inspection.

PART 327—IMPORTED PRODUCTS

1. The authority citation for Part 327 would continue to read as follows:

Authority: 34 Stat. 1260, 79 Stat. 903, as amended, 81 Stat. 584, 84 Stat. 91, 436; 21 U.S.C. 71 et seq.

§ 327.2 [Amended]

2. Paragraph (b) of § 327.2 would be amended by removing the following country from the list of countries eligible for importation of products of cattle, sheep, swine, and goats into the United States:

Panama

Done at Washington, DC, on August 7, 1989.

Lester M. Crawford, DVM, PhD.,

Administrator, Food Safety and Inspection Service.

BILLING CODE 3410-DM-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 89–ASW–21]

Proposed Removal of Transition Area: Brackettville, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to remove the transition area located at Brackettville, TX. The May 1, 1989, cancellation of the RNAV RWY 30 standard instrument approach procedures (SIAP) to the Los Medanos Ranch Airport has made this proposed action necessary. The intended effect of this proposal is to return to public use that protected airspace no longer required due to the cancellation of the SIAP serving the Los Medanos Ranch Airport. Coincident with this proposal would be the changing of the status of the Los Medanos Ranch Airport from instrument flight rules (IFR) to visual flight rules (VFR).

DATES: Comments must be received on or before October 20, 1989.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Docket No. 89–ASW–21, Department of Transportation, Federal Aviation Administration, Forth Worth, TX 76193–0530.

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Forth Worth, TX.

FOR FURTHER INFORMATION CONTACT: Bruce C. Beard, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Forth Worth, TX 76193–0530; telephone: (817) 624–5561.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89–ASW–21." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, 4400 Blue Mound Road, Fort Worth, TX, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Manager, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193–0530. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of the Federal Aviation Regulations (14 CFR Part 71) to remove the transition area located at Brackettville, TX. The May 1, 1989, cancellation of the RNAV RWY 30 SIAP serving the Los Medanos Ranch Airport has necessitated this proposed action. The intended effect of this proposal is to return to public use that protected airspace no longer required due to the cancellation of the RNAV RWY 30 SIAP. Coincident with this proposal would be the changing of the status of the Los Medanos Ranch Airport fror IFR to VFR. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6E dated January 3, 1989.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "a major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

The Proposed Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Brackettville, TX [Removed]

Issued in Forth Worth, TX on August 17, 1989.

Larry L. Craig,

Manager, Air Traffic Division Southwest Region.

RIN 3235–AB14

Ownership Reports and Trading by Officers, Directors and Principal Security Holders

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rules.

SUMMARY: In response to comments received and upon further consideration, the Commission today is reproposing for comment amendments to its rules and forms, as well as related disclosure requirements for issuers, regarding the filing of ownership reports by officers, directors, and principal security holders, and the exemption of certain transactions by those persons from the short-swing profit recovery provisions of the Securities Exchange Act of 1934 and related provisions of the Investment Company Act of 1940 and the Public Utility Holding Company Act of 1935.

DATES: Comments should be received on or before November 1, 1989.

ADDRESSES: Comments should be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Comment letters should refer to File No. S7–23–89. All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street NW., Washington DC 20549.

FOR FURTHER INFORMATION CONTACT: Brian J. Lane, Special Counsel, or Brian J. Lynch, Attorney-Adviser, Office of Disclosure Policy, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549, (202) 272–2589.

SUPPLEMENTARY INFORMATION: The Commission is republishing for comment proposed amendments to its rules promulgated under Section 16 [1] of the Securities Exchange Act of 1934 ("Exchange Act").[2] Every rule under Section 16 would be amended, deleted, or reorganized except for Rule 16e–1,[3] and several new Section 16 rules would be added. Further, Exchange Act Rule 12h–2 [4] would be deleted and Rule 30f–1 [5] under the Investment Company Act of 1940 ("Investment Company Act") [6] would be amended.

In addition, the Commission is reproposing new Item 405 of Regulation S–K [7] and new Form 5 as well as changes to Schedule 14A [8] and Forms 10–K,[9] 3,[10] 4,[11] and N–SAR.[12] While the rules are being reproposed in their entirety, this release focuses only on changes from the original proposals.[13]

I. Executive Summary

After reviewing the comments received on the initial proposed amendments to the rules promulgated under section 16 of the Exchange Act, the Commission is reproposing for comment the entire regulatory scheme with the following principal revisions:

- The definition of "officer" would be expanded to include specifically the principal financial officer, controller or principal accounting officer, as well as officers of the issuer's parent who perform policymaking functions for the issuer.
- Institutions engaged in holding securities for their clients in the ordinary course of business, eligible to file a Schedule 13G, would not include customer account holdings in determining ten percent beneficial owner status, and customer trust accounts would not be subject to section 16 as a result of the institution's insider status.
- Reporting of option exercises would be accelerated to the next required Form 4 or Form 5.
- Four different exemptions for intra-plan transactions would be added to Rule 16b–3(e) governing employee benefit plans.
- A three calendar day de minimis exemption from proxy disclosure of late filings would be added, but timeliness would be measured by receipt date at the Commission rather than mail date.
- Form 5 would be required from every person subject to section 26, except a person who conducted no transactions during the year that are reportable on Form 5 and has filed all required Forms 3, 4, and 5.
- An exemption from section 16 for insiders of Canadian issuers would be provided.

In addition, the revised proposed rules include other changes, discussed below. Apart from substantive changes, language in numerous revised proposed rules has been amended for purposes of clarity.

The reproposed rules continue to require that an issuer include in its annual proxy statement disclosure concerning delinquent filers. The Commission is particularly disappointed, given the publicity and concerns expressed, that its updated study reflects a continuing pattern of substantially delinquent filings.[14] This reinforces its conclusion that the proposed rules requiring proxy disclosure and the proposed legislation authorizing administrative proceedings including fines is necessary.

II. Background

Section 16 of the Exchange Act was designed both to provide the public with information on securities transactions and holdings of corporate officers, directors, and principal security holders, and to deter those individuals from profiting on short-term trading in the securities of their corporationswhile in possession of material, non-public information. Section 16 applies to every person who is directly or indirectly the beneficial owner of more than ten percent of any class of equity securities that is registered pursuant to section 12 of the Exchange Act ("ten percent holders"),[15] and to every director and officer of an issuer with a class of equity securities so registered. Officers, directors, and ten percent holders are referred to throughout this release as "insiders."[16]

Believing prompt publicity to be a potent weapon in the effort to curb the abuse of inside information, Congress enacted section 16(a),[17] which requires insiders to file public reports with respect to transactions in the equity securities of their corporations. In mandating reporting by insiders, Congress intended not only to discourage abuse of inside information and encourage voluntary maintenance of proper fiduciary standards by those in control of corporations, but also to give public investors information concerning purchases and sales by insiders, which might indicate such insiders' private opinions of the company's prospects.[18]

"For the purpose of preventing the unfair use of information which may have been obtained by [an insider] by reason of his relationship to the issuer," Congress enacted Section 16(b),[19] which provides for the automatic recovery of any profits made by an insider on securities purchased and sold within a six month period. Unlike other provisions applicable to insider trading, such as Sections 10(b), 14(e) and 21A of the Exchange Act,[20] Section 16 is a strict liability provision under which an insider's short-swing profits can be recovered regardless of whether that insider actually was in possession of material, nonpublic information.[21]

---

[14] See Section VIII.A, *infra.*

[15] When referring to issuers registered under Section 12, this release includes closed-end investment companies subject to Section 30(f) of the Investment Company Act (15 U.S.C. 80a–29(f) (1982)) and public utility holding companies subject to Section 17 (a) and (b) of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79, 79q (a), (b) (1982)).

[16] The insiders of a closed-end investment company also include the adviser, officers and directors of the adviser, and any affiliated person of the adviser. 15 U.S.C. 80a–2(a)(3); (a)(19) (1982).

[17] 15 U.S.C. 78p(a) (1982).

[18] H. Rep. No. 2383, 73d Cong., 2d Sess. 13, 24 (1934).

[19] 15 U.S.C. 78p(b)(1982).

[20] 25 U.S.C. 78j(b), 78n(e)(1982), 78u–1 (Supp. III 1985); *see* Rule 10b–5 (17 CFR 240.10b–5) and Rule 14e–3 (17 CFR 240.14e–3).

[21] Unlike other provisions of the Exchange Act, Section 16(b) is enforced by the issuer or by security holders bringing derivative actions on behalf of the issuer, rather than by the Commission or by security holders directly pursuing claims for damages.

Congress used this "automatic recovery provision [to] cut * * * through the formidable difficulties of proving intent and actual misuse of inside information that serve to hinder the effectiveness of traditional remedies against insider speculation."[22] The Commission was given specific rulemaking authority to exempt transactions as not comprehended within the purpose of the subsection. Traditionally, rules that exempt an insider from Section 16(b) short-swing profit liability have not provided an exemption for an insider from reporting under Section 16(a), while a reporting exemption has carried with it an exemption from Section 16(b).[23]

Section 16(c),[24] subject to a good faith delivery exception, prohibits the sale of any equity security of the issuer if the selling insider either (1) does not own the security, or (2) does not deliver it within 20 days after sale or mail it within five days. Section 16(d) [25] provides an exemption from Sections 16(b) and (c) for over-the-counter marketmaking activity and Section 16(e) [26] provides an exemption from Section 16(a) for specified foreign and domestic arbitrage transactions.

In the 1988 Release,[27] the Commission proposed a comprehensive revision of the rules under Section 16 to provide consistent treatment of insiders' securities transactions. After consideration of the 271 comment letters received in response to the 1988 Release, the Commission is reproposing for comment the entire regulatory scheme with modification of certain rules in response to comments ("revised proposed rules").[28] This release discusses only substantive changes from the proposed rules. Those wishing a more extensive explanation of the proposed rules that remain unchanged should consult the 1988 Release. In addition, much of the language of the rules initially proposed has been further revised for purposes of greater clarity, and the rules have been repositioned and renumbered for ease of reference. Two charts in Section X of this release compare the current and revised proposed rules.

III. Section 16(a) Reporting

A. Who Must Report

1. Officer

Under the amendments reproposed today, the definition of "officer" under Section 16 would be revised.[29] Although retaining the focus on executive duties contained in the initial proposal, the revised proposal would expand the class of officers subject to Section 16.[30] In addition to the executive officers covered in the definition originally proposed, the revised proposed rules would include principal financial officers, controllers or principal accounting officers,[31] and officers of an issuer's parent [32] who perform policy making functions for the issuer.

Of all the issues presented by the proposed rules, this received the most comment. Concern was voiced by a large number of commenters, particularly individuals, regarding potential narrowing of the officer definition. After weighing these concerns, the Commission continues to believe that title alone should not be determinative. Consistent with the statutory purpose, judicial decisions have focused on employees performing important executive duties. Most recently, the United States Court of Appeals for the Second Circuit endorsed this view of Section 16, holding that "it is the duties of an employee * * * rather than his corporate title which determine whether he is an officer subject to the short-swing trading restrictions of § 16(b) of the 1934 Act."[33] As long recognized by the Second Circuit, the term "officer" for Section 16 purposes

> includes, *inter alia,* a corporate employee performing important executive duties of such character that he would be likely, in discharging these duties, to obtain confidential information about the company's affairs that would aid him if he engaged in personal market transactions. It is immaterial how his functions are labelled.* * *[34]

To do otherwise would permit those with executive functions to avoid responsibility by foregoing title, and to subject those with officer titles, but no real executive responsibilities, to the draconian liability of Section 16.

Many companies already look to the executive officer definition in determining officer status for Section 16 purposes.[35] The revised proposed rules accommodate both the statutory purpose of Section 16 and the strict liability provisions of Section 16(b), which in the view of many commenters are excessively harsh, particularly in view of legal and regulatory developments since the enactment of Section 16. When the reporting and short-swing liability provisions of Section 16 were enacted, they were the only safeguards against the abuse of inside information. Today, the primary tools for prohibiting and remedying the misuse of inside information are the antifraud insider trading liability provisions under Rules 10b–5, 14e–3, and Section 21A of the Exchange Act.[36] Given the efficacy of these provisions, care should be taken to avoid broad-brush imposition of short-swing liability for transactions in which there is no misuse of inside information. Moreover, the liabilities that Section 16(b) can impose on perfectly legitimate transactions can unduly interfere with an insider's sale of securities necessitated by personal emergency.

2. Transactions While not an Officer or Director

Commenters expressed concern that disclosure of officer or director

---

[22] S. Rep. No. 379, 88th Cong., 1st Sess. 9 (1963). It should be noted that Section 16 predated the development of the anti-fraud insider trading provisions of Sections 10(b) and 14(e).

[23] *See* current Rule 16a–10 (17 CFR 240.16a–10) and revised proposed Rule 16a–9.

[24] 15 U.S.C. 78p(c)(1982).

[25] 15 U.S.C. 78p(d)(1982).

[26] 15 U.S.C. 78p(e)(1982).

[27] *See* n.13, *supra.*

[28] As used in this release, the term "proposed rules" refers to the original proposals in the 1988 Release. The term "revised proposed rules" refers to the proposals contained in this release.

[29] The revised proposed rules would alphabetize the definitions for easier reference. The definition of "officer" would be relocated as revised proposed Rule 16a–1(f).

[30] The original proposal would have used the definition of executive officer in Rule 3b–7 (17 CFR 240.3b–7). Rule 3b–7 defines an executive officer as "president, any vice president. . . in charge of a principal business unit, division of (sic) function (such as sales, administration or finance), any other officer who performs a policy making function or any other person who performs similar policy making functions for the registrant." It also includes officers of a subsidiary that perform policy making functions for the parent issuer.

[31] Principal financial officers and controllers or principal accounting officers also are required to sign an issuer's Securities Act of 1933 ("Securities Act") (15 U.S.C. 77a *et seq.* (1982)) registration statements and annual reports filed on Form 10–K (17 CFR 249.310) under the Exchange Act.

[32] In the 1988 Release, comment was solicited regarding the inclusion of parent company executive officers. Commenters were supportive of this proposal, which would specifically address common corporate arrangements where parent management sets and effectuates policy for an issuer. Executive officers of subsidiaries performing policy making functions for the issuer also are included in the reproposed definition, as in Rule 3b–7 and the original proposal.

transactions are subject to short-swing profit liability.[47] This analysis is wholly

the insider's immediate family [54] members residing in the same

the standard of care owed by general partners in both general and limited transactions before attaining insider status is unnecessarily harsh in that it subjects those persons to liability, even though they may not have known at the time of the transactions that they would become officers or directors in the future. For example, an individual may acquire securities prior to becoming an insider without regard to the potential liabilities for subsequent sales; however, upon becoming an insider, the individual could incur liability from selling securities no matter what the need. Commenters argued, and the Commission is persuaded, that the extension of strict liability to these trades may not be warranted. Therefore, the Commission proposes to revise the proposed rule, so that transactions occurring prior to the date a person becomes an officer or director would not be subject to the reporting and liability provisions of Section 16.[37] Section 16 would continue to apply to transactions by officers and directors that take place within six months before the issuer's registration of a class of equity securities under Section 12 of the Exchange Act.[38] Insiders of private companies should be well aware of plans to register under Section 12 sufficiently in advance to take potential Section 16 responsibilities into account in buying and selling issuer securities.

Comment is solicited, however, as to whether it is preferable to subject all transactions conducted prior to achieving insider status to Section 16 or alternatively to subject pre-insider transactions to Section 16 when the person knows or has reason to know that he or she will become an officer or director. Comment is further solicited on whether an exemption for pre-insider trades should be an exemption from the short-swing profit recovery provisions of Section 16(b), but not from the reporting provisions of Section 16(a).

3. Beneficial Ownership

A large number of commenters requested clarification regarding the operation of the beneficial ownership concepts under the proposed rules. The term "beneficial owner," both as originally proposed and as reproposed, would have two applications: one to determine who is subject to Section 16 and another to determine what holdings and transactions must be reported and subject to short-swing profit recovery. The first application of beneficial owner in the revised proposed rules would be used solely to determine whether a person is a ten percent holder and therefore subject to Section 16.[39] Once the determination has been made that a person is an insider—whether an officer, director, or ten percent holder—the second definition of beneficial ownership, the pecuniary interest test, would be used, both for determining what holdings and transactions are reported under Section 16(a) and what transactions are subject to short-swing profit recovery under Section 16(b).[40]

a. *Determining Who is a Ten Percent Holder.* In determining who is a ten percent holder, the voting or investment control analysis of Section 13(d) of the Exchange Act, and the rules thereunder, would be used, as originally proposed.[41] Application of the revised proposed definition [42] would be straightforward; if a person is deemed a ten percent holder pursuant to Section 13(d), and the rules thereunder, the person would be deemed a ten percent holder under Section 16 and would be required to file a Form 3. Once ten percent holder status is determined, the pecuniary interest analysis would govern the securities holdings and transactions to be reported on Forms 3, 4, and 5.

Many commenters recommended an exception from the ten percent holder determination for customer accounts of institutions engaged in holding securities for their clients in the ordinary course of business, generally defined as those institutions currently eligible to file a Schedule 13G ("13G Institutions").[43] The Commission is persuaded that the rules as reproposed should contain such an exemption. Without an exemption, institutions that administer fiduciary accounts in the ordinary course of business would become subject to Section 16 if they exercised either voting power or investment power over these accounts that, when aggregated, held over ten percent of a Section 12 class of equity securities. Under the rules as initially proposed, both the institution and each individual fiduciary account could become subject to Section 16 reporting and liability.[44]

The revised proposals would exclude from the calculation of beneficial ownership of a 13G Institution those securities held in or for customer accounts in the ordinary course of business where the 13G Institution is a passive investor.[45] If the 13G Institution also held securities of the same class in another capacity, those securities would be counted for purposes of determining ten percent holder status. The proposed revision appears necessary to avoid undue interference with the day-to-day business of banks, brokers, dealers, investment advisers and other specified institutional fiduciaries and custodians. The ordinary course of business and passive investment intent conditions should minimize the potential for the institutions to use the aggregated holdings to exert control and gain access to inside information.

The Commission requests comment on the potential for abuse of the proposed exemption and specifically requests comment as to whether the revised proposed rules should be amended to treat a 13G Institution as an insider if it holds more than ten percent of an issuer's equity securities for a single customer or customers that would constitute a "group" under Rule 13d–2.[46] Further, if all accounts of a 13G Institution buy and sell issuer stock in unison it may be appropriate to treat each account as an insider. Comment is accordingly requested whether, as a condition to this exemption, the 13G Institution should be precluded from having one person, or one investment committee, make the investment decisions for each of the fiduciary accounts.

b. *Determining Beneficial Ownership for Reporting and Short-Swing Profit Liability.* Once it has been determined that a person is a ten percent holder, or that a person is otherwise subject to Section 16 as a director or officer, the pecuniary interest definition of beneficial owner determines what securities holdings and transactions must be reported and which transactions are subject to short-swing profit liability.[47] This analysis is wholly independent and separate from the analysis determining ten percent holder status.

Under the definition, as originally proposed and as reproposed, an insider beneficially owns all shares in which the insider holds a direct or indirect pecuniary interest.[48] Indirect pecuniary interest represents the insider's ability to profit from purchases and sales in securities held by family members, or through derivative securities, partnerships, corporations, trusts and "other arrangements."[49] An indirect pecuniary interest arising from "other arrangements" would include, among other things, any formal or informal agreement to share profits from transactions in a particular issuer's securities. For example, this would include parking arrangements [50] and specified interests in fee arrangements.[51]

Once all holdings involving a direct or indirect pecuniary interest have been ascertained, such holdings would be reported on the appropriate Form 3, 4, or 5. Insiders would not report beneficial ownership of securities in which they do not have a pecuniary interest, notwithstanding their authority to vote, acquire, or dispose of the securities.[52] If the right to vote or dispose of the securities, however, is separated from the security, the holder of the right may be deemed the beneficial owner of an equity security.[53]

The proposed rule defined several categories of indirect interests in securities that conveyed beneficial ownership for reporting and short-swing profit purposes. Changes have been made with respect to such provisions as follows.

i. Family Holdings. As initially proposed, the rules would have required automatic attribution of the holdings of the insider's immediate family [54] members residing in the same household. Commenters responding to this proposal objected to the automatic attribution feature, which would not have permitted an insider to rebut the presumption of beneficial ownership, and strongly disfavored the suggested alternative approach, which would have extended the concept of beneficial ownership to non-family members residing in the same household.

In response to commenters' concerns, the proposed treatment of family holdings would be revised to eliminate the mandated attribution feature and return to the current use of a rebuttable presumption.[55] The revised proposed rule [56] would create a rebuttable presumption that an insider is the beneficial owner of securities held by a member of the immediate family sharing the same residence. The Commission has been persuaded by commenters that the alternative approach is not appropriate because the control over non-family members' investments is likely to be limited, resulting in a substantial risk of inadvertent shortswing transactions. Nonetheless, where it can be demonstrated that a non-family member in the same household shares a pecuniary interest with the insider, the securities would be attributable to the insider.

ii. Partnership Holdings. As originally proposed, holdings of a general partnership would be attributed to the general partners.[57] As reproposed, this attribution principle would be extended to general partners of limited partnerships.[58] Commenters addressing the issue of attribution generally recommended attributing to general partners of limited partnerships the partnership's portfolio securities holdings [59] and transactions since (1) the standard of care owed by general partners in both general and limited partnerships is typically the same, (2) general partners of limited partnerships typically have a direct interest in the profits of a limited partnership, and (3) the opportunity for general partners to profit from short-swing speculation is no less in a limited partnership than in a general partnership. Accordingly, the revised proposed rule would attribute portfolio securities held by a limited partnership to its general partners for both reporting and short-swing profit liability purposes.

In addition, the revised proposed rule would specify that the extent of a general partner's pecuniary interest in either the general partnership's or the limited partnership's portfolio securities would be measured by the greater of the partner's proportional interest in (1) partnership profits, including profits attributed to any limited partnership interest and any other interest in profits that arise from the purchase and sale of the partnership's portfolio securities, or (2) the general partnership capital account.[60] This approach should reflect more accurately the general partner's pecuniary interest in the partnership's securities.[61]

Comment is solicited, however, on whether beneficial ownership should be determined solely by a general partner's percentage of profit with respect to transactions in the issuer's securities. Comment is further requested whether the rule should specify the means and timing for determining a general partner's profit interest or capital account. Specifically, should the general partner's profit interest or capital account be determined by the greater of the balance specified in the partnership agreement at the date of the subject transaction or as reported to the Internal Revenue Service prior to the subject transaction?

iii. Fee Arrangements. Several institutional commenters urged an exemption from the pecuniary interest

---

[37] Current Rule 16a–1(d) (17 CFR 240.16a–1(d)); revised proposed Rule 16a–2(a).

[39] Revised proposed Rule 16a–1(a)(1).

[40] Revised proposed Rule 16a–1(a)(2).

[41] *See* Rule 13d–3 (17 CFR 240.13d–3).

[42] Revised proposed Rule 16a–1(a)(1).

[43] 17 CFR 240.13d–102. 13G Institutions would be defined as institutions currently identified in Rule 13d–1(b)(1) (17 CFR 240.13d–1 (b)(1)): brokers, dealers, banks, insurance companies, investment companies, investment advisers, employee benefit plans, pension or endowment funds, groups where all members are the foregoing types of entities, and parent companies of the foregoing, provided their non-13G subsidiaries hold one percent or less of the securities of the issuer in question. The Commission has proposed rules providing that Schedule 13G be made available to certain passive non-institutional investors. *See* Exchange Act Release No. 26598 (March 6, 1989) (54 FR 10552). Revised proposed Rule 16a–1(a)(1), however, is intended to apply to institutions only; the revised proposed Rule is premised on the potential interference the Rule otherwise would have upon the designated institutions' day-to-day affairs carried out in the ordinary course of business.

[44] Pursuant to proposed Rule 16a–5(a)(2) and revised proposed Rule 16a–8(b), trusts with insider trustees would themselves become insiders. *See* Section III.A.3.d. *infra.*

[45] One of the current conditions to the use of Schedule 13G is that eligible institutions not hold the securities with the purpose or effect of changing or influencing the control of the issuer. Rule 13d–1(b)(1)(i) (17 CFR 240.13d–1(b)(1)(i)). Under the revisions that have been proposed, this would continue to be the case.

[46] 17 CFR 240.13d–2.

[47] Revised proposed Rule 16a–1(a)(2).

[48] "Pecuniary interest" would be defined in revised proposed Rule 16a–1(a)(2)(i) to mean the opportunity to profit, directly or indirectly, from a transaction in the subject securities.

[49] Revised proposed Rule 16a–1(a)(2)(ii).

[50] "Parking" is a term used to describe arrangements, generally prohibited, whereby a person seeks to disguise his or her beneficial ownership by having another entity or person claim to be the beneficial owner.

[51] *See* Section III.A.3.b.iii, *infra.*

[52] Accordingly, a ten percent holder with no pecuniary interest in the securities would file a Form 3 stating that the amount of securities in which there was a pecuniary interest was zero. No Form 4 or 5 would be required as to those securities unless the ten percent holder acquired a pecuniary interest.

[53] *C.f.* Section III.A.3.b.iv, *infra.*

[54] "Immediate Family" would be defined in revised proposed Rule 16a–1(e) as any child, stepchild, grandchild, grandparent, parent, stepparent, spouse, sibling, mother-in-law, father-in-law, son-in-law, daughter-in-law, brother-in-law, or sister-in-law and all adoptive relationships. The only substantive revision from that originally proposed is the addition of grandparents.

[55] *See* Exchange Act Release No. 18114 (Sept. 24, 1981) (46 FR 48147) ("Release No. 18114") Q.4: "Absent countervailing facts, it is expected that securities held by a spouse, minor children and other relatives who share the same home as the insider will be reported as being beneficially owned by the insider since such relationships ordinarily result in the insider obtaining benefits substantially equivalent to ownership."

[56] Revised proposed Rule 16a–1(a)(2)(ii)(A).

[57] Proposed Rule 16a–1(a)(2)(iii).

[58] Revised proposed Rule 16a–1(a)(2)(ii)(B).

[59] The term "portfolio securities" would be defined in revised proposed Rule 16a–1(a)(2)(iv).

[60] The capital account balance in a partnership generally represents the partner's initial investment in the partnership as adjusted by any future investment, distributions, or partnership allocations.

[61] Thus, under revised proposed Rule 16a–1(a)(2)(ii)(B), if a general partner's capital account represented a one percent interest in the partnership but the partnership agreement provided that the general partner would receive ten percent of the profits of the partnership after the first five years, the general partner would beneficially own one percent of the partnership's securities for the first five years and ten percent of the securities after the fifth year, even if the capital account remained equal to a one percent interest. The initial proposal would have attributed merely the partner's pro rata share of the partnership, without distinguishing between profit allocations or the capital account.

definition for management fees, even if

represents a sufficient interest that the

voting power over the corporation's

above, under the revised proposals,[75]

favor of a new exemption for on-going

responsible, however, for the accuracy

definition for management fees, even if those fees are performance related. In response to these commenters' remarks, the revised proposed rules [62] would provide that management and advisory fees would not represent a pecuniary interest in an issuer's securities where the established fee arrangement is based on the gains generated by a portfolio over a period of one year or more and securities of the issuer do not account for more than ten percent of the portfolio. A large percentage of an investment adviser's fee usually is derived from a percentage of the total assets under management, while a smaller portion of the total fee is earned as a result of the fund's performance relative to the Standard and Poor's 500 or some other relevant benchmark. Section 205 of the Investment Advisers Act of 1940 ("Advisers Act") [63] generally prohibits basing adviser fee arrangements on capital gains or capital appreciation generated in the portfolio.[64] Advisers Act Rule 205-3 [65] allows such a performance fee under specified conditions.[66] Since the customary fee received by an adviser usually is connected with the performance of a portfolio of securities over a period of one year or more,[67] the pecuniary interest in the profit from a single securities trade appears so remote that attribution of beneficial ownership for that trade would be inappropriate except where the securities of the issuer account for a significant portion of the portfolio. However, if an entity is awarded a fee based upon the gains from particular transactions, the fee would create a pecuniary interest in the securities transaction that would be subject to short-swing profit liability.

The Commission solicits comment on whether ten percent of a portfolio represents a sufficient interest that the profit generated from transactions in these securities is no longer remote: Should the percent be larger, such as 20 percent, or smaller, such as five percent, before attribution is appropriate?

iv. Dividends. The proposed treatment of pecuniary interest would be revised to exclude interests solely in dividends.[68] The right to dividends alone generally is too remote from the pecuniary interest derived from the purchase and sale of securities to be considered an interest subject to Section 16. This comports with the view of commenters who unanimously urged the exclusion of an interest in dividends alone from Section 16. However, any interest in dividends separated from a security, which is a separate security or traded as a separate right or security, would not be exempt. These interests, which may be treated as equity securities in their own right, present the same potential for speculative profit as the related equity security.

v. Corporate Holdings. Initially, the Commission did not propose a rule addressing a security holder's indirect pecuniary interest in corporate portfolio holdings in order to permit courts flexibility in applying Section 16 to situations where corporate holdings are involved. Those responding to the request for comment generally agreed with the Commission's position with respect to publicly-held entities, but urged the Commission to provide specific attribution provisions for closely-held corporations. These commenters expressed concern that an insider of a Section 12 issuer who also owned shares in a non-public corporation holding securities of that issuer could risk having a court determine that the insider is responsible for transactions carried out by the non-public corporation, even where the insider is not in control of that corporation and does not participate in investment decisions of the entity.

The revised proposed rules contain a non-exclusive safe harbor from attribution. Under the revised proposal, portfolio securities held by a non-public corporation [69] would not be attributed to an insider security holder of that corporation if the following conditions are met: (1) The person is not a control person of the entity; and (2) the person does not have or share investment or voting power over the corporation's portfolio securities. If the test is met, the corporation's securities would not be attributed to or effectively passed through to the insider equity security holder. The Commission is considering treating specified insurance companies and foreign issuers exempt from Section 12 of the Exchange Act as public companies for purposes of the proposed safe harbor.[70] Comment is solicited on whether this alternative would present an opportunity for abuse.

c. *Disclaiming Beneficial Ownership.* Given the change from mandated to presumed attribution,[71] the revised proposed rules would allow an insider to disclaim beneficial ownership of immediate family holdings. Where, however, beneficial ownership is otherwise mandated by a rule, an insider would not be permitted to disclaim beneficial ownership of equity securities.[72]

d. *Trusts and Trustees* i. Introduction. The revised proposed rules reflect two substantive changes from the original proposals in the trust area.[73] First, the revised proposals would exempt trusts from becoming subject to the provisions of Section 16 as a result of having an insider 13G Institution as a trustee. Second, the revised proposals would limit the exemption for trust remainder holders to those without investment control over the trust. There would be two other minor changes to remote interest provisions, discussed below.

ii. Exemption for 13G Institutions as Trustees. As originally proposed and as reproposed, the insider status of a trustee would be attributed to a trust that is not otherwise an insider because of the substantial potential for the trust to benefit from information obtained by the insider trustee.[74] As discussed

---

[62] Revised proposed Rule 16a-1(a)(2)(ii)(C).

[63] 15 U.S.C. 80b-5 (1982).

[64] Section 205(b)(2) (15 U.S.C. 80b-5(b)(2)(1982)) permits certain performance fees, known as "fulcrum fees," if the fee is pursuant to an advisory contract with a registered investment company or with certain other persons, provided the contract relates to the investment of assets in excess of $1 million. Section 205(b)(3) (15 U.S.C. 80b-5(b)(3)(1982)) permits performance fees with respect to business development companies.

[65] 17 CFR 275.205-3.

[66] The conditions that must be met in order for the performance related fee to be permissible are, generally, that the client agreeing to the arrangement must meet certain net worth tests, the arrangement involves an arms-length contract, and that disclosure requirements are met, provided that the compensation is based upon net realized and unrealized gains over a period of at least one year. *Id.*

[67] Compensation is calculated after taking into consideration realized capital losses and unrealized capital depreciation netted against gains and unrealized capital appreciation in securities in the account over a period of one year or more.

[68] Revised proposed Rule 16a-1(a)(2)(ii)(D).

[69] Revised proposed Rule 16a-1(a)(2)(iii) would apply to corporations having no reporting obligations under Sections 13 and 15(d) of the Exchange Act, and to corporations having reporting obligations arising from registration of debt securities only.

[70] Section 12(g)(2)(G) of the Act (15 U.S.C. 78*l*(g)(2)(G) (1982)) and Rule 12g3-2(b) (17 CFR 240.12g3-2(b)) exempt specified insurance companies and foreign issuers from the registration requirements of Section 12(g) of the Act (15 U.S.C. 78*l*(g)(1982)) and the reporting requirements of Section 13 of the Act 15 U.S.C. 78m (1982)).

[71] *See* Section III.A.3.b.i., *supra.*

[72] Revised proposed Rule 16a-1(a)(4). This revised rule would not affect the ability of a person to disclaim beneficial ownership for purposes of Section 13(d) reporting. *See* Rule 13d-4 (17 CFR 240.13d-4).

[73] In addition to these substantive changes, all rules relating to trusts would be moved to revised proposed Rule 16a-8, with two exceptions. The exemption for remote interests would be moved to revised proposed Rule 16a-1(a)(5) and the 12 month exemption for fiduciaries would be moved to revised proposed Rule 16a-2 (d) and (e).

[74] Commenters did not object generally to the extension of an individual trustee's insider status to the trust or to the extension of a trust's insider status to an individual trustee. On the other hand,

Continued

above, under the revised proposals,[75] 13G Institutions would not become ten percent holders as a result of their customer account holdings.

There may be situations, however, where a 13G Institution may otherwise be an insider, for example, where it holds ten percent for its own account. In such a case, under the proposed rules, each individual trust would become subject to Section 16. In response to this concern, the revised proposed rule would provide an exemption for all individual trusts administered by 13G Institutions, in the ordinary course of business, and where the 13G Institution was a passive investor.[76] Thus, just as customer accounts would not subject the 13G trustee to Section 16, neither should the 13G trustee subject customer accounts to Section 16. Comment is solicited as to whether there are opportunities for abuse by 13G Institutions, or reasons to subject trusts administered by 13G Institutions to Section 16.

iii. Remote Interests. The proposed rules would be modified in several respects. First, the revised proposed rules would exempt from the beneficial ownership determination remainder interests in trusts, provided the person with the remainder interest does not exercise and does not have the ability to exercise investment control over the trust.[77] Second, the Commission proposes to delete the current exemption for a business trust with over 25 beneficiaries because these entities operate similarly to a corporation and different treatment appears inappropriate.[78] They would be considered corporations for purposes of these rules. The final revision to the remote interest exemption would be the deletion of the exemption for securities held in pension or retirement plans in favor of a new exemption for on-going acquisitions in such a plan.[79]

B. How and When to Report

1. Option Exercises

Many commenters, particularly individual investors, voiced concern over deferred reporting of option exercises. Many investors stated that option exercises represented important indicia of an insider's private views of a company's prospects. One commenter noted that information concerning a sale of securities received upon the exercise of an option, considered profit taking, is viewed as less indicative of an insider's assessment of a company's prospects than other sales. Thus in order to be useful, transaction disclosure requires information as to whether the insider is profit taking or selling an investment.

The revised proposed rules would require insiders to report option exercises at the time they file their next required report, whether on Form 4 or Form 5.[80] This would permit investors evaluating transactions to make a judgment as to whether the securities sold represent option stock or investment stock. Since insiders otherwise would be required to file the report, there should be no significant burden in adding disclosure of the option exercise.

2. Form 5 Revisions

The revised rules incorporate four changes to the proposed annual statement on Form 5 in response to comment received. First, an insider would not be required to file a Form 5 if the person had reported all required holdings and transactions on Forms 3, 4, and 5, during or prior to the fiscal year for which the form is to be filed, and had no transactions requiring deferred reporting.[81] The issuer would continue to have to disclose all insiders who had not filed a required Form 5, but would be entitled to rely on a written representation from the insider that no Form 5 was required if the issuer retains the representation for at least two years.[82] The issuer would not be responsible, however, for the accuracy of the insiders' assertions.

The second change would involve the timing of the filing of Form 5. Originally, the Commission proposed that the Form 5 be filed within 30 days of the issuer's fiscal year end. Many commenters were concerned that this period was not long enough for insiders to learn their positions in various trusts and benefit plans, while other commenters cautioned against extending the deadline significantly since the issuer would need to receive the Forms 5 in time to comply with the proposed Item 405 proxy disclosure requirement. The revised proposed rules would extend the deadline from 30 days to 45 days.[83]

The third proposed change to Form 5 would be the deletion of the certification of compliance with Section 16(a).

An additional change is being proposed in an attempt to clarify the Form 5 filing requirement. The revised proposed rule would require a Form 5 from any person who was an insider at any time during the year. Comment is requested as to whether the rule should require that a person be an insider for a specified minimum period, such as three months or six months of the year. Further, comment is requested as to whether the Form 5 should be required from a person becoming an insider late in the fiscal year, but not from a person ceasing to be an insider.

3. Date of Filing

As proposed, Forms 3, 4, and 5 would have been deemed timely filed if mailed on the date due at the Commission. While those required to supply the information generally supported the proposal, those using the information did not. In light of the comment received, the Commission would revise the proposal to address both concerns. The revised proposed rules would eliminate the mailing date provision and require the filing of these forms by the date due at the Commission. However, given the concern underlying the initial proposal that mail delays might cause some insiders to be identified in proxy statements as non-complying persons, even where the form had been sent in a timely fashion, the proposed proxy disclosure requirement for late filers would be amended to permit the issuer to omit disclosure from the proxy statement if a form was provided to it within three calendar days of the required filing date.[84]

---

most respondents objected to the concept of aggregating bank and professional trust company holdings, ascribing insider status to the trustee if such aggregate holdings exceed ten percent and ascribing insider status to the trusts that have a professional trustee who is deemed to be an insider because he or she administers trusts which, in the aggregate, hold over ten percent.

[75] *See* Section III.A.3.b., *supra.*

[76] Revised proposed Rule 16a-8(b).

[77] Revised proposed Rule 16a-1(a)(5)(i). A person with a remainder interest in a trust has an interest in a trust's securities upon the death of a prior beneficiary or expiration of the trust's term. If the ability to control investment decisions is present, the beneficial ownership interest would not be considered remote and the insider would be required to report his or her pecuniary interest in the remainder.

[78] Current Rule 16a-8(g). Many investment companies are structured as Massachusetts business trusts.

[79] Current Rule 16a-8(g)(3) and revised proposed Rule 16b-3(e)(4). *See* discussion in Section V.C., *infra.*

[80] Revised proposed Rule 16a-4(b). If the next required report is due in less than ten days, the reporting person may defer the option exercise disclosure to the following report; otherwise, for example, an insider might exercise an option on the sixth day of the month and a Form 4 disclosing a trade from the previous month would be due on the tenth, providing the insider with only four days to report the exercise.

of-the-money derivative securities were

manner similar to the underlying stock,

IV. Derivative Securities

The rules, both as originally proposed and as reproposed, would deem derivative securities to be the same class of equity securities as the underlying security.[85] Thus, the proposed rules would expand liability for transactions in derivative securities, which would be matched with transactions in the underlying securities to yield possible short-swing profits. This is essential to the efficacy of the Section 16 regulatory scheme. The profit potential with derivative securities is the same as with the underlying security, or even greater because of the leverage opportunities. If derivative securities and underlying securities were not matched for purposes of Section 16(b) short-swing profit liability, there would be a substantial loophole in the Section 16 regulatory scheme that would provide an opportunity for abuse.

From an economic perspective, Section 16 should apply to any position the value of which depends on the value of the issuer's equity. Options, warrants and other derivative securities have this characteristic. Indeed, by purchasing put and call options with the appropriate characteristics an investor can replicate the cash flows that result from holding stock directly.[86]

When an insider exercises an option or converts a convertible security, the insider changes indirect ownership in the underlying securities to direct ownership. The insider realizes no profit at the time of exercise,[87] has not significantly altered the potential for profit, and has acquired no greater percentage of beneficial ownership. Whether an insider pays money to exercise or convert a security does not change the analysis. Economists commenting on the proposed treatment of options agreed with this analysis.[88] Moreover, since there is a reportable purchase of the derivative security at acquisition, the purchase at exercise or conversion generally would be exempt because there should not be two purchases involving the same security subject to Section 16(b) liability.

Put equivalent positions, as defined in the revised proposed rules,[89] would be subject to Section 16, as they provide the same opportunity to profit as call equivalent positions. Insiders knowing of news adverse to the issuer could profit through use of put equivalent positions just as insiders might use call equivalent positions to profit on the basis of positive news.

Commenters generally were supportive of the proposed scheme. As more fully discussed below, in response to various comments, the revised proposals incorporate the following major changes: (1) The definition of a derivative security would be revised to clarify when merger rights are excluded; (2) the definition of derivative securities would be narrowed to exclude a larger class of cash-only derivative securities; (3) the reporting of exempt exercises or conversions of derivative securities would be required on the next report due rather than on an annual basis; (4) the exemption from short-swing profit liability for exercises and conversions would be expanded to include out-of-the-money options where the exercise was necessary to comply with the serial exercise provisions of the Internal Revenue Code; and (5) the profit calculation provision would be revised.

A. Definition of Derivative Security

1. Exchange of Shares in a Merger

The initial proposal defined the term "derivative security," but provided four exclusions: (1) Pledged securities; (2) rights arising in connection with a merger; (3) specified cash only securities; and (4) broad-based index options and futures. Concern was expressed that the language of the second exclusion in the proposed definition was too broad and might be read to exclude all derivative securities in connection with a merger, such as privately negotiated options granted by an issuer or principal shareholder upon execution of a merger agreement (a "lock-up" option). This exclusion, taken from the current rules,[90] is intended to have a narrow scope, applying only to the exchange of securities pursuant to a merger agreement which otherwise might be viewed as the exercise of a "right," and therefore a derivative security.[91] Lock-up options and other similar arrangements, which have an existence independent of a merger agreement and otherwise resemble a call option, are not within the scope of the intended exclusion. As such, the Commission proposes to amend the exclusion by changing the clause "in connection with a merger" to "all security holders pro rata . . . as a result of a merger." [92] Thus, a right excluded from the definition is the right resulting from merger terms offered to all holders of that class of securities pro rata, rather than any right that might arise either in connection with or as a result of a merger.

2. Cash-Only Derivative Securities

The definition of derivative security proposed in the 1988 Release would have excluded only those cash-only derivative securities awarded pursuant to a benefit plan satisfying the requirements of Rule 16b–3.[93] Such securities would not be deemed equity securities. In response to the concerns of commenters, the revised proposed rule also would exclude from the definition of derivative securities cash-only derivative securities that have a fixed date of redemption, at least six months in the future, not subject to the discretion of any party.[94] For example, an issuer may award "phantom stock" to an insider that will be redeemed for cash exactly one year and one day after grant. This would not be deemed a derivative security or an equity security. The opportunity for abuse appears slight since the insider is at market risk for at least six months and has no discretion over the transaction.

B. Reporting of Exercises and Conversions

As discussed above, the revised proposed rules would require exercises of derivative securities to be reported on the next otherwise required report, either Form 4 or Form 5.[95]

C. Short-Swing Profit Liability

1. Acquisitions

Some commenters expressed concern that issuer grants of options would be deemed a purchase for Section 16(b)

---

calendar days of the required filing date, the issuer may presume, for purposes of disclosure, that the form was filed timely with the Commission.

[85] This would essentially codify the holding in *Chemical Fund* v. *Xerox Corp.*, 377 F.2d 107 (2d Cir. 1967).

[86] The relationship underlying this duplication is known as the "put-call parity theorem." *See* Brealey and Myers, *Principles of Corporate Finance*, 474–475 (Third Edition). Call equivalent position is defined in revised proposed Rule 16a–1(b).

[87] The profit is realized at the time the underlying security is sold. For example, when an insider exercises a call option with an exercise price of $10 and a market price of $20 for the underlying security, there is no profit received until the insider sells the underlying stock for $20 per share. Alternatively, in the case of a standardized option, the insider could have realized his or her profit by selling the option, rather than exercising it.

[88] *See* Letters from Gregory S. Crespi, Senior Counsel Executive Office of the President's Council of Economic Advisors and H. Nejat Seyhun, Visiting Assistant Professor of Finance University of Chicago.

[89] Revised proposed Rule 16a–1(h).

[90] Current Rule 16a–6(a), Note 3 (17 CFR 240.16a–6(a)). The Note was added originally as a result of concern regarding a proposed change to that rule contained in Exchange Act Release No. 9396 (Nov. 24, 1971) (36 FR 22905).

[91] *See* Release No. 18114 Q.51.

[92] Revised proposed Rule 16a–1(c)(2).

[95] *See* Section III.B.1, *supra*.

purposes, unless issued pursuant to a Rule 16b–3 plan, since the proposed scheme would treat all acquisitions as purchases. They argued that option grants generally are beyond the control of insiders and are received without payment of cash. As such, they concluded that there is little opportunity for abuse, and a general exemption from Section 16(b) short-swing profit liability would be warranted.

Concern also was expressed that the absence of an exemption for issuer grants could create inadvertent short-swing transactions. An insider could sell stock and three months later receive a non-exempt stock option grant. The option grant would be deemed a purchase to be matched with the prior sale and a short-swing transaction would result. In essence, these commenters appear to be urging that the Commission delete all conditions to Rule 16b–3 and provide a blanket exemption for issuer option grants, which generally are awarded for compensatory purposes. The Commission is not prepared to provide such an exemption. Comment is requested, however, as to examples of non-compensatory issuer option grants given without consideration or value.

2. Exercises and Conversions

a. *Out-of-the-Money Securities.* The initial proposal would have exempted exercises of in-the-money and at-the-money derivative securities only.[96] If a derivative security is in-the-money, the value of the derivative security is generally more directly linked with the underlying stock than is the case with an out-of-the-money security. The opportunity for profit is different for out-of-the-money securities since they do not have a dollar-for-dollar direct relationship with the underlying securities.[97] Further, if exercises of out-of-the-money derivative securities were exempt, an insider might decide that qualifying for the exemption from Section 16(b) was more desirable than the ability to purchase the underlying stock at a better price in the open market, since stock acquired upon the exercise could be sold immediately, whereas stock acquired in the open market could not be sold for six months. There would be opportunities for abuse in such situations.

Commenters mentioned several reasons out-of-the-money call options are exercised that might justify an exemption: (1) to increase voting power; (2) to buy a large block of stock without affecting the market price; and (3) to comply with Section 422A of the Internal Revenue Code's [98] requirement to exercise options in the order they were granted ("serial exercise rule"). The third situation does not seem to present a significant opportunity for abuse. Whereas the serial exercise rule has been deleted for incentive stock options awarded after January 1, 1987, previously granted options remain subject to the rule. As such, the revised proposal would exempt exercises of out-of-the-money derivative securities where necessary to satisfy the serial exercise rule of the Internal Revenue Code.[99]

b. *Issuer Option Grants.* A few commenters expressed concern that many option grants would be exempt purchases under proposed Rule 16b–3 covering employee benefit plans. Where both the grant and exercise of a derivative security are exempt purchases, they contend, there will be no short-swing transaction when the insider sells the derivative security or underlying security, unless there is another independent purchase by the insider. Thus, the option could be granted, exercised, and the underlying securities sold, within six months without short-swing profit liability.[100] The Commission anticipated these concerns by proposing a six month holding period for options granted pursuant to a Rule 16b–3 plan.

Several commenters criticized the option holding period requirement, stating that there was no similar requirement for stock awarded under a plan complying with Rule 16b–3. They suggested that the treatment be the same and that the option holding period be deleted. Since the overall proposed scheme treats derivative securities in a manner similar to the underlying stock, consistent treatment appears to be warranted. Therefore, it would seem there should be a holding period for both stock and derivative securities or none at all. The revised proposed rules would require a six month holding period for employee benefit plan grants of either underlying securities or derivative securities.[101]

Comment is solicited as to whether the Commission should instead delete any holding period requirements in proposed Rule 16b–3, but amend the exemption for exercises and conversions to exclude derivative securities acquired pursuant to the Rule 16b–3 exemption from the proposed exemption for exercises and conversions. Comment also is requested as to whether there is a basis for distinguishing between options and stock with respect to the need for the proposed holding period.

c. *Derivative Securities with Fixed Exercise Price.* The exemption of exercises and conversions from Section 16(b) liability [102] would be reproposed with one language change. The revised proposed rule would make clear the Commission's intent to exempt exercises of only those derivative securities with fixed exercise or strike prices. Thus, the exercise of an option that by its terms has an exercise price of 90 percent of the market value on the date of exercise would not be exempt. Such an option would be considered to have a "floating" exercise price, warranting special treatment.

The foundation of the proposed scheme for derivative securities is that a person acquires an economic interest in the underlying security at the time the derivative security is acquired. The holder of a derivative security with a floating exercise price has limited economic interest and bears limited risk in a price fluctuation in the underlying security.[103] Therefore, holders of such securities would not be deemed to have purchased the underlying securities until the date of exercise.

3. Dispositions

a. *Determination of Profit.* The Commission proposed two alternative methods for determining the profit from transactions involving derivative securities. As a result of the comments, the Commission proposes to use a profit calculation based on an assumption that the insider purchased and sold the same security, but delete consideration of

---

[96] When the exercise price for a derivative security is less than the current market price of the underlying security, the derivative security is "in-the-money." If the exercise price and market price are the same, the derivative security is "at-the-money." If the exercise price is greater than the market price, the derivative security is "out-of-the-money."

[97] Factors such as interest rates and volatility of the underlying stock may affect the increase in value of the underlying stock and may also affect the increase in value of the option, but in-the-money options generally closely follow the price movements of the underlying stock. *See generally* J. Cox, S. Ross, & M. Rubinstein, "Option Pricing: A Simplified Approach," *Journal of Financial Economics*, 229–263 (Sept. 1979); M. Brennan & E. Schwartz, "The Valuation of American Put Options," *Journal of Finance*, 449–462 (May 1977).

factors such as interest rates and

issuer's securities.[104] The only change

rights to acquire the underlying security

subsequent prohibition on participation

"derivative security" and would not be

transaction would be reported on Form

factors such as interest rates and volatility of the underlying equity security. Such factors, although used by professional options traders in valuing standardized options, are likely to unduly confuse and complicate what otherwise should be a routine application. The revised proposed rule [104] would provide courts a choice between using the change in value of the underlying security or the change in value of one of the derivative securities involved in the transaction. The recovery, however, could not exceed the change in value of the underlying security.[105]

The Commission recognizes that problems could arise in determining profits involving different derivative securities if both securities did not exist as of the time of the relevant purchase and sale. Under these circumstances, profits would be calculated with reference to changes in the value of whichever derivative security existed at both points of the short-swing transaction. If neither derivative security existed at both points of the transaction, the court would look to the change in value of the underlying security.

The Commission also seeks comment as to whether it would be preferable to provide a specific formula that does not offer courts a choice between using changes in the value of two different derivative securities. In particular, one alternative might calculate profit as the greater change in value in the derivative securities bought and sold over the relevant time period, provided that the change in value does not exceed the change in value of the underlying security. A second alternative might calculate profit as the lesser change in value in the derivative securities bought and sold over the relevant time period, provided that the change in value does not exceed the change in value of the underlying security.

b. *Options in a Merger Context.* The current rules provide an exemption for dispositions of underlying stock acquired from an option exercise where the disposition is pursuant to a merger, consolidation, or reclassification of the issuer's securities.[106] The only change initially proposed was to narrow the exemption to options acquired under a plan satisfying Rule 16b–3.

Given the proposed exemption of all exercises of in-the-money and at-the-money options, insiders could exercise their options and deliver the underlying equity securities into the merger without creating a short-swing transaction; thus the Rule may no longer be necessary.[107] Its retention, rather than providing equal treatment for stock and options, may provide preferential treatment for option holders; stock acquired upon exercise of an option could be sold as part of a merger in an exempt manner, but other acquisitions of stock could not. The Commission has not proposed to change further Rule 16b–6(c), but requests comment as to whether it should be deleted.

4. Expirations

While the initial proposals addressed short-swing profits recoverable from an expiration of a short option position,[108] the expiration of a long option position was not addressed. The revised proposed rule would exempt dispositions by expiration of long derivative security positions, where no value is received from the expiration.[109] Expirations of short derivative security positions would not be exempted, since there is an opportunity for short-swing profit.[110]

D. Subscription Rights

The current rules [111] provide an exemption for sales of subscription rights to acquire the underlying security that meet four specified criteria: 1) the rights are acquired from the issuer without payment of consideration; 2) the rights expire within 45 days; 3) the rights are issued on a pro rata basis to all holders; and 4) the rights are registered under the Securities Act. This rule was not, and is not, proposed to be changed.[112]

Under the proposed scheme, a subscription right would be deemed a derivative security such that an acquisition of a subscription right could be matched with a sale of any equity security to find a short-swing transaction. As derivative securities, these rights could be exercised in an exempt manner, pursuant to revised proposed Rule 16b–6(b). While subscription rights are similar to issuer options, they generally are granted to a class of security holders, rather than a limited group of employees. Comment is solicited on whether the general nature of the distribution provides a sufficient safeguard against abuse that an exemption for all pro rata grants of subscription rights is not appropriate. Because this rule provides an exemption for the sale of a subscription right, rather than its acquisition, it would not prevent a grant of a subscription right from being matched with a prior sale, for short-swing profit liability. Comment is solicited whether there should be an exemption for acquisitions, rather than sales. Comment is requested further as to whether any special exemption for subscription rights is necessary.

V. Employee Benefit Plans

Both the current and proposed rules provide exemptions for specified transactions involving employee benefit plans. The Commission proposes revisions to the original proposals concerning employee benefit plans in order to remove the potential for an unwarranted chilling effect upon many benefit plans. The changes are described below.[113]

A. Disinterested Administration

Under the proposed rules, a disinterested administrator could not participate in any discretionary plan of the issuer for the year before the transaction and could not be eligible to participate in any discretionary plan for the three years subsequent to the transaction. Commenters indicated that a one year prior and one year

---

[104] Revised proposed Rule 16b–6(d). The revised rule is based upon the originally proposed Alternative A.

[105] For example, on April 1st an insider purchases a warrant for $2 with an exercise price of $10 a share and a market price of the underlying security of $9 per share. On May 1st, the insider sells an option for $2 with an exercise price of $15 a share while the underlying security was $15 per share. The warrant purchased on April 1st was selling for $9 on May 1st. Thus, the profit would appear to be $7 per share. However, the maximum recovery would be $6 per share (representing the change in the underlying stock).

[106] Current Rule 16b–6(c) (17 CFR 240.16b–6(c)); revised proposed Rule 16b–6(c).

[107] Under the current rules, if an insider exercises an option, it is considered a purchase. Thus, absent Rule 16b–6(c), option holders would be unable to deliver the underlying equity securities into the merger for six months, without becoming subject to Section 16(b) liability. This would no longer be true under the proposals.

[108] Proposed Rule 16b–6(e); revised proposed Rule 16b–6(e).

[109] For example, an insider purchases a call option with an exercise price of $20 per share. At expiration, the underlying stock is selling for $15 per share, rendering the option worthless. The disposition of the option at expiration would be deemed an exempt sale.

[110] For example, an insider sells short, or writes, a call option with an exercise price of $30 per share. The insider receives a $3 per share premium for the option. At expiration, the underlying stock is selling for $15 per share, rendering the option worthless. Since the holder will not exercise the option at expiration, the insider would profit $3 per share, the amount of the premium received. See revised proposed Rule 16b–6(e).

[111] Current Rule 16b–11 (17 CFR 240.16b–11).

[112] Revised proposed Rule 16b–2.

---

subsequent prohibition on participation in a discretionary plan should be a sufficient safeguard. The Commission has so revised the proposed rule.[114]

The proposed rules would have required a disinterested committee to exercise sole discretion in administering the plan. Commenters were concerned that the requirement might be interpreted to preclude other persons from performing ministerial functions such as bookkeeping. This was not intended and the revised proposed rule has been clarified.[115]

In response to comment received, the revised proposed rules would require all members of the committee to be disinterested, rather than a majority, and require that a committee be composed of at least two persons.[116]

In addition, the Commission has revised the proposed rules to permit interested directors to serve as administrators of plans that do not permit directors to participate. The current rule provides a similar opportunity but the proposed rules would have deleted it.[117] Different treatment for plans awarding securities to non-director officers is appropriate because there appears to be little opportunity for abuse where the participant has no ability to influence the administrator.

As an alternative to having a disinterested committee, the proposed rules provided that the disinterested administration requirement could be satisfied if insiders exercised no control or discretion in awarding securities under a plan where securities awards are determined automatically by application of a formula or standardized criteria,[118] but restricted formula amendments to once every six months. Commenters suggested that more amendments be permitted if made to comply with tax law changes and that job classifications and compensation levels be added to the list of standardized criteria. The revised proposed rule would incorporate each of these suggestions.[119]

B. Stock Appreciation Rights

Under the proposed rules, many SARs that can be settled in cash only would be excluded from the definition of "derivative security" and would not be viewed as equity securities.[120] Thus, they would be exempt from Section 16. SARs that are settled for stock would be treated as options. SARs that could have been settled in either cash or stock, but were settled in cash, would be treated as an exercise of an option and the simultaneous sale of the underlying stock.

Several commenters questioned the disparate treatment between SARs that may be settled in cash or stock and other forms of derivative securities. Under the proposed rules, SARs would have favored treatment over options because both the "purchase" at the time of exercise of the SAR and the "sale" upon receipt of cash would be exempt,[121] whereas a sale of stock received from an option exercise would not be exempt. A few commenters recommended that the distinction between the two be deleted.

The exemption for exercises in the proposed rules would resolve the concern that led to the Rule's adoption in 1976 [122] since the purchase portion of the constructive simultaneous purchase and sale upon exercise of SARs would be exempt so that long term profits would not be subject to short-swing profit recovery. Comment is solicited as to whether revised proposed Rule 16b–3(d) is unnecessary and therefore should be deleted.

C. Intra-plan Transactions

Many commenters were concerned that the proposed deletion of the intra-trust exemption for trusts holding less than 20 percent of the corpus [123] in issuer equity securities owned by insiders would have a chilling effect on the majority of tax qualified benefit plans. The revised proposed rules are intended to alleviate that concern by providing four limited exemptions suggested by commenters.[124] In each case, the insider's election to participate, the selection of an investment alternative and the intra-plan transaction would be exempt from Section 16(b). The election would not be reportable, but the intra-plan transaction would be reported on Form 5.

The first new proposal would exempt an irrevocable investment election made at least six months in advance of its effective date.[125] For example, an insider could elect within a thrift plan to move assets from a money market fund into company stock on March 1, if the "purchase" of company stock did not occur until September 1, at a price related to the market price on September 1. Thus, an insider would not be able to take advantage of inside information learned in February because the insider would be at market risk for six months. If the news were favorable, for example, it is assumed that the information would become public and the stock price would adjust accordingly in the ensuing six months. In this case, the election would not be the purchase or sale because no price was fixed. The purchase or sale would be deemed to occur on September 1, and would be reported accordingly.

The second new proposal would exempt investment elections, and the resulting transactions, made on specified dates that are at least six months apart.[126] For example, a plan could specify that participants could switch investment funds only on June 30th or December 31st. The participant could purchase or sell issuer securities on those dates in an exempt manner. Comment is requested, however, as to whether the alternative of using a pre-determined date or "window period" for conducting transactions would be an effective safeguard against abuse of inside information. Comment is requested also as to whether the specified date or "window period" is sufficient, in isolation, to warrant an exemption.[127] If pre-established dates for conducting transactions are a sufficient safeguard from abuse, comment is solicited as to whether this rule should adopt the same ten day "window period" approach of current Rule 16b–3(e).

The third new proposal would exempt elections by terminated or disabled employees to defer receipt of securities or cash from their plan account.[128] As

[114] Revised proposed Rule 16b–3(c)(2).

[115] Revised proposed Rule 16b–3(b)(1)(i).

[116] *Id.* Current Rule 26b–3(b) (17 CFR 240.26b 3(b)) requires a committee of three or more persons, all of whom must be disinterested.

[117] Current Rule 16b–3(b)(2) (17 CFR 240.16b–3(b)(2)) would be incorporated partially into revised proposed Rule 16b–3(b)(1)(i).

[118] This is similar to current Rule 16b–3(b)(1)(iii) (17 CFR 240.16b–3(b)(l)(iii)).

[119] Revised proposed Rule 16b–3(b)(1)(ii).

[120] Revised proposed Rule 16a–1(c)(3).

[121] Revised proposed Rule 16b–3(d).

[122] Current Rule 16b–3(e) (17 CFR 240.16b–3(e)). Exchange Act Release No. 13097 (December 22, 1976) (42 FR 754).

[123] Current Rule 16a–8(b).

[124] Revised proposed Rule 16b–3(e). Although the revised proposed exemptions would be placed in revised proposed Rule 16b–3, plans not satisfying the disinterested administration conditions of Rule 16b–3(b) would be eligible to use the exemptions as well. The plan, however, would have to satisfy the definition of "plan" in revised proposed Rule 16b–3(c)(1).

[125] Revised proposed Rule 16b–3(e)(1).

[126] Revised proposed Rule 16b 3(e)(2).

[127] Current Rule 16b–3(e)(3)(iii) (17 CFR 240.16b–3(e)(3)(iii)), revised proposed Rule 16b–3(d)(3), uses a ten day "window period" as one safeguard in providing a safe harbor for cash exercises of SARs. The rule, however, has other safeguards to protect against abuse, such as a reporting requirement for issuers, a six month holding period, and compliance with other provisions of Rule 16b–3.

[128] Revised proposed Rule 16b–3(e)(3). Similar elections are protected under the current Rule 20b–

should require that the plaintiff own

and reporting. Canadian issuers, unlike

VIII. Compliance With Section 16(a)

with the other intra-plan exemptions, the election would not be deemed a purchase or sale. Thus, for example, a retiring officer could elect to defer receipt of securities held by a retirement plan, or cash representing the value of the securities, without the election being deemed a purchase or sale until the securities or cash are received.[129] Many plans automatically distribute securities to participants upon termination, including retirement, while other plans may require terminated employees to sell their plan securities back to the issuer. Such automatic transactions might cause the terminated insider to engage inadvertently in a short-swing transaction. Under the revised proposal, an insider could defer the acquisition or sale to the issuer for six months to avoid a possible short-swing transaction. Comment is solicited on whether the revised proposal should exempt an insider's choice between stock or cash. Without an exemption, the receipt of cash would be treated as an exercise of an SAR.

The fourth new proposal would pertain to retirement and pension plans only and would exempt specifically a decision to participate or not participate in an on-going stock acquisition program, as well as the ultimate acquisition.[130] This exemption would be particularly advantageous to employees participating in an employee stock ownership plan ("ESOP" or "PAYSOP"). The exemption would require that the plan be open to all employees generally and that participants not be entitled to distributions until death, retirement, or termination unless the plan imposes significant penalties. This codifies current interpretive requirements.[131] In addition, the proposed rule would require that if participants cease participation, they may not elect to participate again for at least six months. This would limit the opportunity for abuse by limiting the ability to change their participation in a short term manner. Comment is solicited as to whether the rule also should require that an insider not cease participation for the six months after initiating participation and whether there should be dollar amount restrictions[132] upon a participant's decision to increase or decrease his or her contribution to the plan. Comment is solicited further on whether the restrictions on participation are sufficient safeguards against abuse.

D. Distributions

In response to commenter concerns, a new rule would exempt distributions from a plan where the acquisition of the securities distributed had been reported previously pursuant to Section 16(a).[133] Under the current rules, most intra-plan transactions are exempt from both reporting and short-swing liability. However, when securities are distributed from the plan, they are viewed as purchases by the participant.[134] While, under the current rules, most intra-plan transactions are not reportable, the proposed scheme would require reports for these transactions. Specified intra-plan transactions complying with revised proposed Rule 16b–3(e) would be reported annually on Form 5, while non-exempt transactions would be reported currently on Form 4. Thus, since the acquisition of the securities within a plan would have been reported previously, there would be merely a change in the form of ownership, rather than the substance of ownership.

The analysis is similar to that for derivative securities—just as an option holder has an indirect interest in the underlying security, insiders have indirect beneficial ownership of securities held in a plan. The distribution of securities from a plan is analogous to an exercise of an option in that the form of beneficial ownership is changed merely from an indirect to a direct interest. Distributions exempt pursuant to the revised proposed rule would be reported annually on Form 5.

This new rule, however, would not exempt distributions of securities that had not been reported prior to the distribution. For example, if an insider was the beneficiary of a trust where the trustee exercised investment discretion, the acquisition of stock without the prior approval of the insider beneficiary would be exempt from reporting and liability.[135] If the trustee were later to distribute the stock to the beneficiary, this would be a purchase by the insider, not eligible for exemption under revised proposed Rule 16b–3(f). The proposed scheme requires a predistribution reported purchase before the constructive purchase at distribution can be exempt. If a distribution is exempt because it represents merely a change in the form of ownership, from indirect to direct, there can be no exemption where an insider has not reported an indirect interest in the securities.

VI. Synopsis of Other Changes

Other changes are discussed in the order in which they would appear if the revised proposed amendments are adopted. Charts showing how the current rules would be restructured and comparing them to the revised proposed rules are included in Section X below.

A. Definition of Owner of any Security

For purposes of determining standing, the initial proposed rules defined "owner of any security of the issuer" as either a current beneficial owner of securities of the issuer at the time of filing the suit or a former beneficial owner who was compelled to dispose of the securities because of a business combination resulting in the issuer's becoming a non-public company. This was intended to address situations where the issuer becomes a subsidiary of another company, as well as situations involving leveraged buyouts and other forms of securities ownership redistribution.

In response to comment received, the Commission reproposes a more limited definition.[136] The revised proposed definition would extend standing only to former security holders who had filed suit before surrendering their securities. Comment is solicited whether a former security holder should be given a specified number of days after the merger, or after the filing of the Section 16(a) report disclosing the transaction, to institute suit (*e.g.*, 60 days). Comment is solicited further as to whether standing should be extended to security holders who have notified the issuer of a short-swing transaction, but are compelled to surrender their securities because of a business combination during the 60 days that the statute requires security holders to wait before instituting suit. To ensure that the plaintiff has a sufficient financial interest in the outcome to warrant an extension of standing, the Commission requests comment as to whether the rule should require that the plaintiff own securities of the surviving company.

B. Exemptive Rules under Section 16(b)

1. Bona Fide Gifts and Inheritance

The rules as originally proposed and as reproposed would exempt all acquisitions and dispositions as a result of bona fide gifts or the laws of descent because these transactions generally do not provide opportunities for speculative abuse.[137] One commenter was concerned that gifts to family members not sharing the same residence may provide opportunities for abuse.[138] While the rule is reproposed without change, comment is solicited as to whether the exemption should be narrowed to cover only gifts to parties other than immediate family members or only gifts to charitable institutions.

2. Exemption of Issuer Redemptions

The Commission proposes to revise the language in the current rule, without any substantive change, to clarify the limited circumstances where the exemption for issuer redemptions is available.[139] Comment is requested on whether this rule is a useful exemption or should be deleted.

3. Stock Splits and Stock Dividends

The original proposals specified that pro rata stock splits and stock dividends were exempt generally from Section 16(b), and therefore eligible for reporting on Form 5.[140] However, no rule was proposed explicitly exempting these transactions. The Commission is persuaded by the commenters' suggestions that an exemptive rule would be preferable. Accordingly, a new rule would exempt stock splits and stock dividends relating to the issuer's securities that are applicable to all holders of the class of equity securities.[141] Moreover, the Commission requests comment as to whether pro rata stock splits and dividends should be exempt from the reporting requirements as well.

4. *Canadian Issuers*

Under current rules, Canadian issuers are treated differently from all other foreign private issuers under the Exchange Act, principally with respect to use of Form 20–F [142] for registration and reporting. Canadian issuers, unlike other foreign issuers, currently are able to use Form 20–F only for registration and reporting obligations pursuant to Section 12(g) of the Exchange Act.[143] Securities of foreign issuers eligible to use Form 20–F are exempt from Section 16 of the Exchange Act.[144]

The Commission sees little reason to single out Canadian issuers for application of Section 16, and therefore proposes to provide an exemption from reporting, short-swing liability, and the short sale prohibition of Section 16(c)[145] for all insiders of Canadian issuers, not just those reporting because of Section 12(g) registration.[146]

VII. Revisions to Forms 3 and 4

Several commenters complained that the printing and spaces on the forms were too small. They suggested a series of two page forms so that insiders would have sufficient space for disclosures. In response, the Commission proposes non-substantive changes to Forms 3 and 4, as well as proposed Form 5, to improve the format. The instructions to the Forms also would be revised for clarity and consistency.

Persons have inquired of the staff whether a computer-generated form substantially identical to the Commission's printed form would be acceptable. The Commission would have no objection if the generated forms are substantially identical, printed on 8½"x11" paper and manually signed.[147]

The Commission proposes to amend Instruction 1(b) to Form 3 to achieve greater conformity with the statutory language of Section 16(a). Instruction 1(b) would be revised to make it clear that insiders of a new Section 12 registrant do not have ten days after effectiveness to file, but must file on or before effectiveness of the registration statement.

VIII. Compliance With Section 16(a)

A. Lack of Compliance with Section 16(a)

As stated in the 1988 Release, the Commission is concerned about the widespread lack of compliance with the reporting requirements under Section 16(a).[148] In response to the problem, the Commission proposed a four-part response: (1) Simplifying the reporting provisions to focus on timely reporting of those securities transactions that are more discretionary in nature and present a greater opportunity for abuse; (2) providing for annual reporting on Form 5 by insiders of their securities ownership and previously unreported transactions; (3) requiring annual disclosure by companies pursuant to proposed Item 405 of Regulation S–K regarding insiders who have failed to comply timely with the filing requirements within the past year; and (4) supporting legislation to provide fining authority for violations of Section 16(a).[149]

The Commission is particularly disappointed to find that notwithstanding the publicity and concerns expressed about the substantial delinquency in filings, there has not been a substantial improvement in compliance. In a recent study, the Commission found 36.7 percent of the transactions reported in calendar year 1988 were reported more than three days late. As of June 10, 1989, the delinquency rate was 34.7 percent for transactions reported in the first five months of 1989. This reinforces the Commission's conclusion that the proposed proxy disclosure and fines are necessary.

B. Revised Disclosure Requirements

The Commission is substantially revising proposed Item 405 of Regulation S–K. The Item would: (1) Make it clear that the disclosure requirements extend to any person who was an insider at any time during the issuer's fiscal year; (2) require separate disclosure of transactions reported late, forms filed late and failures to file; (3) provide that forms delivered to the issuer within three calendar days would be presumed timely filed for purposes of the disclosure requirement; and (4) provide

---

3(d)(2) definition of "exercise of an option." Given the proposed treatment of option exercises and revised proposed Rule 16b–3(e), the definition would not be needed.

[129] This would be in accord with present staff interpretation. *See, e.g., TCI International, Inc.* (April 5, 1989) (exemption for election by participant to receive cash distribution of ESOP account at termination).

[130] Revised proposed Rule 16b–3(e)(4) would replace current Rule 16a–8(g)(3) (17 CFR 240.16a–8(g)(3)). Rule 16a–8(g)(3) was included in the 1988 proposals as Rule 16a–5(d)(2)(iii). As a result of the move from the Section 16(a) rules to the Section 16(b) rules, transactions exempted by this provision would have to be reported on Form 5.

[131] Current Rule 16a–8(g)(3); Release No. 18114 Q.71.

[132] For example, the Rule could provide a $10,000 limit on the amount of change per month, or require that no increase or decrease in participation shall exceed 50 percent of the current contribution.

[133] Revised proposed Rule 16b–3(f).

[134] *See* Release No. 18114 Q.64.

[135] Revised proposed Rule 16a–8(d)(1).

[136] Revised proposed Rule 16a–1(b).

[137] Revised proposed Rule 16b–5.

[138] Gifts to members of the immediate family sharing the same residence would be attributed back to the insider donor pursuant to revised proposed Rule 16a–1(a)(2)(ii)(A); thus no change in beneficial ownership would occur.

[139] Current Rule 16b–6 (17 CFR 240.16b–6); revised proposed Rule 16b–4.

[140] *See* 1988 Release, n.93 (53 FR 50005).

[141] Revised proposed Rule 16b–10.

[142] 17 CFR 249.220f.

[143] 15 U.S.C. 78*l*(g) (1982).

[144] Rule 3a12–3(b) (17 CFR 240.3a12–3(b)).

[145] Revised proposed Rule 16a–10.

[146] Insiders of Canadian issuers have reporting requirements similar to those imposed by Section 16(a). It should be noted that the Commission's proposal concerning multi-jurisdictional disclosure would provide that insiders of Canadian issuers need comply only with Canadian reporting requirements. *See* Exchange Act Release No. 27055 (July 6, 1989) (54 FR 32226). If the revised proposed exemption in this release is adopted, the proposal contained in the multi-jurisdictional release would be unnecessary.

[147] The Commission ultimately expects these forms to be filed in electronic format after implementation of its operational EDGAR system ("Electronic Data Gathering, Analysis and Retrieval").

[148] A Commission study found that over 40 percent of all transactions required to be reported during 1986–88 were filed more than three days late. *See* Release No. 26333, Section VIII.A. at 107–108 (53 FR 50017).

[149] *See* "Securities Law Enforcement Remedies Act of 1989," S. 647 and H.R. 975. This legislation would, *inter alia*, provide the Commission with fining authority for violations of section 16(a).

a safe harbor for issuers with respect to disclosure of insiders not filing a Form 5. An issuer would not be required to disclose the name of an insider failing to file a Form 5 where the issuer obtains a written representation form the insider that no Form 5 filing is required if the representation is retained for two years.[150] Comment is requested whether proxy statements or other filings containing disclosure of delinquent filers should reflect on the cover page or in the transmittal letter filed with the Commission that the document contains such disclosure.

IX. Transition to New System

If the revised proposed rules are adopted, provisions for a transition from the current rules to the revised proposed rules appear necessary in the areas of: (1) new reporting persons; (2) reporting of, and exemptions for, transactions involving derivative securities: (3) transactions exempt under current Rule 16b–3 and/or other current rules involving employee benefit plans; and (4) disclosure under revised proposed Item 405 of Regulation S–K.

Those who become reporting persons as a result of the new rules would be required to file a Form 3 on or before the effective date of the rules. To provide sufficient preparation time, the Commission would make the rules effective 45 days after adoption.

Derivative securities acquired prior to the effective date of the revised proposed rules would be subject to a special transition framework regarding reporting and liability. An insider would have to report beneficial ownership of these securities on the first Form 4 or Form 5 otherwise required to be filed after the effective date. These derivative securities would not be eligible for the exemptions provided by revised proposed Rule 16b–6 unless held at least six months, and either previously reported as owned or shown as disposed of in reporting the transaction for which the revised proposed Rule 16b–6 exemption is intended.

The Commission believes that registrants should have a reasonable opportunity to effect an orderly transition to the proposed regulatory scheme for employee benefit plans. Accordingly, there would be a 16-month phase-in period for employee benefit plans, during which time exemptions under the current rules would continue to be available. This period should provide registrants sufficient time to restructure their plans to take advantage of any available exemptions under the revised proposed rules an, if necessary, to seek shareholder approval at an annual meeting.

Disclosure of delinquent filings under revised proposed Item 405 of Regulation S–K would be required in proxy and information statements, Form 10–K and N–SAR reports for fiscal years ending more than six months after the effective date of the revised proposed rules. The disclosure would be required based on reports filed for the portion of the fiscal year after the effective date when insiders would be required to furnish copies of their filings to the issuer.

X. Charts Comparing Current and Revised Proposed Rules

A. The following chart lists the current rules and the corresponding revised proposed rules and indicates which rules would be changed substantively or reorganized. The proposed rule number in the original proposal is indicated in brackets where it differs from the revised proposed rule number.

Current Rule	Content	Revised Proposed Rule	Substantive Changes
12h–2	Offerings before 1967.	Deleted	Yes.

XI. Request for Comment

Any interested person wishing to submit written comments on: the proposed amendments and additions to Rules 16a–1 through 16c–3, Schedule 14A, Forms 10–K, 3 and 4; the addition of new Rule 16c–4, 16d–1 and new Form 5; the deletion of Rule 12h–2 under the Exchange Act; the addition of new Item 405 to Regulations S–K; and the proposed amendments to Rule 30f–1 and Form N–SAR under the Investment Company Act; as well as on other matters that might have an impact on the proposals contained herein, is requested to do so. In addition, the Commission requests comments on whether any further changes to the Section 16 rules are necessary or appropriate at this time. The Commission also requests comment on whether the proposed rules, if adopted, would have an adverse effect on competition that is neither necessary nor appropriate in furthering the purposes of the Exchange Act, Investment Company Act, or Public Utility Holding Company Act. Comments on this inquiry will be considered by the Commission in complying with its responsibilities under Section 23(a) of the Exchange Act.[151]

XII. Cost-Benefit Analysis

As in the 1988 Release, the Commission invites commenters to provide views and data as to the costs and benefits associated with the revised proposed rules. It appears to the Commission that the revised proposals

---

BEST COPY AVAILABLE

would result in further savings by: (1) exempting them from all or part of the Authority: Secs. 6, 7, 8, 10, 19(a), 48 Stat. 78,

representations, a copy of which shall definition of "beneficial owner" in paragraph (E) A person's proportional interest as would result in further savings by: (1) Requiring Form 5 filings from only those insiders conducting transactions reportable on Form 5; (2) removing the certification of compliance requirement of Form 5; (3) creating a de minimis three calendar day exemption from proxy disclosure of late filings; (4) providing an exemption for Schedule 13G Institutions from the ten percent holder determination; (5) expanding the exclusion for cash-only derivative securities; (6) specifically exempting stock splits and stock dividends; and (7) exempting insiders of Canadian issuers from Section 16.

The revised proposals may increase reporting, recordkeeping, and compliance requirements by: adding principal financial officers, controllers or principal accounting officers, and officers of a parent to the definition of "officer."

XIII. Summary of Initial Regulatory Flexibility Analysis

An Initial Regulatory Flexibility Analysis in accordance with 5 U.S.C. 603 has been prepared concerning the revised proposed amendments to Rules 16a–1 through 16c–3, Schedule 14A, Forms 10–K, 3 and 4; the addition of new Rules 16c–4, 16d–1, and a new Form 5; the deletion of Rule 12h–2 under the Exchange Act; as well as the addition of a new Item 405 to Regulation S–K. Also a subject of this analysis are revised proposed amendments to Rule 30f–1 and Form N–SAR under the Investment Company Act. The analysis notes that the revised proposed amendments are intended to help assure that persons meet their reporting obligations, assist the fair and effective operation of Section 16(b) by limiting the opportunities for abuse, and remove transactions that do not involve the potential for abuse from the scope of the rules. As discussed more fully in the analysis, many of the reporting persons that the revised proposed amendments would affect are small businesses or organizations, as defined by the Commission's rules.

It is expected that the overall effect of the proposed amendments would be to decrease significantly the impact of reporting, recordkeeping, and compliance requirements upon reporting persons subject to Section 16, although certain of the proposed amendments may increase such requirements, as noted in the analysis.

The analysis discusses several possible significant alternatives to the proposed amendments including, among others, establishing different compliance or reporting requirements for small businesses and organizations or exempting them from all or part of the proposed requirements. As discussed more fully in the analysis, implementing any of these alternatives either would be duplicative of the revised proposed amendments or would not be consistent with the Exchange Act, Investment Company Act, or Public Utility Holding Company Act.

Comments are encouraged on any aspect of the analysis. A copy of the analysis may be obtained by contacting Brian J. Lane or Brian J. Lynch, Office of Disclosure Policy, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

XIII. Statutory Basis

The amendments to the proxy rules, Form 10–K, Regulation S–K, and the Section 16 rules are being proposed by the Commission pursuant to Exchange Act Sections 3(a)(11),[152] 3(b),[153] 9(b),[154] 10(a),[155] 12(h),[156] 13(a),[157] 14,[158] 16, and 23(a). The amendments to Form N–SAR and Rule 30(f) are being proposed pursuant to Investment Company Act Sections 30 and 38.[159] As the Section 16 rules relate to the Investment Company Act and the Public Utility Holding Company Act, they are proposed pursuant to Investment Company Act Sections 30 and 38, and Public Utility Holding Company Act of 1935 Sections 17[160] and 20,[161] respectively.

Reporting and recordkeeping requirements, and securities.

XIV. Text of Proposals

In accordance with the foregoing, Title 17, Chapter II of the Code of Federal Regulations is proposed to be amended as follows:

PART 229—STANDARD INSTRUCTIONS FOR FILING FORMS UNDER SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934 AND ENERGY POLICY AND CONSERVATION ACT OF 1975—REGULATION S–K

1. The authority citation for Part 229 continues to read as follows:

Authority: Secs. 6, 7, 8, 10, 19(a), 48 Stat. 78, 79, 81, 85; secs. 12, 13, 14, 15(d), 23(a), 48 Stat. 892, 894, 901; secs. 205, 209, 48 Stat. 906, 908; sec 203(a), 49 Stat. 704; secs. 1, 3, 8, 49 Stat. 1375, 1377, 1379; sec. 301, 54 Stat. 857; secs. 8, 202, 68 Stat. 685, 686; secs. 3, 4, 5, 6, 78 Stat. 565–568, 569, 570–574; sec. 1, 79 Stat. 1051; secs. 1, 2, 3, 82 Stat. 454, 455; secs. 1, 2, 3–5, 28(c), 84 Stat. 1435, 1497; sec. 105(b), 88 Stat. 1503; secs. 8, 9, 10, 11, 18, 89 Stat. 117, 118, 119, 155; 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a), 78l, 78m, 78n, 78o(d), 78w(a), unless otherwise noted.

2. § 229.405 is added to Subpart § 229.400 to read as follows:

§ 229.405 (Item 405) Compliance with Section 16(a) of the Exchange Act.

Every registrant having a class of equity securities registered pursuant to Section 12 of the Exchange Act (15 U.S.C. 78*l*), every closed-end investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a—1 *et seq.*) and every holding company registered pursuant to the Public Utility Holding Company Act of 1935 (15 U.S.C. 79a *et seq.*) shall:

(a) Describe briefly its procedures for assisting directors, officers, beneficial owners of more than ten percent of any class of equity securities of the registrant, and any other person subject to Section 16 of the Exchange Act because of the requirements of Section 30 of the Investment Company Act or of Section 17 of the Public Utility Holding Company Act ("reporting persons"), in complying with Section 16(a) of the Exchange Act; and

(b) Based upon a review of Forms 3 and 4 furnished to the registrant during and with respect to its most recent fiscal year and Forms 5 furnished to the registrant with respect to its most recent fiscal year, disclose the following:

(1) Identify each person who was a reporting person at any time during the fiscal year and failed to file on a timely basis reports required by Section 16(a) of the Exchange Act during that fiscal year or prior fiscal years.

(2) For each such person, set forth the number of late reports, the number of transactions that were not reported on a timely basis, and the failure to file any required Section 16(a) report.

(c) With respect to the disclosure required by paragraph (b) of this Item:

(1) A form received by the registrant within three calendar days of the required filing date may be presumed to have been filed with the Commission by the required filing date.

(2) The registrant may rely on a written representation from the reporting person that no Form 5 is required if the registrant maintains for two years a file of such written representations, a copy of which shall be made available to the Commission or its staff upon request.

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for Part 240 continues to read:

Authority: Sec. 23, 48 Stat. 901, as amended (15 U.S.C. 78w).

§ 240.12h—2 [Removed]

2. Section 240.12h–2 is removed.

3. By revising Item 7(b) of § 240.14a–101 to read as follows:

§ 240.14a–101 Schedule 14A. Information required in proxy statement.

* * * * *

Item 7. Directors and executive officers.

* * * * *

(b) The information required by Items 401, 404(a) and (c), and 405 of Regulation S–K (§ 229.401, § 229.404 and § 229.405 of this chapter).

* * * * *

4. Sections 240.16a–1 through 240.16a–10 are revised and § 240.16a–11 is removed, and the undesignated center heading preceding them is republished to read as follows:

Reports of Directors, Officers, and Principal Shareholders

§ 240.16a–1 Definition of terms.

Terms defined in this Rule shall apply solely to Section 16 of the Act and the rules thereunder. These terms shall not be limited to Section 16(a) but shall apply to all subsections under Section 16.

(a) The term "beneficial owner" shall have the following applications:

(1) Solely for purposes of determining whether a person is a beneficial owner of more than ten percent of any class of equity securities registered pursuant to Section 12 of the Act, the term "beneficial owner" shall mean any person who is deemed a beneficial owner pursuant to the rules under Section 13(d) of the Act; *provided, however*, that an institution eligible to file a Schedule 13G (§ 240.13d–102) pursuant to § 240.13d–1(b)(1) with respect to a class of equity securities is not deemed the beneficial owner of securities of such class that are held in fiduciary accounts.

Note: Pursuant to this Rule, a person deemed a beneficial owner of more than ten percent of any class of equity securities registered under Section 12 of the Act would file a Form 3, but the securities holdings disclosed on Form 3, and changes in beneficial ownership reported on subsequent Forms 4 or 5, would be determined by the definition of "beneficial owner" in paragraph (a)(2) of this Rule.

(2) Other than for purposes of determining whether a person is a beneficial owner of more than ten percent of any class of equity securities registered under Section 12 of the Act, the term "beneficial owner" shall mean any person who, directly or indirectly, through any contract, arrangement, understanding, relationship or otherwise, has or shares a direct or indirect pecuniary interest in the equity securities, subject to the following:

(i) The term "pecuniary interest" in any class of equity securities shall mean the opportunity, directly or indirectly, to profit or share in any profit derived from a transaction in the subject securities.

(ii) The term "indirect pecuniary interest" in any class of equity securities shall include, but not be limited to:

(A) Securities held by members of a person's immediate family sharing the same household; *provided, however*, that the presumption of such beneficial ownership may be rebutted.

(B) A general partner's proportional interest in the portfolio securities held by a general or limited partnership. The general partner's proportional interest shall be the greater of:

(*1*) The general partner's share of the partnership's profits, including profits attributed to any limited partnership interests held by the general partner and any other interests in profits that arise from the purchase and sale of the partnership's portfolio securities; or

(*2*) The general partner's share of the partnership capital account, including the share attributable to any limited partnership interest held by the general partner.

(C) A fee received by any broker, dealer, bank, insurance company, investment company, investment adviser, investment manager, trustee or person or entity performing a similar function; *provided, however*, that no pecuniary interest shall be present where:

(*1*) The fee is based upon the gains from a portfolio if the amount of the fee is calculated based upon net capital gains and/or net capital appreciation generated from the portfolio or from the fiduciary's overall performance over a period of one year or more; and

(*2*) Equity securities of the issuer do not account for more than ten percent of the portfolio;

(D) A person's right to dividends separated from the underlying securities that is a separate security or trades separately. Otherwise, a right to dividends alone shall not represent a pecuniary interest in the securities;

(E) A person's proportional interest as beneficiary or settlor in the securities of a trust, as specified in § 240.16a–8; and

(F) A person's right to acquire equity securities through the exercise or conversion of any derivative security, whether or not presently exercisable.

(iii) A pecuniary interest shall not include a person's proportional interest in the portfolio securities held by a corporation in which the person owns securities, if:

(A) The corporation is subject to the reporting requirements of Section 13 or 15(d) of the Act as a result of registration of equity securities under the Securities Act of 1933 or Section 12 of the Act; or

(B) The person is not a control person of the corporation and does not have or share voting or investment power over that corporation's portfolio.

(iv) For purposes of this Rule, the term "portfolio securities" shall mean all securities owned by an entity other than securities of the entity.

(*3*) Where more than one person subject to Section 16 is deemed to be a beneficial owner of the same equity securities, all such persons must report as beneficial owners of the securities. In such cases, the amount of short-swing profit recoverable shall not be increased above the amount recoverable if there were only one beneficial owner.

(*4*) Any person filing a statement pursuant to Section 16(a) of the Act may state that the filing shall not be construed as an admission that such person is, for purposes of Section 16 of the Act, the beneficial owner of any equity securities covered by the statement, unless beneficial ownership is mandated by a rule under Section 16 of the Act. A person may rebut the presumption of beneficial ownership under § 240.16a–1(a)(2)(ii)(A).

(*5*) The following interests are deemed not to confer beneficial ownership for purposes of Section 16 of the Act:

(i) The remainder interest of a trust, provided that the person with the remainder interest has no power, directly or indirectly, to make purchase or sale decisions for the trust;

(ii) Interests in portfolio securities held by any holding company registered under the Public Utility Holding Company Act of 1935 (15 U.S.C. 79a *et seq.*); and

(iii) Interests in portfolio securities held by any investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*).

(b) The term "call equivalent position" shall mean a derivative security position that increases in value as the value of the underlying equity increases, including, but not limited to, a long convertible security, a long call option, and a short put option position.

(c) The term "derivative securities" shall mean any option, warrant, convertible security, stock appreciation right, or other similar right related to an equity security, but shall not include:

(1) The right of a pledgee of securities to sell the pledged securities;

(2) The right of all security holders of an issuer to receive securities pro rata, or the obligation to dispose of securities, as a result of a merger, exchange offer, or consolidation involving the issuer of the securities;

(3) Securities that either are awarded pursuant to an employee benefit plan satisfying the provisions of § 240.16b-3(b) or contain a fixed date of redemption at least six months after award, which can be exercised only for cash and permit no discretion to receive an equity security in lieu of cash; or

(4) Broad-based index options and broad-based index futures.

(d) The term "equity security of such issuer" shall mean any equity security or derivative security of or relating to an issuer, whether or not issued by that issuer.

(e) The term "immediate family" shall mean any child, stepchild, grandchild, parent, stepparent, grandparent, spouse, sibling, mother-in-law, father-in-law, son-in-law, daughter-in-law, brother-in-law, or sister-in-law, and shall include adoptive relationships.

(f) The term "officer" shall mean an issuer's president, principal financial officer, controller or principal accounting officer, any vice-president of the issuer in charge of a principal business unit, division or function (such as sales, administration or finance), any other officer who performs a policy-making function or any other person who performs similar policy-making functions for the issuer. Officers of the issuer's parent(s) or subsidiaries shall be deemed officers of the issuer if they perform such policy-making functions for the issuer. In addition, when the issuer is a limited partnership, officers or employees of the general partner(s) who perform policy-making functions for the limited partnership are deemed officers of the limited partnership.

(g) The term "owner of any security of the issuer" for purposes of Section 16(b) of the Act shall mean a beneficial owner of securities of the issuer at the time of filing a lawsuit under Section 16(b) of the Act. If as a result of a business combination of the issuer, a beneficial owner of any security of the issuer is required to surrender the securities due to such business combination, such person shall continue to be deemed a beneficial owner until resolution of the lawsuit if the suit was filed prior to the surrender of securities.

(h) The term "put equivalent position" shall mean a derivative security position that increases in value as the value of the underlying equity decreases, including, but not limited to, a long put option and a short call option position.

§ 240.16a-2 Persons and transactions subject to Section 16.

All directors, officers, and persons who are the beneficial owners of more than ten percent of any class of equity securities ("ten percent beneficial owner") registered pursuant to Section 12 of the Act shall be subject to the provisions of Section 16, subject to the following:

(a) Transactions conducted by a director or officer in the six months prior to the first transaction requiring the filing of a Form 4 (§ 249.104) shall be listed on such Form 4 and shall be subject to Section 16 of the Act only if the director or officer became subject to Section 16 solely as a result of the issuer registering a class of equity securities pursuant to Section 12 of the Act.

(b) Transactions conducted by a person who was a director or officer within six months after ceasing to be a director or officer shall be subject to Section 16 of the Act; *provided, however,* that no Form 4 need be filed for a transaction occurring at least six months after the latest transaction giving rise to a Form 4 filing requirement.

(c) The transaction that results in a person becoming a ten percent beneficial owner is not subject to Section 16 of the Act unless the person otherwise is subject to Section 16. A ten percent beneficial owner not otherwise subject to Section 16 must report only those transactions conducted while the beneficial owner of more than ten percent of a class of equity securities of the issuer registered pursuant to Section 12 of the Act.

(d) A fiduciary is exempt from the provisions of Section 16(a) under the Act for the 12 months following appointment and qualification, to the extent the fiduciary is acting as:

(1) Executor or administrator of the estate of a decedent;

(2) Guardian or member of a committee for an incompetent; or

(3) Receiver, trustee in bankruptcy, assignee for the benefit of creditors, conservator, liquidating agent, or other similar person duly authorized by law to administer the estate or assets of another person.

(e) After the 12 month period following appointment or qualification, a fiduciary previously exempt pursuant to paragraph (d) of this section shall become subject to Section 16 only where the estate or trust is a beneficial owner of more than ten percent of any class of equity security registered pursuant to Section 12 of the Act, or the fiduciary is otherwise subject to Section 16 of the Act.

§ 240.16a-3 Reporting transactions and holdings.

(a) Initial statements of beneficial ownership of equity securities required by Section 16(a) of the Act shall be filed on Form 3 (§ 249.103). Statements of changes in beneficial ownership required by that Section shall be filed on Form 4 (§ 249.104). Annual statements shall be filed on Form 5 (§ 249.105). All such statements shall be prepared and filed in accordance with the requirements of the applicable form.

(b) A person filing statements pursuant to Section 16(a) of the Act with respect to any class of equity securities registered pursuant to Section 12 of the Act need not file an additional statement on Form 3 (§ 249.103):

(1) When an additional class of equity securities of the same issuer becomes registered pursuant to section 12 of the Act; or

(2) When such person assumes a different or an additional relationship to the same issuer (for example, when an officer becomes a director).

(c) Any issuer that has equity securities listed on more than one national securities exchange may designate one such exchange as the only exchange with which reports pursuant to section 16(a) of the Act need be filed. Such designation shall be made in writing and shall be filed with the Commission and with each national securities exchange on which any equity security of the issuer is listed. The obligation to file with each national securities exchange on which any equity security of the issuer is listed shall be satisfied by filing with the designated exchange.

(d) Any person required to file a statement with respect to securities of a single issuer under both section 16(a) of the Act and either section 17(a) of the Public Utility Holding Company Act of 1935 or section 30(f) of the Investment Company Act of 1940 may file a single statement containing the required information, which will be deemed to be filed under both Acts.

(e) Any person required to file a statement under section 16(a) shall, not later than the time the statement is transmitted for filing, send or deliver a duplicate to the issuer's corporate secretary or other person designated by the issuer.

(f) A Form 5 shall be filed by every person who at any time during the fiscal year was subject to Section 16. The Form shall be filed within 45 days after the issuer's fiscal year end; *provided, however,* that no Form 5 shall be required where:

(1) There have been no transactions conducted that are required to be reported on Form 5; and

(2) All transactions and holdings that previously were required to be reported on Form 3, 4, or 5 have been reported as of the due date of the Form 5.

(g) All transactions shall be reported on Form 4, except that the following transactions shall be reported on Form 5:

(1) Small acquisitions as specified in § 240.16a-6(a) during the fiscal year, unless previously reported on Form 4;

(2) All transactions conducted during the fiscal year that were exempted by operation of any rule pursuant to section 16(b) of the Act, other than exercises and conversions of derivative securities exempted pursuant to § 240.16b-6(b), which shall be reported as specified in § 240.16a-4 (b) and (c); and

(3) Any occurrence or transaction during or prior to the fiscal year required to be reported on Form 3, 4, or 5 under section 16(a) of the Act that has not been reported as of the date by which the Form 5 is filed: *Provided, however,* That the required Form 3, 4, or 5 shall be appended to the Form 5.

§ 240.16a-4 Derivative securities.

(a) For purposes of section 16 of the Act, both derivative securities and the underlying securities to which they relate shall be deemed to be the same class of equity securities, except that they shall be reported separately.

(b) The exercise or conversion of a call equivalent position shall be reported on the next report, either Form 4 or 5, otherwise required after the date of exercise and shall be treated for reporting purposes as:

(1) A purchase of the underlying security; and

(2) A closing of the derivative security position.

(c) The exercise of a put equivalent position shall be reported on the next report, either Form 4 or 5, otherwise required after the date of exercise and shall be treated for reporting purposes as:

(1) A sale of the underlying security; and

(2) A closing of the derivative security position.

(d) If the next report otherwise required is due within fewer than ten days after an exercise or conversion, the exercise or conversion may be reported on the following required report.

Note: Under § 240.16b-6(b), a purchase or sale resulting from an exercise or conversion of a derivative security generally is exempt from section 16(b) of the Act.

§ 240.16a-5 Odd-lot dealers.

Securities purchased or sold by an odd-lot dealer in odd-lots as reasonably necessary to carry on odd-lot transactions, or in round lots to offset odd-lot transactions previously or simultaneously executed or reasonably anticipated in the usual course of business, shall be exempt from the provisions of section 16(a) of the Act with respect to participation by such odd-lot dealer in such transaction.

§ 240.16a-6 Small acquisitions.

(a) Any acquisition that does not exceed $10,000 in market value shall be reported on the next report otherwise required, either Form 4 or 5, subject to the following conditions:

(1) Total acquisitions of securities of the same class (including securities underlying derivative securities) within the prior six months do not exceed $10,000 in market value; and

(2) The person effecting the acquisition does not within six months thereafter effect any disposition, other than by a transaction exempt from section 16(b) of the Act.

(b) Should an acquisition no longer qualify for the reporting deferral in paragraph (a) of this section, all such acquisitions that have not yet been reported shall be reported on a Form 4 within ten days after the close of the calendar month in which the conditions of paragraph (a) of this section are no longer met.

(c) If the next report otherwise required is due within fewer than ten days after an acquisition subject to the Rule, the acquisition may be reported on the following required report.

§ 240.16a-7 Transactions effected in connection with a distribution.

(a) Any purchase and sale, or sale and purchase, of a security that is effected in connection with the distribution of a substantial block of securities shall be exempt from the provisions of section 16(a) of the Act, to the extent specified in this Rule, as not comprehended within the purposes of that section, subject to the following conditions:

(1) The person effecting the transaction is engaged in the business of distributing securities and is participating in good faith, in the ordinary course of such business, in the distribution of such block of securities; and

(2) The security involved in the transaction is:

(i) Part of such block of securities and is acquired by the person effecting the transaction, with a view to distribution thereof, from the issuer or other person on whose behalf such securities are being distributed or from a person who is participating in good faith in the distribution of such block of securities; or

(ii) A security purchased in good faith by or for the account of the person effecting the transaction for the purpose of stabilizing the market price of securities of the class being distributed or to cover an over-allotment or other short position created in connection with such distribution.

(b) Each person participating in the transaction must qualify on an individual basis for an exemption pursuant to this Rule.

§ 240.16a-8 Trusts.

(a) In the event that more than ten percent of any class of equity securities registered pursuant to Section 12 of the Act is held in a trust, both the trust and the trustee shall be subject to Section 16 of the Act. The trustee shall report on behalf of the trust. All transactions conducted by the trustee on its own behalf, rather than on behalf of the trust, shall be subject to Section 16 of the Act, and shall be separately reported by the trustee.

(b) In the event that a trustee is a person otherwise required to file reports with respect to securities of that issuer pursuant to § 240.16a-2, the trustee shall report separately on behalf of each trust in which the trustee exercises investment decision-making authority, and each such trust shall be subject to Section 16 of the Act: *Provided, however,* That this paragraph (b) shall not apply to an institution that in the ordinary course of business acts as trustee and is eligible to file a Schedule 13G (§ 240.13d-102) pursuant to § 240.13d-1(b)(1) with respect to that class of securities.

(c) In the event that either of the following conditions is met, beneficial ownership of the trust holdings will be attributable to a person specified in § 240.16a-2 instead of the trust:

(1) If a person specified in § 240.16a-2 is the trustee and at least one beneficiary of the trust is a member of the trustee's immediate family, all transactions of the trust will be attributed to the trustee and the trustee shall report all such transactions as

transactions of the trustee rather than as transactions of the trust.

(2) If a person specified in § 240.16a–2 is the beneficial owner of the securities as settlor of a trust and has the power to revoke the trust without obtaining the consent of the beneficiaries, all transactions of the trust will be attributed to the settlor and the settlor shall report the transactions of the trust as transactions of the settlor. These transactions need not be reported by the trustee.

(d) Trust transactions shall be attributable to the following parties, who will be required to report them, if subject to section 16(a) of the Act with respect to that issuer:

(1) Settlors as specified in paragraph (c)(2) of this section, and beneficiaries, in proportion to the beneficiary's pecuniary interest, unless the transaction was made without prior approval or direction of the settlor or the beneficiary; and

(2) The trust, unless the transaction was made at the direction of the settlor or beneficiary, or in a trust as specified in paragraph (c)(2) of this section.

(e) If a trust or other person becomes a reporting person pursuant to this Rule, it shall likewise be subject to Sections 16 (b) and (c) of the Act.

§ 240.16a–9 Exemptions under section 16(a).

Except as provided in § 240.16a–6, any transaction that has been or shall be exempted from the requirements of Section 16(a) of the Act shall, insofar as it is otherwise subject to the provisions of Section 16(b) of the Act, be likewise exempted from Section 16(b) of the Act.

§ 240.16a–10 Exemption for reporting persons of a Canadian issuer.

Securities transactions by reporting persons of a Canadian issuer with a class of equity securities registered under Section 12 of the Act shall be exempt from Section 16 of the Act.

5. Sections 240.16b–1 through 240.16b–10 are revised, § 240.16b–11 is removed, and the undesignated center heading preceding them is republished, as follows:

Exemption of Certain Transactions from Section 16(b)

§ 240.16b–1 Transactions approved by regulatory authority.

(a) Any purchase and sale, or sale and purchase, of a security shall be exempt from Section 16(b) of the Act, if the transaction is effected by an investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*) and both the purchase and sale of such security have been exempted from the provisions of Section 17(a) (15 U.S.C. 80a–17(a)) of that Act by rule or order of the Commission.

(b) Any purchase and sale, or sale and purchase, of a security shall be exempt from the provisions of Section 16(b) of the Act if:

(1) The person effecting such transaction is either a holding company registered under the Public Utility Holding Company Act of 1935 (15 U.S.C. 79a *et seq.*) or a subsidiary thereof; and

(2) Both the purchase and the sale of such security have been approved or permitted by the Commission pursuant to the applicable provisions of that Act or the rules and regulations thereunder.

(c) Any acquisition of securities made in exchange for other securities shall be exempt from the provisions of Section 16(b) of the Act if:

(1) The securities are acquired from the issuer;

(2) The person acquiring the securities is subject to one or more of the provisions of Part I of the Interstate Commerce Act;

(3) The person acquiring the securities is:

(i) Subject to an order of, or has accepted a condition imposed by, the Interstate Commerce Commission in an approval of a unification, merger or acquisition of control pursuant to 49 U.S.C. 11343–11347, requiring such person to dispose of all securities of the same class as those exchanged for the securities acquired; and

(ii) The issuance of the securities acquired by such person has been approved by the Interstate Commerce Commission pursuant to 49 U.S.C. 11301; and

(4) The person acquiring voting equity securities:

(i) Has transferred all voting rights on an unrestricted basis to one or more banks; and

(ii) Such transfer remains in effect until such securities are disposed of by such person.

§ 240.16b–2 Subscription rights.

(a) Any sale of a subscription right to acquire any subject security of the same issuer shall be exempt from the provisions of Section 16(b) of the Act if:

(1) Such subscription right is acquired, directly or indirectly, from the issuer without the payment of consideration;

(2) Such subscription right by its terms expires within 45 days after the issuance thereof;

(3) Such subscription right by its terms is issued on a pro rata basis to all holders of the beneficiary security of the issuer; and

(4) A registration statement under the Securities Act, of 1933 (15 U.S.C. 77a *et. seq.*) is in effect as to each subject security, or the terms of any exemption from such registration have been met in respect to each subject security.

(b) When used within this Rule the following terms shall have the meaning indicated:

(1) The term "subscription right" means any warrant or certificate evidencing a right to subscribe to or otherwise acquire an equity security.

(2) The term "beneficiary security" means a security registered pursuant to section 12 of the Act, the holders of which were granted a subscription right.

(3) The term "subject security" means a security that is the subject of a subscription right.

(c) Notwithstanding anything contained herein to the contrary, if a person purchases subscription rights for cash or other consideration within six months of a sale by such person of subscription rights, such sale shall not be exempt.

§ 240.16b–3 Employee Benefit Plans.

(a) *Exempt Transactions.* The following transactions by a director or officer shall be exempt from section 16(b) of the Act if they occur pursuant to a plan that satisfies the conditions of paragraphs (b) and (c) of this section:

(1) The grant or acquisition of an option, warrant, right, or shares of stock;

(2) The expiration, cancellation, or surrender to the issuer of a stock option or stock appreciation right without value received; and

(3) The surrender or delivery to the issuer of shares of its stock as payment for the exercise of an option, warrant or right with respect to shares of the same class.

(b) *Disinterested Administration.* (1) The plan shall satisfy one of the following conditions:

(i) The decisions concerning the plan shall be made solely by a committee of two or more directors, all of whom are disinterested persons: *Provided, however,* That the directors need not be disinterested persons if directors are not permitted to participate in the plan; or

(ii) The plan by its terms:

(A) Determines which officers and directors may be awarded grants;

(B) Determines the timing of the grants for all participants; and

(C) Determines the amount of securities to be granted to individual participants (which shall be governed by a formula or standardized criteria for participants, such as earnings of the issuer, value of the securities, years of service, job classification, compensation levels, etc.). The plan also must provide that no discretion concerning decisions regarding the plan shall be afforded to a person who is not a disinterested person; and that the requirements described in paragraph (b)(1)(ii) of this section shall not be amended more than once every six months, other than to comport with changes in the Internal Revenue Code or the rules thereunder.

(2) Compliance with this paragraph shall not be necessary with respect to any option or right granted, or other equity security acquired, prior to the date of the first registration of a class of equity security under section 12 of the Act.

(3) Plans that permit participation of persons other than those subject to section 16 of the Act need not comply with this paragraph as it relates to those other persons.

(c) *Definitions and Conditions.* Unless the context otherwise requires, all terms used in this Rule shall have the same meaning as in the Act, the General Rules and Regulations thereunder, or the Rules under section 16 of the Act. In addition, the following definitions and conditions apply:

(1) The term "plan" shall mean an option, bonus, appreciation, profit sharing, retirement, incentive, thrift, savings or similar plan that meets the following conditions with respect to participants subject to section 16 of the Act:

(i) The plan must be set forth in a written document describing the means or basis for determining the eligibility of individuals to participate and either the price at which the securities may be offered or the method by which the price or the amount of the award is to be determined;

(ii) The plan must provide, with respect to any equity security offered pursuant to the plan, that such equity security may not be sold for at least six months after acquisition, except in case of death or disability. The plan must provide further that a derivative security issued pursuant to the plan is not transferable other than by will or the laws of descent and distribution, that it is not exercisable for at least six months except in case of death or disability, and that it is exercisable during the plan participant's lifetime only by the participant or the participant's guardian or legal representative.

(2) The term "disinterested person" used in paragraph (b)(1) of this section shall mean an administrator of a plan who:

(i) During one year prior to the time of exercising discretion in administering the plan, has not been eligible for selection as a person to whom equity securities may be allocated or granted pursuant to the plan (or any other plan of the issuer or any of its affiliates) entitling the participants therein to acquire equity securities; and

(ii) Is not so eligible for one year after such exercise: *Provided, however,* That participation in a plan that satisfies the conditions of paragraph (b)(1)(ii) of this section does not disqualify a person from being disinterested if awards under the plan are not subject to the discretion of any person.

(d) *Cash Settlements of Stock Appreciation Rights.* Any transaction involving the exercise and cancellation of a stock appreciation right issued pursuant to a plan (whether or not the transaction also involves the related surrender and cancellation of a stock option), and the receipt of cash in complete or partial settlement of that right, shall be exempt from section 16(b) of the Act, as not comprehended within the purpose of that section, if the following conditions are met:

(1) *Information About the Issuer.*

(i) The issuer of the stock appreciation right has been subject to the reporting requirements of section 13(a) of the Act for at least a year prior to the transaction and has filed all reports and statements required to be filed pursuant to that section during that year.

(ii) The issuer of the stock appreciation right on a regular basis releases for publication quarterly and annual summary statements of sales and earnings. This condition shall be deemed satisfied if the specified financial data appears:

(A) on a wire service,

(B) in financial news service,

(C) in a newspaper of general circulation, or

(D) is otherwise made publicly available.

(2) *Administration of the Plan.* (i) The plan shall be administered in the manner specified in paragraph (b)(1) of this section.

(ii) The board of directors of the issuer or committee shall have sole discretion either:

(A) To determine the form in which payment of the right will be made (i.e., cash, securities, or any combination thereof), or

(B) To approve or disapprove the election of the participant to receive cash in full or partial settlement of the right. Such approval or disapproval may be given at any time after the election to which it relates.

(3) *Timing.* Any election by the participant to receive cash in full or partial settlement of the stock appreciation right, as well as any exercise by the participant of the stock appreciation right for such cash, shall be made during the period beginning on the third business day following the date of release of the financial data specified in paragraph (d)(1)(ii) of this section and ending on the twelfth business day following such date. This paragraph (d)(3) of this section, however, shall not apply to any exercise by the participant of a stock appreciation right for cash where the date of exercise is automatic or fixed in advance under the plan and is outside the control of the participant.

(e) *Intra-plan Transfers.* Both the election and resulting transactions within a plan shall be exempt from section 16(b) of the Act if they occur pursuant to a plan that satisfies the conditions of paragraph (c) of this section and one of the following conditions:

(1) The participant makes an irrevocable investment election at least six months in advance of the effective date of the transaction;

(2) The participant makes an investment election on a date specified by the plan at least six months after the previous investment election date specified by the plan;

(3) The participant makes an election to defer a distribution of securities or cash incident to the termination of employment or total and permanent disability, provided the securities are delivered six months or later after the date the election to defer is made; or

(4) The participant makes an election to participate or not participate in an on-going securities acquisition program within a pension or retirement plan where:

(i) The plan is open to all employees generally;

(ii) Participants are not entitled to receive a distribution until their death, retirement, or termination of employment unless significant penalties are imposed; and

(iii) If participants elect to cease participation, they may not elect to participate again for at least six months.

Note. Investment elections need not be reported. Resulting intra-plan transactions shall be reported on Form 5.

(f) *Distributions.* Distributions of equity securities from a plan satisfying the conditions of paragraphs (b) and (c) of this section to a participant shall be exempt from section 16(b) of the Act if the securities so distributed had been acquired by the plan for the benefit of the participant, and the acquisition by the plan had been disclosed previously by the participant pursuant to section 16(a) of the Act.

§ 240.16b–4 Issuer redemptions.

An officer's or director's acquisition of equity securities shall be exempt, provided the securities are acquired through an issuer redemption transaction where:

(a) The securities redeemed ("surrendered securities"):

(1) Represent equity securities of an issuer whose assets consist entirely of cash, government securities, and equity securities in the issuer redeeming the surrendered securities;

(2) Have a value equivalent to the equity securities acquired in the redemption; and

(3) Conferred upon the holder the right to receive the acquired equity securities without the payment of any consideration other than the security redeemed;

(b) The officer or director has not acquired or disposed of any surrendered securities during any six month period before or after the redemption transaction;

(c) The security acquired in the redemption transaction is not a derivative security; and

(d) The issuer of the securities acquired in the redemption has taken appropriate action to establish the relationship between its equity securities and the surrendered securities and to establish the issuer's right to redeem.

§ 240.16b–5 Bona fide gifts and inheritance.

Both acquisitions and dispositions of equity securities shall be exempt from the operation of section 16(b) of the Act if they are:

(a) Bona fide gifts; or

(b) Transfers of securities by will or the laws of descent and distribution.

§ 240.16b–6 Derivative securities.

(a) The establishment of or increase in a call equivalent position or liquidation of or decrease in a put equivalent position shall be deemed a purchase of the underlying security for purposes of section 16(b) of the Act, and the establishment of or increase in a put equivalent position or liquidation of or decrease in a call equivalent position shall be deemed a sale of the underlying securities for purposes of section 16(b) of the Act.

(b) The closing of a derivative security position as a result of its exercise or conversion shall be exempt from the operation of section 16(b) of the Act, and the acquisition of underlying securities at a fixed exercise price due to the exercise or conversion of a call equivalent position or the disposition of underlying securities due to the exercise of a put equivalent position shall be exempt from the operation of section 16(b) of the Act: *Provided, however,* That the acquisition of underlying securities from the exercise of an out-of-the-money option, warrant, or right shall not be exempt unless the exercise is necessary to comport with the serial exercise provisions of the Internal Revenue Code of 1986 (26 U.S.C. 422A).

(c) The disposition of a security received upon the exercise of a derivative security awarded pursuant to a plan satisfying § 240.26b–3(b) shall be exempt from the provisions of section 16(b) if the disposition is pursuant to a plan or agreement for merger or consolidation, or reclassification of the issuer's securities, or for the exchange of its securities for the securities of another person that has acquired its assets, or that is in control, as defined in section 368(c) of the Internal Revenue Code of 1986, of a person that has acquired its assets, where the terms of such plan or agreement are binding upon all security holders of the issuer except to the extent that dissenting security holders may be entitled, under statutory provisions or provisions contained in the certificate of incorporation, to receive the appraised or fair value of their holdings.

(d) In determining the short-swing profit recoverable pursuant to Section 16(b) of the Act from transactions involving the purchase and sale or sale and purchase of derivative and other securities, the following rules apply:

(1) Short-swing profits in transactions involving the purchase and sale or sale and purchase of derivative securities that have identical characteristics (*e.o.* purchases and sales of call options of the same strike price and expiration date, or purchases and sales of the same series of convertible debentures) shall be measured by the actual prices paid or received in the short-swing transactions.

(2) Short-swing profits in transactions involving the purchase and sale or sale and purchase of derivative securities having different characteristics (*e.g.*, the purchase of a call option and the sale of a convertible debenture) or derivative securities and underlying securities shall not exceed the difference in price of the underlying security on the date of purchase or sale and the date of sale or purchase. Such profits may be measured by calculating the short-swing profits that would have been realized had the subject transactions involved purchases and sales solely of the derivative security that was purchased or solely of the derivative security that was sold, valued as of the time of the matching purchase or sale, and calculated for the lesser of the number of ultimate underlying securities covered by the derivative security actually purchased or sold.

(e) Upon expiration of an option within six months of the writing of the option, any profit derived from writing the option shall be recoverable under Section 16(b) of the Act. The profit shall not exceed the premium received for writing the option. The disposition of a long derivative security position, as a result of expiration, shall be exempt from Section 16(b) of the Act where no value is received from the expiration.

§ 240.16b–7 Mergers, Reclassifications, and Consolidations.

(a) The following transactions shall be exempt from the provisions of Section 16(b):

(1) The acquisition or disposition of a security of a company pursuant to a merger or consolidation in exchange for a security of a company which, prior to said merger or consolidation, owned 85 percent or more of the equity securities of all other companies involved in the merger (or, in the case of a consolidation, owned 85 percent of the resulting company); or

(2) The acquisition or disposition of a security of a company, pursuant to a merger or consolidation, in exchange for a security of a company which, prior to said merger or consolidation, held over 85 percent of the combined assets of all the companies involved in the merger or consolidation, computed according to their book values prior to the merger or consolidation as determined by reference to their most recent available financial statements for a 12 month period prior to the merger or consolidation.

(b) A merger within the meaning of this Rule shall include the sale or purchase of substantially all the assets of one company by another in exchange for equity securities which are then distributed to the security holders of the company that sold its assets.

(c) Notwithstanding the foregoing, if an officer, director or beneficial owner of more than ten percent shall make any purchase of a security in any company involved in the merger or consolidation and any sale of a security in any other company involved in the merger or consolidation within any period of less than six months during which the merger or consolidation took place, the exemption provided by this Rule shall be unavailable.

§ 240.16b–8 Voting trusts.

Any acquisition or disposition of an equity security or certificate representing equity securities involved in the deposit or withdrawal from a

voting trust or deposit agreement shall be exempt from Section 16(b) of the Act if substantially all of the assets held under the voting trust or deposit agreement immediately after the deposit or immediately prior to the withdrawal consisted of equity securities of the same class as the security deposited or withdrawn: *Provided, however,* That this exemption shall not apply if within six months of the deposit or withdrawal there is a purchase or sale of an equity security of the class deposited and a sale or purchase of any certificate representing such equity security (other than the actual deposit or withdrawal).

§ 240.16b–9 Dividend or interest reinvestment plans.

Any acquisition of securities resulting from the reinvestment of dividends or interest shall be exempt from Section 16(b) of the Act if made pursuant to a plan, available on the same terms to all holders of that class of securities, providing for the regular reinvestment of such dividends or interest.

§ 240.16b–10 Stock splits and stock dividends.

The following transactions are exempt from Section 16(b) of the Act:

(a) Acquisition of equity securities as a result of a stock split of all securities of the same class; and

(b) Acquisition of equity securities as a result of a stock dividend applied pro rata to all holders of the securities of the same class.

6. Sections 240.16c–1 through 240.16c–3 are revised and §§ 240.16c–4 and 240.16d–1 and the undesignated center heading preceding § 240.16d–1 are added, to read as follows:

Exemption of Certain Transactions from Section 16(c)

§ 240.16c–1 Brokers.

Any transaction shall be exempt from Section 16(c) of the Act to the extent necessary to render lawful the execution by a broker of an order for an account in which the broker has no direct or indirect interest.

§ 240.16c–2 Transactions effected in connection with a distribution.

Any transaction shall be exempt from Section 16(c) of the Act to the extent necessary to render lawful any sale made by or on behalf of a dealer in connection with a distribution of a substantial block of securities, where the sale is represented by an over-allotment in which the dealer is participating as a member of an underwriting group, or the dealer or a person acting on his behalf intends in good faith to offset such sale with a security to be acquired by or on behalf of the dealer as a participant in an underwriting, selling, or soliciting-dealer group of which the dealer is a member at the time of the sale, whether or not the security to be acquired is subject to a prior offering to existing security holders or some other class of persons.

§ 240.16c–3 Exemption of sales of securities to be acquired.

(a) Whenever any person is entitled, incident to ownership of an issued security and without the payment of consideration, to receive another security "when issued" or "when distributed," the sale of the security to be acquired shall be exempt from the operation of Section 16(c), *Provided,* That:

(1) The sale is made subject to the same conditions as those attaching to the right of acquisition;

(2) Such person exercises reasonable diligence to deliver such security to the purchaser promptly after the right of acquisition matures; and

(3) Such person reports the sale on the appropriate form for reporting transactions by persons subject to Section 16(a).

(b) This Rule shall not exempt transactions involving both a sale of the issued security and a sale of a security "when issued" or "when distributed" if the combined transactions result in a sale of more securities than the aggregate of issued securities owned by the seller plus those to be received for the other security "when issued" or "when distributed."

§ 240.16c–4 Derivative securities.

Establishing or increasing a put equivalent position shall be exempt from Section 16(c) of the Act, so long as the securities underlying the put equivalent position do not exceed the amount of underlying securities otherwise owned.

Exemption for Market Makers

§ 240.16d–1 Market maker reporting.

Transactions exempt pursuant to Section 16(d) of the Act need not be reported on Form 3, 4 or 5.

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for part 249 continues to read as follows:

Authority: Securities Exchange Act of 1934, 15 U.S.C. 78a, *et seq.* * * *

2. By revising Item 10 of Form 10–K (§ 249.310) as set forth below:

Note.—The text of Form 10–K does not and this amendment will not appear in the Code of Federal Regulations.

§ 249.310 Form 10–K, annual report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

* * * * *

Part III

* * * * *

Item 10. Directors and Executive Officers of the Registrant.

Furnish the information required by Items 401 and 405 of Regulation S–K. (§ 229.401 and § 229.405 of this chapter).

* * * * *

3. By amending the description of Form 3 in § 249.103 by revising its first and eighth sentences to read as follows:

§ 249.103. Form 3, Initial statement of beneficial ownership of securities.

This form shall be filed pursuant to Rule 16a–3 (§ 240.16a–3 of this chapter) for initial statements of beneficial ownership of securities required to be filed pursuant to Section 16(a) of the Securities Exchange Act of 1934. * * * Social security account numbers, if furnished, will assist the Commission in differentiating among officers, directors and security holders whose own or issuer names are similar. * * *

4. By amending Form 3 (§ 249.103) to read as follows:

Note—The text of Form 3 does not and this amendment will not appear in the Code of Federal Regulations.

OMB Approval

OMB Number: 3235–0104
Estimated Burden Hours: 0.5
Expires: Pending Approval

Form 3—Initial Statement of Beneficial Ownership of Securities

Special Instructions for Completing Form 3

Under Sections 16(a) and 23(a) of the Securities Exchange Act of 1934; Sections 17(a) and 30(a) of the Public Utility Holding Company Act of 1935; and Sections 30(f) and 38 of the Investment Company Act of 1940, and the rules and regulations thereunder, the Commission is authorized to solicit the information required by this form from officers, directors and certain security holders of registered issuers.

Disclosure of the information specified in this form is mandatory, except for social security account numbers, disclosure of which is voluntary. The information will be used for the primary purpose of determining and disclosing the holdings of officers, directors and beneficial owners of registered issuers. This statement will be made a matter of public record. Therefore, any information given will be available for inspection by any member of the public.

Because of the public nature of the information, the Commission can use it for a variety of purposes, including referral to other governmental authorities or securities self-regulatory organizations for investigatory purposes or in connection with litigation involving the Federal securities laws or other civil, criminal or regulatory statutes or provisions. Social security account numbers, if furnished, will assist the Commission in differentiating among officers, directors and security holders whose own or issuer names are similar.

Failure to disclose the information required by this form, except for social security account numbers, may result in civil or criminal action against the persons involved for violation of provisions of the Federal securities laws and rules promulgated thereunder.

General Instructions

1. *When and Where Statements are to Be Filed.*

(a) Within 10 days after the occurrence of any event that requires the filing of this form, other than the registration of securities under section 12 of the Act, three copies, at least one of which shall be manually signed, shall be filed with the Securities and Exchange Commission, 450 5th Street N.W., Washington, DC 20549. In the case of Section 12 registration, the form must be filed no later than the effective date of the registration statement. The events that require the filing of a statement on this form are set forth in Section 16(a) of the Securities Exchange Act of 1934, Section 17(a) of the Public Utility Holding Company Act of 1935 and Section 30(f) of the Investment Company Act of 1940 and the rules thereunder. The filing date is the date of receipt at the Commission. At the same time, one duplicate original of the statement shall be filed with each exchange on which any class of equity securities of the issuer is registered, unless the issuer has, in accordance with Rule 16a–3(c), designated a single exchange to receive such statements. One duplicate original also shall be sent to the issuer pursuant to Rule 16a–3(e).

(b) Acknowledgment of receipt of the statement by the Commission may be obtained by enclosing a self-addressed, stamped post card identifying the statement filed.

2. *Separate Statement for Each Issuer—Exception.*

A separate statement shall be filed with respect to the securities of each issuer, except that a single statement shall be filed with respect to the securities of a registered public utility holding company and of all of its subsidiary companies.

3. *Classes of Securities to Be Reported.*

(a) Information must be furnished as required by this form with respect to all classes of equity securities of the issuer, even though one or more of such classes may not be registered pursuant to section 12 of the Act.

(b) Information concerning derivative securities as defined by Rule 16a–1(c) (*e.g.*, options, warrants, convertible securities) must be reported on Table II.

(c) Persons reporting pursuant to Section 17(a) of the Public Utility Holding Company Act of 1935 shall include information as to their beneficial ownership of all classes of securities of the registered holding company and of all of its subsidiary companies.

(d) Persons reporting pursuant to Section 30(f) of the Investment Company Act of 1940 shall include information as to their beneficial ownership of all classes of securities of the registered closed-end investment company (other than "short-term paper" as defined in Section 2(a)(38) of the Investment Company Act).

4. *Statement Required Although No Securities are Owned.*

If any person required to file a statement on this form does not own any securities required to be reported, a statement shall be made on this form to report that fact.

5. *Reporting of Certain Holdings.*

(a) When two or more securities are owned as a unit and both are required to be reported, report each security separately and describe the unit relationship in the space provided for explanation on the form. If one or more of the securities comprising the unit is not required to be reported, the other security or securities shall be reported separately and the unit relationship described as indicated above.

(b) Securities owned indirectly shall be reported on separate lines from those owned directly and also from those owned through a different type of indirect ownership.

(c) In reporting the ownership of common stock that is convertible into another type of common stock, the stock should be listed on Table I with the number of shares or units subject to the conversion privilege and the conversion price per share or unit set forth in the explanation space. Other convertible securities shall be reported as derivative securities on Table II.

6. *Title of Securities.*

The title of securities in Column 1 of Table I and Columns 1 and 2 of Table II shall be stated as specifically as possible; for example, "Common Stock," "Class A Common Stock," "12% Convertible Preferred Stock," etc. Include the name of the issuer of the securities if it is a public utility holding company or a subsidiary thereof.

7. *Statement of Amounts of Securities.*

(a) In stating amounts of securities in Column 2 of Table I and Column 3 of Table II, give the number of securities, or if debt is required to be reported, give the face amount of the debt securities.

(b) Report only those securities of which the person is a beneficial owner as defined by Rule 16a–1(a)(2) (i.e., in which a pecuniary interest is present).

(c) In stating amounts of securities beneficially owned through a partnership, corporation, trust, or other entity, the reporting person shall indicate only the amount of securities representing the proportionate interest of the person in the transaction conducted by the partnership, corporation, trust, or other entity. Alternatively, at the option of the reporting person, the entire amount of the entity's interest may be reported. See Instruction 8(b) below.

8. *Type of Ownership of Securities.*

(a) The following securities shall be reported as owned directly: securities held in the name of the reporting person or in the name of a bank, broker, or nominee for the account of the reporting person; and securities held in joint tenancy, tenancy in common, tenancy by the entirety, or as community property.

(b) Securities that are beneficially owned, but that are not owned directly, *e.g.*, through a member of the reporting person's "immediate family" as defined in Rule 16a–1(e), shall be reported as indirectly owned; "beneficial owner" is defined in Rule 16a–1(a)(2). Securities holdings attributed to a reporting person as a result of the person's interest in a partnership, corporation, trust, or other entity also are considered to be owned indirectly.

(c) Beneficial ownership of the securities reported on this form may be disclaimed unless mandated by a rule under Section 16(a) of the Securities Exchange Act. See Rule 16a–1(a)(4).

9. *Type of Derivative Security.*

The type of derivative security owned shall be reported in Column 1 of Table II. If appropriate, state whether it represents a right to buy, a right to sell, an obligation to buy, or an obligation to sell, the underlying securities.

10. *Inclusion of Additional Information.*

A statement may include any additional information or explanation deemed relevant by the reporting person.

11. *Signature.*

(a) If the statement is filed for an individual, it shall be signed by the individual or specifically on behalf of the individual by a person authorized to sign for the individual. If signed on behalf of the individual by another person, the authority of such person to sign the statement shall be confirmed to the Commission in writing in an attachment to the statement or as soon as practicable as an amendment by the individual for whom the statement is filed, unless such a confirmation still in effect is on file with the Commission.

(b) If the statement is filed for a corporation, partnership, trust or other entity, the name of the organization shall appear over the signature of the officer or other person authorized to sign the statement, and the capacity in which the individual signed set forth.

5. By amending the description of Form 4 in § 249.104) by revising its first, eighth and ninth sentences as set forth below.

§ 249.104 Form 4. Statement of changes in beneficial ownership of securities.

This form shall be filed pursuant to Rule 16a–3 (§ 240.16a–3 of this chapter) for statements of changes in beneficial ownership of securities required to be filed pursuant to Section 16(a) of the Securities Exchange Act of 1934. * * * Social security account numbers, if furnished, will assist the Commission in differentiating among officers, directors and security holders whose own or issuer names are similar. Failure to disclose the information requested by this form, except for social security account numbers, may result in civil or criminal action against the persons involved for violations of provisions of the Federal securities laws and rules promulgated thereunder.

6. By revising Form 4 (§ 249.104) to read as follows:

Note.—The text of Form 4 does not and this amendment will not appear in the Code of Federal Regulations.

OMB Approval

OMB Number:

Estimated Burden Hours: 0.5

Expires: Pending Approval

Form 4—Statement of Changes in Beneficial Ownership of Securities

Special Instructions for Completing Form 4

Under Sections 16(a) and 23(a) of the Securities Exchange Act of 1934; Sections 17(a) and 20(a) of the Public Utility Holding Company Act of 1935; and Sections 30(f) and 38 of the Investment Company Act of 1940, and the rules and regulations thereunder, the Commission is authorized to solicit the information required by this form from officers, directors and certain security holders of registered issuers.

Disclosure of the information specified in this form is mandatory, except for social security account numbers, disclosure of which is voluntary. The information will be used for the primary purpose of determining and disclosing the holdings of officers, directors and beneficial owners of registered issuers. This statement will be made a matter of public record. Therefore, any information given will be available for inspection by any member of the public.

Because of the public nature of the information, the Commission can use it for a variety of purposes, including referral to other governmental authorities or securities self-regulatory organizations for investigatory purposes or in connection with litigation involving the Federal securities laws or other civil, criminal or regulatory statutes or provisions. Social security account numbers, if furnished, will assist the Commission in differentiating among officers, directors and security holders whose own or issuer names are similar.

Failure to disclose the information required by this form, except for social security account numbers, may result in civil or criminal action against the persons involved for violation of provisions of the Federal securities laws and rules promulgated thereunder.

General Instructions

1. *When and Where Statements Are To Be Filed.*

(a) On or before the 10th day after the end of the month in which any change in beneficial ownership has occurred, three copies of the statement on this form, at least one of which is manually signed, shall be filed with the Securities and Exchange Commission, 450 5th Street NW, Washington, DC 20549. The filing date is the date of receipt at the Commission. At the same time, one duplicate original of the statement shall be filed with each exchange on which any class of equity securities of the company is registered, unless the issuer has, in accordance with Rule 16a–3(c), designated a single exchange to receive such statements. One duplicate original also shall be sent to the issuer pursuant to Rule 16a–3(e).

(b) Acknowledgment of receipt of the statement by the Commission may be obtained by enclosing a self-addressed, stamped post card identifying the statement filed.

2. *Separate Statement for Each Issuer—Exception.*

A separate statement shall be filed with respect to the securities of each issuer, except that a single statement shall be filed with respect to the securities of a registered public utility holding company and all of its subsidiary companies.

3. *Classes of Securities To Be Reported.*

(a) Information must be furnished as required by this form with regard to all classes of equity securities of the issuer, even though one or more of such classes may not be registered pursuant to Section 12 of the Act.

(b) Information concerning derivative securities as defined by Rule 16a–1(c) (*e.g.*, options, warrants, convertible securities) must be reported on Table II.

(c) Persons reporting pursuant to Section 17(a) of the Public Utility Holding Company Act of 1935 shall include information required to be reported as to certain changes in the amount of securities beneficially owned, changes in the nature of beneficial ownership and the amount of their beneficial ownership at the end of the month of all classes of securities of the registered holding company and all of its subsidiary companies.

(d) Persons reporting pursuant to Section 30(f) of the Investment Company Act of 1940 shall include information required to be reported as to certain changes in the amount of securities beneficially owned, changes in the nature of beneficial ownership and the amount of their beneficial ownership at the end of the month of all classes of securities of the registered closed-end investment company (other than "short-term paper" as defined in Section 2(a)(38) of the Act).

4. *Transactions To Be Reported.*

(a) All transactions that result in a change of beneficial ownership in the issuer's securities shall be reported on this form, except those exempted transactions excluded from the reporting and liability provisions of Section 16 by operation of Rule 16a–5, 16a–7, 16a–8, or 16a–10 and the transactions listed in paragraph (b) below.

(b) The following transactions that result in a change of beneficial ownership shall be reported on Form 5 rather than this form: small acquisitions that are to be reported on a deferred basis pursuant to rule 16a–6(a) and transactions conducted during the issuer's fiscal year that were exempt from the provisions of Section 16(b) of the Exchange Act by operation of any rule pursuant to such section, except that if a Form 4 otherwise is required to be filed and prior to its filing there has been an exercise or conversion of a call equivalent position or a put equivalent position also exempt, it shall be reported on the Form 4 rather than on a Form 5 pursuant to Rule 16a–4.

(c) Every transaction shall be reported even though acquisitions and dispositions during the month are equal, or the change involves only the nature of ownership, such as a change from indirect ownership through a trust or corporation to direct ownership by the reporting person.

5. *Reporting of Certain Transactions and Holdings.*

(a) When a transaction relates to the acquisition or disposition of two or more securities as a unit or such a unit is beneficially owned at the end of a month and both are required to be reported, report each security separately and describe the unit relationship in the space provided for explanation. If one or more of the securities comprising the unit is not required to be reported, the other security or securities shall be reported separately and the unit relationship described as indicated above.

(b) Securities owned indirectly shall be reported on separate lines from those owned directly and also from those owned through a different type of indirect ownership.

(c) In reporting the acquisition, disposition or end of a month beneficial ownership of one class of common stock that is convertible into another type of common stock, the transaction should be listed on Table I with the number of shares or units subject to the conversion privilege and the conversion price per share or unit set forth in the explanation space. Other convertible securities shall be reported as derivative securities on Table II.

6. *Title of Securities.*

The title of securities in Column 1 of Table I and Columns 1 and 3 of Table II shall be stated as specifically as possible; for example, "Common stock," "Class A stock," "12% Convertible Preferred Stock," etc. Include the name of the issuer of the securities if it is a public utility holding company or a subsidiary thereof.

7. *Statement of Amounts of Securities.*

(a) In stating amounts of securities in Columns 3, 4 and 7 of Table I and Columns 4, 5, 6, 9 and 10 of Table II, give the number of securities, or if debt is required to be reported, give the face amount of the debt securities.

(b) Report only those equity securities of which the person is a beneficial owner as defined by Rule 16a–1(a)(2) (i.e., in which a pecuniary interest is present).

(c) In stating amounts of securities beneficially owned through a partnership, corporation, trust, or other entity, the reporting person shall indicate only the amount of securities representing the proportionate interest of the person in the transaction conducted by the partnership, corporation, trust, or other entity. Alternatively, at the option of the reporting person, the entire amount of the entity's interest may be reported. See Instruction 9(b) below.

8. *Purchase or Sale Price of Securities.*

(a) If any transaction reported involved a purchase or sale of securities for cash or obligation to pay cash, state in Column 6 of Table I or Column 8 of Table II the purchase price per share or unit, exclusive of brokerage commissions or other costs of execution. If the transaction was only partly for cash and partly for other consideration, state the amount of cash per share or unit and the nature of the other consideration. If the transaction did not involve cash, state the nature of the consideration given or received.

(b) When two or more securities are purchased or sold as a unit, the purchase or sale price of the unit shall be stated in Column 6 of Table I or Column 8 of Table II with respect to one of the securities and cross-referenced with respect to the other security or securities.

9. *Type of Ownership of Securities.*

(a) The following securities shall be reported as owned directly: securities held in the name of the reporting person or in the name of a bank, broker or nominee for the account of the reporting person; and securities held in joint tenancy, tenancy in common, tenancy by the entirety or as community property.

(b) Securities that are beneficially owned, but that are not owned directly, *e.g.* through a member of the reporting person's "immediate family" as that term is defined in Rule 16a 1(e), shall be reported as indirectly owned; "beneficial owner" is defined in Rule 16a—1(a)(2). Securities holdings attributed to a reporting person as a result of the interest of the person in a partnership, corporation, trust, or other entity also are considered to be owned indirectly.

(c) Beneficial ownership of the securit=es reported on this form may be disclaimed unless mandated by a rule under Section 16(a) of the Securities Exchange Act of 1934. See Rule 16a–1(a)(4).

10. *Type of Derivative Security.*

The type of derivative security owned shall be reported in Column 1 of Table II. If appropriate, state whether it represents a right to buy, a right to sell, an obligation to buy, or an obligation to sell, the underlying securities.

11. *Beneficial Ownership at End of Month.*

Beneficial ownership at the end of the month covered by the statement (Column 7 of Table I and Column 9 of Table II) shall be shown for all equity securities required to be reported even though there has been no change during the month in the aggregate ownership of securities of one or more classes or accounts. For example, a person reporting a transaction relating to common stock shall, in addition to providing all the information in Table I relating to such transaction, report the amount of preferred stock, convertible debentures, etc., owned at the end of the month. See Instruction 4 above as to when reports on this form are required.

12. *Inclusion of Additional Information.*

A statement may include any additional information or explanation deemed relevant by the person filing the statement.

13. *Signature.*"

(a) If the statement is filed for an individual, it shall be signed by the individual or specifically on behalf of the individual by a person authorized to sign for the individual. If signed on behalf of the individual by another person, the authority of such person to sign the statement shall be confirmed to the Commission in writing in an attachment to the statement or as soon as practicable in an amendment by the individual for whom the statement is filed, unless such a confirmation still in effect is on file with the Commission.

(b) If the statement is filed for a corporation, partnership, trust, etc., the name of the organization shall appear over the signature of the officer or other person authorized to sign the statement, and the capacity in which the individual signed set forth.

BILLING CODE 8010-01-C

7. By adding § 249.105 to subpart B to read as follows:

§ 249.105 Form 5, annual statement of beneficial ownership of securities.

(a) This form shall be filed pursuant to Rule 16a–3 (§ 240.16a–3 of this chapter) for the annual statement of beneficial ownership of securities required to be filed pursuant to Section 16(a) of the Securities Exchange Act of 1934. Under Sections 16(a) and 23(a) of the Securities Exchange Act of 1934; Sections 17(a) and 20(a) of the Public Utility Holding Company Act of 1935; and Sections 30(f) and 38 of the Investment Company Act of 1940, and the rules and regulations thereunder, the Commission is authorized to solicit the information required by this form from officers, directors and certain security holders of registered issuers.

(b) Disclosure of the information specified in this form is mandatory, except for social security account numbers, disclosure of which is voluntary. The information will be used for the primary purpose of determining and disclosing the holdings of officers, directors and beneficial owners of registered companies. This statement will be made a matter of public record. Therefore, any information given will be available for inspection by any member of the public.

(c) Because of the public nature of the information, the Commission can use it for a variety of purposes, including referral to other governmental authorities or securities self-regulatory organizations for investigatory purposes or in connection with litigation involving the Federal securities laws or other civil, criminal or regulatory statutes or provisions. Social security account numbers, if furnished, will assist the Commission in differentiating among officers, directors and security holders whose own or issuer names are similar.

(d) Failure to disclose the information requested by this form, except for social security account numbers, may result in civil or criminal action against the persons involved for violation of provisions of the Federal securities laws and the rules promulgated thereunder.

8. By adding Form 5 (§ 249.105) to read as follows:

Note.—The text of Form 5 will not appear in the Code of Federal Regulations.

OMB Approval

OMB Number:

Form 5—Annual Statement of Beneficial Ownership of Securities

Special Instructions for Completing Form 5

Under Sections 16(a) and 23(a) of the Securities Exchange Act of 1934; Sections 17(a) and 30(a) of the Public Utility Holding Company Act of 1935; and Sections 30(f) and 38 of the Investment Company Act of 1940, and the rules and regulations thereunder, the Commission is authorized to solicit the information required by this form from officers, directors and certain security holders of registered issuers.

Disclosure of the information specified in this form is mandatory, except for social security account numbers, disclosure of which is voluntary. The information will be used for the primary purpose of determining and disclosing the holdings of officers, directors and beneficial owners of registered issuers. This statement will be made a matter of public record. Therefore, any information given will be available for inspection by any member of the public.

Because of the public nature of the information, the Commission can use it for a variety of purposes, including referral to other governmental authorities or securities self- regulatory organizations for investigatory purposes or in connection with litigation involving the Federal securities laws or other civil, criminal or regulatory statutes or provisions. Social security account numbers, if furnished, will assist the Commission in differentiating among officers, directors and security holders whose own or issuer names are similar.

Failure to disclose the information required by this form, except for social security account numbers, may result in civil or criminal action against the persons involved for violation of provisions of the Federal securities laws and the rules promulgated thereunder.

General Instructions

1. *When and Where Statements Are to Be Filed.*

(a) On or before the 45th day after the end of the issuer's fiscal year, three copies of the statement on this form, at least one of which is manually signed, shall be filed with the Securities and Exchange Commission, 450 5th Street NW., Washington, DC 20549. The filing date is the date of receipt at the Commission. At the same time, one duplicate original of the statement shall be filed with each exchange on which any class of equity securities of the issuer is registered, unless the issuer has in accordance with Rule 16a–3(c), designated a single exchange to receive such statements. One duplicate original also shall be sent to the issuer pursuant to Rule 16a–3(e).

(b) Acknowledgment of receipt of the statement by the Commission may be obtained by enclosing a self-addressed, stamped post card identifying the statement filed.

2. *Separate Statement for Each Issuer—Exception.*

A separate statement shall be filed with respect to the securities of each issuer, except that a single statement shall be filed with respect to the securities of a registered public utility holding company and all of its subsidiary companies.

3. *Classes of Securities To Be Reported.*

(a) Information must be furnished as required by this form with respect to all classes of equity securities of the issuer, even though one or more of such classes may not be registered pursuant to Section 12 of the Act.

(b) Information concerning derivative securities as defined by Rule 16a–1(c) (*e.g.*, options, warrants, convertible securities) must be reported on Table II.

(c) Persons reporting pursuant to Section 17(a) of the Public Utility Holding Company Act of 1935 shall include information required to be reported as to certain changes in the amount of securities beneficially owned, changes in the nature of beneficial ownership and the amount of their beneficial ownership at the end of the fiscal year of all classes of securities of the registered holding company and all of its subsidiary companies.

(d) Persons reporting pursuant to Section 30(f) of the Investment Company Act of 1940 shall include information as to transactions required to be reported as to certain changes in the amount of securities beneficially owned, changes in the nature of beneficial ownership and the amount of their beneficial ownership at the end of the fiscal year of all classes of securities of the registered closed-end investment company (other than "short-term paper" as defined in Section 2(a)(38) of the Act).

4. *Statement Required Only When Transactions Have Been Conducted.*

A statement on this form is required only when the reporting person has (1) conducted a transaction in the issuer's securities during the issuer's fiscal year that is reportable on Form 5 or (2) has failed to file a previously required Form 3, 4, or 5. (See Rule 16a–3(g)(3)).

5. *Transactions to Be Reported.*

(a) In accordance with Rule 16a–3(g)(2), all transactions in the issuer's securities conducted during the issuer's fiscal year that were exempted from Section 16(b) of the Exchange Act (by operation of rules promulgated pursuant to Section 16(b) of such Act) and, therefore, are to be reported on a deferred basis, shall be reported on this form unless, in the case of an exercise or conversion of a call or put equivalent position, previously reported pursuant to Rule 16a–4 on a Form 4. Small acquisitions that are to be reported on a deferred basis pursuant to Rule 16a–6(a) also shall be reported on this form unless previously reported.

(b) Any occurrence or transaction during or prior to the issuer's fiscal year required to be reported on Form 3 or 4 under Section 16(a) of the Act before the date of filing of this Form 5, but not so reported, shall be reported on this Form 5: *Provided, however,* That a completed Form 3 or 4 shall be appended to this Form 5.

(c) Transactions involving derivative securities shall be reported in Table II; all other transactions shall be reported in Table I.

6. *Reporting of Certain Transactions and Holdings.*

(a) When a transaction relates to the acquisition or disposition of two or more securities as a unit or such a unit is beneficially owned at the end of a fiscal year and both are required to be reported, report each security separately and describe the unit relationship in the space for comments below Table II. If one or more of the securities comprising the unit is not required to be reported, the other security or securities shall be reported separately and the unit relationship described as indicated above.

(b) Securities owned indirectly shall be reported on separate lines from those owned directly and also from those owned through a different type of indirect ownership.

(c) In reporting the acquisition, disposition or end of a fiscal year beneficial ownership of common stock that is convertible into another type of common stock, the transaction should be listed on Table I with the number of shares or units subject to the conversion privilege and the conversion price per share or unit set forth in the explanation space. Other convertible securities should be reported as derivative securities in Table II.

(d) If a derivative security is converted or exercised and the transaction has not been reported on Form 4, the transaction shall be reported on Table II and the acquisition or disposition of the underlying security shall be reported on Table I.

7. *Title of Securities.*

The title of securities in Column 1 of Table I and Columns 1 and 3 of Table II shall be stated as specifically as possible; for example, "Common stock," "Class A common stock," "12% Convertible Preferred Stock," etc. Include the name of the issuer of the securities if it is a public utility holding company or a subsidiary thereof.

8. *Statement of Amounts of Securities.*

(a) In stating amounts of securities in Columns 3, 4 and 7 of Table I and Columns 4, 5, 6, 9 and 10 of Table II, give the number of securities, or if debt is required to be reported, give the face amount of the debt securities.

(b) Report only those securities of which the person is a beneficial owner as defined by rule 16a–1(a)(2) (*i.e.*, in which a pecuniary interest is present).

(c) In stating amounts of securities beneficially owned through a partnership, corporation, trust, or other entity, the reporting person shall indicate only the amount of securities representing the proportionate interest of the person in the transaction or holdings of the partnership, corporation, trust, or other entity. Alternatively, at the option of the reporting person, the entire amount of the entity's interest may be reported. See Instruction 10(b) below.

9. *Purchase or Sale Price of Securities.*

(a) If any transaction reported on Table I or II involved a purchase or sale of securities for cash or obligation to pay cash, state in Column 6 of Table I or Column 8 of Table II the purchase price per share or unit, exclusive of brokerage commissions or other costs of execution. If the transaction was only partly for cash and partly for other consideration, state the amount of cash per share or other unit and the nature of the other consideration. If the transaction did not involve cash, state the nature of the consideration given or received.

(b) When two or more securities are purchased or sold as a unit, the purchase or sale price of the unit shall be stated in Column 6 of Table I or Column 8 of Table II with respect to one of the securities and cross-referenced with respect to the other security or securities.

10. *Type of Ownership of Securities.*

(a) The following securities shall be reported as owned directly: securities held in the name of the reporting person or in the name of a bank, broker, or nominee for the account of the reporting person; and securities held in joint tenancy, tenancy in common, tenancy by the entirety, or as community property.

(b) Securities that are beneficially owned, but that are not owned directly, *e.g.*, through a member of the reporting person's "immediate family" as that term is defined in Rule 16a–(1)(e), shall be reported as indirectly owned; "beneficial owner" is defined in Rule 16a–1(a)(2). Securities holdings attributed to a reporting person due to the person's interest in a partnership, corporation, trust, or other entity also are considered to be owned indirectly.

(c) Beneficial ownership of the securities reported on this form may be disclaimed unless mandated by a rule under Section 16(a) of the Securities Exchange Act of 1934. See Rule 16a–1(a)(4).

11. *Type of Derivative Security.*

The type of derivative security owned shall be reported in Column 1 of Table II. If appropriate, state whether it represents a right to buy, a right to sell, an obligation to buy, or an obligation to sell, the underlying securities.

12. *Beneficial Ownership at End of Fiscal Year.*

Beneficial ownership at the end of the fiscal year covered by the statement (Column 7 of Table I and Column 9 of Table II) shall be shown for all equity securities required to be reported even though there has been no change during the fiscal year in the aggregate ownership of securities of one or more classes or accounts. For example, a person reporting a transaction relating to common stock shall, in addition to providing all the information in Table I relating to such transaction, report the amount of preferred stock, convertible debentures, etc., owned at the end of the fiscal year. See Instruction 4 above as to when reports on this form are required.

13. *Inclusion of Additional Information.*

A statement may include any additional information or explanation deemed relevant by the person filing the statement.

14. *Signature.*

(a) If the statement is filed for an individual, it shall be signed by the individual or specifically on behalf of the individual by a person authorized to sign for the individual. If signed on behalf of the individual by another person, the authority of such person to sign the statement shall be confirmed to the Commission in writing in an attachment to the statement or as soon as practicable in an amendment by the individual for whom the statement is filed, unless such a confirmation still in effect is on file with the Commission.

(b) If the statement is filed for a corporation, partnership, trust, etc., the name of the organization shall appear over the signature of the officer or other person authorized to sign the statement, and the capacity in which the individual signed set forth.

PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

1. The authority citation for Part 270 continues to read:

Authority: Secs. 38, 40, 54 Stat. 841, 842; 15 U.S.C. 80c–88; The Investment Company Act of 1940, as amended, 15 U.S.C. 80a–1; unless otherwise noted.

2. Section 270.30f–1 is revised to read as follows:

§ 270.30f–1. Applicability of Section 16 of the Exchange Act to Section 30(f).

(a) The filing of any statement prescribed under Section 16(a) of the Securities Exchange Act of 1934 shall satisfy the corresponding requirements of Section 30(f) of the Investment Company Act of 1940.

(b) The rules under Section 16 of the Securities Exchange Act of 1934 shall apply to any duty, liability or prohibition imposed with respect to a transaction involving any security of a registered closed-end company under Section 30(f) of the Act.

(c) No statements need be filed pursuant to Section 30(f) of the Act by an affiliated person of an investment adviser in his or her capacity as such if such person is solely an employee, other than an officer, of such investment adviser.

PART 274—FORMS PRESCRIBED UNDER THE INVESTMENT COMPANY ACT OF 1940

1. The authority citation for part 274 continues to read as follows:

Authority: The Investment Company Act of 1940, 15 U.S.C. 80a–1 *et seq.* * * *

2. By amending the instruction to sub-item 77Q of Form N–SAR (§ 274.101) to read as follows:

Note.—The text of Form N–SAR is not and this amendment will not be in the Code of Federal Regulations.

BILLING CODE 8010–01–M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Part 658

[FHWA Docket No. 89–20]

RIN 2125–AC35

Truck Size and Weight; National Network, Oregon

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of proposed rulemaking; request for comments.

SUMMARY: The FHWA proposes to modify the National Network for commercial motor vehicles by adding and deleting certain routes in Oregon. The National Network was established by the final rule on truck size and weight published at 49 FR 23302 June 5, 1984. It is maintained under 23 CFR part 658, Appendix A, as amended. The additions and deletions have been requested by the State of Oregon based on an evaluation concerning 53-foot long semitrailers.

DATES: Comments on this docket must be received on or before September 28, 1989.

ADDRESS: Submit written, signed comments, to FHWA Docket No. 89–20, Federal Highway Administration, HCC–10, 400 Seventh Street SW., Washington, DC 20590. All comments received will be available for examination at the above address between 8:30 a.m. and 3:30 p.m. ET, Monday through Friday, except legal holidays. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Mr. Richard A. Torbik, Office of Planning, (202) 366–0233, Mr. Philip W. Blow, Office of Motor Carrier Information Management and Analysis, (202) 366–4036, or Mr. David C. Oliver, Office of the Chief Counsel, (202) 366–1354, Federal Highway Administration, 400 Seventh Street SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., ET, Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION:

Background

The designated National Network on which commercial vehicles with the dimensions authorized by the Surface Transportation Assistance Act (STAA) of 1982, Public Law 97–424, 96 Stat. 2097, may operate, was first established by the final rule (23 CFR part 658) published in the Federal Register at 49 FR 23302, June 5, 1984. Routes on the National Network are listed or described by category in Appendix A of the rule. Additional routes not on the network but available for STAA vehicles have also been identified at State request.

Procedures for the addition and deletion of routes are outlined in 23 CFR 658.11. A number of revisions to the National Network have been completed or initiated by the FHWA in separate rulemaking actions. One such revision was a final rule for the State of Oregon published on June 5, 1989, at 54 FR 23976. Revisions may also be initiated by the States, or by others through the States.

The Oregon Department of Transportation, as the Governor's designee, has requested the addition of two route segments and the deletion of fifteen route segments on the National network. The request was the result of State evaluations of National Network routes with respect to 53-foot long semitrailers. On January 29, 1988, the FHWA published a rule in 23 CFR part 658, Appendix B (53 FR 2597) which established a grandfathered semitrailer length of 53 feet in Oregon.

Prior to the final rule on semitrailer lengths, Oregon had accepted its National Network (NN) routes on the basis of accommodating an STAA-authorized semitrailer with a 48-foot maximum length. Several of the route segments contain sharp curves and narrow lane widths which the State considered only marginally able to accommodate a 48-foot semitrailer.

The State evaluations of federally- and/or State-designated routes considered safety, availability of alternative routes, and the effects on interstate commerce, local industry and the environment. The adequacy of the geometrics and the operational characteristics of the route segments were also analyzed. Special attention was given to the effect of off-tracking on horizontal curves and the resulting intrusion of 53-foot semitrailers into the opposing lane when negotiating the sharper curves. The reviews not only identified NN route segments with safety problems, but also other segments that could safely accommodate all STAA-authorized vehicles.

Federal authority is required for the segments proposed for addition to accommodate grandfathered semitrailers because State law applicable to roads not on the NN restricts truck tractors and semitrailers to an overall length limit of 65 feet. The State has noted that segments proposed for the deletion would continue to be available to other STAA-authorized vehicles under State law.

Additions

The State has proposed the addition of two routes segments to the National Network. The FHWA worked closely with the State during the review of each segment. Some of the specific factors considered were accident rates, traffic volumes, horizontal curvature, grades, lane width, shoulder width, sight distance and network connectivity.

The first segment is an 18.5-mile segment of OR 35 between Baseline Road near Mt. Hood and US 26 Government Camp. Designation of this segment will place the entire length of OR 35 between I–84 Hood River and US 26 Government Camp on the National Network. This addition will provide a connection between two routes presently on the National Network.

The second addition is 69.3 miles of OR 140 between OR 62 White City and US 97 Klamath Falls. The proposed addition will connect OR 62 and US 97 that are presently on the National Network.

The FHWA has reviewed the route segments and finds that they will support safe operation of STAA authorized vehicles and increase the service provided. The FHWA therefore proposes the segments be added to the NN.

Deletions

Ten segments to be deleted have similar geometric features that could, under certain conditions, adversely affect safety. The two most significant features are sharp horizontal curvature and narrow lane width. A typical example of the review performed on each of the ten segments is the 49.8-mile segment of US 20 between Newport and Philomath. The segment contains 38 miles of the two-lane roadway with lane widths less than 12 feet, and 9 miles with lane widths of 9 feet. There are 80 horizontal curves sharper than 6 degrees. Of these, 65 are too sharp for the grandfathered 53-foot semitrailer to remain within its travel lane. On ten of the curves, the vehicles will intrude more than 4 feet into the opposing lane. The maximum intrusion on the segment is 7 feet 6 inches. The other segments have similar geometrics and numerous significant intrusions into the opposing lane of traffic. The ten segments are:

US 20—49.8 miles between Newport and Philomath;
US 26—47.6 miles between Prineville and Mitchell;
US 197—46.4 miles between The Dalles and Maupin;
US 395—90.3 miles between Pendleton and Long Creek;
OR 47—24.6 miles between Forest Grove and McMinnville;
OR 51—8.7 miles between Monmouth and Salem;
OR 82—71.4 miles between LaGrande and Joseph;
OR 99—24.1 miles between Ashland and I–5 north of Central Point;
OR 206—40.7 miles between Wasco and Condon; and
OR 206/207—34.2 miles between Heppner and Kinzua Road.

It appears that the geometrics on each segment are not adequate to support the safe operation of the longer semitrailers because of significant intrusions into the opposite lane on numerous horizontal curves.

The next five segments were proposed for deletion because they serve no significant interstate commerce or National Network purpose. Two of the segments connect to the National Network at one end only and do not connect to any State designated network at the other end. The two segments are:

US 101—9.3 miles between Tillamook and Beaver and
OR 62—16.4 miles between White City and Trail.

The third segment is 35.1 miles of US 101 between Gold Beach and the California State line. Neither end of this segment connects to the National Network or to any State designated route.

The fourth and fifth segments are both relatively short segments of US 30 that function as I–84 business routes through the center of Cascade Locks and Pendleton. Both segments are accessible to all STAA authorized vehicles under the State's reasonable access policy. The fourth segment is 2.0 miles in length at Cascade Locks and the fifth segment is 6.6 miles in length at Pendleton. The proposed rule would also clarify the terminus or OR 11 which has been at I–84 rather than US 30 in Pendleton.

The FHWA is proposing deletion of the segments at this time to gain benefit of public comment.

Regulatory Impact

The FHWA has considered the impacts of this rulemaking and has determined that it is not a major rulemaking action within the meaning of E.O. 12291 nor a significant rulemaking under the regulatory policies and procedures of the Department of Transportation (DOT). These determinations by the agency are based on the nature of the rulemaking. The FHWA has determined that this rulemaking would technically amend the June 5, 1984, the final rule by adding and deleting certain highway segments in accordance with statutory provisions. The impacts of the changes addressed in this rulemaking do not significantly alter the impacts fully considered in the original impact statement accompanying the June 5 rule. These segments represent a very small portion of the National Network, and the changes would have neglible impact on the prior system. Thus, no revised regulatory evaluation is needed. For the same reasons, and under the criteria of the Regulatory Flexibility Act, FHWA hereby certifies that this action does not have a significant economic impact on a substantial number of small entities.

Federalism

The FHWA has considered the "federalism" implications of this action in accordance with the principles and policymaking criteria of E.O. 12612, *Federalism*, of October 26, 1987. The Final Rule is in response to an application by the State. There are no adverse impacts on the State or significant intrusions into State authority as a result of this rulemaking.

The regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

Due to the limited subject matter of this document and the familiarity with the proposal by the interests in Oregon, a thirty (30) day public comment period is considered adequate.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

List of Subjects in 23 CFR Part 658

Grant programs—transportation, Highways and roads, Motor Carrier—size and weight.

Issued on: August 22, 1989.

Eugene R. McCormick,

Deputy Administrator.

In consideration of the foregoing, the FHWA proposes to amend chapter I of title 23, Code of Federal Regulations, by

amending Appendix A to part 658 for the State of Oregon to read as set forth below.

PART 658—[AMENDED]

1. The authority citation for 23 CFR Part 658 continues to read as follows:

Authority: Secs. 133, 411, 412, 413, and 416 of Pub. L. 97–424, 96 Stat. 2097 (23 U.S.C. 127; 49 U.S.C. app. 2311, 2313, and 2316), as amended by Pub. L. 98–17, 97 Stat. 59, and Pub. L. 98–554, 98 Stat. 2829; 23 U.S.C. 315; and 49 CFR 1.48.

Appendix A to Part 658—(Amended)

2. Appendix A to Part 658 is amended for the State of Oregon by removing the following Posted Route Number entries:

Route	From	To
OR 11	US 30 Pendleton	WA State Line.
OR 35	Baseline Road MP 82.11.	I–84 Hood River.

and inserting in their places the following:

Route	From	To
OR 11	I–84 Pendleton	WA State Line.
OR 35	US 26 Government Camp.	I–84 Hood River.

3. Appendix A to Part 658 is amended for the State of Oregon by adding at the end of the Oregon listing the Posted Route Number entry:

Route	From	To
OR 140	OR 62 White City	US 97 Klamath Falls.

4. Appendix A to part 658 is amended for the State of Oregon by removing the Posted Route Number entries:

Route	From	To
US 20	US 101 Newport	ECL Sweet Home.
US 26	US 101 Cannon Beach Junction.	Mitchell.
US 30	In Cascade Locks	
US 30	I–84 W. of Pendleton.	I–84 E. of Pendleton.
US 101	CA State Line	Gold Beach.
US 101	MP 75.54 N. of Beaver.	WA State Line.
US 197	OR 216 Maupin	WA State Line.
US 395	Long Creek	Pendleton.
OR 47	OR 99W near McMinnville.	US 26 N. of Banks.
OR 51	OR 99W Monmouth	OR 22 near Eola.
OR 62	Medford	Trail.
OR 82	I–84 La Grande	Joseph.
OR 99	Ashland	Central Point.
OR 206	US 97 Wasco	OR 19 Condon.
OR 207	US 730 Cold Springs Jct.	MP 23.56 Kinzua Rd.

and inserting in place of US 20, US 26, US 101, US 197, OR 47, OR 62 and OR 207 the following, respectively:

Route	From	To
US 20	OR 34 Philomath	ECL Sweet Home.
US 26	US 101 Cannon Beach Junction.	OR 126 Prineville.
US 101	OR 6 Tillamook	WA State Line.
US 197	I–84, The Dalles	WA State Line.
OR 47	OR 8 Forrest Grove	US 26 N. of Banks.
OR 62	Medford	OR 140 White City.
OR 207	US 730 Cold Springs Jct.	OR 74 S. Int. Heppner.

BILLING CODE 4910-22-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 89–366, RM–6824]

Radio Broadcasting Services; Knoxville, IA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition by Dominion Publishing, Inc., and Leighton Enterprises, Inc., requesting the substitution of Channel 221C3 for Channel 221A at Knoxville, Iowa, and the modification of their share-time Stations KTAV–FM and KRLS to specify the higher powered channel. Channel 221C3 can be allotted to Knoxville in compliance with the Commission's minimum distance separation requirements without the imposition of a site restriction. The coordinates for this allotment are North Latitude 41–19–12 and West Longitude 93–05–42. In accordance with Section 1.420 of the Commission's Rules, we will not accept competing expressions of interest in use of the channel at Knoxville or require that the petitioners demonstrate the availability of an additional equivalent channel for use by such parties.

DATES: Comments must be filed on or before October 16, 1989, and reply comments on or before October 31, 1989.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Jerry Miller, Esq., Miller & Fields, P.C., P.O. Box 33003, Washington, DC 20033 (Counsel to petitioners).

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 89–366, adopted August 7, 1989, and released August 23, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Vincent A. Pepper, Esq., Barbara R. Merlie, Esq., Pepper & Corazzini, 1776 K Street NW., Suite 200, Washington, DC 20006 (Counsel to Gillbro Communications).

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 89–365, adopted August 7, 1989, and released August 23, 1989. The full text of the Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

BILLING CODE 6712-01-M

---

47 CFR Part 73

[MM Docket No. 89–367, RM–6835]

Radio Broadcasting Services; Klondike, SC

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition by Sandlapper Broadcasting, seeking the allotment of Channel 253A to Klondike, South Carolina, as its first local FM service. Petitioner should provide community data to show that Klondike is a community for allotment purposes. Channel 253A can be allotted to Klondike in compliance with the Commission's minimum distance separation requirements without the imposition of a site restriction. The coordinates for this allotment are North Latitude 33–41–27 and West Longitude 79–07–05.

DATES: Comments must be filed on or before October 16 1989, and reply comments on or before October 31 1989.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Toni T. Rinehart, Sandlapper Broadcasting, 2557–E Mountain Lodge Circle, Birmingham, Alabama 35216 (Petitioner).

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 89–367, adopted August 7, 1989, and released August 23 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

---

47 CFR Part 73

[MM Docket No. 89–364, RM–6796]

Radio Broadcasting Services; Plantersville, SC

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition by Carocom Media seeking the allotment of Channel 253A to Plantersville, South Carolina, as its first local FM service. The Commission seeks additional information to determine whether Plantersville is a community for allotment purposes. Channel 253A can be allotted to Plantersville with a site restriction of 5.6 kilometers (3.4 miles) east to avoid a short-spacing to Station WWKT–FM, Channel 252A, Kingstree, South Carolina. The coordinates for this allotment are North Latitude 33–33–08 and West Longitude 79–09–11.

DATES: Comments must be filed on or before October 16, 1989, and reply comments on or before October 31, 1989.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: William J. Pennington, III, Carocom Media, 5519 Rockingham Road-East, Greensboro, NC 27407 (Petitioner).

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 89–364, adopted August 7, 1989, and released August 23, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 641

RIN 0648–AC16

Reef Fish Fishery of the Gulf of Mexico

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of availability of an amendment to a fishery management plan, three minority reports, and request for comments.

SUMMARY: NOA issues this notice that the Gulf of Mexico Fishery Management Council has submitted Amendment 1 to the Fishery Management Plan for the Reef Fish Fishery of the Gulf of Mexico (FMP) for Secretarial review and is requesting comments from the public.

DATE: Comments will be accepted until October 25, 1989.

ADDRESSES: Comments should be sent to William R. Turner, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, FL 33702. Mark envelope, "Reef Fish Amendment 1." Copies of Amendment 1 may be obtained from the Gulf of Mexico Fishery Management Council, 5401 West Kennedy Boulevard, Suite 881, Tampa, FL 33609.

FOR FURTHER INFORMATION CONTACT: William R. Turner, 813–893–3722.

SUPPLEMENTARY INFORMATION: The Magnuson Fishery Conservation and Management Act (Magnuson Act) requires that a council-prepared fishery management plan or amendment be submitted to the Secretary of Commerce (Secretary) for review and approval or disapproval. The Magnuson Act also requires that the Secretary, upon receiving the document, immediately publish a notice of its availability for public review and comment. The Secretary will consider public comments in determining approvability of the document.

Amendment 1 proposes extensive changes in the reef fish management structure primarily to restore diminished spawning stocks to a level equivalent to 20 percent of the biomass that would be available in the absence of fishing mortality. Red snapper, the single most important species in the reef fish complex, is severely overfished and on the verge of collapse, while certain other species of snappers and some of the groupers apparently are overfished but to a lesser degree. Amendment 1 contains a definition of overfishing as required by the revised guidelines for fishery management plans.

Specific measures that are proposed in the amendment would: (1) Eliminate the current exemptions to the size limit for red snapper; (2) establish size limits for other major species; (3) establish bag limits for red snapper, certain other snappers, groupers, and amberjack; (4) establish commercial quotas for red snapper, deep-water groupers, and shallow-water groupers; (5) place areal restrictions on the use of longline and buoy gear; (6) specify procedures for adjusting the total allowable catch, size limits, bag limits, and other restrictive measures on an annual basis; (7) modify permitting and reporting requirements for reef fish fishermen; (8) reduce the number of allowable fish traps per vessel; (9) eliminate entanglement nets; and, (10) extend the "stressed area" by adding coastal waters off Louisiana and Texas. Other changes are also proposed.

Three minority reports object to: (1) The prohibition of the retention and sale of undersized fish in certain instances; (2) the bag limits being applied to shrimp vessels; (3) the geographical extension of stressed areas; (4) the maximum number of persons aboard charter and headboats to fish commercially; (5) the commercial quota on groupers; (6) the prohibition of entangling nets; or (7) the 20-inch minimum size limit for red grouper. Regulations proposed by the Council to implement Amendment 1 are scheduled to be filed by September 10, 1989 for publication.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 23, 1989.

David S. Crestin,

Deputy Director, Office of Fishery Conservation and Management.

Federal Register
Vol. 54, No. 166
Tuesday, August 29, 1989

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

August 25, 1989.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Public Law 96–511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404–W Admin. Bldg., Washington, DC 20250, (202) 447–2118.

Forest Service

Environmental Impact Statement for the Proposed Threemile Timber Sale, Medicine Bow National Forest, Carbon County, WY

AGENCY: Forest Service, USDA.

ACTION: Extension of time period for public review of the Draft Environmental Impact Statement.

SUMMARY: Notice of filing a draft environmental impact statement (DEIS) for the Threemile Timber Sale was published in the **Federal Register** Vol. 54 No. 129 on July 7, 1989. Comments were due on September 1, 1989. The period for commenting is now extended 45 days until October 15, 1989. The extension has been granted to provide time for parties to review and formulate comments on the DEIS. In addition to extending the period for comments, open house meetings are scheduled for September 19, 1989 from 3:00 pm to 7:00 pm and on September 23 from 9:00 a.m. to 1:00 pm. Both meetings will be at the Holiday Inn in Laramie, Wyoming in the Ivinson Room.

DATE: Comments on the DEIS must be received by October 15, 1989.

ADDRESSES: Send written comments to the District Ranger, 605 Skyline Drive, Laramie, WY 82070.

FOR FURTHER INFORMATION CONTACT: Gary Rorvig, Laramie District Engineer (307) 745–8971.

Dated: August 21, 1989.

BILLING CODE 3510–24–M

International Trade Administration

United States-Canada Free-Trade Agreement, Article 1904 Binational Panel Reviews; Request for Panel Review

AGENCY: United States-Canada Free-Trade Agreement, Binational Secretariat, United States Section, International Trade Administration, Department of Commerce.

ACTION: Notice of First Request for Panel Review of Final Affirmative Countervailing Duty Determination Respecting Fresh, Chilled and Frozen Pork from Canada made by International Trade Administration, Import Administration, which was filed by the Canadian Pork Council and its members with the United States Section of the Binational Secretariat on August 22, 1989.

SUMMARY: On August 22, 1989, the Canadian Port Council and its members filed a Request for Panel Review with the United States Section of the Binational Secretariat pursuant to Article 1904 of the United States-Canada Free-Trade Agreement. Panel review was requested of the final affirmative countervailing duty determination respecting fresh, chilled and frozen pork from Canada, Import Administration file number C–122–807, issued by the International Trade Administration, Import Administration and published in 54 **Federal Register** 30774 on July 24, 1989. The Binational Secretariat has assigned Case Number USA–89–1904–06 to this Request for Panel Review. In addition to the first Request for Panel Review, requests have also been filed by the Canadian Meat Council and its members, Canada Packers, Inc., the Government of the Province of Alberta and the Government of Canada.

FOR FURTHER INFORMATION CONTACT: James R. Holbein, Acting U.S. Secretary, Binational Secretariat, Suite 4012, 14th and Constitution Avenue, Washington, DC 20230, (202) 377–5438.

SUPPLEMENTARY INFORMATION: Chapter 19 of the U.S.-Canada Free-Trade Agreement ("Agreement") establishes a mechanism for replacing domestic judicial review of final determinations in antidumping and countervailing duty cases involving imports from the other country with reveiw by independent binational panels. When a Request for Panel Review is filed, a panel will be established to act in place of national courts to expeditiously review the final determination to determine whether it conforms with the antidumping or countervailing duty law of the country that made the determination.

Under Article 1904 of the Agreement, which came into force on January 1, 1989, the Government of the United States and Government of Canada established Rules of Procedure for Article 1904 Binational Panel Reviews ("Rules"). These Rules were published in the **Federal Register** on December 30, 1988 (53 FR 53212). The panel review in this matter will be conducted in accordance with these Rules.

Rule 35(a) requires the Secretary to publish Notice of the receipt of a Request for Panel Review stating that a Request for Panel Review was filed with the United States Section of the Binational Secretariat on August 22, 1989, pursuant to Article 1904 of the Agreement.

Rule 35(1)(c) of the Rules provides that:

> (a) a Party or interested person may challenge the final determination n whole or in part by filing a Complaint in accordance with Rule 39 within 30 days after the filing of the first Request for Panel Review (the deadline for filing a Complaint is September 21, 1989);
>
> (b) a Party, investigating authority or interested person that does not file a Complaint may participate in the panel review by filing a Notice of Appearance in accordance with Rule 40 within 45 days after the filing of the first Request for Panel Review (the deadline for filing a Notice of Appearance is October 6, 1989); and
>
> (c) the panel review shall be limited to the allegations of error of fact or law, including the jurisdiction of the investigating authority, that are set out in the Complaints filed in the panel review and the procedural and substantive defenses raised in the panel review.

Dated: August 23, 1989.

James R. Holbein,
Acting U.S. Secretary, FTA Binational Secretariat

[FR Doc. 89–20307 Filed 8–28–89; 8:45 am]

BILLING CODE 3510–DA–M

National Oceanic and Atmospheric Administration

Endangered and Threatened Wildlife and Plants; Recovery Plans

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Notice of availability and request for comments.

SUMMARY: The Draft Hawaiian Sea Turtle Recovery Plan is available for review by interested parties prior to final approval and adoption by National Marine Fisheries Service (NMFS). The plan was developed by the Hawaiian Sea Turtle Recovery Team which was appointed in late 1985 by NMFS to develop a Recovery Plan for listed sea turtles found in Hawaiian waters. Membership included biologists and resource managers from NMFS, U.S. Fish and Wildlife Service, State of Hawaii Department of Land and Natural Resources, and academia.

DATES: Comments on the draft recovery plan must be received on or before October 30, 1989.

ADDRESSES: Comments should be addressed to E.C. Fullerton, Director, Southwest Region, National Marine Fisheries Service, 300 S. Ferry St., Terminal Island, CA 90731. Copies of the Draft Hawaiian Sea Turtle Recovery Plan are available upon request from James H. Lecky, Chief, Protected Species Management Branch, Southwest Region, National Marine Fisheries Service, 300 S. Ferry St. Terminal Island, CA 90731 or Eugene T. Nitta, Protected Species Management Branch, Pacific Area Office, Southwest Region National Marine Fisheries Service, 2570 Dole St., Honolulu, HI 96822–2396.

FOR FURTHER INFORMATION CONTACT: James H. Lecky or Eugene T. Nitta at the addresses above.

SUPPLEMENTARY INFORMATION: The Endangered Species Act of 1973 (ESA; 16 U.S.C. 1531 et seq.) requires that the agencies responsible for listed species develop and implement recovery plans for the conservation and survival of threatened and endangered species, unless it is determined that such plans will not promote the conservation of the species. Accordingly, NMFS appointed an interagency Hawaiian Sea Turtle Recovery Team which developed a Draft Hawaiian Sea Turtle Recovery Plan. The Plan has been reviewed by many outside agencies and individuals for technical content. Priority needs for research that will support sound management actions for the conservation and enhancement of listed sea turtles in Hawaii and their habitat are outlined in the Draft Recovery Plan. Where research and/or management activities are ongoing, specific agencies have been identified as lead or cooperating agencies.

The Draft Recovery Plan ultimately is intended as a guide for those entities responsible for research, conservation, education and information, enforcement, and management to consider sea turtle

recovery issues in their operations or as

Insert: "Add 5810.10.0000—

recommendations with respect thereto,

recovery issues in their operations or as part of their priority activities in future agency actions. One of the 1988 amendments to the ESA required "* * * estimates of the time required and the cost to carry out those measures needed to achieve the plan's goal and to achieve intermediate steps toward that goal." Funding and resource allocations are now included in the Draft Plan as an appendix.

Dated: August 23, 1989.

Morris M. Pallozzi,

Director, Office of Enforcement.

BILLING CODE 3510-DR-M

DEPARTMENT OF EDUCATION

Meeting of National Council on Vocational Education

AGENCY: National Council on Vocational Education.

ACTION: Notice of Public Meeting of the National Council on Vocational Education.

SUMMARY: This notice sets forth the proposed agenda of a forthcoming meeting of the National Council on Vocational Education. It also describes the functions of the Council. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act, and is intended to notify the general public of its opportunity to attend.

DATE: September 17, 1989—7:00 PM to 9:00 PM, September 18, 1989—9:30 AM to 4:00 PM.

ADDRESS: Embassy Suites Hotel, 1250 22nd Street, NW., Washington, DC 20037.

Location: September 17, 1989—Chairman Farley's Suite, September 18, 1989—Ambassador Room, (202) 857-3388.

SUPPLEMENTARY INFORMATION: The National Council on Vocational Education is established under Section 104 of the Vocational Education Amendments of 1968, Public Law 90-576.

The Council is established to:

(A) Advise the President, the Congress, and the Secretary of Education concerning the administration of, preparation of general regulations for, and operation of, vocational education programs supported with assistance under this title;

(B) Review the administration and operation of vocational education programs under this title, including the effectiveness of such programs in meeting the purposes for which they are established and operated, make recommendations with respect thereto, and make annual reports of its findings and recommendations (including recommendations for changes in the provisions of this title) to the Secretary for transmittal to Congress; and

(C) Conduct independent evaluations of programs carried out under this title and publish and distribute the results thereof.

Agenda: The proposed agenda will include:

September 17, 1989, Briefing and Updating of the Council Initiatives, Budget Report, Awards Report, Newsletter and Council materials, Briefing on the JTPA Amendments.

September 18, 1989, Discussions on the following: National Awareness Campaign, Occupational Competency, Annual Report, Reauthorization, Future Initiatives.

FOR FURTHER INFORMATION CONTACT: Dr. Joyce Winterton, Executive Director, 330 C Street, SW., MES—Suite 4080, Washington, DC 20202-7580, (202) 732-1684.

Records are kept of all Council proceedings, and are available for public inspection at the above address from the hours of 9:00 a.m. to 4:30 p.m.

Signed at Washington, DC, August 23, 1989

Joyce Winterton,

Executive Director.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Financial Assistance Award; Intent To Award Grant to Humbug Mountain Research Laboratories

AGENCY: Department of Energy.

ACTION: Notice of unsolicited financial assistance award.

SUMMARY: The Department of Energy announces that pursuant to 10 CFR 600.14, it is making a financial assistance award based on an unsolicited application under Grant Number DE-FG01-89CE15453 to Humbug Mountain Research Laboratories.

SCOPE: The funding for this grant will support the continuing research in the development of software for controlling the generation of the sound waves, the measurements and identification of the resonance frequencies, the upgrading of the electronic circuitry and laboratory testing to calibrate readings against measured particulate flows.

ELIGIBILITY: Based on acceptance of an unsolicited application, eligibility of this grant award is being limited to Humbug Mountain Research Laboratories, who has developed the technology, a method of using resonance shifts in sound waves as a mean of measuring quantities of solids, suspended in air or similar fluids, flowing through pipelines. The project is of high technical merit, representing an innovative technology which has a strong possibility of allowing for future reduction in the nation's energy consumption.

The term of this grant shall be two years from the effective date of award.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Office of Procurement Operations, ATTN: Calvin Lee, MA-453.2, 1000 Independence Avenue, SW., Washington, DC 20585.

BILLING CODE 6450-01-M

Financial Assistance Award; Intent To Award Grant to Sanford & Russell, Inc.

AGENCY: Department of Energy.

ACTION: Notice of unsolicited financial assistance award

SUMMARY: The Department of Energy announces that pursuant to 10 CFR 600.14, it is making a financial assistance award based on an unsolicited application under Grant Number DE-FG01-89CE15436 to Sanford & Russell, Inc.

SCOPE: The funding for this grant will support the building and loop testing of six prototype drilling devices, which have the potential to prevent most blowouts in oil wells, thus saving oil from being wasted and preventing damage to the environment.

ELIGIBILITY: Based on acceptance of an unsolicited application, eligibility of this grant award is being limited to Sanford & Russell, Inc. who has high qualification in building, testing and analyzing tests results of prototype drilling devices. The project will allow Sanford & Russell, Inc. to test the drilling devices downhole with cooperating drilling companies. In addition, this is a project with a high technical merit, representing an innovative technology that has a strong possibility of adding to the national energy resources.

The term of this grant shall be two years from the effective date of award.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Office of Procurement Operations, ATTN: Calvin Lee, MA-453.2, 1000 Independence Avenue, SW., Washington, DC 20585.

Thomas S. Keefe,

BILLING CODE 6450-01-M

Financial Assistance Award; Intent To Award Grant to Michael Gondouin, S-Cal Research Corporation

AGENCY: Department of Energy.

ACTION: Notice of unsolicited financial assistance award.

SUMMARY: The Department of Energy announces that pursuant to 10 CFR 600.14, it is making a financial assistance award based on an unsolicited application under Grant Number DE-FG01-89CE15446.

SCOPE: The funding for this grant will support the conceptual engineering of a downhole catalytic converter which will be used to estimate the facilities for a specific location, the West Sak heavy oil reservoir on the north slope of Alaska.

ELIGIBILITY: Based on acceptance of an unsolicited application, eligibility of this grant award is being limited to Michael Gondouin, S-Cal Research Corporation, who has developed a process for recovering Viscous (Heavy) Oils from Deep Underground Formations and thereby has gained valuable experience in researching heavy oil exploration. This project will allow Michael Gondouin, S-Cal Research Corporation, to continue his research and improve upon the current technology that has the potential on a global scale to unlock the recovery of several trillion barrels of oil that is not economically recoverable now.

The term of this grant shall be for 24-months from the effective date of award.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Office of Procurement Operations, ATTN: Lisa Tillman, MA-453.2, 1000 Independence Avenue, SW., Washington, DC 20585.

Thomas S. Keefe,

Director, Contact Operations Division "B" Office of Procurement Operations.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER89-609-000 et al.]

Vermont Electric Power Company, Inc., et al.; Electric Rate, Small power production, and Interlocking Directorate filings

Take notice that the following filings have been made with the Commission:

1. Vermont Electric Power Company, Inc.

[Docket No. ER89-609-000]

August 18, 1989.

Take notice that on August 16, 1989, Vermont Electric Power Company, Inc. (VELCO) tendered for filing a revised Exhibit A (as to Citizens Utilities Company only) to VELCO Power Purchase Agreement, dated as of June 1, 1981, FERC Rate Schedule No. 234. The revised exhibit A authorizes VELCO to acquire energy for Citizens Utilities from Niagara Mohawk Corporation under the Agreement between Niagara Mohawk Corporation and VELCO, dated as of February 1, 1983, when such energy is available and when Citizens Utilities determines that it is economic.

VELCO proposes that the revision become effective on August 16, 1989. VELCO requests a waiver of the Commission's regulations to allow the filing to become effective as of that date. If the waiver is granted, VELCO states that there will be no adverse effect upon any of VELCO's customers. If the waiver is not granted, VELCO requests that the filing become effective on October 16, 1989, or on such other date as the Commission deems appropriate.

VELCO states that it has served the filing upon Citizens Utilities Company and upon the Vermont Public Service Board and the Vermont Department of Public Service.

Comment date: September 1, 1989, in accordance with the Standard Paragraph E at the end of this notice.

2. Amoco Corporation

[Docket No. QF89-305-000]

August 18, 1989.

On August 3, 1989, Amoco Corporation (Applicant), of Warrenville Road and Mill Street, Naperville, Illinois 60566, submitted for filing an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Naperville, Illinois. The facility will consist of a combustion turbine generator and a heat recovery steam generator equipped with supplementary firing. Thermal energy recovered from the facility will be utilized for space heating and cooling and for research processes in the Amoco Research Center. The electric power production capacity of the facility will be 8,300 kW. The primary source of energy will be natural gas. Construction of the facility is scheduled to begin approximately January 1990.

Comment date: Thirty days from publication in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

3. Blackstone Valley Electric Company

[Docket No. ER89-606-000]

August 18, 1989.

Take notice that on August 16, 1989, Blackstone Valley Electric Company (BVE) tendered for filing Supplement No. 1 to Rate Schedule No. 28 in the form of an Amended and Restated Interconnection Agreement between itself, Ocean State Power (OSP) and Ocean State Power II (OSP II). This Agreement provides for construction, ownership and payment for facilities to be built in order to interconnect the generating station of the Ocean State Power Projects (the Project) to BVE's transmission facilities (the Interconnection Facilities). The Agreement provides that, upon the commencement of commercial operation of the second unit, OSP shall pay one hundred (100) percent of the yearly cost of service for the Interconnection Facilities. Upon the commencement of commercial operation of the second unit, OSP and OSP II shall each pay fifty (50) percent of the yearly cost of service for the Interconnection Facilities. The Agreement does not constitute a rate increase.

Comment date: September 1, 1989, in accordance with Standard Paragraph E end of this notice.

4. Kentucky Utilities Company

[Docket No. ER89-610-000]

August 18, 1989.

Take notice that on August 17, 1989, Kentucky Utilities Company (KU) tendered for filing a new Agreement dated September 1, 1989 between KU and Big Rivers Electric Corporation (BR).

The new Agreement is intended to replace in its entirety the presently effective Agreement between KU and BR. The new Agreement contains proposed reciprocal Service Schedules for Emergency Energy, Economy Energy, Short-Term Power, Firm Power and Non Displacement Energy.

Copies of this filing have been sent to the Big Rivers Electric Corporation and the Kentucky Public Service Commission.

Comment date: September 5, 1989, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs:

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public insection.

Lois D. Cashell,

Secretary.

[FR Doc. 89-20253 Filed 8-28-89; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 1957-003 Wisconsin]

Wisconsin Public Service Corp.; Availability of Environmental Assessment

August 22, 1989.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for minor license for the existing Otter Rapids Hydroelectric Project located on the Wisconsin River near Eagle River in Vilas and Oneida Counties, Wisconsin and has prepared an Environmental Assessment (EA) for the proposed project. In the EA, the Commission's staff has analyzed the environmental impacts of the project and has concluded that approval of a new license for the project, with appropriate enhancement measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, Room 1000, of the Commission's offices at 825 North Capitol Street, NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

[FR Doc. 89-20257 Filed 8-28-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP89-1958-000 et al.]

Northwest Pipeline Corp., et al.; Natural gas certificate filings

Take notice that the following filings have been made with the Commission:

1. Northwest Pipeline Corporation

[Docket No. CP89-1958-000]

August 18, 1989.

Take notice that on August 16, 1989, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89-1958-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Exxon Corporation (Exxon), a producer, under the blanket certificate issued in Docket No. CP86-578-000, pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Northwest states that pursuant to a transportation agreement dated February 10, 1988, as amended, under its Rate Schedule TI-1, it proposes to transport up to 200,000 MMBtu per day equivalent of natural gas for Exxon. Northwest states that it would transport the gas through its system from any transportation receipt point on its system to any transportation delivery point on its system, as defined in the December 5, 1988, amendment.

Northwest advises that service under § 284.223(a) commenced July 1, 1989, as reported in Docket No. ST89-4401 (filed August 4, 1989). Northwest further advises that it would transport 1,200 MMBtu on an average day and 438, MMBtu annually.

Comment Date: October 2, 1989, in accordance with Standard Paragraph G at the end of this notice.

2. Northern Natural Gas Company, Division of Enron Corp. Enron Gas Processing Company and Enron NGL Processing Limited Partnership

[Docket Nos. CP61-132-001 and CP68-5-003]

August 18, 1989.

Take notice that on August 17, 1989, Northern Natural Gas Company, Division of Enron Corp. (Northern), Enron Gas Processing Company (EGP), and Enron NGL Processing Limited Partnership (EPP), all at 1400 Smith Street, Houston, Texas 77002, together referred to as Applicants, filed in the above referenced dockets, pursuant to section 7(c) of the Natural Gas Act their application to amend the certificates of public convenience and necessity issued in Docket No. CP61-132, as amended, and CP68-5, as amended, authorizing the exchange of gas between Northern and EGP, to reflect EPP, the prospective successor to EGP, as the participant in the authorized exchanges with Northern, all as more fully set forth in the petition to amend, which is on file with the Commission and open to public inspection.

Applicants indicate that by orders issued on August 31, 1987, and September 28, 1987, in Docket Nos. CP68-5-002 and CP61-132-001, respectively, Northern and EGP were authorized to exchange gas at the trilgates of EGP's hydrocarbon and ethane plants located at Bushton, Kansas, in order to permit EGP to reimburse Northern in kind for volumes lost in EGP's gas processing operations due to fuel and shrinkage.

EPG states that it plans to transfer its interest in such plants, subject to approval of the Securities and Exchange Commission, to EPP. Applicants indicate that to reflect the change of ownership they request that the certificates authorizing the exchanges be amended to reflect EPP rather EGP as the holder of the certificates with Northern. No other changes are proposed.

Comment date: September 8, 1989, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

3. Texas Gas Transmission Corporation

[Docket No. CP89-1954-000]

August 21, 1989.

Take notice that on August 15, 1989, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89-1954-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to provide transportation on behalf of Transco Energy Marketing Company (TEMCO) under Texas Gas' blanket certificate issued in Docket No. CP88-686-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Texas Gas requests authorization to transport, on an interruptible basis, up to a maximum of 75,000 MMBtu of natural gas per day for TEMCO from receipt points located in Arkansas, Illinois, Indiana, Kentucky, Louisiana, offshore Louisiana, Ohio, Texas and offshore Texas to delivery points located in Louisiana. Texas Gas anticipates transporting, on an average day 75,000 MMBtu and an annual volume of 27,375,000 MMBtu.

Texas Gas states that the transportation of natural gas for TEMCO commenced July 1, 1989, as reported in ST89-4202-000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations and the blanket certificate issued to Texas Gas in Docket No. CP88-686-000.

Comment date: October 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

4. Texas Gas Transmission Corporation

[Docket No. CP89-1955-000]

August 21, 1989.

Take notice that on August 15, 1989, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89-1955-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to provide an interruptible transportation service for American Central Gas Marketing Company (American Central), under Texas Gas' blanket certificate issued in Docket No. CP88-686-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Texas Gas requests authorization to transport on a peak day up to 100,000 MMBtu equivalent of natural gas for American Central, with an estimated average daily quantity of 50,000 MMBtu. It is stated that on an annual basis, American Central estimates a volume of 18,250,000 MMBtu equivalent of natural gas.

Texas Gas states that transportation service for American Central commenced July 1, 1989, under the 120-day automatic provisions of § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89-4203.

Comment date: October 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

5. United Gas Pipe Line Company

[Docket No. CP89-1965-000]

August 21, 1989.

Take notice that on August 16, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas, filed in Docket No. CP89-1965-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide interruptible transportation service on behalf of Graham Energy Marketing Corporation (Graham) a marketer of natural gas, under United's blanket certificate issued in Docket No. CP88-6, all as more fully set forth in the request which is one file with the Commission and open to public inspection.

United states that it proposes to transport 123,600 MMBtu on a peak day, 123,600 MMBtu on an average day, and 45,114,000 MMBtu on an annual basis of natural gas on behalf of Graham, and that service pursuant to § 284.223(a) of the Commission's Regulations commenced July 6, 1989, as reported in Docket No. ST89-4262.

Comment date: October 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

6. Tennessee Gas Pipeline Company

[Docket No. CP89-1956-000]

August 21, 1989.

Take notice that on August 16, 1989, Tennessee Gas Pipeline Company, (Applicant), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP89-1956-000 a request pursuant to § 157.205 and 284.223 of the Commission's Regulations for authorization to provide a transportation service for General Refractories Company (General) under Applicant's blanket certificate issued in Docket No. CP87-115-000 on June 18, 1987, pursuant to section 7(c) of the Natural Gas Act, all as more fully set out in the request on file with the Commission and open to public inspection.

Applicant states that pursuant to a transportation agreement dated June 5, 1989, it proposes to transport natural gas for General, from points of receipt located offshore Louisiana, offshore Texas, and the States of Louisiana, Mississippi, Texas, New York, and Alabama for redelivery to City of Grayson, Kentucky. The City of Grayson will deliver to the General plant.

The applicant further states that the maximum daily quantity is 3,000

dekatherms under the contract. Service

Comment date: October 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

7. Florida Gas Transmission Company

[Docket Nos. CP88-179-015, CP74-192-012, CP86-704-003]

August 21, 1989.

Take notice that on August 8, 1989,[1] Florida Gas Transmission Company (FGT), 1400 Smith Street, Houston, Texas 77002, filed in Docket Nos. CP88-179-015, CP74-192-012, and CP86-704-003, (Docket No. CP88-179-015, *et al.*) an amendment to its pending applications in Docket Nos. CP88-179-012 *et al.*, (Phase II Settlement) and Docket No. CP88-179-013 (January 13th Amendment) pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for a certificate of public convenience and necessity requesting (1) an allocation of existing capacity (Phase I capacity), an allocation of it proposed expended capacity (Phase II capacity) and (2) revisions to FGT's proposed construction of Phase II facilities all as more fully set forth in the amendment on file with the Commission and open to public inspection.

FGT states that on October 30, 1987, it submitted the Phase II Settlement[2] and a related amended certificate filing in Docket Nos. CP88-179-012, CP74-192-011 and CP86-704-002 which addressed two central issues: (1) the justification for the proposed facilities which would expand FGT's peak day capacity up to approximately 925,000 Mcf per day (Phase II expansion) and (2) the restructuring of contractual relationships with its customers in order to offer an expansion of its services.

Subsequently, FGT states that on January 13, 1989, that it filed the following four interrelated filings (1) the January 13th Amendment in which it proposed an allocation of Phase I capacity, nominations of annual volumetric entitlements to existing customers, to initiate new small services under proposed Rate Schedule SGS, and other revisions to its FERC Gas Tariff, (2) Docket No. RP89-50-000 in which it proposed a general cost of service rate increase pursuant to section 4(e) of the Natural Gas Act, (3) Docket No. CP89-555-000 in which it requested a blanket transportation certificate under the Commission's Order Nos. 436 and 500, and (4) Docket No. CP89-556-000 in which it requested a blanket certificate to make interruptible sales for resale to others. FGT asserted that these four filings were interrelated, and conditioned its willingness to accept the requested blanket transportation certificate in Docket No. CP89-555-000 on the approval of all four applications.[3]

FGT hereby amends its January 13th Amendment so as to request authorization to provide sales for resale service through its existing Phase I capacity under Rate Schedules G, I, and SGS at the levels of service which are summarized for each customer in Exhibit I to Docket No. CP88-179-015, *et al.* FGT also requests authorization to utilize its transmission facilities to effectuate deliveries of direct sales volumes through its existing Phase I capacity at the levels which are summarized for each direct customer in Exhibit I.

FGT hereby amends the Phase II Settlement and its proposals therein to provide sales for resale service through its proposed Phase II capacity under Rate Schedules G, SGS, and I at the levels of service which are summarized for each customer in Exhibit I to Docket No. CP88-179-015, *et al.* FGT also requests certificate authority to effectuate deliveries of direct sales volumes through its proposed Phase II capacity at the levels which are summarized for each direct customer in Exhibit I. FGT requests that such authority be pregranted so as to become effective upon the in-service date of the proposed Phase II facilities.

FGT states that it would provide firm transportation services under Rate Schedule FTS-1 for shippers pursuant to the blanket certificate FGT requested in Docket No. CP89-555-000. FGT notes that the levels of firm transportation services for firm shippers are also shown in Exhibit I of Docket No. CP88-179-015 *et al.* FGT further explains that the levels of transportation service reflect only incremental levels of firm service and not initial conversion from sales to transportation service. FGT explains that it would effectuate first year conversions which would be elected by the firm and preferred interruptible sales customers listed in Exhibit I pursuant to the proposed Section 16A of the General Terms and Conditions to FGT's FERC Gas Tariff, included in Exhibit P of the January 13th Amendment.

FGT requests authorization to modify the facilities which were proposed in the Phase II Settlement and the related certificate filing. FGT states that its facility modification would eliminate (1) approximately 114.3 miles of looping on delivery laterals in the State of Florida, (2) the 625 horsepower compressor unit a Station No. 33 on the existing Sarasota Lateral, (3) various meter station upgrades and (4) the construction of a new meter station for the delivery of volumes to FPL Energy Services Inc. FGT notes that Exhibit K in Docket No. CP88-179-015, *et al.* sets forth details on the construction and the related costs which FGT now proposes to construct. As shown in Exhibit K, FGT proposes to construct the following lateral lines: (1) Reedy Creek Lateral—6.4 miles of 6-inch line, (2) St. Petersburg Lateral—10.6 miles of 8-inch line, (3) Panama City/Port St. Joe Laterlas—0.1 mile of 6-inch line and 8.0 miles of 6-inch line (4) Lake City Lateral—7.1 miles of 4-inch line, (5) Port Everglades Lateral—5.4 miles and .9 mile of 16-inch and 18-inch line, (6) Marianna Lateral—3.1 miles of 4-inch line. FGT propose to modify its request to install 2,000 horsepower units at its mainline Compressor Station Nos. 3, 9, 10, 11, 14, 17, 18 and 20. FGT now proposes to install 2,400 horsepower units at each of these stations. FGT asserts that the addition of the 2,400 horsepower units would have a negligible impact on FGT's proposed Phase II design day capacity of 925,000 Mcf.

It is also noted that FGT's Exhibit K in Docket No. CP88-179-015 *et al.* summarizes the proposals for various meter station revisions. It is also noted in Exhibit K that upon Commission authorization FGT would still install an additional 4,000 horsepower of compression at each of its Compressor Station Nos. 12, 15, and 16, an additional 5,000 horsepower of compression at Compressor Station No. 19, and certain piping modification at Compressor Station No. 8.

FGT estimates that the total cost of construction for all of the proposed facilities, as modified above, would be $90,000,000. Further FGT estimates $21,251,900 would be for the construction of the lateral lines and various meter upgrades. FGT states that it is hereby withdrawing its request which was proposed as part of the Phase II Settlement to waive Section 14 of its General Terms and Conditions of its FERC Gas Tariff. Such waiver would have permitted FGT to treat the costs of constructing the delivery lateral expansions on a rolled-in basis for both accounting and rate purposes. Instead, FGT proposes herein to collect a contribution-in-aid of construction from customers receiving new or increased firm service through such facilities.

FGT states that it has contracted with Florida Power & Light Company (FPL) for firm transportation service under Rate Schedule T-4, which was proposed as part of the Phase II Settlement. Further, FGT states that the January 13th Amendment proposed that FPL would have the option to elect to cancel the gas transportation agreement underlying Rate Schedule T-4 and receive alternative service under the proposed Rate Schedule FTS-1. FGT indicates that it would make an additional filing to withdraw its request for authorization of Rate Schedule T-4 in the event FPL makes such election.

Comment date: September 11, 1989, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

8. United Gas Pipe Line Company

[Docket No. CP89-1963-000]

August 21, 1989.

Take notice that on August 16, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP89-1963-000 a request pursuant to Section 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of Conoco, Inc. (Conoco), a marketer of natural gas acting as agent for E.I. Dupont de Nemours and Company, under United's blanket certificate issued in Docket No. CP88-6-000, pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United proposes to transport on an interruptible basis up to 3,090 MMBtu equivalent of natural gas on a peak day, 3,090 MMBtu equivalent on an average day, and 1,127,850 MMBtu equivalent on an annual basis. It is stated that United would receive the gas for Conoco's account at designated points on United's system in Louisiana and Mississippi and would deliver equivalent volumes at designated points on United's system in Louisiana and Alabama. It is asserted that the transportation service would be effected utilizing existing facilities and would not require any construction of additional facilities. It is explained that the transportation service commenced June 29, 1989, as reported in Docket No. ST89-4260.

Comment date: October 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

9. Natural Gas Pipeline Company of America

[Docket No. CP89-1966-000]

August 21, 1989.

Take notice that on August 17, 1989, Natural Gas Pipeline Company of America (Natural), 701 East 22nd Street, Lombard, Illinois, 60148, filed in Docket No. CP89-1966-000 a request pursuant to the notice procedure in Sections 157.205 and 284.223(b) of the Commission's Regulations for authorization to transport, on an interruptible basis, up to a maximum of 250,000 MMBtu (plus any additional volumes accepted pursuant to the overrun provisions of Natural's Rate Schedule ITS) for V.H.C. Gas Systems, L.P. (V.H.C.), a marketer of natural gas. The receipt points are located in New Mexico, Texas, Colorado, Oklahoma, Illinois, Louisiana, Nebraska, Arkansas, Kansas and Iowa and the delivery points are located in Texas, Louisiana, New Mexico, Illinois, Oklahoma, Missouri, Arkansas, Iowa, Kansas and Nebraska. Transportation would be performed under Natural's blanket certificate issued in Docket No. CP86-582-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Natural commenced the transportation of natural gas for V.H.C. on June 1, 1989 at Docket No. ST89-4492-000 for a one hundred and twenty (120) day period ending September 29, 1989, pursuant to § 284.223(a)(1) of the Commission's Regulations and the blanket certificate issued to Natural in Docket No. CP86-582-000. Natural proposes to continue this service in accordance with §§ 284.221 and 284.223(b).

Comment date: October 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

10. Indiana Ohio Pipeline Company

[Docket No. CP88-178-001]

August 21, 1989.

Take notice that on August 15, 1989, Indiana Ohio Pipeline Company (Indiana Ohio) P.O. Box 1642, Houston, Texas 77251-1642, filed a request with the Commission in Docket No. CP88-178-001. In Docket No. CP88-178-001, Indiana Ohio filed an application which requested, *inter alia*, Commission authorization to construct 110 miles of 20-inch pipeline from Panhandle Eastern Pipe Line Company's (Panhandle) to the pipeline facilities of Texas Eastern Transmission Corporation (TETCO) in Warren County, Ohio. Subsequently, Indiana Ohio has determined that a 30-inch pipeline would be economically and environmentally superior, all as more fully set forth in the request which is on file with the Commission and open for public inspection.

Specifically, Indiana Ohio has requested authorization to install a 30-inch pipeline in lieu of the 20-inch pipeline initially proposed in the above referenced proceeding. Indiana Ohio states that the 200 MMcf/d design capacity of the pipeline will not be affected since the 30-inch line will not require construction of the approximately 6,000 horsepower compression originally proposed. Additionally, Indiana Ohio has made certain minor modifications to the route of its proposed pipeline.

Comment date: September 11, 1989, in accordance with Standard Paragraph F at the end of this notice.

11. Columbia Gas Transmission Corporation

[Docket No. CP89-1929-000]

August 21, 1989.

Take notice that on August 9, 1989, Columbia Gas Transmission Corporation (Columbia), 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314 filed in Docket No. CP89-1929-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Columbia to construct and operate 18,950 horsepower of compression and 66.0 miles of pipeline loop at a total estimated cost of $101 million, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, Columbia proposes to construct and operate the following facilities:

Facilities for November 1, 1990 Service

(1) A 4,000 HP unit addition to the existing Eagle Compressor Station located in Chester County, Pennsylvania.

(2) A 4,000 HP unit addition to the existing Lost River Compressor Station located in Hardy County, West Virginia.

---

[1] The application was tendered for filing on July 31, 1989; however, the fee required by § 381.207 of the Commission's Rules (18 CFR 381.207) was not paid until August 8, 1989. § 385.103 of the Commission's Rules provides that the filing date is the date on which the fee is paid.

[2] It is noted that on February 22, 1988, (42 FERC ¶63,022) the presiding law judge issued an order certifying that the Phase II Settlement was uncontested. It is further noted that the Phase II Settlement and the related proposals therein are pending Commission.

[3] It is noted that the Commission's May 26, 1989, order in Docket Nos. CP88-179-013, CP89-555-000, CP89-556-000 and RP89-50-000 (47 FERC ¶ 61,280) consolidated the certificate filings into the ongoing formal hearing previously established for Docket No. RP89-50-000. It is further noted, that the Commission did not consolidate FGT's Phase II Settlement with the formal hearing proceeding set forth in Docket No. RP89-50-000, *et al.*

(3) Three 3,200 HP units at the existing Bickers Compressor Station site located in Greene County, Virginia.

(4) Approximately 8.4 miles of 24-inch pipeline loop located in Bedford and Fulton Counties, Pennsylvania.

(5) Approximately 3.7 miles of 24-inch pipeline loop located in Adams County, Pennsylvania.

(6) Approximately 7.7 miles of 36-inch pipeline loop located in Randolph County, West Virginia.

(7) Approximately 8.9 miles of 36-inch pipeline loop located in Randolph County, West Virginia.

(8) Approximately 11.2 miles of 26-inch pipeline loop located in Braxton, Webster, Lewis and Upshur Counties, West Virginia.[1]

(9) Approximately 3.1 miles of 36-inch pipeline loop located in Warren County, Virginia.

(10) Approximately 8.5 miles of 36-inch pipeline loop located in Kanawha and Clay Counties, West Virginia.

Facilities for November 1, 1991 Service

(11) Approximately 7.2 miles of 24-inch pipeline loop located in Fayette and Greene Counties, Pennsylvania.

(12) Approximately 7.3 miles of 24-inch pipeline loop located in Lancaster County, Pennsylvania.

(13) A 1,350 HP unit addition to the existing Gettysburg Compressor Station located in Adams County, Pennsylvania.

Columbia states that the facilities proposed will provide it with the capacity to provide 231,918 Dt/d of additional firm services for certain of its customers, as follows:

Class of service	Quantity (Dt/d)	
	11/1/90	11/1/91
Contract demand service (CDS):		
Commonwealth Gas Services, Inc. (East)	1,631	
Eastern Shore Natural Gas Co.	1,309	
Orange & Rockland Utilities, Inc.	23,000	
Virginia Natural Gas Co.	10,000	
Total CDS	35,940	
Firm transportation service (FTS):		
Allied-Signal, Inc.	15,000	
Bluefield Gas Company	1,540	
City of Charlottesville, VA	3,299	
City of Richmond, VA	5,120	
Commonwealth Gas Services, Inc. (East)	8,401	
Commonwealth Gas Services, Inc. (West) [1]	2,610	
Penn Fuel Gas, Inc.	1,777	
Roanoke Gas Co.	5,500	
South Jersey Gas Co.	10,022	
UGI Corporation	20,000	
Virginia Natural Gas Co.	11,140	
Washington Gas Light Co.	36,100	
Bethlehem Steel Company	15,500	
General Motors Corporation	4,500	
Total FTS	140,509	
Winter service (WS):		
Commonwealth Gas Services, Inc. (East)	9,499	
Eastern Shore Natural Gas Co.	6,832	
Total WS	16,331	
Firm storage service (FSS):		
City of Charlottesville, VA	800	1,450
City of Richmond, VA		4,729
Commonwealth Gas Services, Inc. (East)	6,522	
Commonwealth Gas Services, Inc. (West) [1]	143	
Delmarva Power & Light Co.	5,040	2,070
Eastern Shore Natural Gas Co.	800	200
Roanoke Gas Co.	2,107	1,777
South Jersey Gas Co.	5,400	2,100
Total FSS	28,812	12,326

[1] Effective July 1, 1989, Columbia Gas of Virginia, Inc. was merged into Commonwealth Gas Services, Inc. The service area of Columbia Gas of Virginia, Inc. will be operated by Commonwealth Gas Services, Inc. as Commonwealth Gas Services, Inc. (West).

Columbia states that the additional firm natural gas services are pursuant to and in implementation of the Stipulation and Agreement filed with the Commission in Docket No. RP86–168–000, *et al.*, on June 29, 1989, and the Commission has been requested to approve the Stipulation and Agreement to be effective November 1, 1989.

Comment date: September 11, 1989, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

12. United Gas Pipe Line Company

[Docket No. CP89–1959–000]

August 21, 1989.

Take notice that on August 18, 1989, United Gas Pipe Line Company (United), Post Office Box 1478, Houston, Texas 77251, filed in Docket No. CP89–1959–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to perform a firm transportation service for Arkla Energy Marketing Company (Arkla), under United's blanket certificate issued in Docket No. CP88–6–000, pursuant to section 7(c) of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United states that pursuant to a transportation service agreement dated October 28, 1988, as amended by a letter agreement dated March 8, 1989, it proposes to receive up to 200,000 Mcf per day from Arkla at specified points located both onshore and offshore Louisiana, Texas, and Mississippi and redeliver equivalent volumes at specified points located in the states of Texas, Louisiana, Florida, Alabama, and Mississippi. United indicates that in the event of failure of deliveries to receipt or delivery points for firm service, Arkla may request authorized overrun transportation if, in United's sole judgment, the capacity of its system or part thereof would permit such receipt, transportation, and delivery without impairing the ability of United to meet its other delivery obligations. It is indicated that United would receive the overrun volumes at specified points located in Texas and in onshore and offshore Louisiana and redeliver the volumes at specified points located in the states of Alabama, Florida, Mississippi, and Louisiana. United estimates peak day, average day, and annual volumes of 206,000 million Btu, 206,000 million Btu, and 75,190,000 million Btu, respectively. It is indicated that on June 14, 1989, United initiated a 120-day transportation service for Arkla under § 284.223(a) as reported in Docket No. St89–4075–000.

United further states that no facilities need be constructed to implement the service. United states that the contract expires three years from the date of initial transportation. United proposes to charge rates and abide by the terms and conditions of its Rate Schedule FTS.

Comment date: October 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

13. United Gas Pipe Line Company

[Docket No. CP89–1961–000]

August 21, 1989.

Take notice that on August 18, 1989, United Gas Pipe Line Company (United), Post Office Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP89–1961–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to perform an interruptible transportation service for PSI, Inc. (PSI), a marketer, under United's blanket certificate issued in Docket No. CP88–6–000, pursuant to section 7(c) of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United states that pursuant to a transportation service agreement dated March 14, 1989, as amended on May 9, 1989, it proposes to receive up to 150,600 Mcf per day from PSI at specified points located in the states of Texas, Mississippi, Alabama, Florida, as well in onshore and offshore Louisiana and redeliver equivalent volumes at specified points located in the states of Florida, Louisiana, Mississippi, and Alabama. United estimates peak day and average day volumes of 154,500 million Btu and annual volumes of 56,392,500 million Btu. It is indicated that on July 3, 1989, United initiated a 120-day transportation service for PSI under § 284.223(a) as reported in Docket No. ST89–4278–000.

United further states that no facilities need be constructed to implement the service. United states that the service would continue until terminated on 30 days written notice. United proposes to charge rates and abide by the terms and conditions of its Rate Schedule ITS.

Comment date: October 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

14. Great Lakes Gas Transmission Company

[Docket No. CP89–1898–000]

August 21, 1989.

Take notice that on August 2, 1989, Great Lakes Gas Transmission Company (Great Lakes), 2100 Buhl Building, Detroit, Michigan 48226, filed in Docket No. CP89–1898–000 an application pursuant to section 7(c) of the Natural Gas Act, for a certificate of public convenience and necessity to provide additional firm gas transportation service of 831,000 Mcf per day for TransCanada Pipe Lines Limited (TransCanada), and 43, 700 Mcf per day for ANR Pipeline Company (ANR), and to construct and operate facilities required to provide such service, all as more fullly set forth in the application which is on file with the Commission and open to public inspection.

Specifically, Great Lakes states that the existing TransCanada-Great Lakes Gas Transportation Contract dated September 12, 1967, as amended, currently provides for firm transportation by Great Lakes of up to a maximum of 1,405,000 Mcf per day of volumes from a point of interconnection between the facilities of Great Lakes and TransCanada on the International Boundary at Emerson, Manitoba (Emerson Interconnection), to points on the International Boundary located at Sault Ste. Marie and St. Clair Interconnections. Great Lakes states that TransCanada has requested that the additional 831,000 Mcf per day be transported by Great Lakes from the Emerson Interconnection to the St. Clair Interconnection. To provide this service, an Amendatory Agreement dated July 28, 1989 (Amendment) has been executed by the parties, which provides for such increase to a total of 2,236,000 Mcf per day, which is expected to commence November 1, 1991. A second increase of 166,000 Mcf per day is expected to commence on November 1, 1992.

It is stated that ANR and Great Lakes have entered into a Transportation Service Agreement (ANR Service Agreement) dated July 28, 1989, under which Great Lakes has agreed to transport up to 43,700 Mcf per day on a firm basis, for ANR, from the Emerson Interconnection to an existing point of interconnection between the facilities of ANR and Great Lakes, located at Fortune Lake, Michigan (Fortune Lake Delivery Point). ANR has advised Great Lakes that it will receive these volumes into the ANR Pipeline system at Fortune Lake Delivery Point for alternate deliveries to the joint subsidiaries of Kamine Engineering and Mechanical Contracting, Inc. and the Besicorp Group, Inc. (Cogen Developers), who are constructing gas-fired cogeneration projects in South Glen Falls, South Corning, and Holtsville, New York.

Great Lakes states ANR will provide transportation of the subject volumes from the Fortune Lake Delivery Point to a proposed point of interconnection between the facilities of ANR and CNG Transmission Corporation (CNG) located at Lebanon, Ohio (Lebanon Delivery Point). The Cogen Developers are entering into arrangements with CNG and other entities for transportation of the volumes from the Lebanon Delivery Point to the sites for the cogeneration projects.

It states that the proposed service for ANR is expected to commence on November 1, 1991, with a daily firm contract quantity of 14,200 Mcf per day, which will be increased by 29,500 Mcf, to 43,700 Mcf, commencing on or about November 1, 1992.

---

[1] This loop segment is being proposed solely to provide for increased reliability of service at the request of Columbia's eastern market customers. Such segment will complete the looping of the remaining single line section of Columbia's system between its interconnection with Columbia Gulf Transmission Company at the Kentucky-West Virginia State Line and Columbia's East Coast main line system north of Baltimore, Maryland.

Great Lakes further states that TransCanada and ANR have advised Great Lakes that their respective transportation arrangements are primarily required to satisfy the market needs of the U.S. Northeast. A substantial portion of the proposed services will be utilized in conjunction with the Iroquois, Champlain, and ANR-Lebanon projects, previously determined by the Commission to be discrete, its "Order Ruling on Discreetness of Additional Northeast Projects and Establishing Procedures", issued January 12, 1989, in Docket No. CP87-451-016, 46 FERC ¶ 61,012 (1989).

Great Lakes states that, in order to provide the proposed transportation services, Great Lakes proposes to construct and/or install (1) thirty-three loop sections, totalling 68.5 miles of 36-inch diameter pipe and 465.1 miles of 42-inch diameter pipe; (2) seven compressor units of 27,000 horsepower class rating (3) twenty-five aerodynamic assemblies and station piping modifications at various Great Lakes' compressor stations; (4) an addition to Great Lakes' existing meter station located at St. Clair, Michigan; and (5) one aftercooler at an existing compressor station, as more fully explained in the application.

The rate for transportation of the volumes for TransCanada will be the effective rate under rate schedule T-4 of the Original Volume No. 2 of Great Lakes' FERC Gas Tariff, applicable for deliveries at the St. Clair Interconnection. The rate for ANR will be determined from the components of the Base Tariff Rates of a comparable, long-term transportation arrangement, applicable to volumes being transported from the Emerson Interconnection to Great Lakes' central zone.

Comment date: September 11, 1989, in accordance with Standard Paragraph F at the end of this notice.

15. United Gas Pipe Line Company

[Docket No. CP89-1960-000]

August 21, 1989.

Take notice that on August 16, 1989, United Gas Pipe Line Company (United), Post Office Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP89-1960-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to perform an interruptible transportation service for Seagull Marketing Services (Seagull), a marketer, under United's blanket certificate issued in Docket No. CP88-6-000, pursuant to section 7(c) of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United states that pursuant to a transportation service agreement dated October 1, 1989, as amended on May 19, 1989, May 22, 1989, and June 15, 1989, it proposes to receive up to 500,000 Mcf per day from Seagull at specified points located in the states of Texas, Louisiana, Mississippi, Alabama, and Florida and redeliver equivalent volumes at specified points located in the states of Texas, Louisiana, Mississippi, and Alabama. United estimates peak day and average day volumes of 515,000 million Btu, and annual volumes of 187,975,000 million Btu. It is indicated that on June 29, 1989, United initiated a 120-day transporation service for Seagull under § 284.223(a) as reported in Docket No. ST89-4333-000.

United further states that no facilities need be constructed to implement the service. United states that the service would continue until terminated on 30 days written notice. United proposes to charge rates and abide by the terms and conditions of its Rate Schedule ITS.

Comment date: October 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

16. Eastern Shore Natural Gas Company

[Docket No. CP89-1024-001]

August 21, 1989

Take notice that on August 17, 1989, Eastern Shore Natural Gas Company (Eastern Shore), P.O. Box 615, Dover, Delaware 19903-0615, filed in Docket No. CP89-1024-001, as supplemented on August 17, 1989, a petition to amend Docket No. CP89-1024-000, which is currently pending before the Commission, so as to select Option A for the proposed 10-inch pipeline segment from just south of the C & D Canal to just south of Clayton, Delaware (Middletown Loop) as its final routing, to revise the length of the proposed Middletown Loop from 19.9 miles to 20.1 miles, revise its firm gas supply "mix" from Columbia Gas Transmission Corporation (Columbia), revise the increased service levels requested by certain of Eastern Shore's customers, provide a new storage service pursuant to a new rate schedule, Rate Schedule FSS, revise Exhibit K and revise the location of its proposed Dover Automatic Valve/Regulator Station within Dover, Delaware, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Eastern Shore states that in Docket No. CP89-1024-000, it proposed two alternate routes for the 10-inch pipeline segment referred to as the Middletown Loop. Eastern Shore states that it has determined that Option A (Railroad Route) presents the least environmental impact and is the least expensive alternative, therefore, Eastern Shore states that it is no longer considering Option B (Road Route) for the Middletown Loop.

Eastern Shore states that in Docket No. CP89-1024-000, the proposed length of the Middletown Loop was 19.9 miles. Due to environmental considerations, Eastern Shore now proposes to revise the length of the Middletown Loop 0.2 mile, thus making the total length of this segment 20.1 miles.

Eastern Shore states that in Docket No. CP89-1024-000, it proposed to increase contract demand and increase or decrease firm storage service to certain existing cutomers by seeking an increase of firm supply from Columbia in the form of contract demand service (CDS) and winter service (WS) in order to satisfy the proposed new customer demands on its system for the 1989-90 and 1990-91 winter seasons. Eastern Shore now states that because of intervening factors, it proposes to make certain revisions in its supply "mix" requested from Columbia. Eastern Shore states that Columbia's Offer of Settlement filed in Docket No. RP86-168-000, *et al.*, now gives Eastern Shore the option of a 30-day storage service under Rate Schedule FSS which would permit Eastern Shore to purchase and inject third-party gas into storage. Eastern Shore explains that because this new service is offered, Eastern Shore can now reduce its request for WS as well as its request for CDS service from Columbia. Eastern Shore states that by offsetting the reduction in WS service with service under Columbia's proposed FSS rate schedule Eastern Shore is still able to satisfy its customers' demands for increased service levels.

Eastern Shore states that on the basis of its FSS arrangement with Columbia, it proposes to implement a new 30-day firm storage service, rate Schedule CFSS, of its own for its customers. Eastern Shore states that the CFSS will consist of a demand charge and a commodity charge. It is stated that the CFSS demand charge is designed on the same basis as Eastern Shore's currently existing GSS, LSS, CWS and LGA demand rates. It is stated that an increment of $2.7752 per dekatherm, designed to recover the total costs allocated to jurisdictional storage services under the transmission function

after Phase I facilities is added to the corresponding Columbia rate. It is stated that an increment of $2.7752 per dekatherm, designed to recover the total costs allocated to jurisdictional storage services under the transmission function after Phase II facilities is added to the corresponding Columbia rate as shown below:

	CFSS rate schedule	Proposed Columbia rate/dt	Eastern Shore indicated rate/dt
Phase I	$3.462	$2.7752	$6.2372
Phase II	3.462	2.5490	6.0110

Eastern Shore states that the commodity rate will consist of a capacity charge, an injection charge and a withdrawal charge. Eastern Shore also states that such charges are designed to be equivalent to Columbia's corresponding rates as shown below:

CFSS rate schedule	Proposed Columbia rate/dt	Eastern Shore indicated rate/dt
Capacity	$0.0529	$0.0529
Injection	0.0046	0.0046
Withdrawal	0.0046	0.0046

In addition, Eastern Shore states that due to the revision of its gas supply "mix" from Columbia and Eastern Shore's proposed FSS storage service, certain customers of Eastern Shore have agreed to modify their original requests for service.

Eastern Shore also states that in order to eliminate the impact of its proposed Dover Automatic Valve/Regulator Station upon the residential community, Eastern Shore has decided to revise the location of the proposed station from a location near the intersection of Wyoming Ave. and New Burton Road in Dover, Delaware, to a location 0.6 mile north at the intersection of Bank Lane and West Street in Dover, Delaware. In addition, Eastern Shore states that it is revising Exhibit K of Docket No CP89-1024-000 concerning the installation of the Dover Station from $62,003 to $63,0003.

Comment date: September 5, 1989, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

Standard Paragraphs:

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

[FR Doc. 89-20254 Filed 8-28-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. TM89-17-20-000, TM89-16-20-001, TM89-14-20-001]

Algonquin Gas Transmission Co.; Proposed Change in FERC Gas Tariff

August 22, 1989.

Take notice that Algonquin Gas Transmission Company ("Algonquin") on August 16, 1989, tendered for filing, to its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets:

Proposed to be effective, August 1, 1989

Twenty-eighth Revised Sheet No. 205

Substitute Seventeenth Revised Sheet No. 214

Proposed to be effective, September 1, 1989

Thirty-fifth Revised Sheet No. 203

Algonquin states that pursuant to Section 7 of Rate Schedule F-2, it is filing Thirty-fifth Revised Sheet No. 203 to concurrently track rate changes made by its pipeline supplier CNG Transmission Corporation in the service underlying Algonquin's Rate Schedule F-2. Such changes decrease the demand charge by 81.5 cents per MMBtu while increasing the commodity charge by 2.00 cents per MMBtu.

Additionally, Algonquin states that it is filing Twenty-eighth Revised Sheet No. 205 for the sole purpose of bringing forward into a previously filed Sheet No. 205 the effect of the Commission's acceptance of Algonquin's filing in Docket Nos. CP84-654-023 and CP86-480-004 dated August 7, 1989. Such filing and acceptance reduces Algonquin's demand handling charge for Rate Schedule F-4 from $22.756 to $16.725, a reduction of $6.031 MMBtu.

Algonquin further states that it is filing Substitute Seventeenth Revised Sheet No. 214 (Rate Schedule SS-III) for the sole purpose of bringing forward the revised injection rate of 5.05 cents per MMBtu (a 0.02 cent reduction) which it filed for in Docket No. TM89-15-20-000 on July 31, 1989 into the previously filed and accepted Seventeenth Revised Sheet No. 214 (Docket No. TM89-14-20-000, July 21, 1989).

Algonquin notes that copies of this filing were served upon affected parties and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before August 29, 1989. Protest will be

---

considered by the Commission in

the gas from a producer, Mitchell Energy

20503, telephone (202) 395-3785. Copies

Issue heading and Applicant(s)

Inc., 2100 M Street, NW., Washington,

NW., Room 10220. Interested parties

considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Project No. 2179-003]

Merced Irrigation District; Extension of Time

August 22, 1989.

On August 18, 1989, Merced Irrigation District (MID) filed a motion for an extension of time to file a status report as required by Ordering Paragraph (B) of the Commission's Order on Rehearing issued May 26, 1989, in the above-docketed proceeding. In its motion, MID states that both MID and the U.S. Fish and Wildlife Service agree that additional time is needed to pursue negotiations and to satisfy the reporting requirements of the Commission's order.

Upon consideration, notice is hereby given that an extension of time for filing a status report is granted to and including October 23, 1989, in the above-docketed proceeding.

BILLING CODE 6717-01-M

[Docket No. CP89-1514-000]

Mitco Pipeline Co.; Request for Declaratory Order and Motion To Vacate Certificates

August 21, 1989.

On May 30, 1989, Mitco Pipeline Company (Mitco) filed a motion to vacate certificates of public convenience and necessity previously issued to Mitco by the Federal Energy Regulatory Commission in 1981 and 1982 authorizing the construction and operation of an offshore pipeline and related facilities, on the ground that such facilities are exempt gathering facilities under section 1(b) of the Natural Gas Act. The motion will be processed as a petition for a declaratory order.

Mitco states that it uses the pipeline involved, which is 6 inches in diameter, only to transport casinghead gas for Transcontinental Gas Pipe Line Corporation (Transco). Mitco receives the gas from a producer, Mitchell Energy Corporation (Mitchell), on OCS Block 189, Galveston Area (Federal Domain), transports it 8.5 miles to Texas State Tract 214, and delivers it here to an intrastate pipeline owned by Seagull Pipeline Corporation (Seagull). Subsequent to Mitco's handling of the gas at this point, it is transported onshore by Seagull and delivered to Houston Pipe Line Company for ultimate delivery to Transco. Mitco states that Mitchell provides minor compression at Block 189 and all separation and dehydration functions at locations on Block 189 and also onshore, but that Mitco provides no compression or processing services.

Any person desiring to be heard or to protest Mitco's request should file a motion to intervene or protest in accordance with Rules 214 or 211 of the Commission's rules of practice and procedure. All motions to intervene or protests should be submitted to the Federal Energy Regulatory Commission, 825 North Capitol Street NW., Washington, DC 20426, not later than 30 days following publication of this notice in the **Federal Register**. All protests will be considered by the Commission, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene in accordance with Rule 214. Copies of Mitco's request are on file with the Commission and available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6718-21-M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10220. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-200279

Title: Port of Galveston Day Cruise Operating Agreement.

Parties: Board of Trustees of the Galveston Wharves (Port). Carter-Green-Redd, Inc., d/b/a, Pride Cruise Lines (Pride).

Synopsis: The Agreement provides that the Port will grant Pride the exclusive right to operate a Day Cruise Ship from the Port of Galveston for a term of five years. The Port will provide a berth, parking lot, passenger service terminal and related services at Pier 21. Pride will pay dockage at fifty percent of rates published in the Galveston Wharves Tariff Circular 4-D. Pride also guarantees the Port annually, a minimum fee of $500,000 or six percent of the minimum $59.00 ticket price, whichever is greater.

Agreement No.: 224-010807-004

Title: City of Long Beach Terminal Agreement.

Parties: City of Long Beach Maersk, Inc.

Synopsis: The Agreement assigns the use of a crane erected at Pier J. Berths 243 and 244, to Maersk, Inc., for a period ending June 30, 1998.

By order of the Federal Maritime Commission.

Dated: August 23, 1989.

Joseph C. Polking,

Secretary.

FEDERAL RESERVE SYSTEM

BancFirst Corp., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are

BEST COPY AVAILABLE

considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than September 18, 1989.

A. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *BancFirst Corp.*, Zanesville, Ohio; to become a bank holding company by acquiring 100 percent of the voting shares of The First National Bank of Zanesville, Zanesville, Ohio.

B. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Pioneer Bancorp, Inc.*, Chicago, Illinois; to merge with River Associates Bancorp, Inc., River Gove, Illinois, and thereby indirectly acquire River Grove Bank and Trust Company River Grove, Illinois.

C. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Midland States Bancorp, Inc.*, Effingham, Illinois; to become a bank holding company by acquiring 100 percent of the voting shares of Effingham State Bank, Effingham, Illinois.

D. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Fortune 44 Company*, Boulder, Colorado; to become a bank holding company by acquiring 100 percent of the voting shares of Newberry Bancorp, Inc., Newberry, Michigan.

2. *Lincoln Holding Company*, Hankinson, North Dakota; to become a bank holding company by acquiring 95.07 percent of the voting shares of Lincoln State Bank, Hankinson, North Dakota.

E. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *OMNIBANCORP*, Denver, Colorado; to acquire 100 percent of the voting shares of OMNIBANK Denver, Denver, Colorado.

F. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *Palm Desert Investments*, Indian Wells, California; to become a bank holding company by acquiring at least 25 percent of the voting shares of Palm Desert National Bank, Palm Desert, California.

Board of Governors of the Federal Reserve System, August 23, 1989.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register**.

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Small Business Participation in Targeted Industries

AGENCY: Department of Health and Human Services (DHHS).

ACTION: Notice.

SUMMARY: This notice invites public comments on the Department of Health and Human Services proposed initiatives that will expand small business participation in 10 industry categories pursuant to Title VII of the "Business Opportunity Development Reform Act of 1988", Pub. L. 100–656.

DATES: Comments are due in writing on or before Sept. 28, 1989.

ADDRESSES: Interested parties should submit written comments to: Department of Health and Human Services, Office of Small and Disadvantaged Business Utilization, 200 Independence Avenue, SW., Humphrey Bldg., Room 517D, Washington, DC 20201.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Clinkscales, Director, OSDBU, telephone (202) 245–7300.

SUPPLEMENTARY INFORMATION: The Department of Health and Human Services (DHHS) has been designated as one of the nine procuring agencies to implement Title VII of the "Business Opportunity Development Reform Act of 1988", Pub. L. 100–656. The program seeks to demonstrate whether the competitive capabilities of small business firms in certain industry groups will enable them to successfully compete on an unrestricted basis for Federal contracts. Additionally, the Program attempts to demonstrate whether the use of targeted goaling and management techniques by procuring agencies, in conjunction with the Small Business Administration (SBA), will expand small business participation in selected industries that have historically been under-represented by small businesses despite an adquate number of small business sources.

The following are the selected industries which DHHS has targeted for participation in the program.

TARGETED INDUSTRY CATEGORIES FOR DHHS

Product service code	SIC Codes	Description
G004	8742	Counseling/training/social rehabilitation services.
J074	7629	Maintenance, repair and rebuilding of equipment (office machines, text processing system and visible record equipment).
K099	7699	Modification of equipment (miscellaneous).

TARGETED INDUSTRY CATEGORIES FOR DHHS—Continued

Product service code	SIC Codes	Description
Q201	8099	General health care services.
	8742	
R406	8742	Policy review/development services.
R497	7299	Personal services.
6505	2833 2834 2835 2836	Drugs and biologics.
7045	3572 3577 3579	ADP Supplies.
7110	5021	Office furniture.
7510	5112	Office supplies.

Initiatives for Departmental Enhancement of Small Business Participation in the Ten (10) Targeted Industry Categories

The following plan has been developed for expanding small business participation in the ten (10) targeted industry categories. This plan prescribes the efforts which the Department of Health and Human Services (DHHS) must undertake in the acquisition process. This will be the basis for a valid demonstration to determine if special management initiatives will enhance the participation of small businesses in selected industries.

—Broader distribution and utilization of DHHS' advanced procurement plans
—Issuance of sources sought announcements for small businesses
—Expand the utilization of 8(a) contracting mechanism
—Expand the utilization of small business set-asides
—Breakouts on selected acquisitions for small business participation
—Promote teaming and joint ventures by and among small businesses
—Expand outreach efforts to locate small businesses
—Optional inclusion of small purchase data
—Conduct training sessions for departmental contracting officials and small and disadvantaged utilization specialist
—Monitoring of goal attainment

Dated: August 24, 1989.

Richard Clinkscales,

Director, Office of Small and Disadvantaged Business Utilization.

BILLING CODE 4150–04–M

Food and Drug Administration

[Docket No. 86F–0352]

Betz Laboratories; Filing of Food Additive Petition; Amendment

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is amending the petition filed by Betz Laboratories to provide for the safe use of a copolymer of methacrylic acid and acrylic acid as an active polymer in boiler water for use in contact with food. The previous filing notice is amended to indicate that Betz Laboratories no longer seeks to amend the regulations to use this copolymer as a boiler water additive in contact with food, but rather as a component of paper and paperboard in contact with aqueous and fatty foods.

FOR FURTHER INFORMATION CONTACT: Edward J. Machuga, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of October 17, 1986 (51 FR 37074), FDA published a notice that a petition (FAP 6A3957) had been filed by Betz Laboratories, Somerton Rd., Trevose, PA 19047, proposing that § 173.310 *Boiler water additives* (21 CFR 173.310) be amended to provide for the safe use of a copolymer of methacrylic acid and acrylic acid as an active polymer in boiler water. Subsequently, Betz Laboratories amended the petition to indicate that they no longer were seeking to amend § 173.310 to include the use of this copolymer as a boiler water additive, but rather are proposing that § 176.170 *Components of paper and paperboard in contact with aqueous and fatty foods* (21 CFR 176.170) be amended to provide for the safe use of this copolymer of methacrylic acid and acrylic acid.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: August 18, 1989.

Fred R. Shank,

Acting Director, Center for Food Safety and Applied Nutrition.

[Docket No. 89F–0331]

Ciba-Geigy Corp.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Ciba-Geigy Corp. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of 2,3,4,5-tetrachloro-6-cyanobenzoic acid, methyl ester reaction products with *p*-phenylenediamine and sodium methoxide as a colorant in all food-contact polymers.

FOR FURTHER INFORMATION CONTACT: Richard H. White, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5) (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 9B4158) has been filed by Ciba-Geigy Corp., Seven Skyline Dr., Hawthorne, NY 10532–2188. The petition proposes to amend § 178.3297 *Colorants for polymers* (21 CFR 178.3297) to provide for the safe use of 2,3,4,5-tetrachloro-6-cyanobenzoic acid, methyl ester reaction products with *p*-phenylenediamine and sodium methoxide as a colorant in all food-contact polymers.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the Federal Register in accordance with 21 CFR 25.40(c).

Dated: August 18, 1989.

Storz Ophthalmics, Inc.; Filing of Color Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Storz Ophthalmics, Inc., has filed a petition proposing that the color additive regulations be amended to provide for the safe use of D&C Green No. 6 in polymethylmethacrylate used for the support haptics of intraocular lenses.

FOR FURTHER INFORMATION CONTACT: Sandra L. Varner, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 706(d)(1) (21 U.S.C. 376(d)(1))), notice is given that a petition (CAP 9C0219) has been filed by Storz Ophthalmics, Inc., 1365 Hamlet Ave., Clearwater, FL 34616, proposing that § 74.3206 *D&C Green No. 6* (21 CFR 74.3206) of the color additive regulations be amended to provide for the safe use of D&C Green No. 6 in polymethylmethacrylate used for the support haptics of intraocular lenses.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: August 18, 1989.

BILLING CODE 4160–01–M

[Docket No. 89P–0329]

Eggnog Deviating From Identity Standard; Temporary Permit for Market Testing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a temporary permit has been issued to H. P. Hood, Inc., to market test a product designated as "light eggnog" that deviates from the U.S. standard of identity for eggnog (21 CFR 131.170). The purpose of the temporary permit is to allow the applicant to measure consumer acceptance of the product.

DATES: This permit is effective for 15 months, beginning on the date the food is introduced or caused to be introduced into interstate commerce, but not later than November 27, 1989.

FOR FURTHER INFORMATION CONTACT: Howard A. Anderson, Center for Food Safety and Applied Nutrition (HFF–414), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–485–0119.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 130.17 concerning temporary permits to facilitate market testing of foods deviating from the requirements of the standards of identity promulgated under section 401 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 341), FDA is giving notice that a temporary permit has been issued to H. P. Hood, Inc., 500 Rutherford Ave., Boston, MA 02129.

The permit covers limited interstate marketing tests of a product that deviates from the U.S. standard of identity for eggnog in 21 CFR 131.170 in that: (1) The fat content of the product is reduced from 6 percent to 0.75 percent, and (2) sufficient vitamin A palmitate is added to ensure that a 4-fluid-ounce serving of the product contains 8 percent of the U.S. Recommended Daily Allowance for vitamin A. The product meets all requirements of the standard with the exception of these deviations.

For the purpose of this permit, the name of the product is "light eggnog." The principal display panel of the label must include the statements "reduced calorie" and "reduced fat" following the name. In addition, the label must bear the comparative statements "⅓ less calories" and "75% less fat than regular eggnog."

The product complies with reduced calorie labeling requirements in 21 CFR 105.66(d). In accordance with FDA's current views, reduced fat food labeling is acceptable because there is a 50 percent or more reduction in the fat content of the product. The information panel of the label will bear nutrition labeling in accordance with 21 CFR 101.9.

This permit provides for the temporary marketing of 1,056,000 quarts of the test product. The product will be distributed in Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

The test product is to be manufactured at H. P. Hood, Inc., 500 Rutherford Ave., Boston, MA 02129.

Each of the ingredients used in the

BILLING CODE 4160-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Public and Indian Housing

[Docket No. N-89-1943; FR-2467]

Public Housing Child Care Demonstration Program; Fund Availability, Fiscal Year 1989

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Notice of Fund Availability: Extension of time to submit applications.

SUMMARY: On July 14, 1989, HUD published a Notice of Fund Availability (NOFA) soliciting applications for funding under the Public Housing Child Care Demonstration Program. Today's notice extends the application deadline to September 29, 1989.

FOR FURTHER INFORMATION CONTACT: Annette Hancock, Office of Procurement and Contracts, Department of Housing and Urban Development, 451 Seventh Street, SW., Room 5256, Washington, DC 20410. Telephone (202) 755-5585. (This is not a toll-free number). Copies of the NOFA, which contains instructions for submitting applications, are available upon written or telephone request. To ensure a prompt response, it is suggested that requests for the NOFA be made by telephone.

DATES: Applications for funding must be submitted by September 29, 1989.

SUPPLEMENTARY INFORMATION: On July 14, 1989, (54 FR 29840) HUD published a NOFA announcing the availability of $5 million for fiscal year 1989 for the Public Housing Child Care Demonstration Program under amended Section 222 of the Housing and Urban-Rural Recovery Act of 1983 (Pub. L. 98-181, approved November 30, 1983). The demonstration is intended to provide grants to non-profit organizations to: (1) Assist in establishing child care facilities so that the parents or guardians of preschool or school-aged children may seek, retain or train for employment; and (2) determine the extent to which the availability of such child care services facilitates the employability of the parents or guardians of children residing in public housing. This notice also implements Section 1002 of the Stewart B. McKinney Homeless Assistance Amendments Act of 1988 (Pub. L. 100-628, approved November 7, 1988). Section 1002 provides that the child care facilities under this demonstration program may be established not only in lower income housing projects (as provided by Section 117 of the Housing and Community Development Act of 1987), but also in facilities located near such projects.

The notice stated that applications were due by August 26, 1989. Today's notice extends the application deadline to September 29, 1989. This extension will permit eligible applicants adequate time to prepare quality applications in response to the notice.

Authority: Sec. 222 of the Housing and Urban-Rural Recovery Act of 1983, (12 U.S.C. 1701z-6 note); and sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Dated: August 24, 1989.

Thomas Sherman,

Acting General Deputy Assistant Secretary for Public and Indian Housing.

BILLING CODE 4210-33-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AZ-040-09-4351-08-SPCA]

Availability of Record of Decision for the San Pedro River Riparian Management Plan

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: The Bureau of Land Management's Safford District, Arizona, announces the availability of the San Pedro River Riparian Management Plan as approved in the Record of Decision (ROD) signed on August 15, 1989. This ROD documents the approval of the plan described in the Final Environmental Impact Statement (EIS) for the San Pedro River Riparian Management Plan of June 1989.

The approved plan provides a framework to guide management decisions during the next 15 years on about 47,000 acres of public land in the upper San Pedro River Valley in Cochise County. These lands are part of the San Pedro Riparian National Conservation Area (NCA). The NCA contains additional lands that are being planned for in the Safford District Resource Management Plan, now in preparation.

The approved plan documents the kinds and levels of use permitted to maintain or improve the riparian ecosystem presently found in the area. The plan prohibits the use of vehicles off designated roads and provides for the development of a limited number of recreational facilities, as well as research and administrative facilities. A portion of the NCA is closed to the discharge of firearms.

ADDRESSES: Copies of the ROD are available from: Area Manager, San Simon Resource Area, Bureau of Land Management, 425 East 4th Street, Safford, Arizona 85546, telephone (602) 428-4040 or the San Pedro Project Office, Bureau of Land Management, Box 9853, RR 1, Huachuca City, Arizona 85616, telephone (602) 457-2265. Public reading copies will be available at these locations.

FOR FURTHER INFORMATION CONTACT: Vernon L. Saline, San Simon Area Manager, 425 East 4th Street, Safford, Arizona 85546, telephone (602) 428-4040.

Dated: August 15, 1989.

D. Dean Bibles,

Arizona State Director.

Las Cruces District Grazing Advisory Board Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Meeting.

SUMMARY: The meeting will be held at the conference room of the A. B. Cox Visitor Center in the Organ Mountains east of Las Cruces, New Mexico. The purpose of the meeting is to review 8100 projects for FY 89 and FY 90, to review Range Improvement Program procedures, and review a range policy update.

The agenda is:

1. 10:00 a.m.: Opening remarks, approval of minutes.
2. 10:15 a.m.: 8100 Program Update, FY 89 Projects, FY 90 Projects.
3. 11:00 a.m.: Range Improvement Program Procedures.
4. 11:45 a.m.: Lunch.
5. 1:00 p.m.: Public Comment Period.
6. 1:15 p.m.: Range Policy Update.
7. 2:00 p.m.: Adjourn.

DATE: Meeting will be held on Wednesday, September 27, 1989.

FOR FURTHER INFORMATION CONTACT: H. James Fox, District Manager, Las Cruces District, Bureau of Land Management, 1800 Marquess Street, Las Cruces, NM 88005 or at (505) 525-8228.

Order Providing for Opening of Public Land; New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Pursuant to section 3 of the Recreation and Public Purposes Act of June 14, 1926 (42 U.S.C. 869), as amended by the Acts of June 4, 1954 (68 Stat. 173), and September 21, 1959 (73 Stat. 571), the following described patented land has reverted back to the United States, such reversion being evidenced by deed recorded on June 23, 1989, Eddy County, New Mexico:

New Mexico Principal Meridian, New Mexico

T. 17 S., R. 25 E.,
sec. 3, lots 3, 4, and S½NW¼.
The land described contains 160.54 acres.

Effective 9:00 a.m. on the date of publication of this notice, the above described land shall be open to the operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All applications received prior to 9:00 a.m. on the date of publication of this notice, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

Inquiries concerning the land should be addressed to State Director, Bureau of Land Management, P.O. Box 1449, Santa Fe, NM 87504.

Frank Splendoria,

Acting State Director.

BILLING CODE 4310-FB-M

[ID-943-09-4214-11; I-010796]

Proposed Continuation of Withdrawal; Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice

SUMMARY: The U.S. Forest Service, Department of Agriculture, proposes that a 145.00 acre withdrawal for the Dixie Ranger Station Administrative Site and Pasture continue for an additional 50 years. The land is being used as an administrative site. This land will remain closed to surface entry and mining, but has been and will remain open to mineral leasing.

EFFECTIVE DATE: Comments shall be received on or before November 27, 1989.

FOR FURTHER INFORMATION CONTACT: Larry R. Lievsay, Idaho State Office, BLM, 3380 Americana Terrace, Boise, Idaho 83706, 208-334-1735.

The U.S. Forest Service proposes that the existing land withdrawal made by Public Land Order No. 3093 for the Dixie Ranger Station Administrative Site and Pasture be continued for a period of 50 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, insofar as it affects the following-described land.

Boise Meridian

T. 25 N., R. 8 E. (unsurveyed)
sec. 7, NW¼SE¼NE¼, S½SE¼NE¼, E½SE¼, E½E½NE¼SW¼SE¼ and E½SE¼SW¼SE¼;
sec. 8, NW¼NW¼SW¼;
sec. 18, E½NE¼NW¼NE¼, E½W½NE¼NW¼NE¼ and SE¼NW¼NE¼.
The area described contains 145.00 acres in Idaho County.

The withdrawal is essential for protection of substantial capital improvements on the administrative site. The withdrawal closed the land to surface entry and mining but not to mineral leasing. No change in the segregative effect or use of the land is proposed by this action.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuation may present their views in writing to the Idaho State Director at the above address.

The authorized officer of the Bureau of Land Management will undertake such investigations as necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued; and if so, for how long. The final determination of the withdrawal will be published in the Federal Register. The existing withdrawal will continue until such final determination is made.

Dated: August 21, 1989.

William E. Ireland,

Chief, Realty Operations Section.

BILLING CODE 4310-GG-M

Minerals Management Service

Development Operations Coordination Document; Corpus Christi Oil and Gas Co.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development operations coordination document (DOCD).

SUMMARY: Notice is hereby given that Corpus Christi Oil and Gas Company has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 9534, Block 15, South Marsh Island Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an existing onshore base located at Fresh Water City, Louisiana.

DATE: The subject DOCD was deemed submitted on August 16, 1989. Comments must be received within 15 days of the publication date of this Notice or 15 days after the Coastal Management Section receives a copy of the plan from the Minerals Management Service.

ADDRESSES: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44487, Baton Rouge, Louisiana 70805.

FOR FURTHER INFORMATION CONTACT: Ms. Angie D. Gobert; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736-2876.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executive of affected local governments, and other interested parties became effective May 31, 1988 (53 FR 10595).

Those practices and procedures are set out in revised § 250.34 of title 30 of the CFR.

Dated: August 18, 1989.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

[No. MC-C-30146]

The May Department Stores Co. and Volume Shoe Corp.; Petition for Declaratory Order; Transportation Within Single State of Merchandise Imported by Water

AGENCY: Interstate Commerce Commission.

ACTION: Notice of filing of a petition for declaratory order.

SUMMARY: Upon petition by The May Department Stores Company and its wholly owned subsidiary, Volume Shoe Corporation (May), the Commission has instituted a declaratory order proceeding. May seeks a finding that

inland transportation of merchandise imported from the Far East to California ports aboard regulated ocean carriers is in foreign commerce subject to our jurisdiction. The merchandise is briefly held in California warehouses and then tendered to Commission-regulated carriers for transportation to California destinations.

DATES: Persons interested in participating in this proceeding should so advise the Commission in writing by September 13, 1989. A list of interested parties will then be compiled and served. Petitioners will have 10 days from the service date of that list to serve each party on the list and the Commission with a copy of each of their comments. Other parties will then have 35 days from the service date of the service list to submit their comments to the Commission and to petitioners' representatives. Petitioners will have 50 days from the service date of the service list to reply.

ADDRESSES: Send and original and 10 copies of comments referring to No. MC-C-30146 to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

Send one copy of comments to petitioners' representatives: Mark J. Andrews, Mark D. Back, Suite 700, McPerson Building, 901 Fifteenth Street, NW., Washington, DC 20051-2301.

FOR FURTHER INFORMATION CONTACT: Andrew J. Nosacek, (202) 275-1712. Richard Felder, (202) 275-7691. (TDD for hearing impaired: (202) 275-1721).

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To obtain a copy of the full decision, write to, call, or pick up in person from: Office of the Secretary, Room 2215, Interstate Commerce Commission, Washington, DC 20423. Telephone: (202) 275-7428. (Assistance for the hearing impaired is available through TDD services (202) 275-1721.)

Decided: August 22, 1989.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Andre, Lamboley, and Phillips. Chairman Gradison concurred.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

Motor Carrier Applications to Consolidate, Merge, or Acquire Control

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by 49 CFR 1182.1.

Persons wishing to oppose an application must follow the rules under 49 CFR 1182.2. If the protest includes a request for oral hearing, the request shall meet the requirements of 49 CFR 1182.3 and shall include the required certification. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding.

In the absence of legally sufficient protests as the finance application or any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice.

Application(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notification of effectiveness of this decision-notice or the application of a non-complying applicant shall stand denied.

Findings

The finding for these applications are set forth at 49 CFR 1182.6.

MC-F-19478, filed July 28, 1989. GREYHOUND LINES, INC. (GLI) (Suite 2400, 901 Main Street, Dallas, TX 75202)—PURCHASE (PORTION)—UNITED LIMO, INC. (United Limo) (10844 McKinley Highway, P.O. Box 287, Osceola, IN 46561). Applicants' representatives: Fritz R. Kahn, William C. Evans, and Mark D. Back, Suite 700, 901 Fifteenth Street, NW, Washington, DC 20005-2301, attorneys for GLI. Robert B. Hebert, Suite 2300, One Indianapolis Square, Indianapolis, IN 46204, attorney for United Limo.

GLI and United Limo, motor common carriers of passengers, seek approval for a route sale in which GLI will acquire United Limo's operating authority in MC-150365 (Sub-No. 6), which authorizes regular-route authority between Milwaukee, WI, and O'Hare International Airport, at or near Chicago, IL. United Limo operates as a motor carrier of passengers in interstate commerce pursuant to MC-150365 and related subnumbers. United Limo holds interstate regular-route passenger authority in the States of IL, IN, MI, and WI, and irregular-route charter and special operations authority between points in the United States. In addition, United Limo holds intrastate authority in IN and MI.

GLI is a wholly owned subsidiary of noncarrier GLI Bus Operations Holding Company which, in turn, is a wholly owned subsidiary of noncarrier GLI Holding Company which, in turn, is controlled through stock ownership by Fred G. Currey, Craig R. Lentzsch, and Anthony P. Lannie, noncarrier individuals, of Dallas, TX. Certain affiliations of GLI with other carriers have been approved in other proceedings and would not be affected by this transaction. Common control of GLI with BusLease Contract Services, Inc. (MC-193190), Texas, New Mexico & Oklahoma Coaches, Inc. (MC-61120), and Vermont Transit Co., Inc. (MC-45626) was approved in MC-F-18260. Acquisition by GLI of the former 50 percent stock interest of Trailways Lines, Inc., in Continental Panhandle Lines, Inc. (MC-8742) was approved in MC-F-18505. Collectively, GLI and its affiliates currently hold and exercise, and will continue to hold and exercise, authority encompassing regular-route interstate and intrastate operations throughout the 48 contiguous States and DC, interstate charter and special operations in DC and every State except HI, and package express operations nationwide.

By decision served August 21, 1989, the Commission has granted applicant's petition for waiver of the otherwise applicable information requirements of Appendices A-6, A-7, B-4, C-2, C-5, and C-6 of the OP-F-44 application form.

Applicants have been granted temporary authority to lease the pertinent operating rights pending final disposition of the finance application.

Decided: August 22, 1989.

By the Commission, the Motor Carrier Board.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Lodging of Consent Decree; Dubois, PA

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on August 14, 1989, a proposed Consent Decree in *United States* v. *City of Dubois, Pennsylvania,* (W.D. Pa) Civil Action No. 89-182-J was lodged with the United States District Court for the Western District of Pennsylvania. The Consent Decree concerns violations of sections 309 (b) and (d) and section 402 of the Clean Water Act, 33 U.S.C. 1319 (b) and (d) and 1342. Defendant City of Dubois (the "City") has violated its National Pollutant Discharge Elimination System ("NPDES") permit by consistently exceeding its permit limits for biochemical oxygen demand, total suspended solids, and sporadically violating its effluent limitation for ammonia-nitrogen at its Publicly-Owned Sewage Treatment Plant ("POTW"). Also, the City consistently failed to analyze its wastewater samples correctly. The proposed Consent Decree requires defendant to remedy these violations through upgrade and expansion of the POTW. Further, the Decree requires the City to institute a quality assurance/quality control program to correct its water sampling deficiencies. The City is required to pay a civil penalty of $35,000 for its violations of the Clean Water Act and the Pennsylvania Clean Streams Act: $23,333 to the United States and $11,667 to the Commonwealth of Pennsylvania. The consent decree is backed by stipulated penalties and is consistent with EPA's guidelines and policies.

The Department of Justice will receive comments relating to the proposed Consent Decree for a period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *City of Dubois, Pennsylvania*, D.J. No. 90–5–1–1–3285.

The proposed Consent Decree may be examined at the office of the United States Attorney for the Western District of Pennsylvania, 633 U.S. Post Office & Courthouse, 7th Avenue and Grant Street, Pittsburgh, Pennsylvania 15219 and the U.S. Environmental Protection Agency, Region III, 841 Chestnut Street, Philadelphia, Pennsylvania 19107. The Decree may also be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $2.90 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

Richard B. Stewart,

Assistant Attorney General, Land and Natural Resources Division.

[FR Doc. 89–20302 Filed 8–28–89; 8:45 am]

BILLING CODE 4410-01-M

Lodging of Consent Decree Pursuant to the Clean Air Act; G&F Recycling and Salvage Corp.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a proposed consent decree in *United States* v. *G&F Recycling and Salvage Corp.*, 88 Civ. 2576, has been lodged with the United States District Court for the District of New Jersey on August 10, 1989. The proposed consent decree concerns failures to respond to an information request and a Compliance Order, each issued by the Environmental Protection Agency and relating to partial demolition and removal of asbestos from a building in Lodi, New Jersey. The proposed consent decree requires defendant to pay civil penalties and enjoins defendant from violating the Clean Air Act.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent order. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *G&F Recycling and Salvage Corp.*, D.J. Ref. 90–5–2–1–1231.

The proposed consent decree may be examined at the office of the United States Attorney and the Region II Office of the Environmental Protection Agency, 26 Federal Plaza, New York, New York 10278. Copies of the consent decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1647, Ninth Street and Pennsylvania Avenue, Washington, DC 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of Department of Justice.

Donald A. Carr,

Acting Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

Labor Certification Process for the Temporary Employment of Aliens in Agriculture in the United States: Advances of Transportation and Subsistence Costs

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: The Employment and Training Administration (ETA), Department of Labor, in the course of recent litigation (*Jean* v. *Department of Labor*, Civ. No. 89–0611–OG (D.D.C.)), has announced its interpretation of 20 CFR 655.102(b)(5)(i), dealing with advances of transportation and subsistence costs in the temporary alien agricultural labor certification program. The interpretation was set forth in a Declaration by the Director, U.S. Employment Service, which is published below for public information.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas M. Bruening, Chief, Division of Foreign Labor Certifications, Employment and Training Administration, Suite N–4456, 200 Constitution Avenue, NW., Washington, DC 20210. Telephone: 202–535–0165 (this is not a toll-free number.)

Signed at Washington, DC this 23 day of August, 1989.

Roberts T. Jones,

Assistant Secretary of labor.

Declaration of Robert A. Schaerfl

I, Robert A. Schaerfl, declare and state, upon information and belief, as follows:

1. I am the Director of the United States Employment Service, Employment and Training Administration ("USES"), United States Department of Labor ("DOL").

2. Plaintiffs have brought this action challenging the promulgation of a regulation by the U.S. Department of Labor concerning transportation and subsistence costs for farm workers under the temporary agricultural labor certification program. This interim final regulation, codified at 20 CFR 655.102(b)(5)(i), and issued by the DOL on June 1, 1987, 52 FR 20496, was issued pursuant to the temporary foreign agricultural worker program ("H–2A") established by the Immigration Reform and Control Act of 1986 ("IRCA"), 8 U.S.C. 1101(a)(15)(H)(ii)(a) and 1186.

3. The Director of USES, as the delegate of the Secretary of Labor,

pursuant to 20 CFR 655 *et seq.*, has the authority to construe and interpret the H–2A regulatory scheme to ensure that the domestic work force is protected from the admission of temporary alien workers. See, 20 CFR 655.0(c).

4. The plaintiffs have asserted that the regulation was promulgated in violation of the Administrative Procedure Act ("APA"), 5 U.S.C. 701 and 706 and is contrary to the INA and IRCA. While the defendants maintains that the plaintiffs lack standing and that this case is not ripe for review, the defendants recognize that the regulation as currently written can be interpreted to weaken the protections available to domestic workers. Such an interpretation was not our intent.

5. Therefore, in order to resolve this matter without further litigation, the DOL hereby agrees to the following.

a. The current regulation dealing with transportation costs, codified at 20 CFR 655.102(b)(5)(i), states in relevant part:

> The employer shall advance transportation and subsistence costs (or otherwise provide them) to workers when it is the prevailing practice of non-H-2A agricultural employers in the occupation in the area to do so, or when such benefits are extended to H–2A workers.

b. The DOL agrees that the current regulation will be interpreted by the U.S. Department of Labor as if the language in the predecessor regulation, which was codified at 20 CFR 655.202(a) (1986), and which addressed the "indirect" advancement of transportation costs, had not been deleted. In particular, the current regulation shall be construed as if the following language from the earlier regulation was still present:

> For example, if the employer intends to advance transportation costs to foreign workers either directly or indirectly (by having them paid by the foreign government involved), the employer must offer to advance the transportation costs of U.S. workers.

c. The DOL further agrees that they will published an appropriate notice in the **Federal Register** announcing this decision within thirty days of the filing of this declaration in court.

6. Furthermore, DOL is currently considering the promulgation of a new regulation which would deal more extensively with the advance transportation question.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and recollection.

Dated: July 12, 1989.

Robert A. Schaerfl

Director, United States Employment Service, U.S. Department of Labor Employment and Training Administration.

BILLING CODE 4510-30-M

Mine Safety and Health Administration

[Docket No. M–89–9–M]

Bunker Hill Mining Co.; Petition for Modification of Application of Mandatory Safety Standard

Bunker Hill Mining Company, P.O. Box 29, Kellogg, Idaho 83837 has filed a petition to modify the application of 30 CFR 56.19011 (drum flanges) to its Bunker Hill Mine (I.D. No. 10–00083) located in Shoshone County, Idaho. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that flanges on drums extend radially a minimum of 4 inches or three rope diameters beyond the last wrap, whichever is the lesser.

2. As an alternate method, petitioner proposes to suspend two adjustable threaded ⅝" rods with a ¼"×6"×30" curved plate, that will prevent the cable from jumping off the drum. The clearance between the plate and the drum flanges would be between 1⁄16" minimum to ½" maximum. The rope diameter is ¾".

3. In support of this request, petitioner states that the Orr Hoist was installed in 1954, and there has never been any incidents or any record of accidents of any type since installation.

4. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before September 28, 1989. Copies of the petition are available for inspection at that address.

Dated: August 17, 1989.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 89–20337 Filed 8–28–89; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M–89–122–C]

Big Bottom Coal Co., Inc.; Petition for Modification of Application of Mandatory Safety Standard

Big Bottom Coal Company, Inc., P.O. Box 682, Matewan, West Virginia 25678 has filed a petition to modify the application of 30 CFR 75.1701 (abandoned areas adjacent mines; drilling of boreholes) to its Mine No. 1 (I.D. No. 15–12618) located in Pike County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that whenever any working place approaches within 200 feet of any workings of an adjacent mine, a borehole or boreholes must be drilled to a distance of at least 20 feet in advance of the working face of such working place and must be continually maintained to a distance of at least 10 feet in advance of the advancing working face. When there is more than one borehole, they must be drilled sufficiently close to each other to ensure that the advancing working face will not accidentally hole through into abandoned areas or adjacent mines. Boreholes must also be drilled not more than 8 feet apart in the rib of such working place to a distance of at least 20 feet and at an angle of 45 degrees.

2. As an alternate method, petitioner proposes to drill deep test holes, with centers every 25 feet, in lieu of 20-foot test drill holes with specific equipment and procedures as outlined in the petition.

3. In support of this request, petitioner states that—

(a) The long hole drill would be permissible and capable of drilling holes in excess of 400 feet;

(b) The test drilling would be performed away from the current working faces;

(c) The development of an 80-foot block would require a minimum of only six major machine moves rather than the 24 which are required by the standard;

(d) The proposed plan greatly reduces the miners' exposure to caught-by and struck-by accidents;

(e) Fewer people would be exposed to

monitoring devices shall be located so

Dated: Auguste 18, 1989.

resume until the methane level is lower

without hydraulics. Approximately 30–

Dated: August 17, 1989.

(e) Fewer people would be exposed to any potential hazards which might result if an adjacent mine works were penetrated; and

(f) The drill operators would be trained in machine set-up and use of the drill's thrust controls for guiding the drill steel, which would help to ensure that straight drill holes are maintained.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before September 28, 1989. Copies of the petition are available for inspection at that address.

Dated: August 17, 1989.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 89-20338 Filed 8-28-89; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-89-116-C]

Webster County Coal Corp.; Petition for Modification of Application of Mandatory Safety Standard

Webster County Coal Corporation, P.O. Box 128, Clay, Kentucky 42404 has filed a petition to modify the appliction of 30 CFR 75.1103-4(a) (automatic fire sensor and warning device systems; installational; minimum requirements) to its Dotiki Mine (I.D. No. 15-02132) located in Webster County, Kentucky. The petition is filed under section101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. On April 20, 1989, petitioner was granted a modification of 30 CFR 75.1103-4(a) to install one sensor at every belt drive and belt conveyor tailpiece combination where a belt drive discharges onto a belt conveyor tailpiece, to install an early warning fire detection system, and to monitor the air with a carbon monoxide detection system (docket number M-88-68-C).

2. This petition concerns paragraphs 1(b), 1(C) and 3 of the Decision and Order (DO).

3. Paragraph 1(b) of the DO which states that the carbon monoxide monitoring devices shall be located so that the air is monitored at each belt drive and tailpiece and at intervals not to exceed 2,000 feet along each conveyor belt entry, except as provided in paragraph 1(c) or unless the District Manager requires additional carbon monoxide monitors to be installed as part of said plan to ensure the safety of the miners. When the air is coursed into adjacent return entry before crossing the belt tailpiece, the monitoring device shall be installed at the first crosscut outby the tailpiece on the same split of air.

Petitioner requests that outby the tailpiece be changed to outby the temporary stopping (across the belt).

4. Paragraph 1(c) of the DO lists several locations where only one low-level carbon monoxide sensor shall be required, and that it be installed not more than 100 feet inby the drive, belt take-up, and tailpiece on the same split of air.

Petitioner requests that inby the drive, belt take-up, and tailpiece on the same split of air be changed to inby (if the airflow is inby) or outby (if the airflow is outby), the drive, belt take-up and tailpiece on the same split of air.

5. Paragraph 3 of the DO states that the low-level carbon monoxide monitoring devices shall be capable of providing both visual and audible alarm signals.

Petitioner requests that at 10 ppm above the established ambient level, all persons shall be withdrawn to a safe area outby the working places be changed to the Approved Firefighting Plan shall be implemented and appropriate action shall be taken to determine the cause of the actuation.

6. Petitioner states that the proposed amendment to the Decision and Order granting the petition modifying the application of 30 CFR 75.1103-4(a) will improve the paragraphs addressed, and will provide no less than the same measure of protection for the miners.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before September 28, 1989. Copies of the petition are available for inspection at that address.

Dated: Augusta 18, 1989.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 89-20339 Filed 8-28-89; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-89-120-C]

Christian Energies Co., Inc.; Petition for Modification of Application of Mandatory Safety Standard

Christian Energies Company, Inc., Route 1, Box 18, Williamsburg, Kentucky has filed a petition to modify the application of 30 CFR 75.313 (methane monitor) to its Mine No. 3 (I.D. No. 15-16660) located in Whitley County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that a methane monitor be installed on electric face cutting equipment, continuous mining machines, longwall face equipment and loading machines. The monitor is required to be properly maintained and frequently tested.

2. No methane has been detected in the mine.

3. The three-wheel tractors are permissible DC-powered machines, without hydraulics. Approximately 30-40% of the coal is hand loaded into a drag-type bucket. Approximately 20% of the time that the tractor is in use, it is used as a mantrip and supply vehicle.

4. As an alternate method, petitioner proposes to use hand-held continuous oxygen and methane monitors instead of methane monitors on three-wheel tractors. In further support of this request, petitioner states that:

(a) Each three-wheel tractor would be equipped with a hand-held continuous monitoring methane and oxygen detector and all persons would be trained in the use of the detector;

(b) Prior to allowing the coal loading tractor in the face area, a gas test would be performed to determine the methane concentration in the atmosphere. When the elapsed time between trips does not exceed 20 minutes, the air quality would be monitored continuously after each trip. This would provide continuous monitoring of the mine atmosphere for methane to assure the detection of any methane buildup between trips;

(c) If one percent methane is detected, the operator would manually deenergize the battery tractor immediately. Production would cease and would not

resume until the methane level is lower than one percent;

(d) A spare continuous monitor would be available to assure that all coal hauling tractors would be equipped with a continuous monitor;

(e) Each monitor would be removed from the mine at the end of the shift, and would be inspected and charged by a qualified person. The monitor would also be calibrated monthly; and

(f) No alterations or modifications would be made in addition to the manufacturer's specifications.

5. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. BILLING CODE 4510-43-M

LOWER MISSISSIPPI DELTA DEVELOPMENT COMMISSION

Announcement of Arkansas Public Hearing and Colleges and Universities Conference

Background

The Lower Mississippi Delta Development Commission was created by Public Law 100-460, signed on October 1, 1988. The purpose of the Commission is to identify and study the economic development, infrastructure, employment, transportation, resource development, education, health care, housing, and recreation needs of the Lower Mississippi Delta region by seeking and encouraging the participation of interested citizens, public officials, groups, agencies, and others in developing a 10-year plan that makes recommendations and establishes priorities to alleviate the needs identified. The Commission will make its report to Congress, the President, and the Governors of Arkansas, Illinois, Kentucky, Louisiana, Mississippi, Missouri, and Tennessee no later than May 14, 1990.

This notice announces the Arkansas public hearing and the Commission's Colleges and Universities Conference.

Public Hearing

Time: 7:15 p.m. to 11:30 p.m. September 5, 1989

Place: Phillips County Community College, Campus Drive, Helena, Arkansas, 72042

Status: Public oral and written testimony encouraged

Contact: Ann Sartwell, Telephone (901) 753-1400

Colleges and Universities Conference

Time: 4:00 p.m. to 7:00 p.m., September 7, 1989 8:15 a.m. to 4:00 p.m., September 8, 1989

Place: Fogelman Center, Memphis State University, Memphis, Tennessee 38152

Status: Registration Fee

Contact: Stan Hyland, Telephone (901) 753-1400

Wilbur F. Hawkins,

Executive Director.

results in the loss of the main condenser

Based upon the foregoing

The Need for the Proposed Action

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Astronomical Sciences, Subcommittee on Theory, Experimental, and Laboratory Astronomy; Meeting

In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Committee for Astronomical Sciences Subcommittee on Theory, Experimental, and Laboratory Astronomy.

Date and time: September 18 and 19, 1989 9 a.m.–5 p.m.

Place: National Science Foundation Room 1243.

Type of Meeting: September 18 and 19, 1989—Open.

Contact person: Dr. G. Siegfried Kutter, Program Director, Stars and Stellar Evolution, Division of Astronomical Sciences, Room 615, National Science Foundation, Washington, DC 20550 (202/357–7622).

Minutes: May be obtained from the contact person at the above address.

Purpose of committee: To provide advice and recommendations concerning research programs, proposals, and projects in NSF–funded astronomy with the objective of achieving the highest quality forefront research for the funds allocated. To provide advice and recommendations concerning short-range and long-range plans in astronomy, including a recommendation of relative priorities.

Agenda: September 18 and 19.

Discussion of the scientific areas that show the greatest promise with regard to new breakthroughs in discovery and understanding of theory, experimental, and laboratory techniques in astronomy.

Discussion of activities and initiatives needed to address the scientific issues identified above.

M. Rebecca Winkler,

Committee Management Officer.

[FR Doc. 89–20272 Filed 8–28–89; 8:45 am]

BILLING CODE 7555-01-M

Advisory Committees for Astronomical Sciences; Subcommittee on Education and Human Resources; Meeting

In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Committee for Astronomical Sciences, Subcommittee on Education and Human Resources.

Date and Time: September 18, 19, and 20, 1989, 9:00 am–5:00 pm.

Place: International Room, Radisson-Seattle Hotel, 17001 Pacific Highway, Seattle, WA 98188.

Type of Meeting: September 18, 19, and 20, 1989, Open.

Contact Person: Dr. James P. Wright, Program Director, Cross-Directorate Programs, Division of Astronomical Sciences, Room 618, National Science Foundation, Washington, DC 20550 (202/357–7539).

Minutes: May be obtained from the contact person at the above address.

Purpose of Committee: The Subcommittee will review manpower issues in astronomy and will also concern itself with addressing issues and programs that deal with efforts in bringing minorities, women, and the handicapped into scientific and engineering careers.

Agenda: September 18, 19, and 20.

Review and advise on the strategic issues and programs involving demand and supply of scientists, engineers, and technicians for ground-based atronomy research; involving education and training in the astronomical sciences, particularly at the undergraduate level; and to consider how to increase the participation of minorities, women, and the handicapped.

M. Rebecca Winkler,

Committee Management Officer.

[FR Doc. 89–20273 Filed 8–28–89; 8:45 am]

BILLING CODE 7555-01-M

Division of Earth Sciences; Meeting

The National Science Foundation announces the following meeting:

Name: Earth Sciences Proposal Review Panel.

Date: September 18–22, 1989.

Time: 8:00 a.m. to 6: p.m. each day.

Place: The National Science Foundation, Room 543, 1800 G. Street, NW, Washington, DC 20550.

Type of Meeting: Closed.

Contact Person: Dr. Alan Gaines, Section Head, Division of Earth Sciences, Room 602, National Science Foundation, Washington, DC 20550; Telephone: (202) 357–0501.

Minutes: May be obtained from the Contact Person at the above address.

Purpose of Meeting: To provide advice and recommendations concerning support for research in Earth Sciences.

Agenda: To review and evaluate research proposals and projects as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information, financial data, such as salaries, and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–341; FERMI–2]

Detroit Edison Co. and Wolverine Power Supply Cooperative, Inc.; Environmental Assessment and Finding of No Signficant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–43, issued to the Detroit Edison Company (DECo) and the Wolverine Power Supply Cooperative, Incorporated (the licensees) for the operation of Fermi-2 located in Monroe County, Michigan.

Environmental Assessment

Identification of Proposed Action

The proposed amendment would revise the Technical Specifications (TS) for the Reactor Protection System (RPS) to reflect design changes for the Reactor Protection System (RPS) scheduled to be completed during the upcoming refueling outage scheduled for September 1989. The design change will eliminate the Backup Manual Scram function and add further redundancy to the RPS capability to manually initiate a scram.

The proposed action is in accordance with the licensees' application for amendment dated May 10, 1989.

The Need for the Proposed Action

The proposed changes to the TS are required in order for the TS to include appropriate requirements for the as-modified RPS design.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed revision to the TS. The proposed revision would reflect design changes which are being made to eliminate the Backup Manual Scram (BUMS) feature. The BUMS feature when actuated causes a concurrent isolation for the Main Steam Isolation Valves (MSIV). This is understirable since the MSIV isolation

results in the loss of the main condenser as a heat sink. In place of the Bums feature, DEC is providing an additional channel in each RPS trip logic for the Manual Scram and Reactor Mode Switch features. These additional channels provide an alternative method to meet the regulatory and design requirements for manual scram redundancy. Therefore, the proposed changes do not increase the probability or consequences of any accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that this proposed action would result in no signficant radiological impact and could result in the reduction of the radiological impacts.

With regard to potential nonradiological impacts, the proposed changes to the TS involve systems located within the restricted area as defined in 10 CFR part 20. They do not affect nonradiological plant effluents and have no other environmental impact. Therefore, the Commission concludes that there are no significant nonradiologial environmental impacts associated with the proposed amendment.

Alternative to the Proposed Action

Because the Commission has concluded that there is no signifiant environmental impact associated with the proposed amendment, any alternative would have either no or greater environmental impact. The principal alternative would be to deny the requested amendment. This would prevent the design modifications from being completed and would accordingly not alleviate the problems of the current BUMS design.

Alternative Use of Resources

This action involves no use of resources not previously considered in connection with the "Final Environmental Statement Related to Operation of Fermi-2," dated August 1981.

Agencies and Persons Consulted

The Commission's staff reviewed the licensees' request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed license amendment.

Based upon the foregoing environmental assessment, the Commission concludes that the proposed action will not have a signficant effect on the quality of the human environment.

The Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the Federal Register on July 11, 1989 (54 FR 29117). No request for hearing or petition for leave to intervene was filed following this notice.

For further details with respect to this action, see the application for amendment dated April 3, 1989, which is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, and at the Monroe County Library System, 3700 South Custer Road, Monroe, Michigan 48161.

Dated at Rockville, Maryland, this 23rd of August 1989.

For the Nuclear Regulatory Commission.

John O. Thoma,

Acting Director, Project Directorate III–1, Division of Reactor Projects—III, IV, V & Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 89–20312 Filed 8–28–89; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50–341; FERMI–2]

Detroit Edison Co. and Wolverine Power Supply Cooperative, Inc.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–43, issued to the Detroit Edison Company (DECo) and the Wolverine Power Supply Cooperative, Incorporated (the licensees) for the operation of Fermi-2 located in Monroe County, Michigan.

Environmental Assessment

Identification of Proposed Action

The proposed amendment would revise the Technical Specifications (TS) relating to the Source Range Monitors (SRM) to permit core off-loading during the first refueling outage. The proposed amendment also increases the minimum signal-to-noise ratio required for a reduced SRM minimum count rate requirement and eliminates a related TS provision which is no longer needed.

The proposed action is in accordance with the licensees' application for amendment dated April 3, 1989.

The Need for the Proposed Action

The proposed changes to the TS are required in order to allow complete core off-loading and ensure adequate signal-to-noise ratio exists when the SRM minimum count rate requirement is reduced.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed revision to the TS. The proposed revision would permit complete core off-loading by eliminating the SRM minimum count rate requirements during the off-load process once the remaining fuel is configured such that SRM monitoring is no longer needed for safety. The SRM minimum count rate requirement may be reduced to 0.7 counts per second (cps) from 3.0 cps as long as a sufficient signal-to-noise ratio is present. The current requirement is a signal-to-noise ratio of 2; the proposal increases this required ratio to 20 to ensure that the assumptions regarding SRM measurement uncertainty remain satisfied at the reduced SRM levels. Therefore, the proposed changes do not increase the probability or consequences of any accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that this proposed action would result in no significant radiological impact and could result in the reduction of the radiological impacts.

With regard to potential nonradiological impacts, the proposed changes to the TS involve systems located within the restricted area as defined in 10 CFR part 20. They do not affect nonradiological plant effluents and have no other environmental impact. Therefore, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed amendment.

Alternative to the Proposed Action

Because the Commission has concluded that there is no significant environmental impact associated with the proposed amendment, any alternative would have either no or greater environmental impact. The principal alternative would be to deny the requested amendment. This would prevent core offloading and not provide appropriate TS provisions for reducing the SRM minimum count rate requirements.

Alternative Use of Resources

This action involves no use of resources not previously considered in connection with the "Final Environmental Statement Related to Operation of Fermi-2," dated August 1981.

Agencies and Persons Consulted

The Commission's staff reviewed the licensees' request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environment impact statement for the proposed license amendment.

Based upon the foregoing environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment.

The Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on August 1, 1989 (54 FR 31749). No request for hearing or petition for leave to intervene was filed following this notice.

For further details with respect to this action, see the application for amendment dated May 10, 1989, which is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, and at the Monroe County Library System, 3700 South Custer Road, Monroe, Michigan 48161.

Dated at Rockville, Maryland, this 23rd of August 1989.

For the Nuclear Regulatory Commission.

John O. Thoma,

Acting Director, Project Directorate III-1, Division of Reactor Projects—III, IV, V & Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 89-20313 Filed 8-28-89; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-361 and 50-362]

Southern California Edison Co., et al., San Onofre Nuclear Generating Station, Units 2 and 3; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating Licenses No. NPF-10 and No. NPF-15 issued to Southern California Edison Company, San Diego Gas and Electric Company, the City of Riverside, California and the City of Anaheim, California (the licensees) for operation of San Onofre Nuclear Generating Station, Units 2 and 3, located in San Diego County, California.

Environmental Assessment

Identification of Proposed Action

The proposed amendments would revise the following Technical Specifications (TS) to increase the interval for the 18-month surveillance tests to at least once per refueling interval, which is defined as 24 months, in support of the nominal 24-month fuel cycle:

a. TS 3.4.7.6, "Snubbers."

b. TS 3/4.10, "Special Test Exceptions." (Unit 2 only)

The Need for the Proposed Action

The proposed amendments are required to prevent unnecessary plant shutdowns to perform a surveillance test which cannot be performed during plant operation.

Environmental Impacts of the Proposed Action

For each of the proposed amendments, the licensees provided analyses to demonstrate the reliability of the systems. The staff reviewed the licensees' analyses and agrees that reliability of the systems would not be significantly degraded by extension of the surveillance intervals. Therefore, the staff has approved the proposed 24-month surveillance interval for these proposed changes.

As a result, the proposed action would not involve a significant change in the probability or consequences of any accident previously evaluated, nor does it involve a new or different kind of accident. Consequently, any radiological releases resulting from an accident would not be significantly greater than previously determined. The proposed amendments do not otherwise affect routine radiological plant effluents. Therefore, the Commission concludes that there are no significant radiological environmental impacts associated with the proposed amendments. The Commission also concludes that the proposed action will not result in a significant increase in individual or cumulative occupational radiation exposure.

With regard to nonradiological impacts, the proposed amendments do not affect nonradiological plant effluents and have no other environmental impact. Therefore, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed amendments.

The Notices of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action were published in the **Federal Register** on February 27, 1989 (54 FR 8250) and April 24, 1989 (54 FR 16438-D). No request for hearing or petition for leave to intervene was filed following these notices.

Alternatives to the Proposed Action

Because the Commission has concluded that there are no significant environmental impacts associated with the proposed action, there is no need to examine alternatives to the proposed action.

Alternative Use of Resources

This action does not involve the use of resources not previously considered in connection with the Final Environmental Statement related to operation of San Onofre Nuclear Generating Station, Units 2 and 3, dated April 1981 and its Errata dated June 1981.

Agencies and Persons Consulted

The NRC staff has reviewed the licensees' request that supports the proposed amendments. The NRC staff did not consult other agencies or persons.

Findings of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed amendments.

Based upon the foregoing environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the applications for amendments dated May 19, 1988 and March 10, 1989, which are available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20555, and at the General Library, University of California, P.O. Box 19557, Irvine, California 92713.

Dated at Rockville, Maryland, this 22nd day of August, 1989.

For the Nuclear Regulatory Commission.

Harry Rood,

Acting Director, Project Directorate V, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 89-20315 Filed 8-28-89; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-445 and 50-446]

Texas Utilities Electrical Co., et al [1]; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering the issuance of Amendment No. 11 to Construction Permit No. CPPR-126 and Amendment No. 10 to Construction Permit No. CPPR-127 which would authorize the transfer of a 2⅛% ownership interest in the Comanche Peak Steam Electric Station (CPSES), Units 1 and 2, from Tex-La to TU Electric. The proposed amendments would delete Tex-La as an owner on the construction permits and increase TU Electric's aggregate ownership to 100%.[2]

Environmental Assessment

Identification of Proposed Action: The proposed action would reflect a transfer of ownership interest in CPSES, Units 1 and 2, from Tex-La to TU Electric. This transfer will in no way affect the design or construction of CPSES nor will it affect the responsibility for operation and control of the facility.

The deletion of Tex-La from the Comanche Peak construction permits and reallocation of Tex-La's 2⅛% ownership interest to TU Electric are in accordance with the agreement between Tex-La and TU Electric dated March 23, 1989, as described in TU Electric's request dated May 4, 1989.

The Need for the Proposed Action: The license conditions attached to the CPSES construction permit required TU Electric to offer ownership access to entities in a specified area of the state of Texas. As a result of the conditions, several smaller power systems purchased shares in the plant, including Tex-La. For a number of reasons, Tex-La now wishes to sell its 2⅛% interest in the CPSES back to TU Electric. On March 23, 1989, TU Electric and Tex-La entered into a settlement agreement that provides for the purchase by TU Electric of Tex-La's ownership interest in the CPSES and also terminates all pending litigation between the two parties in various District Court proceeding in Texas originating from Tex-La's participation in the CPSES.

The requests for amendments were submitted pursuant to 10 CFR 50.30 and 10 CFR 50.90 to properly reflect the change of ownership from Tex-La to TU Electric.

Environmental Impacts of Proposed Action: The proposed action is administrative in nature and involves only the transfer of an ownership interest from one entity to another entity which is already an owner and an applicant. This transfer will in no way affect the design or construction of CPSES, nor will it affect the responsibility for operation and control of the facility. The proposed action will not affect the principal architectural and engineering criteria and environmental protection commitments set forth in the construction permit application, as amended, nor will it change the impact associated with the construction or operation of the CPSES. It will not result in the reallocation of ownership interest from one owner to another. Therefore, the Commission has concluded that there is no environmental impact associated with the proposed action.

Alternative to the Proposed Action: The Commission has concluded that there are no measurable environmental impacts associated with the proposed action. The principal alternative would be for the Commission to deny the requested amendments. This would not reduce the environmental impacts of plant construction or operation.

Alternative Use of Resources: This action does not involve the use of resources not previously considered in connection with the Final Environmental Statement related to the proposed Comanche Peak Steam Electric Station Units 1 and 2, dated June 1974 or the Final Environmental Statement related to the operation of Comanche Peak Steam Electric Station, Units 1 and 2 (NUREG-0775), dated September 1981.

Agencies and Persons Consulted: The NRC staff reviewed the applicant's request and applicable documents referenced therein that support the proposed amendments. The NRC did not consult other agencies or persons in preparing this assessment.

Finding of No Significant Impact

The staff has reviewed the proposed action relative to the requirements set forth in 10 CFR Part 51. Based upon the foregoing environmental assessment, the Commission concludes that there are no significant environmental impacts associated with the proposed action and that issuance of the proposed amendments will not have a significant effect on the quality of the human environment. Therefore, pursuant to 10 CFR 51.31, an environment impact statement need not be prepared for this action.

For further details with respect to this action, see the applicant's request for amendments dated May 4, 1989. This document is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555, and at the local public document room at the Somervell County Public Library on the Square, P.O. Box 1417, Glen Rose, Texas 76043. The staff's evaluation of the request will be published in a safety evalution associated with the amendments to the construction permits for Comanche Peak Steam Electric Station, Units 1 and 2, and will be available for inspection at the locations listed above.

Dated at Rockville, Maryland this 23rd day of August, 1989.

For the Nuclear Regulatory Commission.

Christopher I. Grimes,

Director Comanche Peak Project Division, Office of Nuclear Reactor Regulation.

[FR Doc. 89-20311 Filed 8-28-89; 8:45 am]

BILLING CODE 7590-01-M

---

[1] The current owners of the Comanche Peak Steam Electric Station are: Texas Utilities Electric Company (TU Electric), Tex-La Electric Cooperative of Texas, Inc. (Tex-La), and Texas Municipal Power Agency (TMPA). Transfer of ownership from TMPA to TU Electric was previously authorized by Amendment Nos. 9 and 8 to Construction Permits CPPR-126 and CPPR-127, respectively, for Comanche Peak, Units 1 and 2, on August 25, 1988 to take place in 10 installments as set forth in the agreement attached to the application for amendment dated March 4, 1988. At the completion thereof, TMPA will no longer retain any ownership interest.

[2] The aggregate ownership amount takes into consideration the presently incomplete transfer of 6.2% ownership interest from the TMPA to TU Electric.

[Docket No. 999-90003 General License EA 89-060]

Grand Haven Board of Light and Power; Order Imposing Civil Monetary Penalty

I

Grand Haven Board of Light and Power (licensee), Grand Haven, MI 49417, is authorized to possess and use density/thickness gauges containing byproduct material pursuant to the general license provisions of 10 CFR 31.5. Pursuant to this authority the licensee possessed six byproduct material (cesium-137 sealed sources) gauging devices at the J. B. Sims Generating Station.

II

A special inspection of the licensee's activities was conducted on February 22, 1989 in response to allegations received by the NRC Region III office concerning the inadequate storage of gauges containing byproduct material at the J. B. Sims Station. The inspection disclosed that the licensee had not conducted its activities in full compliance with NRC requirements. A written Notice of Violation and Proposed Imposition of Civil Penalty was served upon the licensee by letter dated May 3, 1989. The Notice states the nature of the violations, the provisions of the NRC requirements that the licensee had violated, and the amount of the civil penalty proposed for the violations. The licensee responded to the Notice of Violation and Proposed Imposition of Civil Penalty by letter dated May 25, 1989. In its response the licensee admitted the violations and asked that the civil penalty be reduced.

III

After consideration of the licensee's response and the statements of fact and argument for reconsideration contained therein, the Deputy Executive Director for Nuclear Material Safety, Safeguards, and Operations Support has determined, as set forth in the Appendix to this Order, that the penalty proposed for the violations designated in the Notice of Violation and Proposed Imposition of Civil Penalty should be imposed.

IV

In view of the foregoing, and pursuant to Section 234 of the Atomic Energy Act of 1954, as amended (Act), 42 U.S.C. 2282, and 10 CFR 2.205, *It is hereby ordered* That:

The licensee pay a civil penalty in the amount of Five Hundred Dollars ($500) within 30 days of the date of this Order, by check, draft, or money order, payable to the Treasurer of the United States and mailed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555.

The licensee may request a hearing within 30 days of the date of this Order. A request for a hearing should be clearly marked as a "Request for an Enforcement Hearing" and shall be addressed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555. A copy of the hearing request shall also be sent to the Assistant General Counsel for Hearings and Enforcement, Office of General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the Regional Administrator, U.S. Nuclear Regulatory Commission, Region III, 799 Roosevelt Road, Glen Ellyn, Illinois 60137.

If a hearing is requested, the Commission will issue an Order designating the time and place of the hearing. If the licensee fails to request a hearing within 30 days of the date of this Order, the provisions of this Order shall be effective without further proceedings. If payment has not been made by that time, the matter may be referred to the Attorney General for collection.

In the event the licensee requests a hearing as provided above, the issues to be considered at such hearing shall be whether, on the basis of such violation, this Order should be sustained.

Dated at Rockville, Maryland, this 21st day of August 1989.

For the Nuclear Regulatory Commission.

Hugh L. Thompson, Jr.,

Deputy Executive Director for Nuclear Materials Safety, Safeguards, and Operations Support.

Appendix—Evaluations and Conclusions

On May 3, 1989, a Notice of Violations and Proposed Imposition of Civil Penalty (Notice) was issued for violations identified during an NRC inspection. Grand Haven Board of Light and Power responded to the Notice on May 25, 1989. In its response, the licensee admitted the violations as set forth in the Notice, but requested reconsideration of the civil penalty based on statements concerning their corrective actions. The NRC's evaluation and conclusion regarding the licensee's request for reconsideration of the civil penalty are addressed below.

Summary of Licensee's Response

The licensee admitted the violations in the Notice. The licensee restated the corrective actions previously described in the NRC Inspection Report forwarded to them on March 16, 1989, and updated the implementation status of those corrective actions. The licensee also described in its May 25, 1989, letter some management controls its implemented to ensure long term correction of the violations. The licensee requested reconsideration of the civil penalty based on statements concerning initiation of corrective actions, followup of job responsibilities, and implementation of a preventative maintenance program to prevent recurrence of problems.

NRC Evaluation of Licensee's Response

In determining the amount of civil penalty for the identified violations, the NRC evaluated the six factors for escalation and mitigation outlined in 10 CFR, Part 2, Appendix C (1989) (Enforcement Policy). Our conclusion that the base civil penalty of Five Hundred Dollars ($500) should not be adjusted, was based on these six factors. The licensee focused its request for mitigation of the proposed civil penalty on the factor dealing with "Corrective Action to Prevent Recurrence." That factor recognizes that corrective actions are always required to meet regulatory requirements. In situations where the licensee acts promptly in taking very extensive corrective actions, including actions to prevent recurrence, the civil penalty may be mitigated 50 percent. In this case, while we recognize the final corrective actions appear adequate to prevent recurrence, the initial relocation of the gauges to a secure storage location was at the request (telephonic) of the NRC and the implementation of long term management controls to prevent recurrence occurred after discussion of the need for that type of control during the enforcement conference. Therefore, mitigation of the civil penalty, based on both the immediate and long term corrective actions taken, was not considered warranted.

NRC Conclusion

An adequate basis for mitigation of the civil penalty was not provided by the licensee based on its corrective actions. Consequently, the proposed civil penalty in the amount of $500 should be imposed.

[FR Doc. 89–20310 Filed 8–28–89; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50–133]

Pacific Gas and Electric Co., Humboldt Bay Power Plant Unit No. 3; Exemption

I

Pacific Gas and Electric Company (the licensee) is the holder of Facility License No. DPR–7, which authorizes possession but not operation of Humboldt Bay Power Plant, Unit No. 3 (Humboldt Bay Unit 3). The license provides, among other things, that it is subject to all rules, regulations, and orders of the Nuclear Regulatory Commission (the Commission) now or hereafter in effect. The facility consists of a permanently shut down boiling water reactor and stored spent fuel located at the licensee's site in Humboldt County, California.

II

Section 50.54(w) of the Commission's regulations requires that each commercial power reactor licensee shall, by June 29, 1982, take reasonable steps to obtain on-site property damage insurance available at reasonable costs and on reasonable terms from private sources or to demonstrate to the satisfaction of the Commission that it possesses an equivalent amount of protection covering the facility, provided, among other things, that "this insurance must have a minimum coverage limit for the reactor station site of either $1.06 billion or whatever amount of insurance is generally available from private sources, whichever is less."

On May 28, 1982, the licensee filed a previous Request for Exemption from 10 CFR 50.54(w) to reduce the required minimum amount of primary property damage insurance to $100,000,000. In support of this request, the licensee indicated that Humbolt Bay Unit 3 had been shut down since July 1976 and was in cold shutdown condition. The licensee indicated that studies conducted by it and the NRC staff concluded that the unit presented no danger to the health and safety of the public. Further, the licensee was then

maintaining all-risk property damage insurance for Humboldt Bay Unit 3 in the amount of approximately $100,000,000. The licensee submitted that any additional insurance beyond that currently carried should not be required. In addition, the licensee stated that the annual premium for additional insurance would be an unnecessary burden on its ratepayers. That exemption request was granted on November 3, 1982 (54 FR 3168).

In its June 9, 1989 request the licensee asks for a further reduction in the required minimum property damage insurance from $100,000,000 to $63,160,000. Pursuant to 10 CFR 50.12(a) the Commission may grant exemptions from the requirements of the regulations which are authorized by law, will not endanger life or property or the common defense and security, and are otherwise in the public interest.

III

Humboldt Bay Unit 3 has been shut down since July 2, 1976. In 1983, the licensee decided to decommission Humboldt Bay Unit 3 and subsequently submitted a proposed Decommissioning Plan, proposed Technical Specifications (TS) and an Environmental Report. The licensee proposed (1) to amend License No. DPR–7 to possess-but-not-operate status; (2) to delete certain license conditions related to seismic modifications required before the NRC would authorize a return to power operation; (3) to revise the TS to reflect the possess-but-not-operate status; (4) to decommission Humboldt Bay Unit 3 in accordance with the plan included with the submittal; and (5) to extend License No. DPR–7 for 15 additional years, to November 9, 2015, to be consistent with the Decommissioning Plan.

On July 16, 1985 License No. DPR–7 was amended to possess-but-not-operate status. Only July 19, 1988 License No. DPR–7 was amended to approve the Decommissioning Plan and the balance of items 1 through 5 above.

The licensee notes that all fuel has now been removed from the reactor (394 assemblies), all fuel is now stored in the on-site spent fuel pool, along with 54 incore fission chambers, and the unit is now functioning as a spent fuel storage facility. Plant operations are not limited to surveillance and monitoring activities, and continued treatment and purification of spent fuel pool water and water entering the plant as ground water in-leakage. The licensee also notes that the staff's previous evaluation of the spent fuel pool conducted that the probability of any credible means of achieving nuclear criticality was negligibly small.

The licensee explains that the requested insurance minimum of $63,160,000 is the combined book value of the nuclear unit (Humboldt Bay Unit 3, $10,294,000) and the two on-site fossil fuel units ($52,866,000). The licensee indicates that the difference in cost between insuring for $100,000,000 and the proposed $63,160,000 is about $94,000 per year, and that the additional cost is against the public interest as it is a needless expense.

The NRC staff agrees with the licensee that Humboldt Bay Unit 3 is functioning as a spent fuel storage facility, that the risk of criticality is negligibly small, and that the proposed minimum amount of property damage insurance is adequate. A previous Commission-sponsored review and analysis of the costs of clean-up and decontamination at reference non-reactor facilities following postulated accidents comparable to those for which Humboldt Bay Unit 3 is conceivably vulnerable (e.g., fire, explosion) concluded that recovery costs would be substantially less than the proposed insurance minimum (see NUREG/CR–3293). For example, costs of recovery from credible accidents at a mixed oxide plant and a uranium fuel fabrication plant are estimated to be no more than $4.6 million and $2.2 million, respectively, in 1981 dollars. Potential accident recovery costs at these facilities would be higher than at Humboldt Bay Unit 3. This is because the radioactive material is more dispersive and can lead to more widespread contamination than the aged spent fuel elements maintained under water in the spent fuel pool at Humboldt Bay Unit 3. The staff therefore concludes that the underlying purpose of 10 CFR 50.54(w) will still be achieved with a minimum property damage insurance amount of $63,160,000.

Based on the foregoing, and in accordance with 10 CFR 50.12(a) the staff concludes that the exemption from the requirements of 10 CFR 50.54(w) as discussed above, is authorized by law, will not endanger life or property or the common defense and security, and is otherwise in the public interest. Furthermore, full compliance with 10 CFR 50.54(w) is not necessary to achieve the underlying purpose of the rule. Thus, special circumstances exist as described in § 50.12(a)(2)(ii), which the Commission has determined are sufficient to warrant the exemption.

Accordingly, the Commission hereby grants Pacific Gas and Electric Company the following exemption:

The licensee is exempt, until further Order of the Commission, from the requirement to carry primary property damage insurance coverage for Humboldt Bay Unit No. 3 in the full amount called for by 10 CFR 50.54(w)(1), provided that the licensee maintains such primary property damage insurance in an amount not less than $63,160,000.

IV

Pursuant to 10 CFR 51.32, the Commission previously determined that the granting of this Exemption would have no significant impact on the environment (54 FR 34266).

This exemption is effective upon issuance.

Dated at Rockville, Maryland this 22nd day of August 1989.

For the Nuclear Regulatory Commission.

John T. Greeves,

Deputy Director, Division of Low-Level Waste Management and Decommissioning, Office of Nuclear Material Safety and Safeguards.

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Procurement Policy

Availability; Procurement Regulatory Activity Report

AGENCY: Office of Management and Budget, Office of Federal Procurement Policy.

ACTION: Notice of availability of the Procurement Regulatory Activity Report.

SUMMARY: Subsections 25 (g) (1) and (2) of the Office of Federal Procurement Policy (OFPP) Act, as amended by Public Law 100–679, requires the Administrator for Federal Procurement Policy to publish a report within 6 months after the date of enactment and every 6 months thereafter relating to the development of procurement regulations to be issued.

Accordingly, the OFPP has prepared the first Procurement Regulatory Activity Report. This report is designed to satisfy all aspects of subsections 25(g) (1) and (2) of the OFPP Act which includes information on: The status of each regulation; a description of those regulations required by statute; a description of the methods by which public comment was sought; regulations, policies, procedures, and forms under review by the OFPP; whether the regulations have paperwork requirements; the progress made in promulgating and implementing the Federal Acquisition Regulation; and

such other matters as the Administrator determines would be useful.

ADDRESSES: Those persons interested in obtaining a copy of the Procurement Regulatory Activity Report, which is currently being printed, should contact the Executive Office of the President Publications Service, Room 2200, 725 17th Street, NW, Washington, DC, 20503, or phone (202) 395–7332.

Dated: August 23, 1989

David F. Baker,

Acting Deputy Administrator and Acting Administrator.

OFFICE OF PERSONNEL MANAGEMENT

Excepted Service

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: This gives notice of positions placed or revoked under Schedules A, B, and C in the excepted service, as required by civil service rule VI, Exceptions from the Competitive Service.

FOR FURTHER INFORMATION CONTACT: Leesa Martin, (202) 632–0728.

SUPPLEMENTARY INFORMATION: The Office of Personnel Management published its last monthly notice updating appointing authorities established or revoked under the Excepted Service provisions of 5 CFR Part 213 on July 31, 1989 (54 FR 31598). Individual authorities established or revoked under Schedule A, B, or C between July 1, 1989, and July 31, 1989, appear in a listing below. Future notices will be published on the fourth Tuesday of each month, or as soon as possible thereafter. A consolidated listing of all authorities will be published as of June 30 of each year.

Schedule A

No Schedule A's for the month of July.

Schedule B

Department of the Navy

All civilian professor positions at the Marine Corps Command and Staff College. Effective July 27, 1989.

Schedule C

Department of the Air Force

One Secretary to the Vice President for National Security Affairs. Effective July 17, 1989.

One Staff Assistant to the Secretary of the Air Force. Effective July 28, 1989.

U.S. Department of Agriculture

One Confidential Assistant to the Administrator, Animal and Plant Health Inspection Services. Effective July 3, 1989.

One Confidential Assistant to the Administrator, Farmers Home Administration. Effective July 3, 1989.

One Confidential Assistant to the Chief, Soil Conservation Service. Effective July 3, 1989.

One Special Assistant to the General Counsel. Effective July 11, 1989.

One Confidential Assistant to the Administrator, Foreign Agricultural Service. Effective July 18, 1989.

One Confidential Assistant to the Assistant Secretary for Congressional Relations. Effective July 18, 1989.

One Private Secretary to the Assistant Secretary for Congressional Affairs. Effective July 18, 1989.

One Special Assistant to the Chief of Staff. Effective July 25, 1989.

One Confidential Assistant to the Administrator, Bureau of Farmers Home Administration. Effective July 28, 1989.

Department of Commerce

One Confidential Assistant to the Director, Office of Public Affairs. Effective July 3, 1989.

One Special Assistant to the General Counsel, National Oceanic and Atmospheric Administration. Effective July 11, 1989.

One Confidential Assistant to the Chief Economist. Effective July 24, 1989.

One Confidential Assistant to the Deputy Secretary for Basic Industries. Effective July 24, 1989.

One Confidential Assistant to the Deputy Assistant Secretary for U.S. and Foreign Commercial Service. Effective July 26, 1989.

One Confidential Assistant to the Assistant Secretary for Import Administration. Effective July 26, 1989.

One Special Counsel to the General Counsel. Effective July 27, 1989.

One Confidential Assistant to the Under Secretary for International Trade. Effective July 27, 1989.

Department of Energy

One Staff Assistant to the Principal Deputy Assistant Secretary for Conservation and Renewable Energy. Effective July 5, 1989.

One Staff Assistant to the Chief of Staff to the Secretary. Effective July 11, 1989.

One Staff Assistant to the Assistant Secretary, Management and Administration. Effective July 11, 1989.

One Staff Assistant to the Principal Deputy Assistant Secretary for Congressional, Intergovernmental, and Public Affairs. Effective July 13, 1989.

Two Staff Assistants to the Assistant Secretary for Nuclear Energy. Effective July 19, 1989.

One Staff Assistant to the Assistant Secretary for International Affairs and Energy Emergencies. Effective July 24, 1989.

One Staff Assistant to the Principal Deputy Assistant Secretary for International Affairs and Energy Emergencies. Effective July 25, 1989.

One Staff Assistant to the Assistant Secretary for International Affairs and Energy Emergencies. Effective July 25, 1989.

Two Staff Assistants to the Deputy Under Secretary, Office of Policy, Planning and Analysis. Effective July 27, 1989.

One Staff Assistant to the Staff Assistant to the Secretary. Effective July 27, 1989.

One Staff Assistant to the Principal Deputy Assistant Secretary for International Affairs and Energy Emergencies. Effective July 27, 1989.

One Staff Assistant to the Administrator, Economic Regulatory Administration. Effective July 27, 1989.

One Staff Assistant to the Executive Assistant to the Secretary. Effective July 28, 1989.

Two Staff Assistants to the Director, Office of Civilian Radioactive Waste Management. Effective July 28, 1989.

Department of Defense

One Confidential Assistant to the Assistant Secretary. Effective July 25, 1989.

Department of Education

One Confidential Assistant to the Director, Scheduling and Briefing Staff. Effective July 6, 1989.

One Confidential Assistant to the Deputy Assistant Secretary for Legislation. Effective July 6, 1989.

One Confidential Assistant to the Assistant Secretary for Postsecondary Education. Effective July 6, 1989.

One Special Assistant to the Assistant Secretary for Vocational and Adult Education. Effective July 6, 1989.

One Confidential Assistant to the Assistant to the Secretary. Effective July 11, 1989.

One Confidential Assistant to the Assistant Secretary for Educational Research and Improvement. Effective July 17, 1989.

One Staff Assistant to the Assistant Secretary for Educational Research and Improvement. Effective July 17, 1989.

One Special Assistant to the Assistant Secretary for Special Education and Rehabilitation Services. Effective July 25, 1989.

One Confidential Assistant to the Director, Public Affairs Service. Effective July 27, 1989.

One Special Assistant to the Deputy Under Secretary for Planning, Budget and Evaluation. Effective July 27, 1989.

Environmental Protection Agency

One Staff Assistant to the Administrator. Effective July 13, 1989.

One Special Assistant to the Administrator. Effective July 18, 1989.

One Staff Assistant to the Administrator. Effective July 29, 1989.

Federal Home Loan Bank Board

One Staff Assistant to the Executive Director of Public Affairs. Effective July 5, 1989.

General Services Administration

One Confidential Assistant to the Deputy Administrator. Effective July 3, 1989.

One Deputy Chief of Staff to the Chief of Staff. Effective July 3, 1989.

One Confidential Assistant to the Administrator. Effective July 11, 1989.

Department of Health and Human Services

One Special Assistant for Public Affairs to the Associated Commissioner for Public Affairs. Effective June 19, 1989. Note: this position should have appeared in the listing dated Monday, July 31, 1989; 54 FR 31598.

One Director, Office of Policy, Planning, and Legislation. Effective July 6, 1989.

One Special Assistant to the Deputy Assistant Secretary for Legislation (Health). Effective July 11, 1989.

One Special Assistant for Liaison to the Associate Commissioner for Legislative Affairs. Effective July 11, 1989.

One Confidential Assistant to the Associate Commissioner for Public Affairs. Effective July 13, 1989.

One Congressional Liaison Specialist to the Deputy Assistant Secretary for Legislation. Effective July 13, 1989.

One Staff Assistant to the Secretary. Effective July 13, 1989.

One Associate Administrator, Office of Communications, Family Support Division. Effective July 19, 1989.

One Special Initiatives Coordinator to the Secretary. Effective July 19, 1989.

One Special Assistant to the Associate Commissioner. Effective July 21, 1989.

One Private Sector Initiatives Coordinator to the Deputy Assistant Secretary for Health (Disease Prevention and Health Promotion). Effective July 24, 1989.

One Executive Assistant to the Assistant Secretary for Health. Effective July 25, 1989.

One Special Assistant to the Director, Office of Community Services. Effective July 26, 1989.

One Deputy Director to the Director, Office of Community Services. Effective July 26, 1989.

One Special Assistant to the Secretary, Health and Human Services. Effective July 27, 1989.

One Director, Office of Public Affairs, to the Assistant Secretary for Human Development Services. Effective July 27, 1989.

One Special Assistant to the Assistant Secretary for Health. Effective July 27, 1989.

Department of Housing and Urban Development

One Confidential Assistant to the General Counsel. Effective June 26, 1989. Note: this position should have appeared in the listing dated Monday, July 31, 1989; 54 FR 31598.

One Special Assistant to the Assistant Secretary for Housing. Effective July 5, 1989.

One Special Assistant (Advance) to the Assistant Secretary for Public Affairs. Effective July 5, 1989.

One Associate Deputy General Counsel to the General Counsel. Effective July 6, 1989.

One Executive Assistant to the Assistant Secretary for Public and Indian Housing. Effective July 6, 1989.

One Special Assistant to the Under Secretary. Effective July 6, 1989.

One Intergovernmental Relations Officer to the Deputy Under Secretary for Intergovernmental Relations. Effective July 6, 1989.

One Special Assistant to the Regional Administrator-Regional Housing Commissioner. Effective July 6, 1989.

One Executive Assistant to the Assistant Secretary for Legislation and Congressional Relations. Effective July 11, 1989.

One Assistant for Congressional Relations to the Deputy Assistant Secretary for Congressional Relations. Effective July 11, 1989.

One Staff Assistant to the Deputy Assistant Secretary for Program Policy Development and Evaluation. Effective July 13, 1989.

One Special Assistant to the Deputy Assistant for Single Family Housing. Effective July 18, 1989.

One Special Assistant to the Deputy Assistant Secretary for Public Affairs. Effective July 18, 1989.

One Special Assistant to the Assistant Secretary for Housing. Effective July 25, 1989.

One Special Assistant to the Assistant Secretary for Public and Indian Housing. Effective July 28, 1989.

One Special Assistant to the Assistant Secretary for Community Planning and Development. Effective July 27, 1989.

One Special Assistant to the Secretary. Effective July 28, 1989.

One Special Assistant to the Regional Administrator-Regional Housing Commissioner (Region II, New York). Effective July 28, 1989.

Department of the Interior

One Staff Assistant for Intergovernmental Affairs to the Assistant to the Secretary and Director, External Affairs. Effective June 29, 1989. Note: this position should have appeared in the listing dated Monday, July 31, 1989; 54 FR 31598.

One Special Assistant to the Assistant Secretary for Indian Affairs. Effective July 7, 1989.

One Special Assistant to the Director, Bureau of Land Management. Effective July 13, 1989.

One Staff Assistant to the Director, Office of External Affairs, Bureau of Land Management. Effective July 25, 1989.

U.S. International Trade Commission

One Congressional Liaison to the Chairman. Effective July 28, 1989.

Department of Labor

One Special Assistant to the Assistant Secretary for Employment Standards. Effective July 3, 1989.

One Special Assistant to the Assistant Secretary for Public and Intergovernmental Affairs. Effective July 3, 1989.

One Confidential Assistant to the Deputy Secretary. Effective July 3, 1989.

One Confidential Assistant to the Assistant Secretary for Employment Standards. Effective July 3, 1989.

One Staff Assistant to the Deputy Under Secretary for International Labor Affairs. Effective July 3, 1989.

One Senior Legislative Officer to the Assistant Secretary for Congressional Affairs. Effective July 3, 1989.

One Special Assistant to the Assistant Secretary for Public and Intergovernmental Affairs. Effective July 3, 1989.

One Special Assistant to the Secretary. Effective July 3, 1989.

BILLING CODE 6325-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–27156; File No. SR–CSE–88–5]

Self-Regulatory Organizations; Cincinnati Stock Exchange; Order Approving Proposed Rule Change Authorizing Establishment of a Signature Guarantee Program

August 21, 1989.

On August 16, 1988, the Cincinnati Stock Exchange ("CSE") filed a proposed rule change (File No. SR–CSE–88–5) under section 19(b) of the Securities Exchange Act of 1934 ("Act").[1] The proposal authorizes the CSE to establish and operate a signature guarantee card distribution program. The Commission published notice of the proposal in the **Federal Register** on February 22, 1989.[2] No comments were received. For the reasons discussed below, the Commission is approving the proposal.

The proposal would authorize the CSE to establish and operate a signature guarantee [3] card distribution program. Under the program, CSE will distribute to transfer agents signature cards containing specimen signatures of individuals authorized to guarantee signatures on behalf of a CSE member. CSE also will notify transfer agents of updates it receives from its members and will provide transfer agents with new signature cards of new individuals authorized to guarantee signatures on behalf of a CSE member.

CSE believes the proposal rule change is consistent with the requirements of section 6b(5) of the Act. Specifically, CSE believes that the proposed will faster coordination with persons engaged in settling transactions in securities.

The Commission believes that the proposal is consistent with section 6(b)(5) of the Act in that it is designed to foster coordination with persons engaged in settling transactions in securities. Currently, CSE does not have a signature gurantee card distribution service and, thus, CSE members must distribute signature cards directly to more than 1200 transfer agents. The CSE's proposal is similar in many respects, to the signature card distribution service of other national securities exchanges.[4]

It is therefore ordered, Pursuant to section 19(b) of the Act, that the proposed rule change (File No. SR–CSE–88–5) be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

[2] *See* Securities Exchange Act Release No. 26544 (February 14, 1989), 54 FR 7657.

[3] Transfer agents generally require that the signature of the registered holder of a stock certificate be guaranteed before it can be accepted for cancellation and reissuance. Transfer agents, also require signature guarantors to provide specimen signatures for each individual authorized to issue guarantees on behalf of the financial institution.

[4] The New York Stock Exchange, American Stock Exchange, Midwest Stock Exchange and Philadelphia Stock Exchange offer signature guarantee card services to their members.

[Release No. 34–27157; File No. SR–OCC–89–10]

Proposed Rule Change by The Options Clearing Corporation; Provision for the Processing of Basket Trades

August 21, 1989.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) (the "Act"), notice is hereby given that on August 14, 1989, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

File No. SR–OCC–89–10 proposes Rules pursuant to which OCC would clear and facilitate the settlement of market baskets. The Chicago Board Options Exchange, Inc. ("CBOE") has proposed in File No. SR–CBOE–88–20 to trade market baskets based on two stock market indexes.

II. Self-Regulatory Organization's Statement of the Purposes of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change General

The overall purpose of the proposed rule change is to provide for the clearance and to facilitate the settlement of market baskets. Unlike options and IPs, which are securities of which OCC is the issuer, market baskets are simply contracts for the purchase and sale of the stocks comprising the basket and are not separate securities. OCC's role is to clear the Exchange transactions that it accepts, reporting the resulting transactions in the individual underlying stocks for clearance through correspondent clearing corporations, as provided in the rules.

Amendments to Existing By-Laws

Proposed amendments to Article I, Section 1 of OCC's existing By-Laws are, for the most part, made to incorporate references to market baskets. The term "market basket" is defined in paragraph (mmmm).

Articles V, VI and VIII are amended to incorporate references to market baskets. Section 5 of Article VI is amended to provide for the Corporation's acceptance of market baskets. Section 5 conditions acceptance of market basket transactions on OCC's receiving all margin payments due in respect of the transaction on the business day following the trade date. Section 7 of Article VI is amended to describe the information as to which a Purchasing Clearing Member and a Writing Clearing Member must agree in a market basket transaction.

Article VIII is amended to reflect that OCC's Non-Equity Securities Clearing Fund will cover losses suffered by OCC if a Clearing Member should default on any obligation to OCC with respect to market baskets.

Proposed Article XIX of the By-Laws

A new Article XIX that addresses market baskets is added to OCC's By-Laws. The introduction to the Article makes clear that the By-Laws in Articles I–XI apply to market baskets, except where expressly modified or made inapplicable by Article XIX. The effect on other By-Laws of each By-Law section in Article XIX is stated in brackets at the end of that section.

Article XIX, Section 1, contains definitions applicable to market baskets. Most of the definitions parallel those used with respect to IPs. The terms "purchaser" and "seller" are used instead of "holder" and "writer" to reflect the fact that market baskets are simply contracts of sale and not securities conferring ongoing rights and obligations upon holders and writers. The term "aggregate basket value" in respect of a market basket is defined as the sum of the closing market prices of each of the securities underlying the market basket on the day the market basket was accepted by OCC.

Except for the purposes of calculating margin pursuant to Rule 602A, the terms "long position" and "short position" are not used with respect to market baskets. The reason is that an opening transaction in market baskets that is not offset by a closing transaction effected in the same account on the same day results only in settlement obligations in respect of the stocks in the basket and not in a "position" in the sense that the term is used elsewhere in OCC's By-Laws and Rules. (These settlement obligations are in turn netted across accounts, as described below with reference to Rule 2001, to obtain a net obligation to receive or deliver each of the stocks in the basket.)

Section 2 conditions the acceptance of a market basket transaction on OCC's receiving margin payments in respect of the transaction on the business day immediately following the trade date. OCC retains the authority to accept a market basket for which margin has not been paid by applying certain funds of the Clearing Member that may be available to apply to the payment of any unpaid margin.

Section 3 of Article XIX states the general obligations of purchasers and sellers of market baskets.

Section 4 provides that the identity and number of shares deliverable in settlement of a market basket shall be determined by the Exchange. Should a security comprising a market basket become ineligible for settlement through a correspondent clearing corporation or should delivery of such security become impossible, unlawful or unfairly burdensome, OCC may direct that delivery of such security shall not be required and shall make such adjustments, if any, in the trade price or aggregate basket value of the market basket as it deems to be fair and reasonable under the circumstances.

Section 5 provides that OCC shall rely on the reporting authority for the market prices of the underlying securities. In the event OCC does not receive a market price for one or more underlying securities, it may either fix the market price for such securities on the basis of most recent available market prices, or it may suspend settlement obligations with respect to either the affected securities or the affected class of market baskets.

Proposed Amendments to Existing Rules

References to market baskets are being inserted where appropriate in Rules 207, 401, 603, 605, 609, 913(a) and 913(f).

Margin for market baskets will be calculated utilizing OCC's current non-equity margin system. Rule 602A is therefore amended to accommodate market baskets. In addition, the Rule is amended to make certain other minor changes.

The definition of "premium margin" is expanded to include market baskets. The definition provides that market basket premium margin within a class will be calculated on a settlement date by settlement date basis. These premium margin quantities are algebraically combined with all other premium margin quantities relating to the same class group to determine the premium margin for the class group.

The definition of "marking price" is expanded to include market baskets. Parallel changes are made in the definition of "margin interval." The description of the calculation of margin in the firm and market-maker's and specialist's accounts is expanded to accommodate market baskets.

The proposed rule change deletes language stating that each Clearing Member's obligations in respect of delivery units of physical IPs shall be margined in the firm account, because this language is made redundant by the language added to Rule 1907, which is described below.

A subparagraph is proposed to be added to state that OCC will collect margin equal to the movement in the value of market baskets between the time of the trade establishing the position and the close of business on that date if the movement is against the position of the Clearing Member, and that OCC will also give margin credit equal to that same movement if the movement is to the benefit of the Clearing Member.

The formula set forth in Rule 1001 for calculating each Clearing Member's contribution to the Non-Equity Securities Clearing Fund is being amended to include market baskets. In calculating a clearing member's proportionate share pursuant to that Rule, OCC will use the daily average of the sum of the net number of market baskets purchased or sold in each account.

As is discussed below, the proposed rule change amends Rule 1605(b) regarding the netted settlement of foreign currency options and Rule 1907(b) regarding the netted settlement of IPs to be settled by delivery of stock.

Proposed Chapter XX of the Rules

A new Chapter XX that addresses market baskets is added to OCC's Rules. Proposed Rule 2001 provides that the settlement date shall be the fifth business day after the market basket transaction is accepted. OCC's Board of Directors retains the authority to extend or postpone any market basket settlement date.

Proposed Rule 2001(b) describes the settlement of market baskets and, by and large, parallels Rule 1907(b) for IPs. As in the case of exercised IPs and foreign currency options, settlements are netted across accounts to a single net obligation to deliver or receive. OCC will report the purchase and sale of the underlying securities to the designated clearing corporation of each Clearing Member as if such securities were traded at their closing prices on the day the market basket transaction was effected. Accordingly, settlement will require the purchaser to pay through the designated clearing corporation the aggregate basket value, which is equal to the sum of the closing prices of the underlying securities. Any difference between the aggregate basket value and the trade price will be settled through OCC's cash settlement system on the settlement date in accordance with Rule 2001.

The proposed rule governing the settlement of a market basket accepted by OCC prior to an "ex" date of an underlying security is similar to the comparable rule applicable to equity options. In the event a particular underlying security becomes ineligible for settlement through a correspondent clearing corporation, OCC may direct that delivery of such underlying security be effected on a broker-to-broker basis.

Rule 2001 states that the rights and obligations of each Clearing Member to deliver or receive stock against receipt or payment of the aggregate basket value shall be deemed to be in the Clearing Member's firm account. Parallel sentences are being added to Rule 1605(b) with respect to the netted rights and obligations of Clearing Members to effect settlement of foreign currency and Rule 1907(b) with respect to the netted rights and obligations of Clearing Members to effect settlement of IPs by delivery or receipt of stock. The purpose of these provisions is to make clear that OCC will treat these settlements as being in the firm account and therefore, in the event of a Clearing Member default, will be able to apply any proceeds from such settlements without regard to the restrictions imposed, for example, by Rule 1104 with respect to the disposition of proceeds arising from positions in a customers' account.

Proposed Rule 2002 describes the treatment of market baskets to which a suspended Clearing Member is a party and, for the most part, parallels Rule 1908 for IPs. OCC's margin system will create a margin credit in the event the market moves in favor of a Clearing Member's pending market basket settlement. Accordingly, a Clearing Member effecting a buy-in is required to pay OCC the excess, if any, of the aggregate basket value over the prices actually paid in respect of the buy-in. Similarly, a Clearing Member effecting a sell-out must pay OCC the excess, if any, of the prices received on the sell-out over the aggregate basket value. OCC will place any amount so received in the suspended Clearing Member's Liquidating Settlement Account.

B. Self-Regulatory Organization's Statement on Burden on Competition

OCC does not believe that the proposed rule change would impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Written comments were not and are not intended to be solicited by OCC with respect to the proposed rule change and none have been received by OCC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or,

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to file number SR–OCC–89–10 in the caption above and should be submitted by September 19, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. IC–17117; File No. 812–7293]

Mutual Benefit Life Insurance Co.; Application for Exemption

August 22, 1989.

Agency: Securities and Exchange Commission ("SEC" or "Commission").

Action: Notice of Application for Exemption under the Investment Company Act of 1940 (the "1940 Act").

Applicants: The Mutual Benefit Life Insurance Company ("Mutual Benefit"), Mutual Benefit Variable Contract Account—11 of the Mutual Benefit Life Insurance Company (the "Account"), and Directed Services, Inc. ("DSI").

Relevant 1940 Act Sections: Applicants seek an order to permit the deduction from the Account of mortality and expense risk charges under a deferred variable annuity and an immediate variable annuity certain contract, and a guaranteed death benefit charge under a deferred variable annuity contract.

Filing Date: The Application was filed on April 11, 1989.

Hearing or Notification of Hearing: If no hearing is ordered, the requested exemption will be granted. Any interested person may request a hearing on this Application or ask to be notified if a hearing is ordered. Any request must be received by the Commission by 5:30 p.m. on September 18, 1989. Request a hearing in writing, giving the nature of your interest, the reasons for the request and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send a copy to the Secretary of the Commission along with proof of service by affidavit or, in the case of an attorney-at-law, by certificate. Request notification of the date of a hearing by writing to the Secretary to the Commission.

Addresses: The Securities and Exchange Commission, 450 5th Street NW., Washington, DC 20549; Applicants, c/o Directed Services, Inc., P.O. Box 5179 FDR Station, New York, New York 10150–5179.

For Further Information Contact: Wendell M. Faria, Staff Attorney, at (202) 272–3450 or Clifford E. Kirsch, Acting Assistant Director, at (202) 272–2061.

Supplementary Information: Following is a summary of the Application; the complete Application is available for a fee from either the Commission's Public Reference Branch in person or the Commission's commercial copier (800) 231–3282 (in Maryland (301) 258–4300).

Applicants' Representations

1. Mutual Benefit is a mutual life insurance company organized in the State of New Jersey in 1845 and presently licensed to engage in the life insurance business in all 50 states and the District of Columbia. Administrative services for these Certificates are provided at The Golden Financial Group, Inc., Customer Service Center, P.O. Box 5179, FDR Station, New York, New York 10150–5179. The Account is a separate investment account of Mutual Benefit established to act as a funding vehicle for a deferred annuity contract (the "Deferred Annuity") and an annuity certain contract (the "Annuity Certain") (referred to collectively as the "Contracts").

2. The Account is divided into divisions. Each division will invest in shares of a designated Series of the Western Capital Specialty Managers Trust (the "Trust") which is an open-end management investment company. The Trust has become registered with the Commission as an open-end management investment company and had filed a registration statement on Form N–1A. The Trust is a series-type mutual fund that contains seven Series, each of which will pursue different investment objectives and policies.

3. Subject to certain restrictions, Certificate owners are permitted to allocate the accumulation value to or from the Guaranteed Interest Division of the general account. The Guaranteed Interest Division currently credits a minimum interest at the effective rate of 4% for the Deferred Annuity and 5% for the Annuity Certain per year, compounded daily. Mutual Benefit may declare excess interest to the Guaranteed Interest Division at its sole discretion which will be guaranteed for one certificate year.

4. Western Capital Variable Advisors Corp. will serve as Manager to the Trust and will appoint investment advisers to each Series of the Trust. Pursuant to a Distribution Agreement between Mutual Benefit and DSI, a wholly owned subsidiary of The Golden Financial Group, Inc. ("GFC"), DSI will enter into a sales agreement with Western Capital Financial Group, Inc. to solicit sales of the Cetificates through registered representatives who are licensed to sell securities and variables insurance products including variable annuities. The registered representatives will be appointed by Mutual Benefit to sell the Certificates.

5. The Certificates provide for the accumulation of values on a variable basis except to the extent that a portion of the accumulation value is allocated to the Guaranteed Interest Division of the general account. Payment of annuity benefits will be on a fixed or variable basis. The variable aspects of the Certificates differ significantly from the fixed aspects in that the Certificate owner and the Annuitant assume the risk of investment gain or loss under a Certificate rather than Mutual Benefit. A Certificate owner directs the allocation of premium payments and accumulation value to the Account.

6. The Certificates are currently intended to be used in connection with a retirement plan qualified under sections 408(a) and/or 408(b) of the Internal Revenue Code or a non-qualified plan.

7. The Deferred Annuity is a group flexible payment contract which provides for an initial purchase payment and for subsequent purchase payments if the Certificate owner so desires. There is, however, no obligation to make additional payments.

8. The Annuity Certain is a group immediate annuity which provides for payment of a single premium and allows for variable annuity payments to be made to the Annuitant.

9. Deferred loading at a maximum rate of 7% of each payment is deducted from each payment for purchase-related expenses. If the payment received at issue on one Certificate or several simultaneously purchased Certificates exceeds specified limits we may reduce this load. This charge is allocated to

---

cover distribution expenses. All

regardless of how long each annuitant

lower hypothetical gross returns it

---

with the Securities and Exchange

[Rel. No. IC–17118; 811–5409]

Series A and Series B shares of limited

cover distribution expenses. All deferred loading applicable to initial or additional purchase payments or single premium payments is imposed at the time of payment but is advanced to the divisions and recovered from the accumulation value in equal installments on the first and subsequent certificate processing dates following the receipt and acceptance of the payment over a period specified in the Certificates. If the Certificate owner surrenders a Certificate, any remaining deferred loading will be deducted. The Application states that for purposes of the sales load provisions of the 1940 Act, the deferred loading is a front-end sales load. This is because the amount of the sales load is deducted from payments when made but is advanced back to the division and recovered in installments. Applicants are not relying on Rule 6c–8 in connection with this charge.

10. Mutual Benefit makes a deduction from the accumulation value for premium or other state and local taxes as they are incurred. Currently, these charges range up to 3%.

11. In the Deferred Annuity an administrative charge of $40 will be deducted from the accumulation value of a Contract each year to reimburse Mutual Benefit for the anticipated actual cost of administration expenses relating to the Contract. The amount of the administrative charge may be changed by Mutual Benefit to meet the anticipated actual cost of administrative expenses relating to the Contract; however, the amount of the administrative charge is guaranteed not to exceed $80 annually.

12. At any time while a Certificate is in effect, part of or all of the values under a Certificate may be surrendered for cash payment, or alternatively, the values under the Certificates may be applied to annuity options available at the time of surrender.

13. The Certificates provide that a maximum mortality and expense risk charge equal to 0.002477% of the asset values in each division of the Account will be deducted on a daily basis (equivalent to an annual charge of 0.90%). For the Deferred Annuity, approximately 0.55% is allocated to the mortality risk and 0.35% is allocated to the expense risk. In the Annuity Certain, approximately 0.45% is allocated to the mortality risk and 0.45% is allocated to the expense risk. The mortality risk assumed by Mutual Benefit arises from its obligation to continue to make annuity payments under the Certificates or income plan provisions of the Certificates, determined in accordance with the guaranteed annuity tables and other provisions of the Certificate, regardless of how long each annuitant lives and regardless of how long all payees as a group live. The mortality risk under the Deferred Annuity is the risk that, after annuitization or upon selection of an annuity option with a life contingency, annuitants will possibly live longer than Mutual Benefit's actuarial projections indicate, resulting in higher than expected payments during the payout phase, since the payment options are guaranteed not to be less than the tables discussed in the Deferred Annuity. In the Annuity Certain, the mortality risk assumed by Mutual Benefit relates to the fact that, at all times, Mutual Benefit will offer the option to convert the Annuity Certain, which does not provide for payments based on life contingencies, to one or more annuity contracts that provide for payments based on life contingencies. The mortality risk assumed by Mutual Benefit is the risk that annuitants, or beneficiaries after the death of the annuitant, will choose one such option and will possibly live longer than Mutual Benefit's actuarial projections indicate, resulting in higher than expected payments during the payout phase, since any payment option is guaranteed not to be less than the tables discussed in the Annuity Certain. In addition, Mutual Benefit assumes a risk that the charges for the administrative expenses may not be adequate to cover such expenses.

14. The Deferred Annuity also provides for a guaranteed death benefit annually. This charge is an account charge imposed to compensate Mutual Benefit for the risk that the minimum guaranteed death benefit due under a Deferred Annuity when the annuitant dies during the accumulation phase may exceed the accumulation value which is the normal death benefit otherwise payable. The guaranteed death benefit is the accumulated value of the purchase payments paid minus the accumulated value of the partial withdrawals taken. The guaranteed death benefit charge for the Certificates is based on the amount of the guaranteed death benefit and is imposed at a rate of $0.60 per $1,000 of guaranteed death benefit per year. However, the Account may offer other variable annuity contracts in the future. These variable annuity contracts may charge up to $1.20 per $1,000 of guaranteed death benefit per year. The guaranteed death benefit charge is based on the amount of the guaranteed death benefit and is approximately equal to (assuming a hypothetical gross return of 5% annually) 0.06% of net assets. For higher hypothetical gross returns this charge, when expressed as an asset charge, would be less, while for lower hypothetical gross returns it would be more.

15. Applicants represent that they have reviewed publicly available information regarding the level of the mortality and expense risk and guaranteed death benefit charges under comparable variable annuity contracts currently being offered in the industry, taking into consideration such factors as current charge levels or annuity rate guarantees and the markets in which the Certificates will be offered. Based upon the foregoing, Applicants further represent that the Maximum charges under the Certificates are within the range of industry practice for comparable contracts. Applicants will maintain and make available to the Commission, upon request, a memorandum outlining the methodology underlying this representation.

16. Mutual Benefit has concluded that there is a reasonable likelihood that the distribution financing arrangement being used in connection with the Certificates will benefit the Account and the Certificate owners. Mutual Benefit will keep and make available to the Commission, upon request, a memorandum setting forth the basis for this representation.

17. Applicants further represent that the Account will invest only in underlying funds which have undertaken to have a board of directors/trustees, a majority of whom are not interested persons of the funds, formulate and approve any plan under Rule 12b–1 under the 1940 Act to finance distribution expenses.

Applicants' Conditions

Applicants agree that if the requested order is granted such order will be expressly conditioned on Applicants' compliance with the undertakings set forth above.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 89–20250 Filed 8–28–89; 8:45 am]

BILLING CODE 8010-01-M

Self-Regulatory Organizations; Order Granting Application To Strike From Listing and Registration; The New York Stock Exchange, Inc. (Western Savings and Loan Association, Permanent Reserve Guarantee Stock, $1.00 Par Value) File No. 1–0009

August 21, 1989.

The New York Stock Exchange, Inc. ("Exchange") has filed an application with the Securities and Exchange Commission ("Commission") pursuant to Section 12(d) of the Securities Exchange Act of 1934 and Rule 12d2–2(c) promulgated thereunder to strike the above specified security from listing and registration thereon.

The reasons alleged for striking this security from listing and registration include the following:

In the opinion of the Exchange, the Common Stock of Western Savings and Loan Association ("Company") is no longer suitable for continued listing and dealings on the Exchange. Information supplied by the Company or taken from other sources believed by the Exchange to be reliable indicated that on June 16, 1989 the Federal Deposit Insurance Corporation announced that the Company had been placed in receivership and that the mutual association created to maintain the normal operations of the Company would not assume any obligations of the Company's stockholders. It was further stated that the Company had assets of $5.78 billion and total liabilities of $5.90 billion.

Exchange Rule 499.20, Subsection 9 (Reduction in Operating Assets and/or Scope of Operations) states the Exchange would normally give consideration to suspending or removing from the list a security of a company "when the operating assets have been or are to be substantially reduced such as by sale, lease, spin-off, distribution, discontinuance, abandonment, destruction, condemnation, seizure or expropriation, or the company has ceased to be an operating company or discontinued a substantial portion of its operations or business for any reason whatsoever, and whether or not any of the foregoing results from action by the company, related parties, or persons unrelated to the company."

The Commission, having considered the facts stated in the application and having due regard for the public interest and protection of investors, orders that said application be, and it hereby is, granted, effective at the opening of business on August 21, 1989.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC–17115; 811–5409]

Prudential Guaranteed Adjustable Fund, L.P.; Application for Deregistration

August 21, 1989.

Agency: Securities and Exchange Commission ("SEC").

Action: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "1940 Act").

Applicant: Prudential Guaranteed Adjustable Fund, L.P. ("Applicant").

Relevant 1940 Act Section: Deregistration under section 8(f).

Summary of Application: Applicant seeks an order declaring that it has ceased to be an investment company under the 1940 Act.

Filing Dates: The application was filed on Form N–8F on August 10, 1989.

Hearing or Notification of Hearing: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving Applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on September 14, 1989, and should be accompanied by proof of service on the Applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

Addresses: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20592.

For Further Information Contact: Patricia Copeland, Legal Technician, (202) 272–3009, or Karen L. Skidmore, Branch Chief, (202) 272–3023 (Office of Investment Company Regulation).

Supplementary Information: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. Applicant is a limited partnership under the laws of the state of Delaware. On December 3, 1987, Applicant registered as an open-end diversified management company under the 1940 Act. On that same date, Applicant filed a registration statement under the Securities Act of 1933 on Form N–1A with respect to an indefinite number of Series A and Series B shares of limited partnership interest. The registration statement never became effective and was withdrawn by Applicant on February 28, 1989. Applicant has never made a public offering.

2. On August 7, 1989, Applicant's General Partners adopted a resolution authorizing the deregistration of Applicant under the 1940 Act.

3. Aside from an annual Delaware tax which may become due and payable at the time Applicant files its certificates of cancellation in that state, Applicant has no debts or other liabilities which remain outstanding. In connection with the organization of Applicant as a limited partnership under Delaware law, an affiliated person of Applicant joined in the partnership agreement as an original limited partner, and such affiliated person might be deemed to be a securityholder of Applicant. Applicant states that it does not currently have any assets nor is it a party to any litigation or administrative proceeding, and it does not propose to engage in any business activities other than those necessary for the winding up of its affairs.

For the Commission, by the Division of Investment Management, under delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010–01–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 89–065]

Towing Safety Advisory Committee; Meeting of Subcommittee

AGENCY: Coast Guard, Department of Transportation.

ACTION: Notice of meeting.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Act (Pub. L. 92–463; U.S.C. App. I), notice is hereby given of a meeting of the following subcommittee of the Towing Safety Advisory Committee (TSAC). The subcommittee on Tug-Barge Construction, Certification and Operations will meet on September 25, 26, 27 and 28, 1989 in Room 2230, U.S. Department of Transportation, 400 7th Street SW., Washington, DC. The meeting is scheduled to begin at 9:30 a.m. and end at 4:00 p.m. each day. The agenda for the meeting follows:

1. Development of suggested improvements in the provisions of 46 CFR Part 151.

2. Evaluate the adequacy of current 46 CFR Part 31 inspection intervals for tank barges.

3. Evaluate the adequacy of U.S. Coast Guard policy regarding the application of "Rivers" structural rules for tank barges that regularly ply a "Lakes, Bays, and Sounds" route or an "Oceans" route within the boundary line.

4. Evaluate requiring a buckling analysis for existing barges with "Rivers" scantlings as a condition of continuing operation on "Lakes, Bays, and Sounds" or "Oceans" routes within the boundary line.

5. Evaluate requiring high level alarms in cargo tanks on tank barges to reduce the incidence of cargo tank overfilling and overpressurization.

6. Evaluate the progress in identifying problems confronting the towing industry that could result from a full conversion to 1969 Tonnage Convention tonnage. Consider information concerning tonnage thresholds and related matters that the Coast Guard obtained during public meetings.

Members of the public may present oral or written statements at the meeting. Additional information may be obtained from Mr. Gene Hummel, Executive Director of TSAC at U.S. Coast Guard, Headquarters, G–MP–2, Room 2414, 2100 Second Street SW., Washington, DC 20593–0001 or by calling (202) 267–1406.

Dated: August 22, 1989.

J.D. Sipes,

Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Safety, Security and Environmental Protection.

[FR Doc. 89–20240 Filed 8–28–89; 8:45 am]

BILLING CODE 4910–14–M

Federal Aviation Administration

Proposed Modification of Airport Improvement Program Grant Improvement

AGENCY: Federal Aviation Administration, (DOT).

ACTION: Notice of Proposed Modification of Airport Improvement Program Grant Assurances.

SUMMARY: The FAA proposes to modify the standard grant assurances required of a sponsor receiving a grant under the Airport Improvement Program (AIP). This modification is necessary to allow FAA to bring up to date the list of Advisory Circulars included as standards without having to publish them in the Federal Register. It will also allow FAA to delete from the grant program two separate certifications presently required to be prepared by grant recipients by adding them to the standard set of assurances. These modifications will provide for new assurances in all grants issued under the Airport Improvement Program after October 1, 1989. The Secretary of Transportation is required to provide notice in the Federal Register and an opportunity for the public to comment upon proposals to modify assurances or to require any additional assurances under AIP pursuant to subsection 511(f) of the Airport and Airway Improvement Act of 1982, as amended by the Airport and Airway Safety and Capacity Expansion Act of 1987, Public Law 100–223.

DATES: These proposed modifications to the Grant Assurances would be effective October 1, 1989. Comments must be submitted on or before September 28, 1989.

ADDRESS: Comments may be delivered or mailed to the Grants-in-Aid Division, APP–500, Room 618, FAA, 800 Independence Ave., SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: Mr. Benedict D. Castellano (Airports Program Specialist); Telephone (202) 267–8822.

SUPPLEMENTARY INFORMATION: The Secretary must receive certain assurances from the sponsor (applicant) under *The Airport and Airway*

Improvement Act of 1982, as amended by *The Airport and Airway Safety and Capacity Expansion Act of 1987*, Pub. L. 100–223. These assurances are submitted as part of the application for Federal assistance and are incorporated in all grant agreements by reference. The current assurances were published on February 3, 1988 (53 FR 3104) and amended on September 6, 1988 (53 FR 34361). As need dictates, these assurances must be amended from time to time to reflect new Federal requirements or to resolve problems arising in the grant program. Notice of such proposed changes are published in the Federal Register and an opportunity provided for comment by the public. The Federal Aviation Administration (FAA) is planning to modify the assurances currently being used in order to reflect some changes in the general requirements.

FAA uses three separate sets of standard assurances: one for airport sponsors (owners/operators); one for planning agency sponsors; and one for nonairport sponsors.

Assurance 1, *General Federal Requirements*, of all three sets of assurances is proposed to add the Drug-Free Workplace Act of 1988 (Pub. L. 100–690, Title V, Subtitle D) to the list under Federal Legislation. Additionally, Assurance 36 of the Airport Sponsor Assurances, Assurance 13 of the Planning Agency Sponsor Assurances, and Assurance 22 of the Non-Airport Sponsor Assurances, entitled *Durg-Free Workplace*, are proposed which will serve as the certification required by sponsors to comply with the Drug-Free Workplace Act.

Assurance 34 of the Airport Sponsor Assurances, titled *Policies, Standards, and Specifications*, is proposed to delete the list of Advisory Circulars presently included. Instead of the Circulars being listed in the assurance, sponsors would be provided a dated listing, entitled the "Current FAA Advisory Circulars for AIP Projects." This listing would be updated periodically by FAA as advisory circulars are changed and updated. The FAA field office would provide copies of the latest list to sponsors at the preapplication stage and this list would be attached to the sponsor's application package to ensure that a sponsor is aware of current requirements. This list would be incorporated in the grant agreement through reference to the application.

Assurance 35 of the Airport Sponsor Assurances and Assurance 21 of the Nonairport Sponsor Assurances, entitled *Relocation and Real Property Acquisition*, are proposed. This assurance would eliminate the need for the current Relocation and Real Property Acquisition Assurances, FAA Form 5100–40, which is presently required of the sponsor as a separate assurance whenever there is a project which includes the acquisition of real property or the relocation of persons.

Airport Improvement Program Grant Assurances

1. The Airport Sponsor Assurances are proposed to be amended as follows:

a. Assurance No. C.1. is proposed to be amended to read as follows:

C. 1. General Federal Requirements

* * * * *

u. Drug-Free Workplace Act of 1988

b. By proposing to revise Assurance 34 to read:

34. Policies, Standards, and Specifications. It will carry out the project in accordance with the policies, standards, and specifications approved by the Secretary including, but not limited to the advisory circulars listed in the "Current FAA Advisory Circulars for AIP Projects," dated ________________ and included in this grant, and in accordance with applicable state policies, standards, and specifications approved by the Secretary.

c. By proposing to add Assurance 35 to read:

35. Relocation and Real Property Acquisition. (1) It will be guided in acquiring real property, to the greatest extent practicable under State Law, by the land acquisition policies in Subpart B of 49 CFR Part 24 and will pay or reimburse property owners for necessary expenses as specified in Subpart B. (2) It will provide a relocation assistance program offering the services described in Subpart C and fair and reasonable relocation payments and assistance to displaced persons as required in Subparts D and E of 49 CFR Part 24. (3) It will make available within a reasonable period of time prior to displacement comparable replacement dwellings to displaced person in accordance with Subpart E of 49 CFR Part 24.

d. By proposing to add Assurance 36 to read:

36. Drug Free Work Place. It will provide a drug-free workplace at the site of work specified in the grant application in accordance with 49 CFR Part 29 by (1) publishing a statement notifying its employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the sponsor's workplace and specifying the actions that will be taken against its employees for violation of such prohibition; and (2) establishing a drug-free awareness program to inform its employees about the dangers of drug abuse in the workplace and any available drug counseling, rehabilitation, and employee assistance programs; (3) notifying the FAA within ten days after receiving notice of an employee criminal drug statute conviction for a violation occurring in the workplace, and (4) making a good faith effort to continue to maintain a drug-free workplace.

2. The Planning Agency Sponsors Assurances are proposed to be amended as follows:

a. Assurance No. C. 1. is proposed to be amended to read as follows:

C. 1. General Federal Requirements

* * * * *

i. Drug-Free Workplace Act of 1988

b. By proposing to add Assurance 13 to read:

13. Drug Free Work Place. It will provide a drug-free workplace at the site of work specified in the grant application in accordance with 49 CFR Part 29 by (1) publishing a statement notifying its employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the sponsor's workplace and specifying the actions that will be taken against its employees for violation of such prohibition; and (2) establishing a drug-free awareness program to inform its employees about the dangers of drug abuse in the workplace and any available drug counseling, rehabilitation, and employee assistance programs; (3) notifying the FAA within ten days after receiving notice of an employee criminal drug statute conviction for a violation occurring in the workplace, and (4) making a good faith effort to continue to maintain a drug-free workplace.

3. The Nonairport Sponsor Assurances are proposed to be amended as follows:

a. Assurance No. C.1. is proposed to be amended to read as follows:

C. 1. General Federal Requirements

* * * * *

u. Drug-Free Workplace Act of 1988

b. By proposing to add Assurance 21 to read:

21. Relocation and Real Property Acquisition. (1) It will be guided in acquiring real property, to the greatest extent practicable under State Law, by the land acquisition policies in Subpart B of 49 CFR Part 24 and will pay or reimburse property owners for necessary expenses as specified in Subpart B. (2) It will provide a relocation assistance program offering the services described in Subpart C and fair and reasonable relocation payments and assistance to displaced persons as required in Subparts D and E of 49 CFR Part 24. (3) It will make available within a reasonable period of time prior to displacement comparable replacement dwellings to displaced person in accordance with Subpart E of 49 CFR Part 24.

c. By proposing to add Assurance 22 to read:

22. Drug Free Work Place. It will provide a drug-free workplace at the site of work specified in the grant application in accordance with 49 CFR Part 29 by (1)

BILLING CODE 4910-13-M

DEPARTMENT OF TRANSPORATION

General Aviation Compliance and Enforcement

AGENCY: Federal Aviation Administration (FAA)/DOT.

ACTION: Notice of open forums and request for comments.

SUMMARY: This notice announces FAA's intent to evaluate its General Aviation Compliance and Enforcement Program. The public can participate in this evaluation: (1) by attending and/or speaking at an open forum; or (2) by written comments.

The vehicle for this evaluation will be a System Safety and Efficiency Review (SSER), conducted by the Office of the Associate Administrator for Aviation Safety. Areas of review will include, but will not be limited to, sanction guidelines, FAA and industry/public attitudes, enforcement effectiveness, Surveillance Program, and the Accident Prevention Program.

DATE: Written comments should be received on or before November 15, 1989.

ADDRESS: Send all written comments to: Federal Aviation Administration, Association Administrator for Aviation Safety, Washington, DC 20591, Attention: ASQ-1.

Background

SSER's are comprehensive, interdisciplinary evaluations conducted under the leadership of the FAA's Associate Administrator for Aviation Safety. Teams consists of highly qualified technical representatives from FAA and other units of Government, and the aviation community. SSER's review specific issues in order to improve aviation safety and efficiency, and address air traffic control, flight standards, aircraft certification, airway facilities, civil aviation security and airport certification, plus the activities of airport operators, air carriers and others. The SSER of FAA's General Aviation Compliance and Enforcement Program will be conducted to determine its effectiveness in promoting safety in general aviation. This review will not involve an evaluation of the agency's enforcement policies for air carriers. All SSER's are preceded by listening sessions at which the aviation community and other interested persons and organizations are encouraged to present their views.

The review will be conducted in three phases: (1) data gathering and analysis; (2) listening sessions at various locations around the country; and (3) technical evaluation of specific compliance and enforcement issues, including those identified in listening sessions or in written comments.

Invitation to Participate

Interested parties and individuals are invited to participate in this SSER by submitting written comments to the address shown above, or by attending the listening sessions shown below. Speakers and written commenters are asked to identify issues which they believe should be examined in the SSER. Reservations or formal presentations are not necessary. Comments will be recorded, but no transcript will be produced. Dates, times and locations for the listening sessions are shown below:

Monday August 28, 1989 (7:30 p.m.), Long Beach Hyatt Regency, 200 South Pine Avenue, Long Beach, California.

Tuesday August 29, 1989 (7:30 p.m.), Best Western Airtel Plaza Hotel, 7277 Valjean Avenue, Van Nuys, California.

Thursday September 7, 1989 (7:00 p.m.), Park Marriott, 300 Bare Blvd., Parkridge, New Jersey.

Tuesday September 26, 1989 (7:30 p.m.), Ramada In—Southeast, 6101 East 87th St., Kansas City, Missouri.

Wednesday September 27, 1989 (7:30 p.m.), Sheraton North Shore Inn, 933 Skokie Blvd., Northbrook, Illinois.

Thursday September 28, 1989 (7:30 p.m.), Holiday Inn, 17040 South Halsted, Harvey, Illinois.

Thursday October 5 (10:00 a.m. to Noon), Georgia World Congress Center, Atlanta, Georgia.

Friday October 20, 1989 (11: a.m.-12:30 p.m.), Buena Vista Palace Hotel, Lake Buena Vista, Florida.

Charles H. Huettner,

Deputy Association Administrator for Aviation Safety.

BILLING CODE 4910-13-M

[Summary Notice No. PE-89-34]

Petition for Exemption; Summary and Disposition

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for examption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requriements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither pubication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and must be received on or before September 18, 1989.

ADDRESS: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-10), Petition Docket No. ———, 800 Independence Avenue SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-10), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267-2132.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, DC, on August 22, 1989.

Denise Donohue Hall,

Manager, Program Management Staff, Office of the Chief Counsel.

Petitions for Exemption

Docket No.: 25210.
Petitioner: Air Transport Association of America.
Regulations Affected: 14 CFR 63.39(b) (1) and (2) and 121.425(a)(2)(i).
Description of Relief Sought: To extend Exemption No. 4901 that allows Part 121 certificate holders to train and check flight engineer candidates in the performance of the airplane preflight inspection using advanced pictorial means instead of the airplane. The exemption also permits Part 121 certificate holders and operators of Part 63 flight engineer schools to complete training and checking of flight engineer applicants in an appropriate simulator instead of taking that portion of the practical test in an airplane in flight. Exemption No. 4901 will expire on January 31, 1990.

Docket No.: 25971.
Petitioner: National Association of Flight Instructors.
Sections of the FAR Affected: 14 CFR 135.251.
Description of Relief Sought: To allow the petitioner's members to submit their anti-drug programs no later than July 1, 1991 (instead of April 15, 1990) and to begin implementation of the program no later than November 1, 1991.

Docket No.: 073CE.
Petitioner: Dornier Seastar Gmbh and Company.
Sections of the FAR Affected: 14 CFR 23.807(d)(1).
Description of Relief Sought: To allow the passenger entrance door of the Dornier Seastar to function as a non-floor-level emergency exit.

Docket No.: 074CE.
Petitioner: Dornier Seastar Gmbh and Company.
Sections of the FAR Affected: 14 CFR 23.807(d)(1)(i).
Description of Relief Sought: To allow petitioner an exemption from the requirement to have an emergency exit on the same side of the cabin as the passenger entrance door.

Docket No.: 21882.
Petitioner: China Airlines Limited.
Sections of the FAR Affected: 14 CFR 61.77 (a) and (b) and 63.23 (a) and (b).
Description of Relief Sought/Disposition: To extend Exemption No. 4849 that allows the issuance of U.S. special purpose pilot and flight engineer certificates to petitioner's airmen, without meeting the requirement that they hold a current foreign certificate or license issued by a foreign contracting state to the Convention on International Civil Aviation.
GRANT, August 14, 1989, Exemption No. 4849A.

Docket No.: 24540.
Petitioner: Union Camp Corporation.
Regulations Affected: 14 CFR 91.45.
Description of Relief Sought/Disposition: To extend Exemption No. 4468 that allows petitioner to perform ferry flights with one engine inoperative from time to time, as the necessity arises, without the requirement to obtain a ferry permit for each flight.
GRANT, August 16, 1989, Exemption No. 4468B.

Docket No.: 25733.
Petitioner: Helicopters, Unlimited.
Regulations Affected: 14 CFR 135.337(a)(5).
Description of Relief Sought/Disposition: To allow Mr. Bennie F. Harris to perform the duties of Flight Instructor and Check Airman for petitioner using a Class III Medical Certificate.
DENIAL, August 4, 1989, Exemption No. 5058.

Docket No.: 2577b.
Petitioner: Lynch Flying Service, Inc.
Regulations Affected: 14 CFR 43.3(g).
Description of Relief Sought/Disposition: To allow properly certificated and trained pilots employed by petitioner to remove and replace passenger seats and ambulatory stretcher and base assemblies in the Cessna 400 series aircraft operated by the peititioner.
PARTIAL GRANT, August 11, 1989, Exemption No. 5085.

Docket No.: 25869.
Peitioner: Air Berlin, Inc.
Sections of the FAR Affected: 14 CFR part 121, Appendix I.
Description of Relief Sought/Disposition: To allow petitioner to submit an anti-drug program to the FAA after the 240-day period after December 21, 1988, as required by Appendix I.
PARTIAL GRANT, August 15, 1989, Exemption No. 5086.

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

International Revenue Service (IRS)

Commissioner's Advisory Group; Open Meeting

There will be a meeting of the Commissioner's Advisory Group on September 13 & 14, 1989. The meeting will be held in Room 3313 of the Internal Revenue Service Building. The building is located at 1111 Constitution Avenue, NW., Washington, DC. The meeting will begin at 8:30 a.m. on Wednesday, September 13 and 8:30 a.m. on Thursday, September 14, 1989. The agenda will include the following topics:

Wednesday, September 13, 1989

Information Systems Development

Report on Registration of Commercial Preperers

Human Resources Traning

Complexity of Regulations and Issues

Thursday, September 14, 1989

Private Rulings Process

Ad Hoc Topics, Q & A

Note: Last minute changes to the day or order of topic discussion are possible and could prevent effective advance notice.

The meeting, which will be open to the public, will be in a room that accommodates approximately 50 people, including members of the Commissioner's Advisory Group and IRS officials. Due to the limited conference space, notification of intent to attend the meeting must be made with Robert F. Hilgen, Assistant to the Senior Deputy Commissioner no later than September 6, 1989. Mr. Hilgen may be reached on (202) 566-4143 (not toll-free).

If you would like to have the committee consider a written statement, please call or write Robert F. Hilgen, Assistant to the Senior Deputy Commissioner, Internal Revenue Service, 1111 Constitution Avenue, NW., C:SD Room 3014, Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Robert F. Hilgen, Assistant to the Senior Deputy Commissioner, (202) 566-4143 (Not toll-free).

Fred T. Goldberg, Jr.,

Commissioner.

UNITED STATES INFORMATION AGENCY

Reporting and Information Collection Requirements Under OMB Review

AGENCY: United States Information Agency.

ACTION: Notice of reporting requirements submitted for OMB review.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit proposed or established reporting and recordkeeping requirements to OMB for review and approval, and to publish a notice in the **Federal Register** notifying the public that the Agency has made such a submission. USIA is required to certify the eligibility of foreign citizen for J-1 visas so that they may visit the United States under one of USIA's Exchange-Visitor programs. USIA is requesting approval of the extension of a program OMB 3116-0008, which provides J-1 visas for Exchange-Visitor programs. Respondents will be required to respond only one time.

DATE: On or before September 28, 1989.

Copies: Copies of the Request for Clearance (SF-83), supporting statement, transmittal letter and other documents submitted to OMB for approval may be obtained from the USIA Clearance Officer. Comments on the items listed should be submitted to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for USIA, and also to the USIA Clearance Officer.

FOR FURTHER INFORMATION CONTACT: Agency Clearance Officer, Debbie Knox, United States Information Agency, to M/ASP, 301 Fourth Street, SW., Washington, DC 20547, telephone (202) 485-7503; and OMB review: Mr. Donald Arbuckle, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503, telephone (202) 395-7340.

SUPPLEMENTARY INFORMATION: Title: "Certificate of Eligibility for Exchange Visitor (J-1) Status."

Form Number: IAP-66.

Abstract: This information collection is intended to facilitate the efforts of an Exchange-Visitor sponsor, who sends the form to an individual abroad so that he or she may take it to the nearest American Consul to receive a J-1 visa.

Proposed Frequency of Responses:

No. of Respondents	200,000
Recordkeeping Hours	450
Total Annual Burden	60,450

Dated: August 22, 1989.

Ledra Dildy,

Federal Register Liaison.

Culturally Significant Objects Imported for Exhibition; Determination; Picasso and Braque: Pioneering Cubism

Notice is hereby given of the following determination: Pursuant to the authority vested in me by the act of October 19, 1965 (79 Stat. 985, 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), and Delegation Order No. 85-5 of June 27, 1985 (50 FR 27393, July 2, 1985), I hereby determine that the objects to be included in the exhibit "Picasso and Braque: Pioneering Cubism" from the U.S.S.R. (see list [1]), imported from abroad for the temporary exhibition without profit within the United States, are of cultural significance. These objects are imported pursuant to loan agreements with the foreign lenders. I also determine that the temporary exhibition or display of the listed exhibit objects at the Museum of Modern Art in New York, New York beginning on or about September 20, 1989 to on or about January 16, 1990, is in the national interest.

Public notice of this determination is ordered to be published in the **Federal Register**.

Dated: August 23, 1989.

Alberto J. Mora,

General Counsel.

DEPARTMENT OF VETERANS AFFAIRS

Privacy Act of 1974; Amendment of System Notice

AGENCY: Department of Veterans Affairs.

ACTION: Notice.

Notice is hereby given that the Department of Veterans Affairs (VA) is amending a system of records entitled "Administrator's Official Correspondence Records" (75VA001B) which is set forth on page 822 of the

---

[1] A copy of this list may be obtained by contacting Ms. Lorie J. Nierenberg of the Office of the General Counsel of USIA. The telephone number is 202-485-8827, and the address is Room 700, U.S. Information Agency, 301 4th Street, SW., Washington, DC 20547.

[1] A copy of this list may be obtained by contacting Lorie J. Nierenberg of the Office of the General Counsel of USIA. The telephone number is 202/485-8827, and the address is Room 700, U.S. Information Agency, 301 Fourth Street, SW., Washington, DC 20547.

Federal Register publication "Privacy Act Issuances, 1987 Compilation, Volume V." The system is being amended to include magnetic disk as a method of storge.

This notice also corrects an administrative oversight in the initial publication which inadvertently omitted the paragraph "Categories of Individuals Covered by the System."

To reflect the elevation to Department level, the name of the system is changed to "Secretary's Official Correspondence Records". All references to "Veterans Administration" are changed to "Department of Veterans Affairs" and references to the "Administrator" are changed to "Secretary" throughout the notice. The full text of the notice is being republished.

These changes are adminstrative in nature, therefore, no public comment is required.

Approved: August 21, 1989.

Edward J. Derwinski,

Secretary.

Notice of Amendment to System of Records

The system identified as 75VA001B "Administrator's Official Correspondence Records" appearing on page 82 of the **Federal Register** publication "Privacy Act Issuances, 1987 Compilation, Volume V"" is revised as follows:

75VA001B

SYSTEM NAME:

Secretary's Official Correspondence Records.

SYSTEM LOCATION:

Records are maintained in the Office of the Secretary, Executive Secretariat (001B), VA Central Office, Washington, D.C. 20420 with copies located in various other offices throughout the Department of Veterans Affairs (VA) Central Office and field stations. (Address locations are listed in VA Appendix 1 at the end of this document.) The Office of Administration, Safety and Office Support Services (03) keeps records on magnetic media.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individual citizens (veteran and nonveteran), VA employees, organizations, agencies of Federal, state and local governments, and public officials who have sent correspondence to VA.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records (or information contained in records) may include: (1) Names of individuals (e.g., private citizens, veterans, public officials, organizations); (2) writers' social security number and/or veterans' claim number; (3) inquires or correspondence sent to the Secretary of Veterans Affairs by individuals; (4) information pertinent to decisions or responses given by the Secretary, administration heads or staff office directors; and (5) copies of the decisions or responses of the Secretary, administration heads or staff office directors.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Title 38, United States Code, 210(C).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

1. The records of an individual who is covered by this system may be disclosed to a member of Congress or staff person acting for the member when the member or staff person requests the record on behalf of and at the request of that individual.

2. Any information in this system from correspondence or inquiries sent to the Secretary of Veterans Affairs may be disclosed to Federal or state agencies at the request of the correspondent or inquirer in order for those agencies to help the correspondent with his or her problem. The information disclosed may include the name and address of the correspondent or inquirer and details concerning the nature of the problem specified in the correspondence.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records of inquiries and correspondence are maintained on paper documents in individual file folders in the Office of the Secretary. Data files supporting the automated system are stored in a secured area on magnetic disk and tape.

RETRIEVABILITY:

Records are maintained in alphabetical order by last name of the individual correspondent. When appropriate, records are also filed alphabetically by name of member of Congress representing the correspondent. Access to the automated system is via terminals located in the secured area referred to in safeguards. Standard security precautions are used to prohibit access to only authorized personnel.

SAFEGUARDS:

Records are maintained in a manned room during working hours. During nonworking hours, there is limited access to the building with visitor control by security personnel, and the room where the records are kept is locked. Access to the records is only authorized to VA personnel on a need-to-know basis.

RETENTION AND DISPOSAL:

In the Office of the Secretary, records retrieved by last name of members of Congress are retained in the Secretary's Office for one current year than retired to inactive storage in VA and Federal Archives and Records Center for ten years. All other records in this system are retained in VA for five years then retired to the Washington National Records Center where they are retained for 20 years. Thereafter, they are offered to National Archives for accessioning. After five years automated files are maintained indefinitiely on a history file in the correspondence tracking system.

SYSTEM MANAGER(S) AND ADDRESS:

Office of the Secretary, Executive Secretariat (001B), VA Central Office, Washington, DC 20420.

NOTIFICATION PROCEDURE:

An indvidual who wishes to determine whether a record is being maintained by the Office of the Secretary (001B) under his or her name or other personal identifier or wants to determine the contents of such records should submit a written request or apply in person to Executive Secretariat (001B).

RECORD ACCESS PROCEDURES:

An individual who seeks access to or wishes to contest records maintained under his or her name or other personal identifier may write or call or visit the Executive Secretariat.

CONTESTING RECORDS PROCEDURES:

(See Record Access Procedures Above.)

RECORD SOURCE CATEGORIES:

Individuals (veterans and nonveterans), attorneys, employees, members of Congress, local and state officials and various private and public organizations.

BILLING CODE

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 11:25 a.m. on Thursday, August 24, 1989, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider: (1) Matters relating to the failure of an insured bank; and (2) matters relating to the Corporation's liquidation activities.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Director Robert L. Clarke (Comptroller of the Currency), concurred in by Chairman L. William Seidman and Mr. Darrell W. Dochow, acting in the place and stead of Director M. Danny Wall (Director of the Office of Thrift Supervision), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

The meeting was held in the Board Room of the FDIC Building located at 500, 17th Street, NW., Washington, DC.

Dated: August 25, 1989.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

BILLING CODE 6715-01-M

NUCLEAR REGULATORY COMMISSION

DATE: Weeks of August 28, September 4, 11, and 18, 1989.

PLACE: Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland.

STATUS: Open and Closed.

MATTERS TO BE CONSIDERED:

Week of August 28

There are no meetings scheduled for the Week of August 28.

Week of September 4—Tentative

There are no meetings scheduled for the Week of September 4.

Week of September 11—Tentative

Thursday, September 14

10 a.m.
Briefings on Status of NRC Technical Training Programs (Public Meeting)

2 p.m.
Briefing on Emerging Technical Issues (Public Meeting)

3:30 p.m.
Affirmation/Discussion and Vote (Public Meeting) (if needed)

Friday, September 15

9 a.m.
Briefing on Status of Maintenance Initiatives and Schedule (Public Meeting)

Week of September 18—Tentative

Wednesday, September 20

10 a.m.
Briefing on EPRI Design Requirements Document for Advanced Light Water Reactors (Public Meeting)

Thursday, September 21

10 a.m.
Briefing on Study of Adequacy of Regulatory Oversight of Materials Under a General License (Public Meeting)

11:30 a.m.
Affirmation/Discussion and Vote (Public Meeting) (if needed)

Note: Affirmation sessions are initially scheduled and announced to the public on a time-reserved basis. Supplementary notice is provided in accordance with the Sunshine Act as specific items are identified and added to the meeting agenda. If there is no specific subject listed for affirmation, this means that no item has as yet been identified as requiring any Commission vote on this date.

TO VERIFY THE STATUS OF MEETINGS CALL (RECORDING): (301) 492-0292.

CONTACT PERSON FOR MORE INFORMATION: William Hill, (301) 492-1661.

Dated: August 24, 1989.

William M. Hill, Jr.,

Office of the Secretary.

BILLING CODE 7590-01-M

RESOLUTION TRUST CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:07 a.m. on Thursday, August 24, 1989, the Board of Directors of the Resolution Trust Corporation met in closed session to consider (1) matters regarding the Corporation's corporate activities; and (2) matters relating to the resolution of certain depository institutions placed in conservatorship under the joint regulatory oversight program.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Director Robert L. Clarke (Comptroller of the Currency), concurred in by Chairman L. William Seidman and Mr. Darrell W. Dochow, acting in the place

in stead of Director M. Danny Wall (Director of the Office of Thrift Supervision), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

The meeting was held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street NW., Washington, DC.

Dated: August 25, 1989.

Resolution Trust Corporation.

Robert E. Feldman,

Acting Executive Secretary.

Department of Labor

Mine Safety and Health Administration

30 CFR Part 56 et al.

Air Quality, Chemical Substances, and Respiratory Protection Standards; Proposed Rule

DEPARTMENT OF LABOR

Mine Safety and Health Administration

30 CFR Parts 56, 57, 58, 70, 71, 72, 75 and 90

RIN 1219–AA48

Air Quality, Chemical Substances, and Respiratory Protection Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Proposed rule.

SUMMARY: This proposed rule would revise the Mine Safety and Health Administration's existing standards for air quality and chemical substances at coal and metal/nonmetal mines. It contains permissible exposure limits for substances that may pose health hazards at these mines. In addition, the proposed rule contains revised requirements for exposure monitoring, carcinogens, and respiratory protection programs. These actions are part of the Agency's ongoing review of metal/nonmetal and coal mine safety and health standards to improve protection for miners.

DATES: Comments must be received on or before November 27, 1989.

ADDRESSES: Send comments to the Office of Standards, Regulations, and Variances; MSHA; Room 631; Ballston Tower #3; 4015 Wilson Boulevard; Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey; Director, Office of Standards, Regulations, and Variances; MSHA; (703) 235–1910.

SUPPLEMENTARY INFORMATION:

I. Paperwork Reduction Act

This proposed rule contains information collection requirements in §§ 58/72.200, 58/72.401, 58/72.402, 58/72.403, 58/72.404, 58/72.405, 58/72.450, 58/72.500 and 58/72.550. These paperwork requirements have been submitted to the Office of Management and Budget (OMB) for review under section 3504(h) of the Paperwork Reduction Act of 1980. Comments on the proposed paperwork provisions should be sent directly to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for MSHA (see address at the end of this discussion). The respondents in each of the paperwork provisions would be mine operators. Each of the following public burden hour estimates include the time for reviewing instructions, gathering and maintaining the data needed, and completing and reviewing the collection information. In each instance, the resultant information collection would be used by MSHA to assess compliance with the proposed requirements.

Exposure monitoring records (§§ 58/72.200). These records are necessary for the mine operator to assess exposure trends, whether the limitations of respirators in use are being exceeded, and whether newly installed or modified controls have reduced exposures to the permissible limits. Recording and reviewing the data would alert operators and MSHA to exposure problems. The record could also satisfy the proposed notification of overexposure requirement. The public reporting burden for this collection of information is estimated to average 8 hours and 10 minutes per response.

Carcinogens (§§ 58/72.401, 58/72.402; 58/72.403, 58/72.404, 58/72.405, 58/72.450). Written procedures for working with class 1 carcinogens would allow the mine operator flexibility to address site-specific applications while ensuring that miners would have virtually no contact with the chemicals. Written decontamination, disposal and emergency procedures for class 2, 3 and 4 carcinogens and asbestos construction work are necessary so that miners can properly follow the procedures, and it can be ascertained that the procedures have been followed. A written medical surveillance program for specific carcinogens would ensure that proper medical evaluations are conducted. The written evaluations are needed to ensure that each miner assigned to a carcinogen area or exposed to a carcinogen as a result of an accident correctly follows any medical limitation determined by the medical examination. These records also help determine whether the miner has suffered a health impairment as a result of occupational exposure to a carcinogen. The written notice of transfer is necessary to ensure that the miner is adequately informed of the need for transfer. The public reporting burden for class 1 carcinogen procedures is estimated to average 40 hours per response. Written procedures for class 2, 3 and 4 carcinogens and asbestos construction work are estimated to take 4 hours per response. The written medical surveillance program is estimated to take 4 hours per response. Records of medical evaluations are estimated to average 1 hour and 30 minutes per response. Notices of transfer are estimated to average 10 minutes per response.

Respiratory protection program records (§§ 58/72.500 and 58/72.550). The mine operator would use the information to provide respiratory protection to miners when feasible engineering and administrative controls do not reduce exposures to permissible limits. Written operating procedures would ensure that miners are provided with proper equipment and follow appropriate use procedures. MSHA would use the information to determine compliance with the standard. Fit-test records are used to ensure that a respirator worn by an individual is properly fitted. Monthly inspections of emergency-use respirators are critical to ensure protection in the event of an emergency. A record of the latest inspection would enable the operator to determine the status of the equipment and when it would need to be inspected again. A written medical surveillance program would ensure that the proper medical evaluations are conducted. Records of the medical evaluations enable the operator to determine the specific medical or physical conditions that may limit respirator use by an individual. The written notice of transfer is necessary to ensure that the miner is adequately informed of the need for transfer. The public reporting burden for the standard operating procedures and medical surveillance program is estimated to average 8 hours per response. Monthly inspections and records of emergency-use respirators are estimated to average 2 minutes per response. Fit-test records are estimated to average 15 minutes per response. Records of medical evaluations are estimated to average 1 hour and 30 minutes per response. Notices of transfer are estimated to average 10 minutes per response.

Send comments regarding these burden estimates or any other aspect of this collection of information, including suggestions for reducing this burden, to Patricia W. Silvey; Director, Office of Standards, Regulations, and Variances; MSHA; Room 631; Ballston Tower #3; 4015 Wilson Boulevard; Arlington, Virginia 22203 and to the Office of Information and Regulatory Affairs, Attention: Diana Rowen; Desk Officer for MSHA; Room 3001; Office of Management and Budget, Washington, DC 20503.

II. Rulemaking History and Organization of Standards

This proposed rule is part of MSHA's ongoing review of its coal and metal/nonmetal safety and health standards. On July 6, 1983 (48 FR 31171), MSHA published a notice in the **Federal Register** inviting public comment on a preproposal draft of revisions to air quality standards for metal/nonmetal mines. On November 19, 1985 (50 FR 47702), MSHA announced the

availability of a preproposal draft of revisions to the Agency's underground coal mine ventilation standards, including a revision of existing § 75.301–2, which addresses harmful quantities of noxious or poisonous gases. On January 27, 1988 (53 FR 2382), MSHA published the ventilation standards as a proposed rule. In that proposal, however, the Agency stated its intent to address exposure to harmful, noxious or poisonous gases separately rather than as part of the ventilation standards. MSHA did not publish a preproposal draft regarding similar air quality standards for surface coal mines and surface areas of underground coal mines. The preproposal drafts received numerous comments which are reflected in this proposal from mine operators, trade associations, labor groups, equipment manufacturers, and other interested parties.

This rulemaking would codify health standards for air quality, chemical substances, and respiratory protection in a new part 58 for metal/nonmetal mines and a new part 72 for coal mines. In the following discussion, the designation "58/72" indicates that a standard appears in both parts 58 and 72. The existing respirable coal mine dust standards in parts 70, 71, and 90 are unaffected by this proposed rule.

III. Nature of the Hazard

During the extraction and processing of ore, coal, and rock at mines, miners are exposed to many different hazardous substances. These substances may be inherent in the ore itself; additives used during milling or processing; chemicals used in cleaning, maintenance of equipment, or laboratory testing. The effect of these substances may range from allergic reactions to systemic toxicity. Some of them are capable of causing cancers, central and peripheral neuropathies, lung disease, liver and kidney damage, birth defects, and other systemic effects. In some instances, exposure to more than one substance may result in greater damage from a combined effect than from exposure to the individual substances. Some cause sensory irritation, which causes rhinitis, cough, sputum production, chest pain, wheezing and dyspnea. MSHA has identified all these health effects as causing a material impairment of health or functional capacity. The Agency believes that the health evidence forms a reasonable basis for proposing revisions to these levels. However, MSHA requests comment on this interpretation of material impairment of health or functional capacity.

In the final rule, MSHA will take all reasonable steps to establish exposure limits to hazardous chemicals to the extent necessary to protect miners from a material impairment of health or functional capacity. The Agency will take into account the probability and severity of harm; the likely benefits to miners; the strengths and weaknesses of the data; the economic impact, including feasibility, of reducing exposures; and the uncertainties of the assumptions used in each case. When appropriate, MSHA will quantify risks to miners in order to establish an exposure level that eliminates unacceptable risks. When quantification is not done, MSHA will assess the data in each case to reach a reasonable determination.

Hazardous substances may enter the body through the skin, the lungs, or the gastrointestinal tract. Some substances can be absorbed through the skin and cause systemic poisoning. Breathing hazardous substances can irritate or damage the upper respiratory tract and the lungs, or also lead to systemic poisoning. Ingestion of toxic materials can result in absorption of the materials in the digestive system and distribution throughout the body in the bloodstream. Contact with certain substances virtually through any route may cause cancer.

To prevent occupational illness and disease, health hazards must be recognized, evaluated, and controlled. This proposed rule would establish lists of hazardous substances that may adversely affect health and would require control of exposure to such substances. Where appropriate, MSHA would establish permissible exposure limits and delineate the methods and frequency of monitoring to evaluate exposure. The proposed rule would also revise requirements for respiratory protection programs for metal/nonmetal mines and establish similar requirements for coal mines. Compliance with these proposed standards would reduce occupational illness and disease among miners, potentially resulting in increased productivity and reduced medical and disability costs.

IV. Discussion of Proposed Rule

Sections 58/72.2 Definitions

The health standards would be preceded by a set of definitions that would apply specifically to them. The proposed defined terms are "access," "confined space," "designated representative," "permissible exposure limit" (PEL), "qualitative fit test," "quantitative fit test," "respirable dust," and "respirator protection factor." A PEL may be a "time-weighted average" (TWA), a "short-term exposure limit" (STEL), a "ceiling exposure limit" (C), or a "mixed exposure limit" (MEL). The "time-weighted average" is the average concentration of a substance that may not be exceeded over the course of a workday. The TWA for an 8-hour workday is listed in the table of permissible exposure limits. If the workday is longer than 8 hours, the TWA is adjusted by the length of the shift. The calculated average concentration of the airborne substance for the worker's shift would determine whether the permissible exposure limit has been exceeded. A time-weighted average allows exposures above the listed concentration, provided they are offset by exposures below the listed concentration during the workday. Some substances with a workday TWA may also have a 15-minute "short-term exposure limit." A STEL is the maximum time-weighted concentration to which workers can be exposed for a continuous period of up to 15 minutes. Other substances are so hazardous that they require a ceiling limit that must not be exceeded at any time, even for an instant. When airborne substances exhibit additive or synergistic effects on health, a mixed exposure limit is used to prevent potentially harmful effects. These concepts are addressed more fully below in the discussion of §§ 58/72.100, "Control of exposure to airborne substances."

In response to commenters, a definition for "confined space" would be added. The definition characterizes a confined space as an area that, by design, has restricted openings for entry and exit; is not intended for continuous occupancy; and has an atmosphere that could contain or produce dangerous air contaminants. Examples of confined spaces include storage tanks or processing vats that may be entered for cleaning or other maintenance. Hazardous gases and vapors as well as oxygen deficiency are among the hazards of confined spaces. The restricted area of confined spaces makes these hazards particularly acute should rescue measures be necessary.

The terms "qualitative fit test," "quantitative fit test," and "respirator protection factor" concern proper selection of respiratory protection and are discussed below in conjunction with §§ 58/72.500, "Respiratory protection program."

"Access" and "designated representative" define terms relating to miners' rights of access to their own exposure records.

BEST COPY AVAILABLE

Sections 58/72.100 Control of Exposure to Airborne Substances

This proposed standard would address the hazards of exposure to potentially harmful substances generated by mining activity or used in the mining or milling process. MSHA would eliminate outdated incorporations by reference in the existing standards and establish the permissible exposure limits. In addition, the Agency would require the use of feasible engineering or administrative controls to reduce exposure to permissible levels, except under specific circumstances where respiratory protection could be used.

Section 101(a)(6)(A) of the Federal Mine Safety and Health Act of 1977 (Mine Act) states that MSHA's promulgation of health standards must:

> * * * [A]dequately assure on the basis of the best available evidence that no miner will suffer material impairment of health or functional capacity even if such miner has regular exposure to the hazards dealt with by such standard for the period of his working life.

The Legislative history of the Mine Act states that:

> * * * [T]he Secretary's authority under this section includes not only the promulgation of standards covering individual substances, but also standards covering classes or groups of substances. The [Senate Committee on Human Resources] believes that ('generic') standards of this kind may often provide more effective protection to miners. In addition, the Committee believes that the overriding consideration in setting health standards dealing with toxic substances and harmful physical agents must be the protection of the health of miners." S. Rep. No. 95–181, 95th Cong., 1st Sess. 21 (1977).

At this point in the rulemaking process, MSHA believes that the exposure limits adopted by the American Conference of Governmental Industrial Hygienists (ACGIH) in its 1989–90 Threshold Limit Values (TLVs®) constitute a reasonable basis for this proposal in light of the statutory requirements. In addition to listing exposure limits for chemicals, mineral dusts, and carcinogens, the "TLV® Booklet" includes an explanation of how TLVs® are to be interpreted and applied. For example, the "TLV® Booklet" discusses time-weighted average limits, short-term limits, ceiling limits, excursion factors, "skin" notations, mixtures, nuisance particulates, simple asphyxiants, and carcinogens. Furthermore, the ACGIH list deals with a great many substances and families of substances in a generic approach consistent with the Agency's statutory mandate to provide the most effective protection to miners.

ACGIH is a widely recognized and respected non-governmental organization of industrial hygiene personnel from governmental and educational institutions. Since ACGIH was founded in 1938, it has concentrated on the technical aspects of worker protection. Each year ACGIH revises and updates its list of threshold limit values (TLVs®) for chemical substances. The ACGIH TLV® list is the largest list available of chemicals with recommended occupational exposure limits. When ACGIH proposes that a substance be added or deleted, or that its value be lowered or raised, the substance is placed for 2 years in the "Notice of Intended Changes" section of the "TLV® Booklet." The ACGIH membership and the public then have an opportunity to comment or offer evidence concerning the appropriate exposure level of the substance during those 2 years. All data received are then considered prior to the adoption of the TLV®. The evidence to support proposed levels is based on work site experience and data collected from human and animal studies.

The ACGIH "Documentation of the Threshold Limit Values" ("TLV® Documentation") contains a brief summary of supporting data for the substances and limits listed. It includes, among other things, the chemical formula for each substance, its threshold limit values (TLVs®), a description of the characteristics of the substance, and a bibliography of the literature that was used to set each TLV®. MSHA preliminarily believes that these efforts by ACGIH are consistent with the Agency's philosophy to use the best available scientific data for the development of appropriate exposure limits. For many years, Federal and state agencies, as well as other countries, have relied upon ACGIH limits as guides for regulatory limits governing worker health.

Indeed, MSHA's existing standards incorporate exposure limits from earlier ACGIH publications. Existing metal/nonmetal §§ 56/57.5001 incorporates by reference pages 1 through 54 of the 1973 edition of ACGIH's publication entitled "TLVs® Threshold Limit Values for Chemical Substances in Workroom Air Adopted by ACGIH for 1973" ("TLV® Booklet"). Existing coal § 75.301–2 establishes the "current" ACGIH TLVs® as the standard for noxious and harmful gas concentrations at underground coal mining operations, while § 71.700 references the 1972 ACGIH TLVs® as the standards for surface coal mines and surface work areas of underground coal mines.

Most of the permissible exposure limits in this proposal are based upon the 1989–90 ACGIH "TLV® Booklet." However, MSHA raises for comment other limits based upon the Occupational Safety and Health Administration's (OSHA) January 19, 1989, rulemaking updating its permissible exposure limits for general industry (54 FR 2332). In addition, the Agency raises for comment Recommended Exposure Limits (RELs) developed by the National Institute for Occupational Safety and Health (NIOSH).

OSHA relied heavily upon the already published and widely accepted ACGIH TLVs® and NIOSH RELs in selecting the PELs for its final rule. NIOSH recommended exposure limits are from criteria documents issued for general industry and not for mining. However, MSHA is soliciting comments on the appropriateness of these NIOSH RELs for mining. For those substances, as well as substances where MSHA's proposed PELs differ from those published by OSHA, MSHA is interested in toxicity data, including, where possible, a discussion of the health risks to miners, and feasibility and cost of compliance information. The following table lists differences between the OSHA PELs and this proposal. A "C" notation in the table indicates a ceiling limit.

TABLE 1—PERMISSIBLE EXPOSURE LIMITS DIFFERENCES

Substance	TWA		STEL	
	ppm	mg/m³	ppm	mg/m³

MSHA requests comments on the most appropriate PELs applicable to mining for these substances, particularly toxicity and feasibility information on both the OSHA and ACGIH limits. The Agency especially requests comments on silver, copper, and vanadium.

The metal/nonmetal preproposal draft also listed a number of new substances from the 1982 "TLV® Booklet" that are not in the existing standard. Some commenters objected and favored listing only substances found on mining property and which present a risk of a material impairment of health or functional capacity. This proposed rule includes those substances which the Agency has reason to believe, based upon the Agency's knowledge thus far, could pose this type of health risk to miners if found on mine property.

The metal/nonmetal preproposal draft also required, as the primary control, the use of feasible engineering or administrative controls to reduce exposure. Some commenters asked the Agency to define "feasible controls." The Mine Act requires the Secretary, when promulgating mandatory standards pertaining to toxic materials or harmful physical agents, base such standards upon:

> * * * [R]esearch, demonstrations, experiments, and such other information as may be appropriate. In addition to the attainment of the highest degree of health and safety protection for the miner, other considerations shall be the latest available scientific data in the field, the feasibility of the standards, and experience gained under this and other health and safety laws. Whenever practicable, the mandatory health or safety standard promulgated shall be expressed in terms of objective criteria and of the performance desired. (Section 101(a)(6)(A)).

Thus the Mine Act requires that the Secretary, in promulgating a standard, attain the highest degree of health and safety protection for the miner, with feasibility as a consideration.

In relation to feasibility, the legislative history of the Mine Act states that:

> * * * This section further provides that "other considerations" in the setting of health standards are "the latest available scientific data in the field, the feasibility of the standards, and experience gained under this and other health and safety laws." While feasibility of the standard may be taken into consideration with respect to engineering controls, this factor should have a substantially less significant role. Thus, the Secretary may appropriately consider the state of the engineering art in industry at the time the standard is promulgated. However, as the circuit courts of appeals have recognized, occupational safety and health statutes should be viewed as 'technology-forcing' legislation, and a proposed health standard should not be rejected as infeasible when the necessary technology looms on today's horizon.' (*AFL–CIO* v. *Brennan*, 530 F.2d 109); (CA 3 1975) *Society of Plastics Industry* v. *OSHA*, 509 F.2d 1301 (CA 2), *cert. denied*, 427 U.S. 992 (1975).
>
> Similarly, information on the economic impact of a health standard which is provided to the Secretary of Labor at a hearing or during the public comment period, may be given weight by the Secretary. In adopting the language of [this section], the Committee wishes to emphasize that it rejects the view that cost benefit ratios alone may be the basis for depriving miners of the health protection which the law was intended to insure. S. Rep. No. 95–181, 95th Cong., 1st Sess. 21 (1977).

Though the Mine Act and its Legislative History are not specific in defining feasibility, the courts have clarified the meaning of feasibility. The Supreme Court, in *American Textile Manufacturers' Institute* v. *Donovan* (OSHA Cotton Dust), 452 U.S. 490, 508–509 (1981), defines the word "feasible" as "capable of being done, executed, or effected."

Though the leading MSHA cases on feasibility are in the noise area, the Federal Mine Safety and Health Review Commission (Commission) gives a general definition of feasibility. Citing the OSHA *Cotton Dust* decision, the Commission concluded that a determination of the feasibility of engineering controls must include consideration of technological and economic factors. The existence of general technical knowledge relating to materials or methods which may be available or adaptable to a specific situation establishes technological feasibility. A control may be technologically feasible when "if through reasonable application of existing products, devices or work methods with human skills and abilities, a workable engineering control can be applied" to the source of the hazard. It need not be an "off-the-shelf" product, but "it must have a realistic basis in present capabilities" (*Secretary of Labor* v. *Callanan Industries, Inc.* (Noise), 5 FMSHRC 1900 (1983)). Industry must have at least conceived some industrial strategies or devices that are likely to be capable of meeting the permissible exposure limits, and the affected industries must be generally capable of adopting these measures. (*United Steelworkers of America, AFL–CIO–CLC* v. *Marshall* (OSHA Lead), 647 F.2d 1189 (D.C. Cir. 1980), *cert. denied*, 453 U.S. 918 (1981)).

In a separate but consistent noise decision, the Commission ruled that an engineering control may also be feasible even though it fails to reduce exposure to permissible levels contained in the standard, as long as there is a signficant reduction in exposure. (*Todilto Exploration and Development Corporation* v. *Secretary of Labor,* 5 FMSHRC 1894 (1983)).

Consistent with case law, MSHA would consider three factors in determining whether engineering controls are feasible at a particular mine: first, the nature and extent of the overexposure; second, the demonstrated effectiveness of available technology; and third, whether the committed resources are wholly out of proportion to the expected results. Under the proposed rule, before a violation of the standard could be found, MSHA would have to determine that a worker has been overexposed; that administrative or engineering controls are feasible; and that the operator failed to install or maintain such controls. If these conditions are met, the operator would be issued a citation with an appropriate abatement date for installing feasible controls. A respiratory protection program would be required while controls are being installed. As long as worker exposure is reduced to or below the PEL, the mine operator has flexibility under the proposed rule to choose the engineering or administrative controls that best suit the mine's situation. If an operator needs assistance in selecting a control method, MSHA would make recommendations on how to reduce exposure, based upon demonstrated experience.

MSHA has considered the substances on the 1989–90 ACGIH "TLV® Booklet" to determine whether it would be appropriate to regulate them at mines. Although the majority of substances in the "TLV® Booklet" do not naturally occur in mining, they may be brought on mine property in the course of day-to-day operations. For this reason, MSHA is proposing to include most of the TLV® list in a table of permissible exposure limits (PEL Table). The Agency believes that the risks to miners posed by these substances results from the frequency or nature of their use, or the nature of their effects on the body. The list is also referenced by §§ 56/72.200, "Exposure monitoring." Other commenters suggested separate TLV® lists for each type of mining operation. However, given the diversity of the coal and metal/nonmetal mining industry, such an approach would be impractical. The Agency is in the process of gathering evidence for a generic final rule for improved health protection for miners. However, MSHA also solicits comments on substances that are not on the proposed list but may be found on mine property and may pose a hazard of material impairment of health or functional capacity.

Simple asphyxiants are listed in the PEL Table as they are identified in the 1989–90 "ACGIH TLV® Booklet." Because they pose a health hazard by displacing oxygen rather than by a toxic nature, the PEL Table references these substances to §§ 56/72.300 which specify the minimum allowable oxygen content in work area.

The PEL Table also lists those substances that are carcinogens on the basis of human and/or animal data. In addition to listing any applicable TLVs® for these substances, the table also references the specific precautions required by the carcinogen standards in Subpart C to alert mine operators that there are additional requirements for such substances because of their carcinogenic nature.

NIOSH maintains a "Registry of Toxic Effects of Chemical Substances" (RTECS). The purpose of the Registry is to provide basic information on the known toxic and biological effects of chemical substances to employees, employers, industrial hygienists, physicians, and anyone else with the need to know in order to assure proper and safe handling of chemicals. The Registry contains basic toxicity information and other data, such as synonyms, trade names, and Chemical Abstracts Service Registry (CAS) numbers. Each chemical in the Registry is assigned a unique identifier. MSHA has included the NIOSH RTECS numbers in its proposed permissible exposure limit tables as a reference aide for the mining community.

At the end of the preamble is a listing of the differences between the proposed rule and the existing rules. The tables include: (1) Substances that would be regulated for the first time by MSHA; (2) Changes and reductions of exposure limits for substances currently regulated by MSHA; (3) Changes and additions concerning short-term exposure limits; (4) Chemicals that would have a new skin notation; (5) Chemicals that would be deleted from existing regulations; (6) Skin notations that would be deleted from existing regulations; (7) Existing names that have been changed to new names in the proposed list; and (8) Substances that would be regulated as carcinogens for the first time. The following table summarizes these proposed changes:

TABLE 2.—SUMMARY OF PROPOSED CHANGES

Proposed change	Number of substances affected		
	Metal/nonmetal alone	Metal/nonmetal and coal	Coal alone
First time regulated	146	6	13
Changes in exposure limits to substances already regulated	136	7	7
Changes of STELs	223		
New skin notation	33		
Deletion of substances	19		
Deletion of skin notation	18		
New carcinogens	40	6	6

Time-Weighted Average (TWA)

The use of a time-weighted average (TWA) allows for excursions above the TWA limit, provided they are compensated by equivalent excursions below the TWA limit during the workday. The essential factor is that the TWA cannot be exceeded when exposures are averaged for the workday.

The TLVs® were developed for an 8-hour day and 40-hour workweek. Therefore, for 8-hour workdays or shorter, the formula given in §§ 56/72.100(a) is used. For workshifts longer than 8 hours, the TWA is adjusted downward proportionally to the hours worked as given in §§ 56/72.100(b). This adjusts the dose received by a miner to the same amount that would have been received in 8 hours at the TWA listed in the exposure limit tables.

It is critical in controlling exposure that a miner's entire workshift be sampled and controlled. In mining, workshifts greater than 8 hours are common. The shifts can range from 9-hour days up to dawn-to-dusk shifts in seasonal operations. If MSHA were to require that the TWA be applied only to 8-hour exposures, miners could be exposed for substantial periods of time to uncontrolled amounts of airborne contaminants.

The method proposed in §§ 56/72.100(b) is simple. The mine operator can easily calculate the TWA that applies to the length of the miner's workshift. With the use of this formula, the miner would only receive the same total dose that the miner would have received during a traditional 8-hour workday.

MSHA is aware that it does not directly address the complicated issues of biological half-life, clearance mechanisms, and recovery time. However, MSHA believes that the

method's simplicity and ease of use are important advantages. Upon review of the scientific literature, MSHA could not find any single adjustment method that was widely accepted. Some methods were so complicated that even professional industrial hygienists might have difficulty applying them. At this time, MSHA believes that this method, which relates the dose received by the miner to the amount allowed in an 8-hour workshift, inherently addresses such concerns as recovery time and clearance because of the lowered TWA. MSHA specifically requests comments on this method and its applicability to different chemicals, as well as the requirement for full-shift sampling. MSHA is also seeking comments on what action is appropriate for calculating exposures when miners work overtime, such as working two consecutive shifts or when more than 40 hours are worked in a 7-day period.

Ceiling Limits and Short-Term Exposure Limits (STELs)

While a time-weighted average is an adequate limit for most substances, there are certain chemical substances that are fast acting or highly irritating and have permissible exposure limits based upon such responses. Acute poisoning is one physiological hazard that could require setting a concentration limit not to be exceeded at any time—a ceiling limit. Ceiling limits are designated by a "C" in the PEL Table.

Under the proposed rule, any instantaneous or other applicable short-term sampling that indicates a concentration above the ceiling limit would constitute an overexposure. The concept of ceiling limits is currently incorporated by reference from the 1972 and 1973 "TLV® Booklets." Commenters suggested a reevaluation of the ceiling limit concept and reassignment of a value more closely associated with the NIOSH/OSHA immediately dangerous to life or health (IDLH) limit. However, the purpose of the ceiling limit is to provide protection from more serious health effects that could occur at levels far below those immediately dangerous to life or health.

The existing standard incorporates the ACGIH concept of excursion factors for all substances not having a ceiling value. These factors are used as multipliers of the TLV® to determine the maximum concentration to which a person may be exposed at any one point in time, within the range of limits of the TLV® and providing the time-weighted average does not exceed the TLV®. In 1973, ACGIH applied excursion factors to all substances, unless a short-term limit is specified by the Commonwealth of Pennsylvania Department of Health in its 1968 "Regulations Establishing Threshold Limit Values in Places of Employment" (Pennsylvania Rules and Regulations, Chapter Four, Article 432) or the American National Standards Institute (ANSI) document "Acceptable Concentrations." Some substances had both Pennsylvania and ANSI limits. In such cases, MSHA has enforced the more restrictive limit. The Agency is proposing to replace the concept of excursions with the concept of short-term exposure limits currently used by ACGIH.

Short-term exposure limits are assigned to certain substances that do not have a ceiling limit but whose short-term toxicological effects necessitate some limitation on excursions above the TWA. MSHA is proposing the concept set forth in the metal/nonmetal preproposal draft. A short-term exposure limit would be a limit that any 15-minute time-weighted average exposure could not exceed during the workday, even if the time-weighted average for the workday were within the time-weighted limit.

The ACGIH concept of STEL in the 1989–90 "TLV® Booklet" recommends that no more than four exposures at the STEL per day be permitted, with at least 60 minutes between each exposure period. The Agency is not proposing this aspect of the STEL concept because it is unlikely that exposures would equate precisely to the STEL without some risk of exceeding the STEL. Under the proposed rule, for purposes of determining whether a substance's STEL has been exceeded, any 15-minute time-weighted average would be compared to the STEL.

STELs are based upon toxicological data that indicate the levels at which workers can be exposed continuously for a short period of time without suffering irritation, chronic or irreversible tissue change, or narcosis (drowsiness) to the extent that accident proneness increases or ability for self-rescue is impaired. STELs have been determined primarily by effects associated with short-term exposures to either humans or animals.

Existing §§ 56/57.5001(c) require that miners be withdrawn from a metal or nonmetal mine where there is an overexposure to an airborne contaminant given a "C" (ceiling) designation. Under the proposed rule, mine operators would be required to take immediate corrective action if exposures exceed the ceiling or short-term exposure limits established by §§ 58/72.100(b). MSHA does not believe that this proposal would result in a reduction of protection afforded miners by the existing standard because operators would be required to reduce concentrations immediately to below the PEL in accordance with proposed §§ 58/72/100(e). If the corrective action would take even a short time, only persons provided with appropriate respiratory protection would be allowed to remain in the area. The required respiratory protection is addressed in proposed §§ 58/72.500. All other persons would have to be withdrawn from the area. The withdrawal requirement would also prompt the operator to practice accident preparedness and prevention.

Some Specific Substances

Asbestos. Regulations for asbestos exposure are included in this proposed rule. MSHA has reviewed the ACGIH TLVs® for the various forms of asbestos as well as OSHA's limit for asbestos and the nonasbestiforms of actinolite, tremolite, and anthophylite. Consistent with OSHA's asbestos standard, MSHA is proposing an exposure limit of 0.2 f/cc, utilizing MSHA's current method of identifying asbestos. However, based on the Agency's experience in mining, the asbestos proposal does not include the non-asbestiforms of actinolite, tremolite, and anthophyllite. These three minerals are not regulated currently by MSHA but would be covered under the proposed respirable mine dust standard. However, since they are regulated under the OSHA asbestos standard, the Agency requests submission of relevant data concerning what, if any, health risk they may pose in mining. Recently OSHA promulgated a STEL of 1 f/cc, and MSHA is requesting comment for its applicability to mining.

The Agency proposes to retain the criteria currently codified in §§ 56/57.5001(b) that fibers are to be greater than 5 microns in length as determined by membrane filter methods at 400–450 magnification (4 millimeters objective) phase contrast illumination. MSHA believes that this provides sufficient information to the mine operator while not inhibiting future sampling and analytical development. MSHA specifically requests comments on the appropriate methods of defining fibers and determining fiber concentration.

Asbestos mining and milling and vermiculite mining and milling where asbestos exceeds .1 percent in the ore or concentrate would also be covered by the requirements for class 4 carcinogens. Asbestos construction work would also have additional requirements. These requirements are discussed below in §§ 58/72.405.

Barite. The metal/nonmetal preproposal draft specified a limit for barite, a barium sulfate compound, of 0.5 mg/m^3, the same limit placed on other barium compounds. The ACGIH had established this limit primarily based on the toxicological data associated with the more soluble forms of barium, such as barium choloride and barium nitrate. In the 1989–90 "TLV® Booklet," ACGIH has taken into account the insolubility of barium sulfate and assigned a TLV® of 10 mg/m^3. MSHA is proposing this limit.

Benzene. MSHA is proposing the OSHA limit of a TWA of 1 ppm and a STEL of 5 ppm instead of the ACGIH recommended TWA of 10 ppm. MSHA believes that health data support the OSHA limit. This substance also would be regulated further under the proposed carcinogen standards, §§ 58/72.403.

Borates. MSHA's metal/nonmetal preproposal draft standard recommended permissible exposure limits for sodium tetraborate salts from the ACGIH 1982 TLV® Booklet (1 mg/m^3 for anhydrous and pentahydrate salts and 5 mg/m^3 for decahydrate salts). Prior to July 1982, these substances were regulated as unlisted nuisance dusts with a TLV® of 10 mg/m^3 (total dust). Subsequently, MSHA revised its nuisance dust policy, and these substances are not regulated currently.

In the 1989–90 "TLV® Booklet," borate salts are categorized in three forms: anhydrous, pentahydrate, and decahydrate. Each form is differentiated by the number of water molecules bound by the salt and has a specific exposure limit. Although each may be found in manufacturing processes, once exposed to changing atmospheric conditions, such as temperature or humidity, each substance may change to another hydrated form of the sodium tetraborate salt in question. The hygroscopic or water binding nature of the salts is variable. Therefore the borate salt that is present in an occupational environment and collected for analysis to compare to the appropriate standard may, during collection, storage, or analysis, change to one of the other hydrated types of borate salt.

MSHA does not know of a sampling and analytical technique that would distinguish the different exposure levels of the airborne borate salts in a mixed sample. Therefore the Agency proposes an inclusive sodium tetraborate salt PEL of 5 mg/m^3 (total dust), regardless of the state of hydration. MSHA requests information and analytical data for alternative PELs.

Cadmium and compounds. MSHA is proposing two alternative PELs for cadmium and its compounds: 10 μg/m^3 and 5 μg/m^3. The 10 $\mu\gamma / \mu^3$ limit is the ACGIH notice of intended changes for cadmium and compounds that is based on the prevention of both kidney effects and carcinogenic effects. MSHA is aware of data that have become available since ACGIH notice of intended changes that indicate that kidney lesions related to cadmium exposure are permanent and may be progressive. In view of this new information as well as the ongoing discussion in the scientific community concerning the carcinogenic risk from cadmium, MSHA is also considering whether a 5 μg/m^3 limit for cadmium and its compounds. MSHA solicits comment on the scientific data supporting either limit as well as information on the feasibility of achieving each limit.

Calcium oxide and calcium hydroxide. Some commenters stated that calcium oxide should be deleted from the PEL Table because they did not believe it to be a "toxic" substance. The existing standard for calcium oxide (CaO) is 5 mg/m^3 as listed in the 1973 "TLV® Booklet." Calcium oxide has been a part of the ACGIH TLV® listings since 1962, when the organization began its review of the substance's properties. From that time, ACGIH has continued to list calcium oxide with a limit of 5 mg/m^3. In 1976, ACGIH published its notice of intent to lower the TLV® of calcium oxide to 2 mg/m^3 and add calcium hydroxide (CaOH) to the list with a TLV® of 5 mg/m^3. This action was based upon the caustic properties exhibited by both substances and their associated irritant potential.

Calcium oxide is a hygroscopic compound that, when suspended in the atmosphere as dust, absorbs water to form calcium hydroxide. This occurs at different rates and affects different percentages of a calcium oxide dust cloud. MSHA is unaware of any sampling method that will selectively collect either calcium oxide or calcium hydroxide. In addition, MSHA is unaware of any sampling and storage method that will maintain the calcium oxide/calcium hydroxide ratio of a collected sample. MSHA solicits information on any analytical procedures that will differentiate between calcium oxide and calcium hydroxide. Therefore the Agency proposes a 5 mg/m^3 (total dust) limit for any combination of calcium oxide and calcium hydroxide, which would be applicable to both substances in order to address the hazard of their caustic properties. MSHA also requests information and analytical data for alternative PELs.

Carbon dioxide. The existing coal ventilation safety standard in § 75.301 requires that the air ventilating active workings in an underground coal mine must not contain more than 0.5 percent (5,000 ppm) carbon dioxide. The existing health standard for metal /nonmetal mines also sets a 5,000 ppm TWA for CO_2. MSHA is proposing the 1989–90 ACGIH values of 5000 ppm (time-weighted average) and 30,000 ppm (STEL) as the appropriate health limits to be applied to all mines. This would not affect the existing safety standard for underground coal mines. OSHA's recent PEL rulemaking set a general industry TWA of 10,000 and a STEL of 30,000. MSHA solicits comments on the appropriateness of the OSHA limit to mining.

Chromium (VI) compounds. MSHA's proposed PEL Table lists chromium (VI) compounds but does not subdivide them further as does ACGIH, because the exposure limits are the same for both "water-soluble" and "certain water insoluble" forms of chromium. In the proposed carcinogen standard §§ 58/72.403, MSHA includes those specific insoluble compounds of chromium (VI) for which there was separate TLV documentation of carcinogenicity (lead chromate and zinc chromate).

Coal exposures in metal/nonmetal mines. Two commenters recommended that the PEL for respirable coal dust containing less than 5 percent silica be deleted, stating that there are no coal dust exposures in metal and nonmetal mining. However, coal is used frequently as a fuel for firing kilns in the cement and perlite industries and at roasting operations such as nickel. As a result, exposure to coal dust occurs during car unloading, conveying and transferring, storage, and milling of the coal prior to use. MSHA would retain the current respirable coal dust PEL of 2 mg/m^3, if less than 5 percent quartz is present. For respirable dust fractions exceeding 5 percent quartz, MSHA proposes that the allowable concentration of respirable coal dust be calculated by dividing the percent of quartz into 10. This methodology is consistent with the respirable dust standards for coal mines in subpart B of 30 CFR parts 70 and 71, which remain unchanged.

Cotton dust and grain dust. MSHA intends to delete raw cotton dust from the current standard. Both raw cotton dust and grain dust (oat, wheat, and barley) are included in the 1989–90 ACGIH "TLV Booklet." However, because they relate specifically to industries other than mining, MSHA is

not including them in the proposed PEL list.

Ethylene glycol particulate. MSHA proposes to delete ethylene glycol particulate from the existing regulation, but ethylene glycol vapor would continue to be regulated. Ethylene glycol particulate would have been considered a nuisance particulate. The new mine dust standard of 5 mg/m^3 respirable dust would replace the current limit of 10 mg/m^3.

Ethylene glycol dinitrate and nitroglycerin. MSHA is proposing the new OSHA limits for ethylene glycol dinitrate (a 0.1 ppm STEL) and nitroglycerin (a 0.05 TWA and a 0.1 STEL). MSHA believes these limits are supported by data and address the type of exposure that occurs in mining. Individuals involved in blasting have short, intermittent contact with these chemicals throughout the shift.

Ethylene oxide. MSHA is proposing the OSHA limit of a TWA of 1 ppm and a STEL of 5 ppm. ACGIH recommends a TWA of 1 ppm, but no STEL. MSHA believes that health data support the OSHA limits. This substance also would be regulated further under the proposed carcinogen standards, §§ 58/72.403.

Graphite. MSHA is proposing a 2 mg/m^3 respirable dust limit for all forms of graphite. ACGIH is proposing a 2 mg/m^3 limit for all forms in its 1989–90 Notice of Intended Changes. NIOSH also recommends a 2 mg/m^3 respirable dust limit. MSHA has conducted a study for conversion factors for graphite in mining. MSHA's data indicate that the existing limit of 15 mpccf is approximately equivalent to 1.9 mg/m^3. MSHA believes that these data support a 2 mg/m^3 limit.

Kaolin. Several commenters objected to the placement of kaolin on the list of mineral dusts which included, among other substances, asbestos and silica. Although they did not object to the assigned exposure limit, they viewed the placement as a change in classification from that of "nuisance dust" in the 1973 ACGIH "TLV® Booklet." The proposed rule would respond to this concern by treating kaolin as a respirable mine dust. Respirable mine dusts are discussed below.

Lead. The PEL for lead in the metal/nonmetal preproposal draft was based on OSHA's lead standard. Many commenters stated that this was inappropriate because the OSHA limit for lead related to the health effects of exposure to lead oxide (PbO), and miners are exposed to lead sulfide (PbS), (galena), which is less soluble and therefore less biologically available. At this point, MSHA has insufficient data on the potential hazards and health effects of the separate lead compounds and therefore proposes to adopt ACGIH's limit of 0.15 mg/m^3 for inorganic lead compounds. The National Toxicology Program's Board of Scientific Counselors has recommended that lead oxide and lead sulfide be ranked a high priority for comparative acute toxicity studies. NIOSH nominated the chemicals in order to aid MSHA in developing standards. MSHA specifically solicits data and comments as to the appropriateness of regulating lead compounds (except lead sulfide) with a TWA of 50 μg/m^3 limit, as OSHA currently does, and regulating lead sulfide with a TWA of 0.15 mg/m^3.

Nitrogen dioxide. OSHA's recent rulemaking established a nitrogen dioxide (NO_2) PEL for general industry of 1 ppm as a 15-minute STEL based upon studies indicating an increased airway resistance cause by exposure to NO_2. NIOSH also has a REL of 1 ppm as a 15-minute STEL. ACGIH recommends a 3-ppm TWA and a 5-ppm STEL for NO_2. At both metal/nonmetal and coal mines, the current PEL for NO_2 is a TWA of 5 ppm. The Agency is continuing to review medical studies and other documentation to determine whether a PEL of 1 ppm as a 15-minute STEL or a 3-ppm TWA with a 5-ppm STEL would be appropriate for mining. MSHA has included both exposure limits for comment in this rulemaking. Comments should address the health basis for either limit and the feasibility and cost of meeting the limit in mining.

Phenyl-ether-diphenyl mixture. MSHA is deleting phenyl-ether-diphenyl mixture—TWA 1 ppm (7 mg/m^3)—from the existing standard. ACGIH does not list this limit in the 1989–90 TLV Booklet. Phenyl ether vapor would have a TWA of 1 ppm (7 mg/m^3) and biphenyl would have a TWA of 0.2 ppm. Exposure to a mixture of the compounds would be controlled by the additive formula which would result in a limit being equal to or less than the existing limit.

Polytetrafluoroethylene decomposition products. The proposal would delete polytetrafluoroethylene decomposition products from the regulations. ACGIH recommends sampling methods but lists no specific TLV®. ACGIH also states that the toxicity of these products remains to be determined but recommends that air concentrations be kept at minimal levels. Although operators are encouraged to follow ACGIH's recommended practice, MSHA does not believe that such recommendations provide sufficient information for the Agency to set an exposure limit.

Silica. The existing requirement for metal/nonmetal mines specifies that exposure to silica-containing respirable dust (quartz) must not exceed a TLV® calculated from the formula 10/(%SiO_2+2). The percentage of silica in the dust largely determines the amount of dust to which the miner can be exposed. The higher the silica content, the lower the amount of dust to which the miner can be exposed. The lower the silica content, the higher the permissible dust level.

Using the 1982 ACGIH "Notice of Intended Changes," MSHA's metal/nonmetal preproposal draft recommended a respirable quartz limit of 0.1 mg/m^3, eliminating the formula and measuring only the quantity of silica present. Now that ACGIH has finalized its approach, which appears in the 1989–90 "TLV® Booklet," MSHA is proposing the same exposure limit. This represents no substantive change in the existing silica exposure limit. Currently, using the respirable quartz formula for metal/nonmetal mines, the calculated limit for dust containing 100 percent quartz is 0.098 mg/m^3, which differs from the recommended limit of 0.1 mg/m^3 only because of the additive constant of 2 in the formula's denominator. The proposed limit does not represent a reevaluation of the toxicity of quartz but would conform the silica PEL to the format used for all other hazardous dusts and simplify the calculation of the PEL of mixtures containing quartz, cristobalite, and tridymite. Simplifying the TLVs® for all forms of crystalline silica provides for more uniform application of the silica PEL. In the current TLV® calculation, the factor of 2 tends to be unnecessarily more stringent where lower percentages of silica are present.

Talc. The preproposal draft set a 2 mg/m^3 respirable limit for talc containing no asbestos fibers. The Threshold Limit Value Discussion and Thirty-five Year Index with Recommendations (ACGIH, 1984) discusses the conversion from 15 million particles per cubic foot (mppcf), as collected by impinger, to the current TLV® of 2 milligrams per cubic meter (2 mg/m^3), as collected by the gravimetric method. This was first proposed by ACGIH in 1981. The 1989–90 "TLV® Booklet" lists only the 2 mg/m^3 respirable dust limit. Some commenters disagreed with this limit and questioned the conversion factor used by ACGIH. The majority of commenters felt that the ACGIH TLVs® should be adopted as the limits for exposure for miners because of their widespread acceptance in the mining community. MSHA agrees that the ACGIH TLV® for talc represents a technically sound integration of medical,

epidemiological, toxicological, and industrial hygiene data and experience. MSHA accepts the original data for the 15 mppcf limit for talc. However, MSHA has conducted its own study of conversion factors and believes that Agency data are a more accurate evaluation of the conversion of mppcf to mg/m^3 for talc in the mining environment.

In 1983, MSHA conducted a study to determine the specific conversion factors for several minerals. One such conversion factor was determined for nonasbestiform talc dust based upon comparison of gravimetric dust samples with impinger samples. A previous study supported a factor of 6 for converting respirable mass concentrations to equivalent number concentrations. The 1983 study confirmed the earlier result. Statistical analysis of the combined data from both studies showed that the relationship of 6 mppcf to 1 mg/m^3 for nonasbestiform talc does not change. Therefore MSHA is proposing a 2.5 mg/m^3 respirable dust limit for talc based on a conversion factor of 6 applied to 15 mppcf. Asbestos exposure for talc containing asbestos fibers would be regulated by the asbestos provisions of this proposal.

Vanadium. MSHA is proposing the NIOSH recommended limits for vanadium (1 mg/m^3) and vanadium compounds (0.05 mg/m^3). Exposure to vanadium in mining occurs from a wide variety of vanadium compounds. Vanadium trioxide exposure can occur in uranium/vanadium circuits and has resulted in worker complaints of illness. Vanadium exposure can also occur in welding and cutting operations. MSHA believes that the NIOSH limits address the various forms of vanadium found in mining better than the ACGIH limit for vanadium pentoxide (dust and fume). MSHA specifically solicits comments on the exposure limits for vanadium compounds.

Vinyl chloride. MSHA is proposing the OSHA limit of a TWA of 1 ppm and a STEL of 5 ppm instead of the ACGIH recommended TWA of 5 ppm. MSHA believes that health data support the OSHA limits. This substance also would be regulated further under the proposed carcinogen standards, §§ 56/72.402.

Mixed Exposure Limits (MELs)

Occupational exposures frequently involve simultaneous exposures to more than one contaminant. An individual may be exposed to multiple contaminants contained in a single product or process, or to multiple contaminants from different sources.

In the metal/nonmetal preproposal draft, MSHA proposed a "target organ" designation system to address adverse health effects which can occur when there is exposure to two or more substances that affect the same body organ. Categories were established, which were further defined by subclassifications detailing specific organ sites or physiological disorders. A mixed exposure limit (MEL) would have applied to those substances having common target-organ designations.

Commenters opposed the target-organ approach as presented in the metal/nonmetal preproposal draft, stating that the Agency had oversimplified a complex issue. MSHA agrees and has abandoned this approach in the proposed rule. EPA in its "Proposed Guidelines for the Health Risk Assessment of Chemical Mixtures" states that no single approach can be recommended to assess the risk of multiple chemical exposures, because there is no validated method in the scientific community for generalization of mixed exposures. The majority of commenters recommended that MSHA use the ACGIH's comprehensive approach to mixed exposures. MSHA agrees with these commenters and is proposing to continue to use the ACGIH concept of threshold limits for mixtures for substances that act upon the same organ system. This formula is the same formula that OSHA uses in 29 CFR 1910.1000.

Information on organ system effects is readily available to mine operators. For example, under OSHA's hazard communication standard, non-mining employers must have material safety data sheets (MSDSs) and container labels to alert employees to the health hazards of hazardous chemicals used in general industry. Both MSDSs and labels warn of target organ effects. These chemicals include all substances listed in the most current ACGIH "TLV® Booklet." Therefore hazardous chemicals entering mine property are accompanied by MSDSs and container labels from which the mine operator should be able to determine quickly and effectively whether a miner could be exposed to substances that act upon the same organ system. On March 30, 1988 (53 FR 10257), MSHA issued an advance notice of proposed rulemaking for a hazard communication standard for the mining industry. The Agency expects to publish a proposed hazard communication standard later this year.

For substances inherent in the ore, mine operators themselves have the greatest knowledge of hazardous substances. In order to be competitive, most operators voluntarily provide material safety data sheets with their products. These sheets allow their general industry customers to address any hazards in their own training programs under OSHA's hazard communication standard, as well as State or local community right-to-know laws. In addition, there are low-cost booklets, such as NIOSH's "Pocket Guide to Chemical Hazards," which list the target organs for specific chemicals. This booklet has been provided to each of MSHA's metal/nonmetal mine inspectors, who can aid the operator if specific questions arise. The booklet is also available at MSHA's coal mine district offices.

It should be noted that mine operators would not have to conduct independent literature searches to determine target organ effects but rather would be expected to use information that is readily available.

Skin Absorption

MSHA proposes to continue regulation of airborne substances with a "skin" notation by requiring use of personal protection to prevent absorption of the substances through the skin. In addition, MSHA is proposing to add the "skin" notation to 33 new chemicals. MSHA would also delete the skin notation from 18 chemicals from which ACGIH has deleted the skin notation.

As in the existing standard, the skin designation would follow the particular substance on the TLV® list. While most exposures are through the respiratory route, substances with a "skin" designation increase the body burden by exposure through the cutaneous route (skin, mucous membranes, and eyes), either through airborne contact or more frequently by direct contact with the liquid or solid form of the substance.

Additional care should be exercised when encountering substances with a skin notation at airborne levels near or above the permissible limits, especially when relying upon respiratory protection to control exposure. The rate of absorption is thought to be a function of the concentration to which the skin is exposed and the total area of exposed skin. Skin absorption is a particular concern at high airborne concentrations, especially if a significant area of skin is exposed for a long period of time. The proposal would require such skin exposures to be minimized by covering exposed skin with personal protection when airborne concentrations exceed permissible exposure limits. This may involve wearing proper clothing, work gloves, or eyewear, as needed. In addition, the proposal would require prevention of direct contact with nonairborne forms (liquids or solids) of

these substances. Direct contact while handling these substances often presents the greatest degree of risk. A spill on the skin could result in an absorbed dose that could negate the protection offered by controlling airborne exposures to the PEL. This requirement would necessitate use of additional personal protection, such as impermeable aprons or gloves.

Nuisance Particulates (Nuisance Dusts)

MSHA's existing metal/nonmetal nuisance particulate (nuisance dust) standards, §§ 56/57.5001, establish exposure limits for airborne contaminants through incorporation by reference of the 1973 ACGIH TLVs® on pages 34, 35 and appendix E on page 53. Nuisance dust is a term that describes particulates containing less than 1 percent quartz and no excessive concentrations of a more toxic material. Where a toxic material is determined to be present, based on laboratory analysis, MSHA enforces the limit listed for that toxic substance.

ACGIH characterizes nuisance particulates as dusts that do not produce significant organic diseases or toxic effects when exposures are kept under reasonable control. ACGIH contrasts nuisance dusts to fibrogenic dusts that can cause scar tissue to form in the lungs. Nuisance dusts are distinguished from fibrogenci dusts on the basis of the absence of toxic impurities, primarily quartz content of less than one percent.

The 1973 "TLV® Booklet" lists some specific examples of nuisance dusts and sets a threshold limit value for these substances of 10 mg/m^3 total dust.

Alundum (Al_2O_3)
Calcium carbonate
Cellulose (paper fiber)
Portland Cement
Corundum (Al_2O_3)
Emery
Glass, fibrous or dust
Glycerin mist
Graphite (synthetic)
Gypsum
Kaolin
Limestone
Magnesite
Pentaerythritol
Plaster of Paris
Rouge
Silicon carbide
Starch
Sucrose
Tin oxide
Titanium dioxide
Vegetable oil mists (except castor, cashew nut, or similar irritant oils)

Prior to July 1982, MSHA also enforced the same limit for unlisted nuisance dusts at metal/nonmetal mines based on ACGIH recommendations. In July 1982, MSHA reviewed its enforcement policy for unlisted nuisance dusts. Because the standard did not explicitly identify unlisted substances, the Agency felt it may not have given adequate notice regarding its application to such substances. Therefore MSHA revised its enforcement policy to exclude unlisted substances from coverage.

In the metal/nonmetal preproposal draft, the Agency excluded nuisance dusts from its PEL list and requested that commenters submit data substantiating the nature of the hazard and the extent of health effects resulting from exposure to such substances. Also, in the preproposal draft, the Agency recommended that kaolin, tin oxide, glass (fibrous or dust), all currently regulated as nuisance particulates, be listed on the main PEL list. MSHA based this preliminary determination upon documentation which indicated that these substances warranted continued regulation.

As mentioned, under the proposed rule kaolin would not be listed as a specific substance but would be regulated under the respirable mine dust standard discussed below.

Tin oxide was listed separately in the preproposal draft and given a recommended full-shift exposure of 2 mg/m^3 total dust and a STEL of 4 mg/m^3 total dust. This recommendation was based upon the 1982 ACGIH "TLV® Booklet" which treated tin oxide as a toxic substance. Consistent with the 1989–90 "TLV® Booklet," MSHA is proposing a PEL of 2 mg/m^3 total dust for tin oxide. The STEL would be eliminated.

In response to MSHA's recommendation to eliminate the nuisance dust standard, many commenters suggested that MSHA would be reducing protection provided by existing standards, which the Mine Act specifically prohibits under section 101(a)(9). MSHA has reviewed available documentation and believes that a respirable mine dust standard would more appropriately address the hazards involved in mining than a nuisance dust standard. Therefore MSHA is proposing a respirable mine dust limit, while at the same time eliminating the current nuisance dust TLV®.

Respirable Mine Dust for Metal/Nonmetal Mines

The proposed rule contains a new concept for controlling exposure to respirable mine dust at metal/nonmetal mines. It would set a permissible exposure limit of 5 mg/m^3 for respirable mine dust in the PEL Table in § 58.100. "Respirable mine dust" is a new concept, although occupational exposure limits have included respirable dust limits for years. In brief, the term would include all ambient, airborne particulates capable of being inhaled into the lower respiratory tract. MSHA would sample for respirable mine dust by using a sampling device with the size-selection characteristics of a 10-mm nylon cyclone operated at a flow rate of 1.7 liters per minute, as indicated in the definitions preceding each subpart. This collection method parallels that used for respirable dust limits proposed by ACGIH.

The airborne particulates found in the mining environment are of variable composition and are not the pure substances normally referred to as "nuisance dusts." MSHA has reviewed the documentation cited below on the risks from inhalation of these particulates and believes that such inhalation may produce harmful health effects that should be regulated. The Agency believes that the concept of "respirable mine dust" appropriately addresses these hazards.

Almost all mine dust contains silica, which is by far the major cause of pneumoconiosis in metal/nonmetal miners. However, the composition of mine dust may also depend upon the minerals being produced, host rock, impurities found in the ore, coal, diesel particulates, oil mists, smoke, welding fumes, blasting products, and other contaminants. Sometimes mine dust will contain toxic components such as lead, arsenic, silica, trace elements or organic materials. Where sampling indicates that specific toxic contaminants are present, mine operators would have to control exposure in accordance with the substance-specific limits listed on the PEL Table and mixed exposure limits, in addition to the respirable dust limit. For example, if a mine dust contains beryllium and other substances, the total amount of respirable dust permitted would be 5 mg/m^3, but the beryllium could not exceed 0.002 mg/m^3. However, the maximum level of the mine dust would be limited by the respirable mine dust PEL to protect miners from the health risks discussed below.

MSHA is proposimg the respirable mine dust limit to protect against two respirable hazards associated with mining and mineral dusts—pulmonary alveolar proteinosis (PAP) and mixed dust fibrosis (MDF).

Pulmonary alveolar proteinosis has been associated with a variety of mineral dusts (refs. 1–8). Other dusts, such as wood dust and glass fiber, also have been linked to this syndrome (refs.

6, 9). The mechanism of this syndrome results from the abnormal accumulation of surfactant phospholipids and protein in the alveolar spaces. It was not recognized as a disease until 1958, when Samuel Rosen published the first article identifying it as such (ref. 2), and it is still not readily recognized (refs. 6, 18, 19). This is probably due in part to the lack of a clear definition of the disease. PAP often occurs in conjunction with other lung disorder, such as pulmonary fibrosis. The 1988 edition of "Pulmonary Disease and Disorders" states that:

> Pulmonary alveolar proteinosis in a disease of uncertain etiology that represents a disorder of lung surfactant homeostasis. It may not be due to a single specific etiologic insult. Treatment is supportive. It does not address the underlying etiologies or cellular pathophysiology of the disorder (ref. 1).

Until appropriate treatment was devised, many individuals with PAP died after a short course of disease, many less than a year after the onset of the disease. In Rosen's original paper, 8 out of 27 patients (30 percent) died, some only 3 months after the onset of the disease. An additional 8 out of 27 (30 percent) were reported to have not improved during the course of the study. The other cases showed some measure of improvement, but the improvement as reported by Rosen varied. However, the development of whole lung lavage, which mechanically removes the offending material by washing, has resulted in individuals surviving and recovering from the disease (refs. 1, 10–13).

The current theory, based in large part on animal data, is that PAP is a nonspecific lung response that can result from a sizeable exposure to any finely divided dust (refs. 3, 6, 8, 9, 14–17).

The case reports reviewed by MSHA have involved coal, tin, and uranium miners, as well as individuals exposed to cement, silica, bentonite, and alumina (refs. 2–5, 7). Most case reports of human PAP have simply stated that dust exposure was heavy and have not characterized the exact dust characteristics. However, one case involving alumina did characterize the dust in a lung biopsy as consisting of spheres less than 1 micron diameter. Other lung tissue biopsy data have indicated that 53 percent of the particles were less than 1 micron, 47 percent were 1 to 10 microns, and 0.4 percent were greater than 10 mg (ref. 20).

Data from animal studies indicate that dusts less than 5 microns in diameter can produce the disease in animals (refs. 8, 9, 14, 16, 17). Rats exposed to 50 mg/m^3 of Mt. St. Helens volcanic ash respirable dust developed alveolar proteinosis, as well as those rats exposed to 50 mg/m^3 quartz respirable dust. After 12 months, rats exposed to 5 mg/m^3 Mt. St. Helens volcanic ash had only minimal changes, consisting primarily of aggregates of dust-laden macrophages, and did not develop PAP (ref. 8). Animal studies involving quartz showed that exposure to 43 mg/m^3 quartz produced alveolar proteinosis but failed to produce silicosis over the time period studied (refs. 14, 15). The relationship between PAP and interstitial fibrosis is unclear. PAP may be found in conjunction with fibrosis, in which case it is called "secondary" PAP (ref. 1). Silicoiproteinosis is a common form of this secondary PAP (ref. 6). Some researchers believe that PAP may be an early stage in the development of fibrosis (ref. 21).

MSHA believes that a 5 mg/m^3 respirable dust limit will prevent miners from developing PAP from acute dust exposure.

Although silicosis and coal dust pneumoconiosis are the most common pneumoconioses found in mining, MSHA believes silicosis is not the only hazard attributable to inhalation of mine dusts. In a report on documentation on the relationship between lung function and coal dust exposure, one study states that analysis of lung function has improved in recent years, thereby increasing the clinical possibilities of examining the cause of occupational pulmonary diseases (ref. 22). The study cautions against overestimating the role of silica in such diseases and states that the toxicity of dust should not be based solely on whether they cause fibrogenic or silicotic effects. It concludes that nonsilicotic dust is also capable of producing permanent morphological changes in the bronchopulmonary system, possibly to an extent that precludes classification of such dusts as inert or innocuous.

Studies such as this indicate that dusts found in the mining environment, regardless of quartz content, can produce "mixed-dust pneumoconiosis" (MDP), also referred to as "mixed-dust fibrosis" (MDF), and therefore must be controlled in order to protect the health of miners. In addition, many of the dusts that are currently considered "nuisance dusts" fall into the category of MDF-producing dusts. MSHA believes that in order to adequately protect miners against MDF, the concentration of respirable mine dust to which workers can be exposed must be limited. The health effects of exposure to mine dusts may include pneumoconiosis, diffuse interstitial fibrosis, bronchitis, toxicity, and synergistic or potentiating effects of irritant gases. The degree of hazard presented depends upon the chemical composition of the dust, particle size, and the concentration of particles in the environment.

"Occupational Diseases—A Guide To Their Recognition" (Key *et al.*, Revised Edition, 1977) points out that the pathology of mixed-dust pneumoconiosis depends to a large extent upon the relative portion of free silica or quartz present in the airborne dust. Dusts with a quartz content of less than about 0.1 perent tend to cause development of small nodular areas in the lungs in almost direct proportion to the total amount of dust deposited, but little in the way of reticular or collagen fibrosis, and very little emphysema. The pathological lesions resemble those found in coal miners. On the other hand, dust in which the quartz content ranges from about 2 percent to about 18 or 20 percent of the total dust tends to produce lesions that more clearly resemble those seen in classical silicosis. Some examples of dust that contain almost no quartz are synthetic graphite, kaolin, talc, and iron oxide associated with welding.

Similar findings of fibrosis induced by mineral dusts of very low or no free silica content have been reported by other sources. These include animal studies and studies of mine workers (ref. 23), reports of cases of nepheline rock dust pneumoconiosis (refs. 24, 25), reports of pulmonary tissue reaction in animals and humans from barite dust (ref. 26), a literature review concerning pneumoconiosis from graphite (ref. 27), reports of pneumoconiosis in kaolin workers (ref. 28), reports of a 26-year radiographic follow-up of diatomite miners (ref. 29), and reports of disabling pneumoconiosis from limestone dust (ref. 30), and in Cornish china clay workers (ref. 31). However, these studies contain little exposure data; it is uncertain at which levels these workers were exposed.
